CEMENT COATED, EGG CASE.

With Extra Large Head.

SIZE.	LENGTH.	NO. TO KEG.	
3d	1¼ in.	53,200	per keg....$

Cement nails are sold at so much per keg, but the kegs weigh less than 100 lbs., as the nails are made of lighter wire than the Standard Nails. They are put up the same number of nails per keg as in the Standard Nails, but on account of the lighter gauge wire used they weigh less.

These fasteners are divergent, having the effect of drawing the work together and making a tight joint.

TEN SMALL PACKAGES IN A CARTON; EACH SMALL PACKAGE CONTAINS ONE HUNDRED FASTENERS.

These fasteners can be used for an endless variety of purposes and are simple, effective and easily applied. They make a perfect secure joint. They are made of smooth steel sharpened on one edge and are as easy to drive as nails and are far more effective for many purposes. The number of corrugations determines the length.

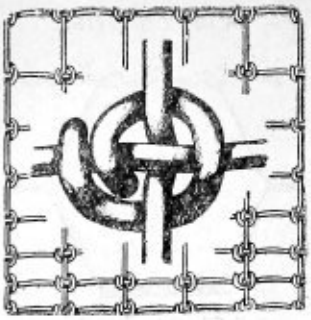
When ordering, be particular to state length, mesh, width and size of wire wanted. The mesh means the number of openings or holes to the inch, measured from the center of the wires; in other words, counting the number of openings in an inch, taking the center of a given wire for a starting point. The size of the openings in a mesh depends on the size of the wire used. The heavier the wire, the smaller the opening. We catalogue only the size usually furnished when size of wire is not specified. Where a special size is wanted be particular to send sample. Wire cloth is sold in full rolls of 100 running ft.; the standard widths are 24, 30 and 36 in., but many other widths from 12 to 48 in., inclusive, can be usually furnished. When less than a full roll is ordered, an extra charge is made; when less than 50 running feet, a further advance is made.

CUT PIECES OF WIRE CLOTH CANNOT BE RETURNED.

100 RUNNING FEET IN A ROLL. AVERAGE WEIGHT 20 LBS. PER 100 SQUARE FEET.

REVONOC WOVEN WIRE FENCING.



REVONOC woven wire fencing is made of the best quality of hard-drawn steel wire. This wire is heavily galvanized, making it weather proof. All the wire used must withstand a rigid acid test. Skilled workmen, who are familiar with all of the conditions, examine carefully every wire used. We have combined in our fence durability and extreme quality. You cannot find a fence anywhere combining as many good features as the REVONOC. It is built to stand any test to which a fence can ordinarily be put.

The Lock or tie is very strong, having five points of bearing. It holds wires firmly, non-slipable, but permitting enough play so that fence will go up on hilly ground, letting cross-bars stand perpendicular without kinking line wires. Our lock is not driven down on wires at the point of crossing, but is driven at an angle, and therefore not a wire in the fence is injured.

The Type belongs to the kind known as the stiff-stay type, the stay being made from one continuous piece of hard steel wire. Any fence lacking in this very essential feature, cannot long retain a presentable appearance, nor give the best of service. It will not sag in summer's heat or break in cold weather.

Spacing—The spacing of all of the REVONOC fences is made so as to give the best service for the purpose for which the fence is designed to be used.

Length—In poultry fence, ten rod rolls will be supplied where wanted. Regular size rolls, however, of both poultry and field fence are either 20, 30 or 40 rods in length.

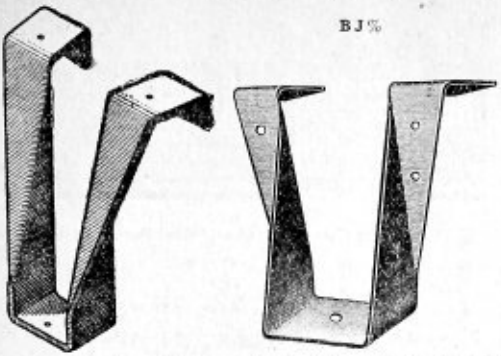
10 RODS IN A ROLL.

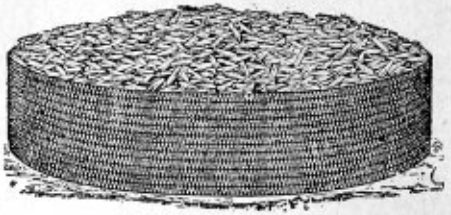


This fence is designed especially for poultry, however, the close mesh together with its range of height make it a fence used generally for rabbit yards, sheep and pig pens, and in fact a safe fence for any light stock.

Its heavy galvanizing is evidence of its rust proof, peel proof and general wearing qualities. It is the best fence for poultry and light stock on the market.

JOIST HANGERS AND CORN CRIBS.

COLUMBIAN JOIST HANGERS.



Forged steel, asphaltum painted. All hangers are made ¼ in. scant to allow for surfacing—for example, hangers for 2x10 in. joists are made 2x9¾ in. Hangers with longer arms than those herein given can be supplied at an additional charge. Double Joist and Timber Hangers are made to order at special prices contingent upon size of hangers and quantity desired.

★*FOR FACTORY SHIPMENT ONLY, F. O. B. CLEVELAND, OHIO.*

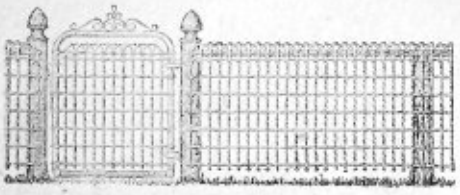
STEEL CORN CRIBS.

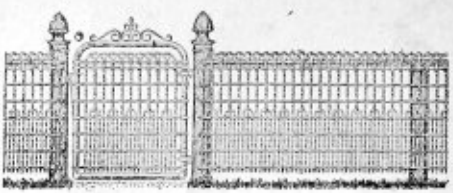
No. 50—2 in. mesh, galvanized steel wire, one section, height 50 in., diameter 15½ ft., capacity 400 bu. in ear, w't about 77 lbs.★ .....each **CFJ** $9.00

By using two cribs one above the other a capacity of 800 bu. can be secured.

No. 75—2 in. mesh, galvanized steel wire, two sections, height 100 in., diameter of crib 11⅔ ft., capacity 400 bu. in ear, w't about 117 lbs.★ .....each **JECE** $13.50



These cribs are durable, thoroughly ventilated, vermin and fireproof, stronger and cheaper than wood. They are inexpensive, easy to build or move and can be used as a chicken or yard fence.



No. 50 is put up in one piece or section in a roll as shown above. No. 75 is put up in two pieces or sections of equal length, but packed together in a single roll.

Each	$5.00	5.50	6.00	7.00	8.00
	BDJ	BGE	BIJ	CCE	CHE

Republic Fabrics are made by cabling horizontal wires and inserting, at intervals, heavy upright or picket wires corrugated, to engage the cabled line wires, reversing the twist of the cable on each picket (not between them), firmly seating the cable in the corrugations of the uprights making an immovable joint and providing for contraction and expansion. This method of reversing the twist of the cables on the pickets prevents the cables from untwisting or becoming slackened under severe strain or climatic changes.

The extra picket interwoven in the Z fabrics gives them an unusually close spacing, as well as added strength, which with the regular double top, distributes the strength where most needed. All Republic fabrics also have a sharp corrugation at the bottom of the pickets, which, being reversely interwoven in the fabric, prevents the lower cable from becoming dislodged. X fences are without the extra picket interwoven.

YANKEE DRIVE.

Yankee Farm, All Steel Frame and Wire, Pipe Steel.

Height, in.	50	58	50	58	50	58
Opening, ft.	12	12	14	14	16	16

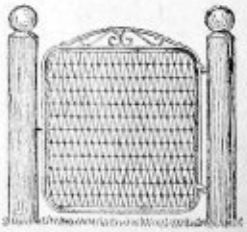
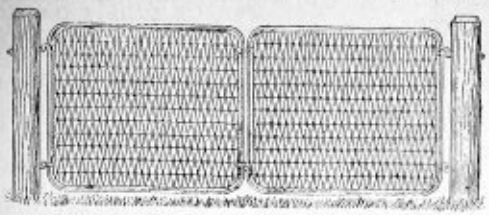
Each	$7.90★	8.35★	8.50★	9.10★	9.20★	9.80★
	DGE	EJJ	EAJ	EDE	EEJ	EIJ

All holes in the hinge posts for Yankee gates should be bored at an angle of 45 degrees from the line of the gate when closed or wide open, as indicated above.



The Yankee Form of gate is especially adapted to farm and railroad uses. It has long been popular, largely due to the fact that no matter if the posts move slightly in any direction, it does not affect the operation of the gate. A Yankee gate, once properly hung, needs no further attention. An auger and a monkey-wrench are the only tools needed to hang the Yankee gate. All Yankee gates are made 10 inches wider than the indicated opening. For instance, a 14 foot Yankee gate is 14 feet 10 inches wide and is intended to lap 5 inches on each post. For a 14 foot Yankee gate set the posts 14 feet apart and the gate will fit all right. For 12 foot Yankee gate set posts 12 feet apart. Can be furnished with top or bottom crane if desired.

WALK GATES.



Walk, All Steel Frame and Wire, Pipe Steel.

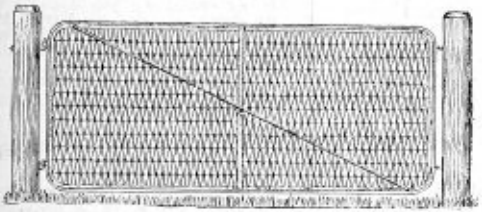
All gates are fitted with a diamond mesh fabric having a two inch opening. The truss form of the mesh gives additional strength and the openings will stop small animals.

FENCE GATES AND GATE CLEATS.

Plain Top.

DOUBLE DRIVE.



..The very best grade of pipe steel is used in the frames. The web is securely attached to the frame on all sides, and at the same time the frame is left perfectly smooth on the outside. For walk gate, set posts 4 in. further apart than the width of gate. For single and double drive gates set posts 6 in. further apart than width of gate. For instance, if you buy a 3 ft. walk gate, posts should be set 3 ft. 4 in. apart—if a 12 ft. single or double drive gate, posts should be 12. 6 in. apart.

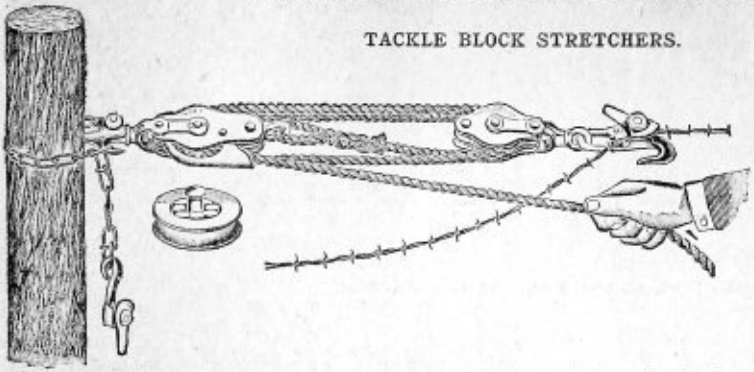
WENZELMAN'S NEVER-SPLIT GATE CLEATS, BRACES AND HINGES.

Outfit Consists of 2 Steel Hinges with Straps 14x1¾x¼ In., 6 Bolts for Same, 4 Angles, 4 ft. Long, 1½x1¼ in., 2 Angle Braces, 5 ft. 8 in. Long, 60-⅞x¾ in. Carriage Bolts for Same, 2 Steel Hinge Hooks, ⅝ in. in Diameter, Over 7½ in. Long.



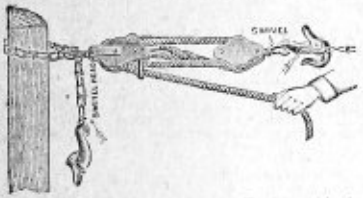
No. 1—For gates 4 ft. high, any length up to 20 ft., w't per set 38 lbs.★	per set	AGE	$3.00
No. 2—For gates 4½ ft. high, any length up to 20 ft., w't per set 41 lbs.★	per set	AHE	3.20
No. 3—For gates 5 ft. high, any length up to 20 ft., w't per set 44 lbs.★	per set	BJJ	3.50
No. 0—Without hinges or braces, for gates 4 ft. high, any length up to 20 ft., w't per set 18 lbs.★	per set	JFE	1.10
No. 00—Without hinges or braces, for gates 4½ ft. high, any length up to 20 ft., w't per set 20 lbs.★	per set	JHE	1.40
No. 000—Without hinges or braces, for gates 5 ft. high, any length up to 20 ft., w't per set 22 lbs.★	per set	JIJ	1.60

By the use of these cleats, braces and hinges a gate can be made that will always remain in correct shape, even if one puts two or three men on the end of it, as the 4 special steel upright angle cleats, held by 40 bolts, and the 2 special steel braces, bolted at an angle of 45 degrees, with 20 bolts, and enormous strength and solidity. Should a board be broken in gate, it is easily replaced, and no splitting of the other boards or cleats is required.

★*FOR FACTORY SHIPMENT ONLY, GALESBURG, ILL.*

WIRE STRETCHERS AND FENCE RATCHETS.

TACKLE BLOCK STRETCHERS.



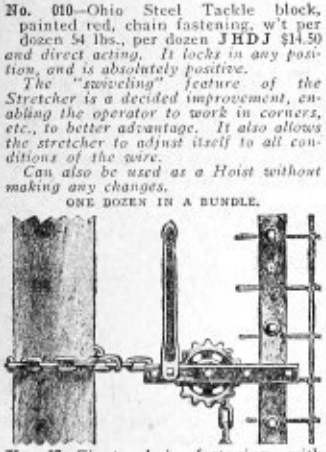
No. 37 REVERDIC—Steel blocks, malleable straps, removable steel axles, hardened steel roller bearings, best wire clamps ever made, for ⅜ in. rope, w't per doz. 60 lbs. .....per dozen **JIJJ** $15.00

No. 39 REVERDIC—Giant, for ½ in. rope, larger blocks and rope sheaves, for heavy work, w't per doz. 123 lbs., otherwise same as No. 37 REVERDIC. per dozen .....**AEJJ** $24.00

No. 40 REVERDIC—Plain bearings, painted green, otherwise same as No. 37 REVERDIC, per dozen .....**JHDJ** $14.00

LOOSE.

WIRE STRETCHERS.



No. 010—Ohio Steel Tackle block, painted red, chain fastening, w't per dozen 54 lbs., per dozen **JHDJ** $14.50

and direct acting. It locks in any position, and is absolutely positive.

The "swiveling" feature of the Stretcher is a decided improvement, enabling the operator to work in corners, etc., to better advantage. It also allows the stretcher to adjust itself to all conditions of the wire.

Can also be used as a Hoist without making any changes.

ONE DOZEN IN A BUNDLE.

No. 07—Giant, chain fastening, with lever, length 30 in., complete with two 5 ft. maple clamps and all bolts and washers necessary, w't per doz. 624 lbs. .....per dozen **EJDJ** $84.00

Especially adapted for woven fence and is equally useful for smooth or barbed wire. Is self-locking, but has no dogs nor ratchets.

ONE IN A CASE.

WIRE STRETCHERS.

No. 1—"O. S." Elwood's, with rod, flat steel bar double acting, chain fastening, length 30 in., w't per doz. 60 lbs., per dozen .....**JFFJ** $10.50

TWO AND THREE DOZEN IN A CASE.

Eccentrics, complete for No. 1 Elwood's, per dozen .....**AEJ** $2.00

No. 2—"N. S." Elwood's, flat steel bar with self-supporting device, extra strong eccentric, chain fastening, length 30 in., w't per doz. 54 lbs., per dozen .....**JFCJ** $10.00

TWO AND THREE DOZEN IN A CASE.

Eccentrics, complete for No. 2 Elwood's, per dozen .....**AEJ** $2.00

No. 8—Hall's, best steel, light and strong, adjustable lock shoe for ⅞, ¾, ⅝, ½ in. rope, with perfect unyielding lock, roped ready for use, w't per doz. 60 lbs., per dozen .....**ABBE** $24.00

Two perfect tools in one, a wire stretcher and a hoist combined. The patent stretcher eccentric of hardened steel, carefully ground, positively prevents slipping.

ONE DOZEN IN A BUNDLE.

★*FOR FACTORY SHIPMENT ONLY.*

COMBINATION HOIST AND FENCE STRETCHERS.

No. 9—Dillons, malleable iron and steel, with handle attached, 5 ft. hardwood clamp, 8½ ft. of ⅞ in. B. B. proof tested chain, w't per doz. 516 lbs., per dozen .....**EDJJ** $84.00

Has pulling capacity of 5,000 pounds, which enables it to pull up 80 rods of fence at one stretch.

Its value as a hoist is very evident.

"E. B. B.," 100 lbs.,

No. 12 B. B.—½ mile coils in stock.

Items marked ★ factory shipment only. Other sizes and kinds from factory only.

"Steel" (or homogeneous metal) is more expressly designed for short-line telephone service, where a measure of conductivity can be exchanged for tensile strength in a light wire. Weight per mile ohm, 6,000 to 7,000 pounds.

"B. B." (Best Best) wire is less uniform and tough. It stands a good mechanical test. Weight per mile ohm, 5,500 to 5,800 pounds. It is largely used by some telegraph companies and in railway telegraph service.

"E. B. B." (Extra Best Best) wire is made by improved continuous process from the very best iron. It stands highest of any telegraph wire in conductivity, with a weight per mile ohm of from 4,600 to 5,100 pounds. Very uniform in quality, pure, tough and pliable.

NO. 6, ONE-THIRD MILE; BALANCE, ONE-HALF MILE IN A COIL. WE CANNOT SUPPLY SMALLER QUANTITIES.

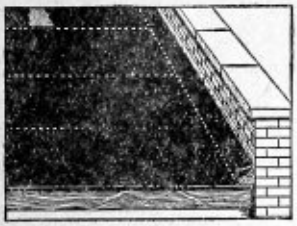
SINGLE LOOP BALE TIES, STOCK SIZES, F. O. B. CHICAGO.

No. 15 Wire, Size	8½	9 ft.
W't per bundle	31	32 lbs.
Per bundle, 250 ties	$4.92	5 18
No. 14 Wire, Size	8½	9 ft.
W't per bundle	38	40 lbs.
Per bundle, 250 ties	$5.69	5.97

No. 16 Wire, size 8 ft. w't per bundle 22 lbs ..... per bundle $3.81

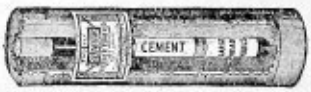
We give above the average weight of single loop bale ties as furnished by the factory. These weights are not guaranteed, as it is impossible to draw wire so close to gauge that every bundle will weigh exactly alike.



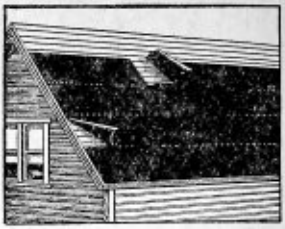
Cross head bale ties are heavier than single loop, varying from 2½ to 5 pounds more than the weight given above, according to length and gauge.

Bale ties of every kind of fastening are sold from the same list. Single loop bale ties are sold at a greater discount than other patterns.

To ascertain the length of tie required, add 3 in. to the measure around the bale when under pressure.



Cost of bale ties is from 40 to 60 cents per ton of hay. For 17×22 perpetual presses, use ties 8, 8½ or 9 feet long; No. 14 wire for heavy work. No. 15 for light work. For 14×18 perpetual presses, use ties 8, 8¼ or 8½ feet long; No. 14 wire for extra or extremely heavy work, and No. 15 for heavy or medium work, and No. 16 for light work. For 12×15 perpetual presses, use ties 7½, 7¾ or 8 feet long; No. 15 wire for heavy work, and No. 16 for medium or light work. For upright hand presses, use No. 14 and No. 16 wire. For upright light horse presses, use No. 14 wire. For upright heavy portable or light stationary horse presses, use No. 13 wire. For upright heavy stationary and beater presses, use No. 12, No. 11 and No. 10 wire, according to the size of bale and number of ties used. It has been repeatedly proved that the use of these ties is more economical to the pressman than the use of wire from the coil. Only the best material is used in their manufacture, and all ties are carefully tested before leaving the factory, thus securing reliability and uniformity.



PREPARED ROOFING.

Applied to Flat Roof.

REVONOC.

Applied to Gabled Roof.

No. 11 REVONOC—1 ply, smooth surface, w't per roll about 35 lbs.....per roll of 108 sq. ft. **AAE** $2.25
No. 12 REVONOC—2 ply, smooth surface, w't per roll about 45 lbs.....per roll of 108 sq. ft. **ADE** 3.25
No. 13 REVONOC—3 ply, smooth surface, w't per roll about 55 lbs.....per roll of 108 sq. ft. **AGE** 4.00
One roll, which contains 108 sq. ft., will cover 100 sq. ft. of roof.

NOTE—Can be furnished sand surfaced from factory.

REVONOC *Rubber Roofing is suitable for all kinds of roofs under any conditions and in any climate. It is impervious to water and is pliable and elastic. It has as a base the best fiber felt thoroughly saturated and coated on both sides with a composition of the highest grade materials selected for preservative and weather resisting qualities. It is odorless and will not taint the rain water where used for domestic purposes. Contains no volatile oils or tar to melt in the heat and crack in the cold. Each roll contains one square complete with nails and cement, with directions for applying.*

MAJOR STANDARD GRADE.

No. 111—1 ply, smooth, w't per roll 35 lbs. .....per roll **AJJ** $2.00
No. 112—2 ply, smooth, w't per roll 45 lbs. .....per roll **ACJ** 3.00
No. 113—3 ply, smooth, w't per roll 55 lbs. .....per roll **AFJ** 3.75
No. 211—1 ply, sanded, w't per roll 55 lbs. .....per roll **AJJ** 2.00
No. 212—2 ply, sanded, w't per roll 65 lbs. .....per roll **ACJ** 3.00
No. 213—3 ply, sanded, w't per roll 75 lbs. .....per roll **AFJ** 3.75

Roll contains 108 sq. ft., enough to cover 100 sq. ft. with a 2 in. lap. Major Roofing is strong and durable, a cheaper garde than our REVONOC, *but equal to any other first-class roofing.*
Sentinel—1 ply, w't per roll 35 lbs. .....per roll **JHE** $1.75
Sentinel—2 ply, w't per roll 45 lbs. .....per roll **AAJ** 2.75
Sentinel—3 ply, w't per roll 55 lbs. .....per roll **ADJ** 3.50

This is made of a cheaper and lighter felt than is used in REVONOC *and does not carry a guarantee. This roofing is sanded one side and smooth surfaced on the other side.*

CRUSO.

No. 22—2 ply felt, w't per square about 45 lbs.....per roll **JIJ** $1.60
Two-ply consists of two sheets of the best quality of tarred felt, with a layer of waterproof composition.

No. 23—3 ply felt, w't per square about 70 lbs. .....per roll **AAE** $2.10
Three-ply consists of three large sheets of the best quality of tarred felt, with two layers of waterproof composition.

Cruso roofing consists of two or three sheets of thoroughly saturated felt, interlaid with an insoluble waterproof pitch, this composition being forced between heavy hot rollers, making a solid flexible sheet. It is put up in measured rolls containing 108 sq. ft. or enough to lay one square and allow for the necessary two inch lap. Cruso Roofing requires coating and this is a part that should not be neglected. A proper coating when roofing is laid will repay doubly in service and an occasional recoating thereafter will keep roof in perfect condition for many years. This is a low priced roofing and not guaranteed.

It requires 1¼ lbs. tin caps and 1 lb. roofing nails per square. We recommend the use of 2 gal. coating per square. The better the roof is coated the longer it will last.

ABOVE PRICES ARE FOR FELT ONLY.

ROOFING FELT, WRAPPING PAPER, MILL BOARD, ETC.

REVONOC SHEATHING PAPER.

REVONOC, tarred, 36 in. wide, 500 sq. ft. to a roll, w't per roll 30 lbs., per roll .....JGE $1.00

EXPLAINING THE USE OF BECKETS ON TACKLE BLOCKS.

When a single tackle block is used alone, no becket is needed.

When a single tackle block is used with a single, one becket is needed.

When a single tackle block is used with a double, a becket on the single is needed.

When a double tackle block is used with a double, one becket is needed.

When a double tackle block is used with a triple, a becket on the double is needed.

We ship all single blocks, one-half of the double and one-third of the triple with beckets, which are more than can possibly be used. If a greater proportion are ordered with beckets, we charge the following net extras—

For 5 in. and smaller blocks	extra, each	AJ	$0.20
For 6 in. blocks	extra, each	AJ	.20
For 7 in. blocks	extra, each	AJ	.20
For 8 in. blocks	extra, each	AJ	.20
For 10 in. blocks	extra, each	AE	.30
For 12 in. blocks	extra, each	AE	.30

The steel straps of these blocks extend below the pin and support the entire strain. The sheaves are accurately turned and are interchangeable. The shells are superior steel with turned edges, and provide secure fastening for pins.

We ship all single blocks, one-half of the double and one-third of the triple with beckets. If a greater proportion are ordered with beckets, we make a small additional charge.

These blocks can be adapted to any size rope, because the shoe is adjustable by bolts which hold the shoe in place and pass through slots on the plate.

With the use of the brake the load can be held at any position desired. It is easily worked—a slight movement of the hand to the right or left engages or disengages the brake. It elevates, lowers, locks and unlocks with one rope only.

ROPE.

Hawser Laid.

Regular Laid.

Rev-o-noc Hawser Laid Manila is carried in sizes ¾, 1⅛, ⅜, 1, 1¼ and 1½ inch. Other sizes can be supplied from factory. This is used principally for well drilling. It is a 3 strand rope and each strand is first twisted separately, then the three strands are twisted together to form the rope.

Sulu Manila, guaranteed to be *pure Manila.* The fibre in its manufacture is not of as good color or length as in Rev-o-noc. This is the same Manila we have sold for years, but to distinguish it, are now branding it "Sulu."

Sulu Manila is carried in 3 strand, with the exception of ¾, ⅛ and ⅜ inch, which we can supply in
3 strand
4 strand with center.
4 strand without center.

Please state which is wanted, otherwise we will ship 3 strand.

Rev-o-noc Manila is made of the purest and finest grade of Manila hemp, absolutely pure in every particular.
Rev-o-noc Manila is carried in 3 strand, with the exception of ¾, ⅛ and ⅜ inch, which we can supply in
3 strand. 4 strand with center. 4 strand without center.

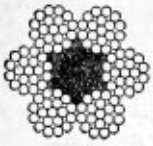
The weights of Manila and Sisal rope are about the same, Manila being about 25% stronger. Working strain should not exceed one-third of tested strength.

Weights given on Manila are for 3 strand, 4 strand weighs about ⅓ more.

WIRE ROPE.



Cut Pieces of Wire Rope cannot be returned under any circumstances. If you are not sure which kind to order, specify for what purpose it is to be used.

For Stump pulling and house moving and all work that requires great breaking strain, recommend only plow steel. Do not order iron rope unless it is to be used on elevators.

Guaranteed to be equal to any on the market, each wire is carefully tested for tensile strength, elongation and torsion, and every piece which does not come up to the standard is thrown aside. The life of a hoisting rope may be greatly increased by ordering a sufficient length to admit of from six to ten feet to be cut off the attachment end from time to time, and thus change the point of stress. It will pay to lubricate the ropes frequently.

Enlarged Cut.

No. 15—100 ft., reinforced hollow cable galvanized, w't per doz. 48 lbs., per dozen .....**JEAJ** $10.00

ROPE CUTTERS, POSTS, PROPS AND CLOTHES LINE

ROPE CUTTERS.

No. 95—Weisman's, best quality steel, height 10 in., width 3 in., finished in bright red enamel, w't per doz. 24 lbs., per dozen .....**AJHJ** $24.00

Will cut all sizes of rope. Simply place rope in slot and give a quick pull. Can be fastened anywhere and will cut in any position. The blade is of best tempered tool steel and can easily be removed and sharpened.

CLOTHES PROPS.

No. 10—Length 8 ft., width 1½ in., ⅛ in. thick, kiln dried gum wood, ends malleable iron, galvanized, w't per doz. 31 lbs., per dozen .....**BAJ** $3.50

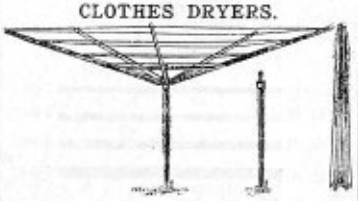
Easy to put on line, and cannot be blown off. Perfectly smooth and free from knots.

These props sometime come round instead of flat, as very often the wood works up to better advantage in a round prop. If a customer expresses a preference we will try to accommodate him as far as possible.

CLOTHES POSTS.

Removable Steel.

No. 40—4 posts of high carbon steel tubing filled with concrete, stand 6½ ft. above ground, annealed steel socket 2½ ft. long, 3½ in. wide, hooks of malleable iron, set consists of 4 posts 4 drive sockets, 1 wood block and 1 driving cap, w't per set 75 lbs., per set .....**DEJ** $6.50



Dig no holes, simply drive sockets into the ground, the steel posts fit securely into these and are held rigid. When not in use the posts can be lifted out of the sockets, leaving a clear lawn. Wooden plugs are provided so that the sockets will not fill up when the posts are removed.

An adjustable hook is fitted to the post and permits the clothes line and clothes to be hung at a convenient height, the line afterwards being raised to the top of the post.

The concrete filling renders the post as strong as a solid bar of steel.

ONE SET IN A BUNDLE.

CLOTHES DRYERS.

HILL'S CHAMPION, All Castings of Best Refined Malleable Iron and Galvanized.

No. 1—Painted wood post, 4 arms 6 ft. long, for 100 feet of line, w't per doz. 408 lbs.....per dozen **EGIJ** $96.00

High grade, per lb.	$0.30	.30	.30
	AH	AH	AH

The weights given are the approximate weight of the common grade. High grade, though lighter, is much more desirable on account of the longer service it will give.

Metallic Asbestos Sheet.

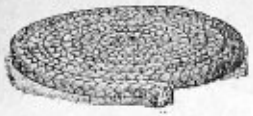
No. 21 —White, 1/16 in. thick, 40 in. wide, for steam engines, w't per sq. yd. about 5½ to 6 lbs., per pound ..... JGJ $1.20

No. 25 —Red and black, 1-32 in. thick, 40 in. wide, for gas engines, w't per sq. yd. about 4½ lbs., each ..... JIJ $1.50

No. 27 —Red and black, 1/8 in. thick, 40 in. wide, for gas engines, w't per sq. yd. about 5½ to 6 lbs., per pound ..... JIJ $1.50

In No. 21 White Metallic Asbestos Sheet Packing, each and every individual strand of yarn is spun around a core of brass wire, and then woven into a compact fabric, and thoroughly impregnated with a special white rubber composition, furnishing a high pressure packing of great merit. Its heat resistant properties appeal strongly to the engineer.

Nos. 25 and 27 Gas Engine Packing is made on the same general lines as No. 21 except that it is especially prepared for use on gas engines, and all other locations where the extreme heat produced by the explosion of gas or other liquid fuel must be withstood. In order that the cylinder heads or exhaust connections may be removed readily without the destruction of the gasket, one surface is especially prepared with a coating of plumbago. The reverse side is red in color and intended to vulcanize firmly to the cylinder.



Sectional Red Tubular Gasket.

Intended for cold water, but may be used for steam up to 80 lbs. Made from long fibre flax, braided in the most approved and skillful manner, lubricated with the finest quality cake tallow, is largely used on hydraulic elevators, where the work is severe. It is also well adapted for use in the water end of the pump.

is made strictly short lap. The pieces are cut not longer than 4 ft. 2 in., and stretched so that they may be in length up to 4 ft. 6 in. Is suitable for any place where any high-grade belt can be used.

Eclipse is made of pure oak leather. It is as thick in appearance as of same width. It is used ordinarily in slow running machinery where the load is comparatively easy, such as machine shop work.

Standard and Agricultural grades are made from the first and second cuts of the shoulder; they are short lap and will run straight, but with much less strength, as thickness would show. Intended for light running machinery only.

Weights given above are for "Our Very Best" grade. The Eclipse weighs about 10%, the Standard about 20% and the Agricultural about 33⅓% less.

RUBBER ENDLESS THRESHER.

W't 100 ft., lbs.	82	94	106	127	143
Ply	4	4	4	5	5
Per foot $0.62	.73	.80	1.05	1.18	
Discount DJ%					

Guaranteed the best grade thresher belt on the market.

Stock sizes, 120, 130, 140, 150, 160 and 170 ft. long.

Double belts of leather take twice the list of single belts, but are economical because they stand a larger overload and last longer with fewer take-ups. Where the small pulley is less than 6 in. in diameter, double belts, on account of their stiffness, might part in the plies. Horse power, speed and size of driving pulley determine whether single or double belts should be used.

The Extra is made of 30 oz. duck and the best grade rubber friction.

Amherst is made of 28 oz. duck and a good medium grade of rubber friction. The Standard is a cheaper grade made from 24 oz. duck for light work only.

Weights given above are approximate of the Extra grade. The Amherst about 10%, the Standard about 20% less.

A FULL ROLL OF BELTING MEASURES FROM 400 TO 450 FEET.

WATER MOTOR.

9 ft., endless, 1 in. wide, of rubber and cloth webbing .....each EJ $0.60

Add to the diameter of the roll in inches the diameter of the hole in the center of the roll. Multiply this sum by the number of coils in the roll, and this product by 3.82. The three figures on the left represent number of feet in the roll. This rule applies to any kind of belting, rubber, canvas or leather, and to any ply of belt.

For each additional inch in width, add per foot extra $0.24

List on double belting is twice list of single.

No. 1BS—For single leather, 3 ply rubber or cotton belts, 1 to 5 in. wide, w't per 100 1 1/4 lb. .....per 100 JCJ $1.20

No. 2BS—For heavy single or light double leather, 4 ply rubber or cotton belts, 1 to 8 in. wide, w't per 100 1 1/2 lbs. .....per hundred JEE $2.00

No. 3BS—For double leather, 4 to 6 ply rubber or cotton belts, 1 to 12 in. wide, w't per 100 2 1/4 lbs., per hundred .....JIJ $3.40

No. 4BS—For heavy double leather, 6 to 8 ply rubber or cotton belts, 1 in. wide and up, w't per 100 3 3/4 lbs., per hundred .....ABJ ...2

No. 5BS—For extra heavy double leather, 6 to 8 ply rubber or cotton belts, 1 1/2 in. wide and up, w't per 100 6 1/2 lbs. .....per hundred BJJ $8.00

The zigzag principle insures a strong and elastic joint and at the same time will run over the smallest pulley without strain on the belt where the teeth enter.

The eight sizes of the Stag cover the entire range from the lightest belt 3/4 in. wide to the widest heavy double belt, one size being sufficient for all belts of the same thickness.

It is quicker to apply. You can cut your belt and have it running in less time than it takes to punch holes for lacing.

NO. 00, TWO; BALANCE, ONE HUNDRED IN A BOX.

REVONOC Wire.

No. 20 REVONOC—For belts from 1 to 2 1/2 in., w't per box 1/4 lb., per box .....BE $0.36

No. 21 REVONOC—For single belts 5 in. and under, w't per box 1/4 lb., per box .....BE $0.36

No. 22 REVONOC—For all single belts wider than 5 in., also for all double belts under 8 in., w't per box 3/4 lb., per box .....BE $0.36

No. 23 REVONOC—For all double belts above 8 in. in width, w't per box 3/4 lb. .....per box BE $0.36

It is a genuine LX composition wire lacing of silver color. It possesses all the qualifications needed to make it in every respect adapted to the purpose. Its single strength being 2,000 lbs. it will stand a far greater strain than is ever required in the driving capacity of a belt.

FIFTY FEET IN A BOX.

LACE LEATHER.

WASHER CUTTERS.

No. 350—Extra quality, heavy, polished, with 2 thumb screws, w't per doz. 8 lbs. .....per dozen JIJJ $15.00

ONE-HALF DOZEN IN A BOX.

STICK BELT DRESSING.

REVONOC—1 lb. sticks ..per lb. CJ $0.50

Made from grease extracted from sheep's wool, the purest and best animal grease obtainable. It is the natural color of the wool fat which is brown.

Black belt dressing contains pitch, pine tar or asphaltum which being a sticky compound is very injurious to the belt.

REVONOC *dressing restores to the leather natural fats and oils lost in process of tanning, thereby making a soft and pliable non-slip belt.* REVONOC *dressing, being in stick form in this cardboard tube, on being held against moving belt, friction melts and spreads it. Cardboard of tube eliminates dust and prevents dressing from melting too fast. Being applied directly to belt and warmed by friction it penetrates the leather. No waste, no time lost melting, suitable for leather, rubber, canvas and cotton belts.*

Absolutely guaranteed to prevent slip-page.

ONE DOZEN IN A CASE.

HOT BELT DRESSING.

REVONOC—5 lb. cans, per pound BH $0.45

The most perfect dressing made for leather belts. Preserves the leather and lengthens lift of belt by rendering it soft and pliable. Being neither sticky or gummy, dirt will not adhere to it.

BELT CEMENT.

REVONOC—1 lb. cans, per lb. JFJ $1.00

The only belt cement made whereby a belt can be put back into service in thirty minutes after making joint without the use of a press. Made from the finest gelatines procurable. On account of its greater adhesive qualities it takes a lesser quantity to make the joint, which after being made is as soft and pliable as any part of the belt.

ONE DOZEN CANS IN A CASE.

PULLEY COVERING CEMENT.

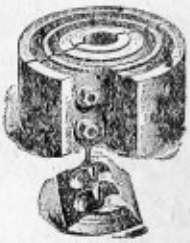
For Iron or Wood Pulleys.

REVONOC—1 1/2 lb. cans, each .....AHJ $3.00

For canvas covered pulleys; always ready for use and fully guaranteed to hold. Sufficient to cover 10 sq. ft. of surface.

ONE DOZEN CANS IN A CASE.

GILBERT WOOD SPLIT PULLEYS.



Style "B."

Style "B" Pulley—Made entirely of thoroughly seasoned maple and finished with two coats of shellac varnish. The rim is both nailed and glued.

Each spoke is securely dovetailed into and glued in the rim, and is set in a line running direct from the center of the shaft to the rim—thus affording its utmost support. Every pulley is perfectly balanced and cannot get out of round. They are furnished with the only bushing that gives a perfect bearing on the entire circumference of the shaft. By using different bushings, the same pulley may be made to fit different sizes of shafting. Made in sizes from 12 inches in diameter up. See next page how to order.

Style "C" Pulley—Made entirely of thoroughly seasoned maple and finished with two coats of shellac varnish. It is bolted together—the nuts on the clamping bolts being covered with sectional blocks which cannot get out of place. When putting the pulley on a shaft, all its parts are accessable from the face. By using different bushings, the same pulley may be made to fit different sizes of shafting. Made in sizes from 3 to 12 inches in diameter. See next page how to order.

It has been clearly demonstrated by practical experience that maple presents a better surface than any other wood adaptable for pulleys. It is very hard, close and fine grained. The face of a maple pulley in use soon takes a high polish, which gives more perfect contact to belt, thereby enabling it to transmit the same power with less tension.

Reducing the tension prolongs the life of the belt, and effects a great saving in power by reducing the friction of the journal and the strain on the shafting.

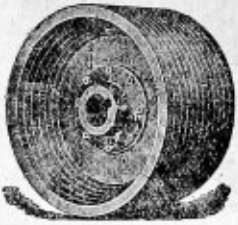
From the way in which they are constructed, Gilbert pulleys cannot get out of round, and must excel all other kinds of wooden pulleys in correctness of balance and trueness of running.

Wooden pulleys, being considerably lighter than iron pulleys, cause less friction of the journal and less strain on the shafting.

These pulleys meet with little atmospheric resistance, as the spokes are set to cut the air, not to fan it and collect dust, as the spokes of many other pulleys do. This makes a greater difference in the power required than is generally supposed.

Can be put on or taken off the shaft very easily, simply and quickly. Will withstand a greater degree of heat or of moisture than other wooden pulleys, on account of the material of which they are made and the way in which they are built and finished.

Will also withstand more severe shocks and greater compression than any other pulleys.



They have the only perfect compression shaft fastening. The wood takes a tighter hold on the shaft than set screws do, but, unlike them, does not injure the shaft. On all the pulleys over 14 inches in diameter, plates are used instead of washers for the nuts on hub clamping bolts, thus distributing the compression over the entire length of the hub.

RULES FOR CALCULATING SIZES AND SPEED OF PULLEYS ON NEXT PAGE.

GILBERT WOOD SPLIT PULLEYS.

Style "A."

Style "D."

WE DO NOT LIST STYLES "A" AND "D" PULLEYS, BUT WILL MAIL PRICES AND INFORMATION ON APPLICATION. THESE ARE SHIPPED DIRECT FROM FACTORY.

HOW TO ORDER PULLEYS.

In ordering, please state:
1st, style; 2nd, diameter; 3rd, width of face; 4th, exact size of shaft; 5th, kind of face (crown or flat). Unless otherwise specified, crown face will be sent.

RULES FOR CALCULATING SIZES AND SPEED OF PULLEYS.

To Find the Size of Driving Pulley—Multiply diameter of the driven by number of its revolutions and divide product by number of revolutions of the driver. Quotient will be diameter of the driver.

To Find the Size of Driven Pulley—Multiply diameter of the driver by number of its revolutions and divide product by number of revolutions of the driven. Quotient will be diameter of the driven.

To Find the Speed of Driven Pulley—Multiply diameter of the driver by number of its revolutions and divide by the diameter of the driven. Quotient will then be the number of revolutions of the driven.

BULL DOG COIL.

Brown or Tenso Pattern.

The most popular weldless chain on the market. Differs from lock link chain in that both ends of link are identical in shape, the planes at right angles to each other, the tie at the center. The neatest, lightest chain, size for size, of any weldless wire chain, its uniformity and smoothness making it peculiarly adaptable to a wide variety of purposes. Used extensively for porch swings, hammock chains, boat chains, tie outs, etc.

Bright, in 100 Foot Boxes.

HALTER AND LINK BELT CHAINS.

RUST PROOF HALTER.

Bull Dog, Brown or Tenso Pattern.

chains are made from hard drawn basic steel wire galvanized, so that the links are not only alike in appearance, but alike in hardness, resulting in uniform strength and durability. They are absolutely rust-proof.

REVONOC *Halter Chains are made from hard drawn steel wire, same pattern as , but not galvanized. This style link is the strongest, smoothest and most flexible for halter purposes, the lock being at the center of the link, hence no rough projections to chafe the animal. Snaps and all attachments are strong and positive in action.*

Wherever possible, Link Belt Chain should run with the back of the coupling hook to wheel, it should be kept well lubricated in the joints with heavy oil or good grease, which should also be used on rims and teeth of wheels at points of contact with belt.

Plumbago or Graphite grease should be used where chain is exposed to gritty dust.

ALL NUMBERS ARE PACKED IN 10 FOOT ROLLS; WE WILL NOT BREAK ROLLS.

REVONOC STEEL STAKE IRONS.

Round.

No. 1 REVONOC—Blued finish, pressed steel, holes for ⅜ in. bolt, for 2x 2¼ in. stake, 3 in. deep, w't per doz. 11½ lbs.....per dozen JIJ $1.50

Square.

No. 2 REVONOC—Blued finish, pressed steel, holes for ⅜ in. bolt, for 1⅝x 3½ in. stake, 3 in. deep, w't per doz. 11½ lbs.....per dozen JIJ $1.50

Made of high grade steel with a slightly flaring top to prevent wearing a notch in the stake, and tapers toward lower end to hold securely. Stronger than malleable iron stakes.

JACK SCREWS AND JACKS.

JACK SCREWS.

Cast Iron Barrel, Bell Bottom, Steel Screw and Collar, Forged Head.

Screw is full size, about ⅛ in. larger than other makes.

Broad flange on bottom of jack gives larger bearing surface on the ground. The forged head cannot loosen under severe strain as will occur with other jack screws.

Hollow handle for holding the bar is a special feature of these jack screws.

Levers will be sent only when ordered, and will be charged extra.

	BIJ	**CCJ**	**CHJ**	**DJJ**

ONE DOZEN IN A CRATE.

MECHANICS' AND HARDWARE MEN'S SOAP.

Wenzelmanns', made from pure vegetable oils, in bars weighing about ½ lb., w't per box 12 lbs., per box of 25 bars .....**BAJ** $3.50

Removes stove polish, paint, oil and hardware dirt in general. Good for cleaning cases and windows.

Contains less lye than other soaps, is a mild but quick cleanser, has a healing effect on the skin, leaving it soft. Lathers freely in either hard or soft water.

Goes twice as far as other soap. Prepared especially for busy people, hardware men, printers, miners, plumbers, engineers, painters, foundrymen, railroad men, tinners, carpenters, mechanics, blacksmiths, farmers and all who get dirty hands.

WE DO NOT BREAK BOXES.

AXLE GREASE.

Extra Quality Light Axle Grease, in Four Color Lithographed Cans and Pails.

In Cans.

1 lb., one-quarter gross in a case, per gross .....**AAEJ** $19.50

3½ lb., one-sixth gross in a case, per gross .....**CJFJ** $51.00

In Pails.

10 lb.,	per dozen pails	**JGHJ**	$13.00
15 lb.,	per dozen pails	**JIFJ**	16.00
25 lb.,	per dozen pails	**AEFJ**	26.00

Graphite, in Tin Cans.

1 lb., one-third gross cans in a case, w't per case 70 lbs., per gross .....**AJHJ** $16.00

3 lb., one and two dozen cans in a case, w't per case of 2 doz. cans 90 lbs., per gross .....**BHHJ** $38.00

It is made from pure lubricating oils, contains no lumps, and has great wearing qualities. This grease contains a large percentage of graphite, which is unsurpassed as a lubricant. It will not run or gum, and is not affected by heat or cold. It is adapted for light and heavy wagons, drays and farm machinery. The graphite adheres to the spindle and prevents the grease from running.

AXLE GREASE.

In Boxes.

Hub Lightning ...per gross **FFJ** $7.50
ONE-THIRD GROSS IN A CASE.

Frazer's .....per gross **AADJ** 13.00

ONE-QUARTER GROSS IN A CASE. W'T 55 LBS. PER CASE.

AXLE GREASE.

In Tin Cans.

Small, Frazer's, wagon, w't per can about 1½ lbs....per dozen **ADJ** $1.75

Medium, Frazer's, wagon, w't per can about 3 lbs.....per dozen **BEJ** $3.25

TWO DOZEN IN A CASE.

Wagon.

In Wood Pails.

15 lb.,	Hub Lightning, per dozen pails	**JGIJ**	$10.80
25 lb.,	Hub Lightning, per dozen pails	**AJHJ**	$14.50
15 lb.,	Frazer's, wagon, per dozen pails	**AJHJ**	$12.00
25 lb.,	Frazer's, wagon, per dozen pails	**AGCJ**	$18.00

1 and 3 lbs. 10 and 25 lbs.

REVO-NOC

1 lb., one-third gross cans in a case, w't per case 70 lbs., per gross .....**JIDJ** $15.00

3 lb., one and two dozen cans in a case, w't per case of 2 doz. cans 90 lbs., per gross .....**BCFE** $36.00

In Pails.

10 lbs. ....per dozen pails **JFBJ** $10.00
25 lbs. ....per dozen pails **AJGJ** 18.00

It is made of pure lubricating oils, is of even consistency and will not run or gum.

It is dark color and its uniformly high fire and viscosity test combined with a good cold test insures smooth and uniform lubrication under all conditions and in all seasons.

WE DO NOT BREAK BOXES ON AXLE GREASE.

HORSE SHOE NAILS, CALKS AND CALK WRENCHES.

HORSE SHOE NAILS.

Drop Forged, Regular Head, Extra Quality Cold Drawn Steel Body, Beveled Corners, Reinforced Points, Hammer Pointed and Well Polished, Will Not Split or Break in Driving.

Nos.	5	6	7	8
Per pound	$0.26	.23	.21	.20

The engraving on the left shows the complete point with gauze and jacket on; the one on the right shows the point punched with elliptical holes before the gauze is put on. These points have the holes punched a uniform distance apart, are galvanized outside and in after the holes are punched, are, therefore, non-corrosive.

"STAR POINTER" FORCE PUMPS.

No. 205.

HAND POWER, DOUBLE ACTING, ANTI-FREEZING, FOR DEEP OR SHALLOW WELLS.

The Star Pointer No. 205 is used as a lift pump or for forcing water through a hose with less effort than any other pump on the market.

Is provided with upper and lower brass cylinders, so that the flow is divided between the upward and downward strokes of the handle. The water filling the upper cylinder and not discharged from the spout on down stroke of handle, is discharged on the up stroke, giving an even, steady flow from the spout.

The base being adjustable, the distance between the spout and platform can be increased to suit conditions.

The materials used are the very best gray and malleable iron castings, steel rods, heavy seamless brass tubing and high class workmanship. From base to bottom of chamber is 4½ ft., from base to spout 21 in. Painted maroon and neatly striped with gold.

No.	Size.	Upper cylinder in.	Lower cylinder in.	Suction pipe in.	Stroke in.	Tapped for lead pipe in.	Shipping wt lbs.	Each.
205	1	1⅝	2½x10	1¼	6	1¼	80	$17.00★ JIGE

205	3	2	3½x10	1¼	6	1¼	80	$20.00★ AAAE

Pump Standard only, tapped for 1¼ in. pipe, each ..... JHJE $14.00★

We furnish cylinder 12 in. long without extra charge when specified.

Where set length is wanted, specify in order, no extra charge.

The pump is provided with ⅜ in. rod coupling, ⅞ in. coupling furnished if preferred.

WINDMILL OR HAND POWER, DOUBLE ACTING, WITH THREE-WAY VALVE, ANTI-FREEZING, STEADY FLOW.

No. 305.

These pumps are designed to be used with wind-mill, gasoline engine or hand power.

The water is discharged as rapidly as supplied by each stroke, consequently no surplus of water is created in the pump. Stream being even and steady, no back pressure or pounding is created in pipe or pump.

Satisfactory results are guaranteed with three-inch cylinder under any eight-foot windmill in wells where water stands 100 feet or more from the surface. In the average well we recommend the use of a 3½-inch cylinder, which means water in satisfactory quantities for stock purposes.

All three-way seats are brass, thus insuring a long life to the rubber three-way valve. The flat rod is of steel and extra long, thus giving a stiff, straight stroke. All parts are malleable iron, painted maroon and neatly striped with gold.

Elbow connection to underground pipe is of heavy malleable iron. If stroke longer than 10-inch is wanted, upper and lower cylinders can be supplied to suit condition at slight additional cost.

Where opening in well is less than 8 in., a well pit must be provided for.

No.	Size.	Upper cylinder in.	Lower cylinder in.	Suction pipe in.	Stroke in.	Tapped for lead pipe in.	Shipping wt lbs.	Each.

Without three-way valve deduct $2.00 from list.

Pump Standard only, with three-way valve, tapped for 1¼-in. pipe ..... each JIBJ $16.00★

Pump Standard only, without three-way valve, tapped for 1¼-in. pipe..... each JHJE $14.00★

Where set length is wanted specify in order, no extra charge.

Unless otherwise specified these pumps are furnished with three-way valve for distributing water to any part of premises. Can be furnished for any stroke of windmill longer than 10 in. when so specified.

HOW TO ASCERTAIN LENGTH OF PIPE AND ROD REQUIRED FOR PUMP.

All Star Pointer pumps extend 4½ ft. below the platform, consequently this should be deducted from the depth of the well. The cylinder is 14 in. long and as the pipe should not extend closer than 1 ft. from the bottom of the well so that 6½ ft. can be deducted from the distance from the platform to the bottom of the well, which would give the required amount of pipe. The cylinder can be placed anywhere within the vacuum limit, which is 27 or 28 ft., but in practice it is best to place it about 15 ft. above the average surface of the water. The rod (⅜ or ⅞ in.) necessary can be ascertained by deducting the length of pipe below the cylinder from the total length of pipe required.

EXAMPLE—To find the quantity of pipe and rod necessary for a well 75 ft. deep, containing 3 ft. of water: See illustration above.

From 75 ft., the depth from platform to bottom of well, deduct the following: 4½ ft., distance from platform to bottom of pump; 14 in., total length of cylinder; 1 ft., distance from bottom of well to lower end of suction pipe; giving total of 6 ft. 8 in. to be deducted, leaving 68 ft. 4 in., amount of pipe needed.

Deduct from 68 ft. 4 in. (quantity of pipe required) 17 ft. (length of suction pipe), leaving 51 ft. 4 in., amount of rod required.

IN ORDERING STATE NUMBER AND SIZE, DETERMINE THIS BY DIAMETER OF WELL, NOT DEPTH.

★FOR FACTORY SHIPMENT ONLY.

WELL CURBS, PLATFORMS AND TUBING.

WELL CURBS.

No. 20.

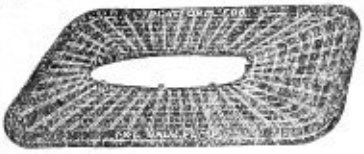
Showing No. 30 in Use.

Galvanized Steel, Painted and Varnished.

No. 20—GEM, made of 4 pieces of steel, height 36 in., diameter 14½ in., extension base 8×16 in., spout 1¼×6½ in., 10 fork roller wheel, diameter 10½ in., w't packed 27 lbs. each **BCJ** $3.25

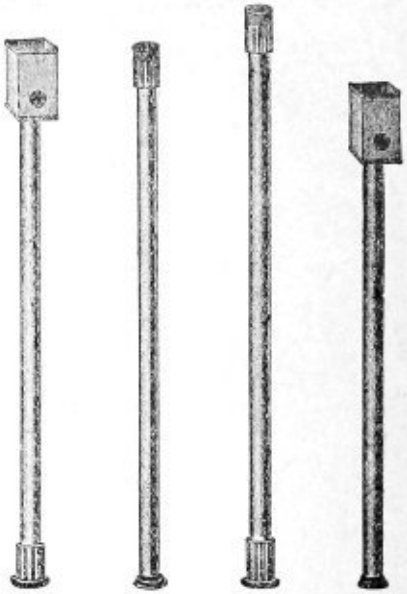
No. 30—IXL, made of 3 pieces of steel, height 40 in., diameter 16 in., base 9×17 in., spout 1¾×6¼ in., 10 fork roller wheel, diameter 12 in., w't packed 40 lbs. ..... each **CAE** 4.75

Covered with two coats of paint and varnished. Will not rot, rust, warp or fall to pieces. No rivets or solder used in construction. All parts securely locked by seams and will not come apart.



PUMP PLATFORMS.

No. 21—12½×20 in., cast iron, japanned, for Gem pumps, w't 9 lbs. ..... each **JGE** $1.25



No. 35—29×31 in., cast iron, japanned, for Gem pumps, w't 48 lbs. ..... each **BHE** $5.00

No. 31—33×35 in., cast iron, japanned, for IXL pumps, w't 80 lbs. ..... each **EJJ** $7.00

IXL PUMP TUBING.

No. 33. No. 34. No. 35. No. 36.

42 Gauge Galvanized Steel, Adapted to all Well Curbs.

No. 33—Reservoir, with half coupling, 5, 6, 7, 8, 9 and 10 ft. lengths, to be used in connection with funnel tubing in wells from 10 to 19 ft. deep. ..... per 100 feet **JEGE** $11 00

No. 34—Funnel, with half coupling, 6, 8 and 10 ft. lengths, to be used in connection with reservoir tubing in wells from 10 to 19 ft. deep. ..... per 100 feet **JEGE** 11 00

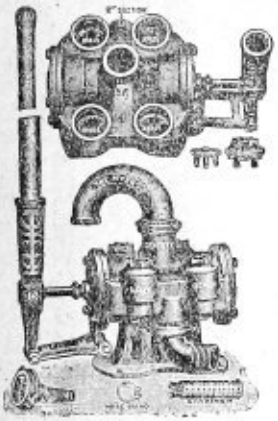
No. 35—Plain, with half coupling on each end to connect ends of Nos. 33 and 34, respectively, 8 and 10 ft., used in wells deeper than 19 ft. to lengthen reservoir and funnel tubing to required depth ..... per 100 feet **JEGE** 11.00

No. 36—Reservoir with funnel, 9 to 19 ft. lengths, to be used without couplings in wells 8 and 9 ft deep. per 100 feet **JEGE** 11 00

Leaves the water clear and pure, will not rust, rot, or accumulate filth never freezes. Weighs only ¾ lb. to the foot and can be used in wells as deep as 40 ft. Can be used with any style of pump curb, wood or iron, as the stirrup on all other curbs will fit the square reservoir box.

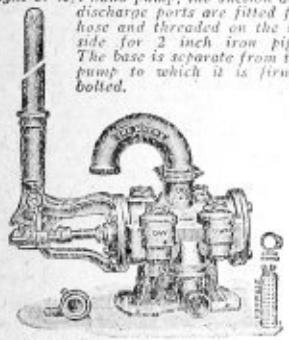
To get proper length of tubing for cistern, add 1 ft. to depth of cistern from platform to bottom. This will give proper allowance for tubing in curb and the right distance it should hang from bottom.

PRICE PER FOOT DOES NOT INCLUDE COUPLINGS.



Showing Couplings and Method of Attaching.

No. 38—Extra couplings for connecting IXL tubing, per pair **AG** $0.25



PUMPS.

FORCE TANK PUMPS.

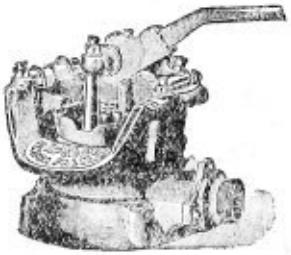
No. 470—Myers, low down, double acting, 5x5 in. polished cylinder, brass valve seats, heavy valves faced with rubber, ¾ in. drawn polished steel piston rod, with heavy brass stuffing nut and reversible handle, equipped with 1 in. discharge hose attachments and 1 in. iron nozzle, 2 in. strainer and hose clamp, w't 100 lbs., each .....**JFJE** $13.50

This pump is so constructed that all valves are located on top of the pump. The valves are of the poppet pattern, which raise clear from the seat, preventing any foreign substance from lodging under them. The handle can be placed on either end, making it either a right or left hand pump, the suction and discharge ports are fitted for hose and threaded on the inside for 2 inch iron pipe. The base is separate from the pump to which it is firmly bolted.

No. R470—Myer's, low down, cog gear, 5x5 in. polished cylinder, brass valve seats, heavy valves faced with rubber, ¾ in. drawn polished steel piston rod with heavy brass stuffing nut and reversible handle, also equipped with 1 in. discharge hose attachments and 1 in. iron discharge nozzle, 2 in. strainer and hose clamp, w't 100 lbs., each .....**JFCE** $13.50

This is the same pump as No. 470, with the exception of the cog gear handle arrangement by means of which the power necessary to operate the pump is reduced 25% to 40% over the old style plain handle.

SET LENGTH PUMPS.



No. 50—3x10 in. iron cylinder with brass valve seat, best grade plunger and valve leathers, cast iron standard, revolving open top, painted green with gilt trimmings, with set screw, large spout and waterways, good length handle, powerful fulcrum, tapped for 1¼ in. pipe, w't 63 lbs., each **CBJ** $6.50

This pump is anti-freezing, has the regular four-foot set length and is especially adapted for cisterns or wells not over 25 feet deep. By lowering the cylinder to within 15 feet of the water, it may be used in deeper wells. Is carefully made of all new iron.

No. 58—Lighter weight, without brass valve seat, w't 56 lbs., otherwise same as No. 50 .....each **BHE** $6.00

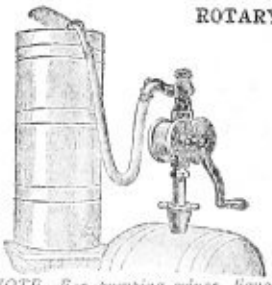
No. 210—Brass lined cylinder, brass plunger yoke and poppet valve, otherwise same as No. 50, each **DEJ** $7.00

No. 3—3 in. Diaphragm or suction, iron body made in two sections, side suction cut for pipe thread unless otherwise ordered, suction valve is metal, rubber faced, and easily removed, wrought iron and reversible lever, approximate capacity 3,500 gal. per hour, w't each 175 lbs., each .....**AFJJ** $34.00

Is used for pumping out cellars, trenches, and as a bilge pump on vessels, barges, etc. Gritty matter in the water will not affect the action.

HOUSE FORCE PUMPS.

No. 53—3 in. cylinder, iron body, faucet spout, ¾ in. brass lever handle hose bibb, bases have brass valve seats fitted with trip valves, to drain pump, and bottom nut threaded for 1¼ in. iron pipe, cap has brass primary plug, back outlet is threaded for 1 in. pipe, fulcrum ring revolves so that handle can be placed in any desired position, stuffing nut is brass, piston rod ⅝ in. brass covered, w't each 30 lbs., each .....**ECJ** $8.00



No. 153—Brass body, nickel plated brass cylinder, piston rod, faucet spout, stuffing nut and primary plug, cylinder of heavy seamless brass tubing screwed into place, otherwise same as No. 53 .....each **FBJ** $9.30

No. 52—3 in. cylinder, iron body and spout, painted blue, threaded for 1 in. pipe and 1 in. hose coupling at discharge end, iron cap on top of spout can be screwed on discharge end of spout when water is forced through back outlet of pump, piston rod ⅝ in., w't each 30 lbs. .....each **DBJ** $6.00

No. 152—Brass body, nickel plated brass cylinder, piston rod, stuffing nut and primary plug, cylinder of heavy seamless brass tubing screwed into place, otherwise same as No. 52, each .....**EBJ** $7.30

Has full brass lining, highly burnished, insuring long life to the plunger packing. No rust. These pumps may be used in connection with wells and cisterns not over 25 ft. deep (20 ft. vertical suction is a more practical limit). They are used for delivering water at sink, forcing water to elevated tank, spraying trees, etc. The nickel plated pumps are particularly attractive and are a high grade article as well.

ROTARY FORCE PUMPS.

NOTE—*For pumping wines, liquors, vinegar and saline solution, bronze case and cams should be used.*

per set .....**BHBJ** $47.00

No. 1—Handy, iron, top discharge and spout, crank handle, iron suction pipe with threaded taper sleeve secured with thumb screw, capacity 10 gal. with 300 revolutions per minute, 1 in. suction pipe, discharges are at end of spout for 1 in. hose and at top of spout for 1 in. hose, hose is not included, w't complete 41 lbs., each .....**JGHJ** $17.00

The threaded taper sleeve will fit any bung hole from 1½ to 3 in. in diam. The end of the suction pipe is sharpened and when forced into the barrel will hold the pump firmly. With this outfit fluids can be transferred from barrels to tanks or other receptacles at a distance. The price includes hose couplings and bent discharge piece or hook spout. The lift and force is 40 ft.

PUMPS, CYLINDERS, VALVES, ETC.

PITCHER SPOUT PUMPS.

Closed Revolving Top, Painted Green with Gilt Stripes.

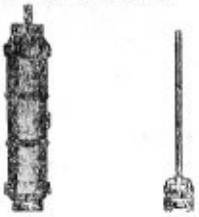
Lead Pipe Couplings, in ordering specify size wanted .....each **JF** $0.15

Handles may be adjusted to any position desired.

EUREKA TUBULAR CYLINDERS.

No. 450—Seamless drawn brass tubing, brass lower check valve and plunger, complete with 2 leather plungers, check valve and spring dog coupling.



Size well	2	2½
Inside diam.	1⅞	2¼
Stroke	12	12
W't, lbs.	7	9
Each	$6.40	11.00
	BGE	JDFJ

They are let down into the well through the pipe after pipe is set to receive them. The cylinder is crowded down into the pipe by means of a seating tool. The spring dog coupling at lower end of cylinder holds firmly to the inside of the pipe, thus keeping the cylinder in place where set.

Cylinder is revolved by means of seating tool to expand the rubber ring which is between the spring dog coupling and the cylinder, the expanding rubber ring making a water tight joint, which is necessary. The seating tool is withdrawn and check valve and plunger let down into place in cylinder.

LOOSE.

CYLINDERS.

No. 6—3x10 in., all iron, w't 10½ lbs., each .....**AAJ** $5.00

No. 6¼—3x12 in., all iron, w't 12½ lbs., each .....**AFJ** $7.00

No. 6½—3½x10 in., all iron, w't 13½ lbs., each .....**AFJ** $7.00

No. 6¾—3½x12 in., all iron, w't 15½ lbs., each .....**BJE** $9.00

No. 7—3x10 in., brass lined, w't 12½ lbs., each .....**BFJ** $9.00

No. 7¼—3x12 in., brass lined, w't 13½ lbs. .....each **BGE** $9.50

No. 7½—3½x12 in., brass lined, w't 14½ lbs. .....each **JCCJ** $11.25

The all iron cylinder has brass valve seat. The average common iron cylinder does not possess this feature. The brass lined cylinder has brass valve seat, brass plunger yoke and poppet valve. The plunger and valve leathers in both the all iron and brass lined cylinders are the very best obtainable.

PITCHER SPOUT PUMP REPAIRS.

Plungers and Rods Complete.

Nos.	1	2	3
Each	$0.50	.60	.70
	CE	DJ	EJ

Handles for Nos. 1, 2 and 3, each .....**CE** $0.50

COMBINATION FOOT VALVES AND STRAINERS.

No. 44—1 in., w't 2⅛ lbs., each .....**CJ** $0.44

No. 52—1¼ in., w't 2⅞ lbs., each .....**CE** .55

Used at lower end of suction pipe, below pitcher spout pumps or below cylinder suspended in well or cistern. The valve in it holds the water in the pipe, preventing leakage back into the well or cistern. The strainer prevents sticks, leaves, etc., being drawn into the suction pipe or cylinder to cause trouble. Especially recommended for use on long suction pipes, either vertical or horizontal.

BALL FLOAT VALVES.

No. 75 REVOROC—Heavy brass body, pure gum ball, perfect working lever, diam. 1 in., length 18 in., w't per doz. 24 lbs. .....per dozen **AABJ** $19.50

The brass valve seat is tapered to fit the rubber ball valve. The ball is held in place by the lever, but is perfectly free in the cage. The water passing through turns the ball, so that the wear is even on all parts, and it is always sure to seat perfectly. The ball being free in the cage also drops onto its seat and acts as a check valve, a feature not found in other valves. When the ball rises by dropping of the lever, the water comes out freely through openings in the side of the valve as shown. These valves will automatically control the flow of water into supply tanks, cisterns, stock tanks, etc., and when in connection with automatic regulating pumps, will effectually prevent windmills from "creeping into gear."

FLOAT AND OUTLET VALVES.

No. 76 REVOROC—Heavy brass body, pure gum ball and lever, valve seat brass tapered to fit rubber ball valve, 1 in., w't per doz. 45 lbs., per dozen .....**AHFE** $32.40

The ball is held in place by the lever, yet is perfectly free in cage. Ball revolves as water passes through and seats perfectly, giving even wear on all parts. Water may be withdrawn through inlet or feed pipe and ball being free in cage always drops onto its seat and acts as a check valve, a feature not to be found on other valves.

LOOSE.

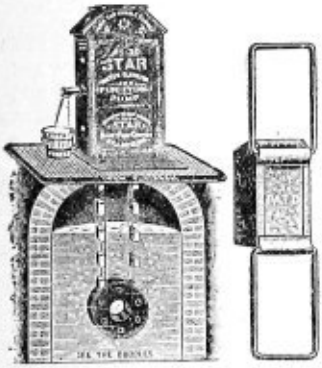
TANK FLOATS.

No. 33—Heavy galvanized iron, diam. 12 in., guaranteed air tight, per dozen .....**JEGE** $10.00

Can be bolted to the lever attached to the valve to open and close automatically.

WATER ELEVATORS AND PUMP FIXTURES.

STAR WATER ELEVATORS.



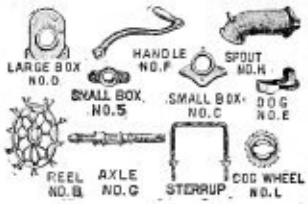
No. 250—Star, curb of 24 gauge galvanized iron with heavy hoops at top and bottom, well painted, nicely decorated and finished with a very heavy coat of varnish, best galvanized iron buckets, double seamed and riveted, japanned cast iron fixtures, complete with 25-ft. chain, w't 85 lbs., each ..... JGBJ $12.00

No. 20—Extra chain for Star elevators, per foot AA $0.18½

Substantially built, attractive in appearance and will positively purify the water in well or cistern in a short time. The bottom hoop is so placed that it allows the body of the curb to project into the opening of well or cistern cover. This, with the special feature of the fixtures being placed below the top line of the curb, prevents any water from leaking out, thus insuring a dry platform.

Fixtures are packed inside curb, chain in bundles on outside.

No. 130—Star, curb of thoroughly seasoned lumber, carefully selected, dressed and matched, put together with cement coated nails, two coats of paint, artistically lettered and decorated, finished with an extra heavy coat of varnish, best galvanized iron buckets, double seamed and riveted, japanned cast iron fixtures, complete with 25-ft. chain, sufficient for 10-ft. well, w't 83 lbs. .....each EDE $9.00



CHAIN AND FIXTURES COMPLETE FOR TEN-FOOT WELL PACKED INSIDE CURB.

PUMP AND SINK BRACKETS.

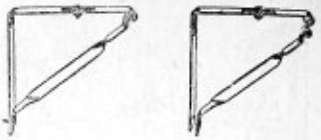
Banner, cast iron, painted, w't per doz. sets 150 lbs., per dozen sets .....AGBE $30.00

Can be attached to any kitchen sink and does not damage in any way. On the left of the above cut is shown a set of Banner pump and sink brackets, and on the right a set as applied to a pump and sink, which thoroughly locks them together as well as furnishes a drip from the pump. As the brackets are interchangeable, the pump can be on either the right or left hand side.

This bracket is neat, small and compact, yet very sanitary and serviceable, does away with all wooden parts, and occupies the least possible amount of space.

SIX SETS IN A CASE.

SINK BRACKETS.



Japanned, Cast Iron.

No. 3—14x16 in., w't per doz. prs. 96 lbs....per dozen pairs JEGE $10.00

No. 4—16x18 in., w't per doz. prs. 108 lbs...per dozen pairs JFJE $10.50

Each bracket has six screw holes which are machined out after the brackets are cast.

SINK BRACKETS.

No. 1—Syracuse steel, 10½x14 in., takes sinks 14 to 18 in. wide, w't per doz. prs. 34 lbs., per doz. pairs **CDE** $6.00

No. 2—Syracuse steel, 12x16 in., takes sinks 18 to 20 in. wide, w't per doz. prs. 38 lbs., per doz. pairs **DAE** $7.20

Notice that the brace in these comes to the extreme end of the bracket, which makes it considerably stronger than the old style. The twist in the brace also adds to its strength.

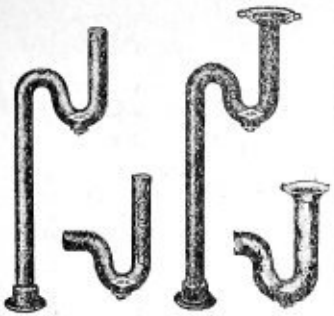
SINK STOPPERS.

No. 9—Rubber plate, fits any sink, converts sink into a dish pan or wash tub, w't per doz. 1¼ lbs., per dozen .....**ADE** $2.50

ONE DOZEN IN A BOX.

SINK STOPPERS AND STRAINERS.

Strainer and Plug Combined.



No. 8—Diam., in. ..	4½	4⅝	4¾
W't per doz., lbs. ..	2½	2¾	3
Per dozen	$9.60	9.60	9.60
	ECE	ECE	ECE

Made entirely of brass and nickel plated, will not rust and lasts a lifetime. When strainer is closed sink may be filled with water and used for washing dishes; it also prevents gas from escaping. Strainer can be opened or closed by turning top plate with finger. In case of stoppage, center plate may be removed and hose inserted, thoroughly cleaning pipe. It is made to fit in place of regular sink plate.

ONE-HALF DOZEN IN A BOX.

PLUMBING SUNDRIES AND FLUE CLEANERS.

SINK TRAPS.

No screws or rivets, made of best material, light, strong and simple. Cutters arranged so as to be always in direct contact with the metal of the flues, will override any irregularities of the tubes such as blisters and welds. The blades have a long shearing cut with a tendency like a plane to work in deeper, which keeps the knives always sharp. The size given is the outside diameter of the boiler flue for which the cleaner is intended, all boiler flues being designated by the outside diameter.

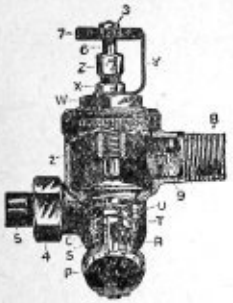
PIPE MENDERS.

No. 25—Steel, galvanized, for ½, ¾ and 1 in. pipe. One complete set in an envelope containing two pieces of rubber, 4 bolts and nuts, and 1 clamp. W t per doz. 4¾ lbs. per dozen BAJ $4.00

Will repair any burst water, gas or steam pipe.

Two or more clamps may be made continuous, by tapping the packing strip from one clamp to the other.



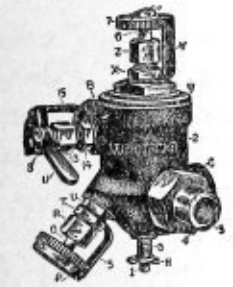
All ready to hand the customer. Full directions on envelope.

ONE DOZEN IN A BOX.

MAIL ORDER DEPARTMENT

Our constant attention in sixty years of business has been given to the perfection of the system of handling mail orders. Our object has always been to handle them with the greatest possible speed, with the result that we are enabled, in most cases, to ship mail orders the same day they are received.

LUNKENHEIMER GENERATOR VALVES.



"NONPAREIL," Type C, Left Hand, with Means for Regulating Lift of Disc and Butterfly Valve in Outlet Passage, for Gasoline Engines, Brass.

No. 78—Size.....	¾	1	1¼ in.
Union connection tapped for pipe....	¼	½	½ in.
Each.....	$6.75 CIJ	8.50 DIJ	10.00 JEGE

No. 76—Size.....	1½	2 in.
Union connection tapped for pipe.....	½	¼ in.
Each.....	$11.50 JFFJ	16.00 JIBJ

Same in construction and use as the No. 77 valve, except that it is left hand. (See general description below.)

"NONPAREIL," Type C, Right Hand, with Means for Regulating Lift of Disc and Butterfly Valve in Outlet Passage, for Gasoline Engines, Brass.

No. 77—Size.....	¾	1	1¼ in.
Union connection tapped for pipe..	¼	½	½ in.
Each.....	$6.75 CIJ	8.50 DIJ	10.00 JEGE

No. 77—Size.....	1¼	2 in.
Union connection tapped for pipe.....	½	¼ in.
Each.....	$11.50 JFFJ	16.00 JIBJ

This style of valve is provided with three adjustments, the gasoline needle valve for controlling the gasoline, an adjusting stem for regulating the quantity of air by governing the lift of the disc, and a butterfly throttle for regulating the quantity of mixture drawn into the engine.

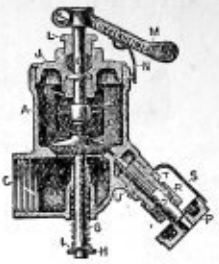
The throttle lever is provided with a notched sector and dial for securing the setting of the valve. (See general description at bottom of first column, page 660.)

"NONPAREIL," Type B, Left Hand, with Regulation for Lift of Disc, No Throttle Valve, for Gasoline Engines, Brass.

No. 78—Size.....	¾	¾	1 in.
Union connection tapped for pipe.	¼	½	½ in
Each.....	$4.25 BDE	5.25 CJJ	6.25 CFJ

No. 78—Size.....	1¼	1½	2 in.
Union connection tapped for pipe.	½	½	½ in
Each.....	$7.75 DDE	9.40 EDJ	14.00 JHJE

These valves are the same in construction as the No. 79, except that they are left hand. (See general description at bottom of first column, page 660.)



"NONPAREIL," Type B, Right Hand, with Regulation for Lift of Disc, No Throttle Valve, for Gasoline Engines, Brass.

No. 79—Size.....	¾	¾	1 in.
Union connection tapped for pipe.	¼	½	½ in
Each.....	$4.25 BDE	5.25 CJJ	6.25 CFJ

No. 79—Size.....	1¼	1½	2 in.
Union connection tapped for pipe.	½	½	½ in
Each.....	$7.75 DDE	9.40 EDJ	14.00 JHJE

These valves are provided with an adjusting stem to control the lift of the disc, thus regulating the quantity of air drawn into the engine. (See general description at bottom of first column, page 660.)

"NONPAREIL," Type A, Left Hand, with Sliding Throttle Controlling the Outlet Passage, No Regulation for Lift of Disc, for Gasoline Engines, Brass.

No. 80—Size.....	½	¾	1 in.
Union connection tapped for pipe.	¼	½	½ in.
Each.....	$5.00 BIJ	6.25 CFJ	7.50 DCJ

No. 80—Size.....	1¼	1½	2 in.
Union connection tapped for pipe.	½	¾	½ in.
Each.....	$9.00 EBJ	11.20 JFDE	15.90 JIAE

This valve is the same in construction and use as the No. 81, except that it is left hand. (See general description at bottom of first column, page 660.)

"NONPAREIL," Type A, Right Hand, with Sliding Throttle Controlling the Outlet Passage, No Regulation for Lift of Disc, for Gasoline Engines, Brass.

No. 81—Size.....	½	¾	1 in.
Union connection tapped for pipe.	¼	½	½ in
Each.....	$5.00 BIJ	6.25 CFJ	7.50 DCJ

No. 81—Size.....	1¼	1½	2 in.
Union connection tapped for pipe.	½	½	½ in.
Each.....	$9.00 EBJ	11.20 JFDE	15.90 JIAE

The special feature of this valve is the revolving throttle for controlling the speed of the engine by regulating the supply of mixture. (See general description at bottom of first column, page 660.)

GENERAL DESCRIPTION OF "NONPAREIL" GENERATOR VALVES.

"Nonpareil" valves are made in right and left hand patterns, with the inlet to the rear and the needle valve in front—the right hand pattern has the outlet to the left, while the left hand pattern has the outlet to the right. The discs have a tensile strength of about 50,000 pounds, and are provided with a screw driver slot for regrinding when worn. They cannot be excelled for the two-port two cycle engines, not even by a good carburetor. They have also been used with success on four cycle and three port two cycle engines.

VALVES.

GLOBE AND ANGLE VALVES WITH JENKIN'S DISCS.

J. D. ANGLE.

Heavy Steam Metal, Guaranteed for 125 lbs. Steam Working Pressure.

Discount **FD%.**

JGHJ JIJJ ADDJ

Can be used for either right or left hand.

PATENT CAP HYDRANT COCKS.

STEAM METAL, High Grade, Tested 200 Lbs., Very Best Quality, Fine Workmanship, Best of Material, Fine Appearance, Fully Guaranteed.

Size—Inches	¾	1
Size pipe thread, in....	¾	1
W't per doz., lbs.....	21	30
Per dozen	$38.40	$2.80

AECJ BAJJ

Hydrant cocks are usually set down in the ground below the freezing with pipe leading up above surface of ground with a goose neck for discharge. A rod is connected to the Tee Handle to turn water on and off. When shut off, water in upright discharge pipe drains out through waste hole shown in side of hydrant cock and prevents freezing.

⅝ AND ¾ IN., ONE-HALF DOZEN; 1 IN., ONE-THIRD DOZEN IN A PASTEBOARD BOX.

STANDARD HYDRANT COCKS.

For Iron Pipe, Red Metal, Big Stop Pin, Tested to 125 Lbs.

	JFE	JHJ	JIE

OIL CUPS.

Pioneer oil cups are especially adapted for traction engines, steam rollers and other machinery of like character.

They are easily filled and regulated, and will not come apart when used on jarring machinery.

"PIONEER," Slide-Top, Glass Body, Cast Brass, Highly Finished.

No. 515—Size	000	00	0	1

No. 591—Size	3½	4	
Threaded for pipe, in.	½	¾	
Capacity, oz.	8	12	
Each	$3.50	4.00	
	BHJ	CBJ	

The "Champion" cup is constructed on lines radically different from anything heretofore designed for this purpose.

The construction is simple; the body has a glass on each side to enable the engineer to see at a glance how much oil is in the cup, and the feeding arrangement consists of a tube, with a regulating valve at top, screwed into the base of the cup and connected with the oil hole in the shank.

GREASE CUPS.

The "Sentinel" cup is handsome in appearance and thoroughly strong and substantial in construction.

This cup will not shake to pieces when placed on jarring machinery.

A very important feature is, that when set to feed a given amount of oil, it will hold up to its rate of feed until the cup is entirely emptied.

"SENTINEL," Snap Lever, Sight Feed, Glass Body, Straight Shank, Brass.

No. 546—Size	0	1	1½
Threaded for pipe, in.	⅛	¼	¼

GREASE CUPS

LUNKENHEIMER.

"JEWEL," Automatic, Brass, for Bearings Shaftings, Loose Pulleys, Etc.

No. 511—Size	00	0	1
Threaded for pipe	⅛	¼	¼ in.
Capacity	⅛	½	1½ oz.
Each	$0.80	1.00	1.30
	DJ	JEJ	JFJ

No. 511—Size	2	3	4
Threaded for pipe	¼	⅜	⅜ in.
Capacity	3	6	10 oz.
Each	$1.70	2.30	3.20
	JHJ	AAJ	AEE

The Jewel cup was designed to meet the demand for a simple and inexpensive automatic cup. The base is of cast brass, and the top of tubing and spun brass. It is provided with a simple feed-regulating screw adjustable to suit any kind of grease.

"TIGER," Plain Brass, Adapted for Jarring Machinery.

No. 513—Size	00	0	1
Threaded for pipe	⅛	¼	¼ in.
Capacity	½	⅝	1 oz.
Each	$0.70	.90	1.15
	CJ	DJ	JEE

No. 513—Size	2	3	4
Threaded for pipe	⅜	½	½ in.
Capacity	2	3½	5 oz.
Each	$1.50	2.15	2.90
	JGJ	AJJ	ACE

The "Tiger" grease cup is of cast brass and well adapted for jarring machinery and is unsurpassed where a simple, compact and efficient cup is desired.

By screwing down the cap, the grease is forced to the bearing.

EMPRESS.

"EMPRESS," Plain Compression, Regular Pipe Thread, Polished Brass.

No. 100—Size	00	0	1
Threaded for pipe	⅛	¼	¼ in.
Capacity	½	⅝	1 oz.
Each	$0.70	.90	1.15

"EMPRESS," Plain Compression, Regular Pipe Thread, Rough Brass.

No. 101—Size	00	0	1
Threaded for pipe	⅛	¼	¼ in.
Capacity	½	⅝	1 oz.
Each	$0.56	.74	.96
	AB	AD	AI

No. 101—Size	2	3
Threaded for pipe	⅜	½
Capacity	2	3½
Each	$1.28	1.76
	JBE	JCE

"EMPRESS," Plain Compression, Regular Pipe Thread, Natural Finished Steel.

No. 102—Size	00	0	1
Threaded for pipe	⅛	¼	¼ in.
Capacity	½	⅝	1 oz.
Each	$0.50	.65	.80
	JH	AA	AC

No. 102—Size	2	3	4
Threaded for pipe	⅜	½	½ in.
Capacity	2	3½	5 oz.
Each	$1.05	1.45	2.00
	JAG	JBD	JCB

The Empress line of grease cups is pressed from sheet metal making them stronger than castings and free from air holes and other defects. The "lugs" on caps insure a "sure grip," and also gives them an artistic appearance.

They are adapted for all jarring machinery, and have proven satisfactory in every instance.

EMPRESS.

"EMPRESS," Ratchet Compression, Lug Cap, Regular Thread, Rough Brass.

No. 103—Size	000	00	0
Threaded for pipe	⅛	¼	¼ in.

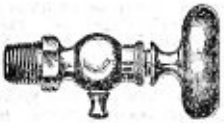
Threaded for pipe	⅜	
Capacity	3	
Each	$2.00	
	JEJ	

These cups have a special leather packing on plunger, insuring a tight smooth working joint. The spring pressure is regulated by the handle and the feed to bearing by screw in the shank which is readily adjusted for grease of any density. Being pressed from sheet metal they are stronger and much more durable than a cast cup.

VALVES, COCKS AND GAUGES.

RADIATOR AIR VALVES.

Compression, Wood Wheel, Threaded for Iron Pipe.



No. 3—⅜ in. .....each AA $0.16

Compression, Iron Key, Threaded for Iron Pipe.

INJECTORS AND EJECTORS.

PENBERTHY AUTOMATIC INJECTORS. FH%

The manufacturers test each injector before it is put in stock. The test requires that each injector must handle water of a temperature:

125 to 130 deg. when operated with 60 to 80 lbs. steam press.

115 to 120 deg. when operated with 100 lbs. steam press.

95 to 104 deg. when operated with 125 lbs. steam press.

They must work at 22 to 25 lbs. pressure and up to 165 lbs. with water of 74 degrees. They must lift from 22 feet below their position and force into boiler.

All Penberthy Injectors are tested to this standard, and are therefore developed to the highest degree possible for use on boilers of all pressures and types, used in the stationary, portable and traction engine service.

PENBERTHY, Style Left and Back, Suction Left, Overflow Front, Discharge Back.

The Penberthy Automatic Injector is perfectly designed. There are no unnecessary joints. The branches for pipe connections are integral continuations of the principal casting and do not admit of any chance for leaks to develop or for air to enter to affect the proper working of the injector. The tubes sleeve into the casing and are held in place without the use of threads. This feature, in consideration of the strain that is necessary to loosen threaded joints, saves the tubes from being twisted and crushed, when, for any reason, it is desired to remove them.

Operated with 80 lbs. of steam pressure, this ejector will lift 25 ft. and elevate 50 ft., delivering 15 lbs. of water per 1 lb. of steam used. The lifting and elevating power is so combined as to make this the best device of its kind.

We recommend this ejector for threshing engines, road rollers and engines of such type, also for filling locomotive tenders.

The lifting and elevating features of the Penberthy XL-96 Ejector make it the most perfect of those instruments and warrant its selection. It maintains its capacity throughout a great range of steam pressures and when used on deep lifts and high elevations of liquids. When operated within the general steam pressures, it will lift from a depth of 24 feet and at the same time elevate 60 or 70 feet above its position, thus making a vertical transfer of 80 to 90 feet. This ejector may be operated with air for the purpose of creating vacuum or for exhausting air or gas, and it also may be operated with water for transferring liquids or for exhausting air and gases.

Ejectors are shipped without strainers.

U. S. AUTOMATIC INJECTORS.

U. S., Heavy Brass Body, Adapted to Either Side of Boiler, Regular Style, Equipped with Drip Cock to Prevent Freezing.

GJ-AJ%

	PIPE CONNECTION INCH	HORSE POWER BASED ON ORDINARY TUB BOILER	HORSE POWER BASED ON 30 LBS. WATER PER H. P. PER HOUR.	CAPACITY PER HOUR 1 TO 3 FT. LIFT, STEAM PRESSURE 60 TO 80 LBS.		EACH
				MAXIMUM	MINIMUM

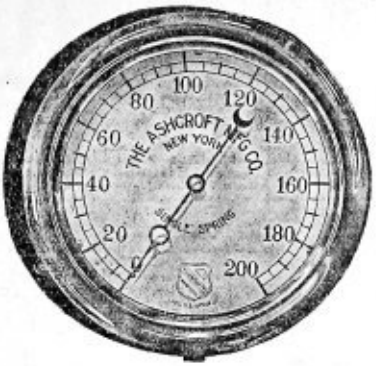
8	1¼	50 to 100	60 to 135	800	425	55.00*
9	1¼	75 to 135	85 to 165	1000	525	60.00*

The drip cock used on all U. S. injectors is a very important feature. It drains the injector when not in use and thus prevents freezing. By leaving it open the injector can be started even though the check valve leaks. This is impossible without the drip cock.

Another feature is the construction of the disc valve on the delivery tube, which being cup shaped, is forced to rise to its seat by the jets of water thrown against it from beneath.



Complete description and directions for applying and operating are furnished with each injector.

Each	$6.15	7.18	8.20	8.20	13.50	16.60
	AEJ	AEE	AGJ	AGE	JDCJ	JEBJ

Connections: The 2½ in. gauge is furnished with ⅛ in. male bottom connection and without cocks. Larger sizes have ¼ in. male bottom connection and are furnished complete with T handle cocks.

Graduation: Standard graduations are 30, 100, 160 or 200 pounds. Gauge should be graduated to double the highest working pressure.

IMPORTANT—In ordering be sure to specify size and graduation, and if brass or nickel plated rings are wanted.

For any pressure which will not deteriorate brass, such as on steam boilers, pressure tanks, water supply systems, pumps, etc.

ASHCROFT ALTITUDE GAUGES.

The interior mechanism consists of a single Ashcroft spring and standard geared movement. The rings on the cases are held by spring cotters, giving accessibility for adjustment of red hand.

The connection is ¼ in. male bottom.

Graduation: Standard graduation is 70 feet and is regularly carried in stock. We can furnish gauges to indicate any altitude from 30 to 500 feet. The black hand indicates the head of water in feet and the red index hand can be set by user at any desired point on the dial.

For indicating the height of water in tanks, reservoirs, stand pipes, heating systems, etc.

PACKED IN INDIVIDUAL WOODEN BOX.

SHIPPING FACILITIES

With our immense stock and very modern facilities for shipments, we are enabled to fill orders with unequaled promptness. On some of the roads we have special through cars which enable us to reach distant points 24 hours ahead of shipments made in the regular way.

PLAIN.

Red Brass, Rough Finish, Made for ¾ Inch Iron Pipe Thread.

No. 1345—½ in., w't per doz. 15 lbs., per dozen .....ACHJ $27.60

Nos. 1, 2 and 1145 Bibbs are made for use with gasoline, kerosene, and other oils. They are thoroughly ground and well lubricated to withstand the action of these liquids and remain tight, yet turning easily. They are practically a lock faucet as the handle can be removed and secreted, being much more convenient than the padlocked article. Will fit all stock faucets made by oil companies, as they are invariably threaded for ½ in. opening.

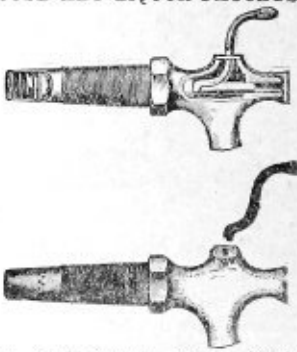
LIQUOR COCKS.



No. 65—McKenna's, ¾ in. long, loose key handle, polished brass body, nickel plated, heavily threaded shank, w't per doz. 9 lbs.,
per dozen ..... ABJJ $20.00

This faucet closes on the end, allowing no liquor to remain inside. The shank being nickel plated, no brass parts are exposed to contact with the liquor.

ONE-HALF DOZEN IN A BOX.

LOOSE KEY LIQUOR FAUCETS.

No. 17—McKenna's, patent burglar proof, ⅞ in., nickel plated, German silver strainer cap, w't per doz. 9½ lbs. ..... per dozen ABFJ $21.00

This Burglar-Proof Liquor Faucet embodies several improvements which obviate the usual objections to brass faucets. The valve is situated at the end inside the barrel, so that when closed no liquor remains in the body of the faucet. The German silver cap on end is provided with a strainer, which prevents the entrance of small particles of charcoal or other foreign substance.

The form of the loose key is such that it is impossible to open a faucet without a key exactly similar. The faucet can be kept open by a slight side movement of the key, but the key cannot be removed without closing the valve. The form of the valve which is used is such that it does not wear out, but will outlast any other.

ONE-HALF DOZEN IN A BOX.

KENNEY NEEDLE SHOWERS.

No. 140—All brass, heavily nickeled, w't per doz. 40 lbs., per dozen .....**JFABJ** $140.00

This novel shower throws four converging streams against the body at such angles as to result in no splashing, wetting of floor, or damaging the walls.
Ladies will appreciate this shower especially as it does not necessitate the wetting of their hair.
Very simple, and with no complications which require the services of a plumber for installing.
A winner with the trade.

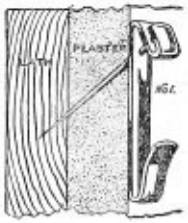
ONE-QUARTER DOZEN IN A 10c PACKET; 24 PACKETS (1½ GRO.) IN A CARTON.

MOORE PUSH PINS.



No. 9—Style B, assorted, Nos. 1 and 2, ⅝ and 1 in. lengths, on easel, w't per gro., 2 easels, ¾ lb., per gross .....A I J $2.40

The Gray Easel-Carton, dimensions 10½x9½x3¼ in., printed in two colors, contains:

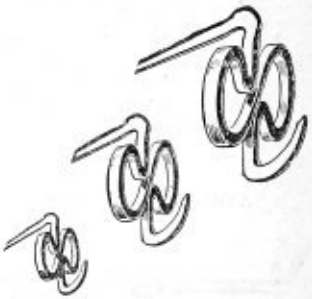
6—10c *packets of 6 No. 1 and*
6—10c *packets of 6 No. 2, or a total of* ½ *gross Moore Push Pins described above.*

WE DO NOT BREAK CARTONS.

HUNT'S INCLINE HOOK.

No. 1—Hunts incline hook, nickel plated brass hook, length 1 in., with ⅞ in. tool steel driving pin, oil tempered, for use in wood or plaster, w't per carton 1 lb.....per carton A I J $2.40

HUNT'S INCLINE PUSH PIN.



No. 16—One piece, nickel plated steel, inclined head, with ⅝ in. tool steel driving pin, oil tempered, for use in wood or plaster, length 1 in., w't per carton 1 lb. ....per carton A I J $2.40

The pin enters the wall on a downward angle of about 40 degrees and cannot drop out. The pin is set in a solid metal head and can be driven with a hammer without breaking, although it can be pushed with the fingers into almost any wall. The downward incline brings the suspended weight close to the wall, with the shortest possible pull downward.

SIX IN A TEN CENT (RETAIL) PACKAGE; TWENTY-FOUR PACKAGES IN A DISPLAY CARTON.

ANCHOR PICTURE HOOKS.

Made of One Piece of Square Bright Steel Wire, with Long Downward Sloping Prong—to Drive Into Wood or Plaster Walls—Looped Body, to Brace Against Wall, and Hook to Engage the Screw Eye on Picture Frame. In Three Sizes Shown in Above Full Size Illustrations.

No. 1018—Pasteboard display carton containing twelve 10c boxes as follows—four boxes each containing 18 small hooks, four boxes each containing 14 medium hooks, and four boxes each containing 10 large hooks, w't per carton 1 lb.....per carton J I E $1.20

We do not break cartons or alter assortments as shown above.

Use two Anchor hooks for each picture. The screw eyes on picture hang directly on the hooks, eliminating picture wire.

Small pictures may be hung on one hook, by placing screw eye in the center at top of frame.

Pictures may be readily interchanged, by fastening screw eyes in top of frame, any uniform distance apart, and setting Anchor hooks in wall with the same uniform spacing.

The S shaped looped body can be stretched slightly to adjust picture perfectly level after hanging. Hooks are invisible in use and do not mar the wall.

PICTURE HOOKS, WIRE, DISPLAY HANGERS, ETC.

No. 754 GVB—4 in., with flange on one side and brass adjustable legs on the other.....per dozen DHE 10.50

GVB Incubator Thermometers are made with greatest possible care. The tubes are thoroughly seasoned and tested, and the graduations on the scale are made with the utmost care to insure accuracy. We guarantee every GVB Incubator Thermometer to be accurate within one degree.

INCUBATOR HYGROMETERS.

No. 5796—Black oxidized brass scale, white filled figures, mercury tube, glass cistern with silk wick, 4 in. scale with complete directions, per dozen.....ACHJ $30.00

The Hygrometer used in connection with a standard grade thermometer accurately indicates percentage of moisture present in the incubator. Millions of chicks die in the shell every year for want of proper moisture conditions. The importance of a correct percentage of moisture during incubation has made the Hygrometer as important as a thermometer in an incubator.

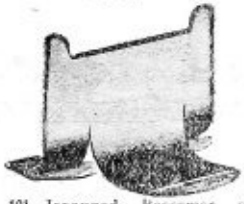
ONE DOZEN IN A PACKAGE.

FOOT SCRAPERS.

No. 14—Japanned iron, width 7 in., height 2 in., w't per doz. 7¼ lbs., per dozen ..... JFJ $1.00



ONE DOZEN IN A PACKAGE.

No. 104—Japanned steel, width 6 in., height 2 in., w't per doz. 4½ lbs., per dozen ..... CE $0.90

Made to supply the demand for inexpensive foot scraper, which at the same time will not bend or break, as will cast iron.

LOOSE.

No. 101—Japanned Bessemer steel, width 6 in., height 3 in., w't per doz. 6 lbs. .....per dozen AJJ $2.50

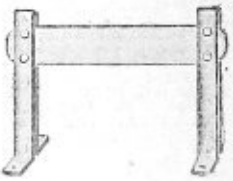
ONE DOZEN IN A BOX, WITH SCREWS.

No. 4—Japanned iron, width 6 in., height 4½ in., w't per doz. 11 lbs., per dozen ..... JHJ $1.50

ONE-HALF DOZEN IN A PACKAGE.

FOOT SCRAPERS.

No. 10—Grab's Automatic, has ten parallel plates made of sheet metal and rigidly kept in place, handsomely enameled, mud drops within space, and will not stick or clog, brushes are of best stiff bristles firmly clamped in place and can be replaced when desired, w't per doz. 35 lbs., per dozen ..... JHGJ $14.50



Grab's Foot Scraper may be rotated and cleaned or swept under with ease; cleans sole and brushes side of shoe in one operation and automatically adjusts itself to any size of shoe. Mud, dust, dirt, snow or slush drop in between plates, which prevents clogging. Scraper attaches easily and quickly to any door step or handy place. Will not injure the finest leather. In use at all seasons.

ONE IN A CASE.

No. 2—Japanned iron, width 5¾ in., height 2½ in., w't per doz. 6 lbs., per dozen ..... DE $0.70

ONE DOZEN IN A PACKAGE.

No. 32—Grade 2, H. F. Hockey, nickel plated, 9½, 10, 10½, 11, 11½ and 12 in., per pair .....**ABJ** $2.25

No. 33—Grade 2, H. F. Hockey, narrow for ladies, sizes 9, 9½, 10, 10½ and 11, per pair .....**ABJ** $2.25
Somewhat higher than the ordinary skate, and the blade has extra long bearing. It is light, consistent with strength.
ONE PAIR IN A BOX. AVERAGE W'T 2½ LBS.

No. 42—Grade 2, Hockey, welded steel ribbed blades, tempered, upper parts of crucible steel, polished and nickel plated, 10, 10½, 11, 11½ and 12 in., per pair .....**BDJ** $3.50
ONE PAIR IN A BOX. AVERAGE W'T 2½ LBS.

No. 94—Grade 3, half hockey, welded steel, ribbed blades, tempered upper parts of crucible steel, polished and nickel plated, foot and heel plates have countersunk screw holes for permanent attachment to shoe, safest and surest for figure skater, 10, 10½, 11 and 11½ in., per pair **CFJ** $5.00

No. 63—Grade 3, Safety Edge Hockey, best quality cast steel blades, highly tempered, upper parts of crucible steel, polished and nickel plated, 10, 10½, 11 and 11½ in., per pr. **CHJ** $5.00
In the construction of these hockey blades the several blades strengthen without adding weight, and blades are of high temper. The safety edge foot plate prevents slipping, having an extension projecting beyond the inside edge of shoe sole, which is ground off to conform to shape of sole, after skate is fastened for use. With each pair of skates two pieces of steel are furnished for use on outer side of sole.
ONE PAIR IN A BOX. AVERAGE W'T 2½ LBS.

No. 66—Grade 3, Canadian Hockey, best quality throughout, edges beveled, superior finish, blades warranted hard, polished and nickel plated, 10, 10½, 11 and 11½ in., per pair **CHJ** $5.00
A popular Canadian pattern.
ONE PAIR IN A BOX. AVERAGE W'T 2 LBS.

ICE SKATES.

Sizes 10, 10½, 11 and 11½ Inches.

No. 643—Grade 3, polished and nickeled, built light and strong on lines approved by the fastest and most expert players, skeleton tops of especially prepared steel, foot plates attached to blades by reinforced extension brackets which are screwed permanently to shoes, in addition to being firmly riveted to plates, heels are formed of two double stanchion, embossed, non-breakable brackets, blades of welded steel, looking-glass finish, hardest degree of temper, and about 5-32 in. thick, note the center bearing on ice and the toe and heel rock, all essential for the best work, guaranteed in every particular, per pair .....**CHJ** $5.00

No. 21—Grade 3, Racer "All Clamp," tempered by Barney & Berry's patent process, polished and nickel plated, **10½, 11 and 11½ in., per pr. CHJ** $5.00

Designed and made expressly for fast skating. All material used in their manufacture is of the best quality. They are made extra long and as light as is consistent with strength.

ONE PAIR IN A BOX. AVERAGE W'T 2¾ LBS.

RACING SKATES.

Nestor Johnson "North Star."

No. 300—Tubular, finely tempered tool steel blades, other parts aluminum bronze and nickel, highly finished, shoes of India kangaroo leather, for men's shoes w't per pr. 3½ lbs., per pair .....**JGBJ** $12.00

SKATE SHARPENERS.

No. 10—Perfect, for hollow grinding, blued steel holder, projecting lugs, flexible grinders, rotary emery wheel, per dozen .....**ABJ** $1.50
No. 15—Perfect, for flat grinding, otherwise same as No. 10, per dozen .....**ABJ** $1.50
Will grind the hardest tool steel runner and positively will not soften it. The projecting lugs give an ideal grip; the guides being flexible, can be pressed to fit the thickness of any skate runner. Emery wheel is of best emery and corundum.
ONE DOZEN ON DISPLAY CARD.

HEEL PLATES.

No. 14—Regular, per hundred pairs .....**ABJ** $2.00
No. 97—Large holes, per hundred pairs .....**ABJ** $2.00

ANKLE SUPPORTS.

No. 5—Heavy russet leather, laced front, men's, boys' and ladies', w't per doz. prs. 3¾ lbs., per dozen pairs .....**JGBJ** $12.00
ONE DOZEN PAIRS IN A BOX.

No. 2—Model B, grade 2, nickel plated, russet leather, w't per doz. prs. 6 lbs., per dozen pairs .....**JHDJ** $14.00
The lower part should be riveted to heel plate of skate, and a hinge plate connecting with upper part is made in line with the ankle, allowing the free forward and backward movement essential for easy skating. Strap is attached to guard which slides freely up and down, while absolutely preventing ankle from turning sideways.
It can be attached to any ordinary lever skate, and it is only necessary to drill two small holes, in heel clamp corresponding to those in support and fasten securely by means of the rivets which accompany supports.
ONE PAIR IN A BOX.

No. 3—Model A, for men, grade 2, nickel plated, for use on HF, F, FZ and all clamp racer and hockey, all clamp fastening skates, w't per doz. prs. 6 lbs. ...per dozen pairs **AJAJ** $16.00
No. 3½—Model A, for ladies' skates, otherwise same as No. 3, per dozen pairs .....**AJAJ** $16.00
The lower part forms a heel clamp for skate and a hinge joint connecting with upper part is made in line with ankle, allowing the free forward and backward movement.
ONE PAIR IN A BOX.

BABY CARRIAGES.

PULLMAN CARRIAGE—Full Size.
Reversible Cradle Gear.

Body—Half round reed, finished in natural enamel upholstered in baby blue, or brown upholstered in brown. Fully enclosed four-positioned, reclining back and deep foot well.
Upholstering—Corduroy, colors baby blue or brown in above combination.
Hood—Reed, new design, adjustable, sliding, corduroy lined.
Gear—Patent full tubular fifth wheel reversible cradle gear, wood cross handle with nickel plated side grips and ferrules, gear enameled brown, oil tempered springs.
Wheels—14 inch, artillery equipped with ⅝ in. rubber tires.
Weight—Approx. shipping w't 80 lbs.
No. 2370★.....each **BCDJ** $39.00

PULLMAN CARRIAGE—Full Size.
Reversible Cradle Gear.

Body—Full round reed, finished in natural enamel upholstered in baby blue, or brown upholstered in brown. Fully enclosed four-positioned reclining back and deep foot well.
Upholstering—Corduroy, colors baby blue or brown in above combination.
Hood—Reed, new design, adjustable, sliding, corduroy lined.
Gear—Patent full tubular fifth wheel reversible cradle gear, wood cross handle with nickel plated side grips and ferrules, gear enameled brown, oil tempered springs.
Wheels—14 inch, artillery, equipped with ⅝ in. rubber tires.
Weight—Approx. shipping w't 80 lbs.
No. 2375★.....each **CABJ** $52.00

A TALK ON GREENLAND REFRIGERATORS.

Full sized sectional view of one wall of Greenland.

Porcelain Steel Lined Refrigerators.

All Refrigerators shown on page 704 have ten walls, all others eight walls.

A PERFECT REFRIGERATOR.

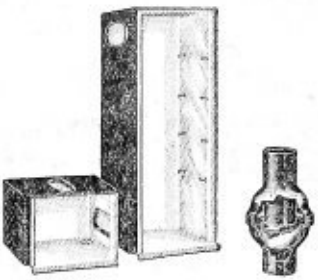
The standard of perfection in refrigerator construction is measured by the following requirements—

1. It must be a non-conductor of heat and cold, to insure ice economy and low temperature.

2. It must allow a free circulation of air to chill the food and keep it germ proof.

3. It must be so constructed as to be thoroughly and easily cleaned.

In offering our Porcelain Greenland Refrigerators to the trade, we firmly believe that they are the nearest perfection of any refrigerator on the market. They have stood the test of time and are in use in every state and many foreign countries.



Our cocoa fibre insulation is one of the best non-conductors ever used. Nearly every other kind has been tested and we are thoroughly convinced of its superiority. We call your special attention to the above cut illustrating the construction of Greenland Refrigerators.

A Barrier Against Heat and Cold.

A scientific combination of walls of wood, air and insulating materials. What further proof do you need of the efficiency of our walls as non-conductors and ice savers.

Next in importance to case construction and insulation is free air circulation. Our refrigerators are so constructed that a current of cold, dry, pure air is continually descending from the ice to the provision chamber, where, in the process of chilling the food, it becomes heated and naturally rises to the ice chamber, laden with food moisture and impurities, which it deposits on the ice. These are carried off with the melted ice water and the air again chilled, dried and purified descends to the provision chamber to repeat its course.

LINING.

Lining.

Our Greenland Refrigerators are porcelain-steel and white enamel lined.

The new one-piece porcelain provision chambers are formed with the outer edges rolled in such a way that the heavy wooden standards, which have been previously on each side of the door opening, have been done away with, and the little inaccessible corners at the front of the provision chambers have been eliminated.

They are equipped with retinned wire shelves with open mesh, allowing free circulation of air. The waste pipe and trap, placed in the bottom of the provision chamber, are of brass, nickel plated. The flues, ice rack, shelves, waste pipe and trap are all easily removed for cleaning. They are all built with a patent device for returning all water from accidental leakage to the trap, so that the walls will never become water-soaked and musty.

Our enamel lined refrigerators have practically the same interior construction as described above. The very best enamel is used. It can be washed with soap and water without injury.

Doors of the porcelain lined have been improved, by covering all the back with the genuine porcelain, formed in a pan shaped piece, thus leaving only the three-coat white porcelain exposed to the interior of the refrigerator.

This latter improvement is carried out in the enameled line as well, by extending the galvanized iron over the backs of the doors in the same manner and is white enameled when the rest of the interior of the box has that finish.

USED ONLY ON THE

Description—The lock is positively self-closing, draws the door air tight, takes care of all variance and sag of the door, and has no effect on the hinges.

In all spring locks in the past, the objection has been that the springs corroded, and the life of the lock was limited by this. In our new lock, we have the most effective spring of all the types made, viz., nickel steel wire coiled spring, and this spring has a compressed action similar to that on a poppet valve motor. The life of such a spring is assured. Further, this spring is non-corroding.

RECORD OF TEST.

For one week, at the rate of 34 times per minute—from 7 a. m. to 6 p. m.—this door was mechanically opened and closed. The week totaled 124,00 times.

After this service, an examination of the lock showed no weakness in any of its parts.

In examining the lock and door, special attention was paid to the hinges. There was no loosening in the hinges or sag in the door. This lock solves the problem of a positive, self-closing and air tight latch for refrigerator doors.

Used on Nansen only.

FACTS ABOUT REFRIGERATION.

A refrigerator is purchased for the purpose of preserving foodstuffs, liquids, etc. However, this cannot be done without the intelligent assistance of the person handling it.

Many people do not understand the proper way to handle and care for a refrigerator.

First they do not buy enough ice to cool the box. A piece of ice weighing twenty-five pounds is not sufficient to cool a refrigerator, the ice chamber of which has a far greater capacity. The result of this is a complaint to the dealer that the refrigerator will not even keep butter hard.

It is the intention of the manufacturer to build a refrigerator strictly in proper proportion, allowing in the ice chamber only enough space for the ice necessary to cool the provision chamber.

In order to get the desired results, with either an expensive or an inexpensive refrigerator, the ice chamber must be filled with ice.

It is easy to understand that this is the proper way to save ice, because ice will not melt nearly so fast in an ice chamber properly filled where the temperature is down to forty-eight degrees, as in a refrigerator where the ice chamber lacks a proper supply of ice.

Some people will rob the refrigerator of ice to make ice cream or to put in water, iced tea, or to cool champagne, etc., and then blame the refrigerator for not preserving the food.

Another mistake is to think that ice can be saved by covering it with a blanket or newspaper and at the same time preserve the food.

It must be remembered that ice will not reduce the temperature in the provision chamber unless it is melted. It is the melting of the ice that produces the cold, and if the temperature could be reduced to 32 degrees, the ice would stop melting. This, of course, is impossible with the necessary frequent opening of the doors.

The doors are likely to be left slightly open, which will not do at all. Not only is the ice wasted by the admission of warm air, but this warm air also contains moisture which will condense on the coldest part of the refrigerator—just under the ice chamber—with the result that the food becomes mouldy. It might thus be thought that the refrigerator leaked, when the carelessness of some person alone was responsible.

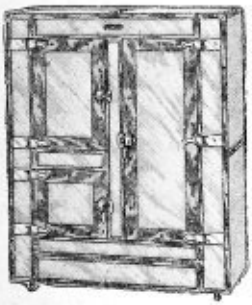
In many cases people are so very neat as to spread white paper over the refrigerator shelves. This should not be done, because it stops the circulation of air.

Another important feature is the location of the refrigerator. It should neither be too near the kitchen stove, nor out on the porch. If the refrigerator is placed where the sun will shine on it the wood will warp, open up at the joints and so destroy the insulation. It will then be impossible to get a low temperature.

A damp cellar will also ruin the refrigerator by causing the wood to swell.

Another frequent cause for dissatisfaction is the fact that the trap gets out of place or is lost entirely. This would let in a constant stream of warm air and act just the same as though the doors were left open. Every time a refrigerator is cleaned, viz., once a week, precaution should be taken to see that the trap is in its proper place in the top of the lower waste pipe.

Waste food, in the form of slime, will accumulate in the waste pipe and trap, and will eventually stop the flow of water. To prevent flooding the refrigerator, this waste must be removed by lifting the waste pipe straight up and taking it entirely out to find the trap.



It is understood that a good refrigerator—one which will preserve food properly and consume as little ice as possible in so doing—must be constructed with the greatest of care. The best quality of lumber must be used, the doors made to fit tightly and the insulation, the most important factor, must be made from the best of materials.

The Greenland Refrigerators are solidly constructed from the best of select kiln-dried lumber. The insulation, consisting of wool felt, charcoal sheathing and waterproof paper, makes the refrigerator a non-conductor of heat and cold.

If properly handled and cared for the will give unalloyed satisfaction for an indefinite time.

COFFEE MILLS.

No. 446 REVONOC—Height 16 in., chilled steel grinder, frame attractively painted red with gold stripes, glass canister and tumbler, capacity one pound, w't per doz. 60 lbs.....per dozen **ABIJ** $20.00

The REVONOC is the ideal family coffee mill. It is a great improvement in coffee mill construction and in finish and material it conforms to the high standard of REVONOC quality.

FRAME—The strong cast iron frame is made so as to be screwed to the wall and held firmly in place. It can easily be taken apart if necessary.

GRINDER—The chilled steel grinder is made with beveled knives and short teeth that do the work perfectly, cutting the coffee instead of crushing it, while the long handle gives better leverage and requires less effort to operate than other models.

FINISH—The REVONOC Coffee Mill is attractively painted in red with gold stripes and the clear glass canister is neatly labeled.

Extra canisters for REVONOC .....per dozen **BDJ** $4.50
Extra tumblers for REVONOC .....per dozen **JIJ** 1.65

ONE IN A CORRUGATED STRAWBOARD BOX, ONE-HALF DOZEN IN A CASE.

Dazey Churns are made to run as noiselessly and smoothly as a bicycle. With this churn every housekeeper can provide herself with fresh and absolutely pure butter of an excellent quality without trouble, and the buttermilk left after churning will be found to be a most refreshing and healthful drink. Directions for operating with each churn.

ONE-HALF DOZEN IN A CRATE.

Adjustable Dasher of White Maple, Heavily Tin Plated Dash Rod, Will Not Rust, Extra Heavily Tinned Receptacle, Made of Best Steel and Iron.

Nos.	1	2
Capacity, gal.	6	3
Churning capacity, gal.	1 to 4	¼ to 2
W't crtd., lbs.	35	15
Each	$7.50 DEJ	4.50 BGJ

The powerful dasher of this churn, aided by the square corners of the receptacle, produces a scientific agitation, making it possible to churn in from two to five minutes. Working of butter is eliminated by the Dazey because the globules in building up their natural condition have squeezed out all the milk and formed into hard uniform sized grains. To wash off outside of grains is all that is necessary. Each churn has butter scoop.

CAN BE SHIPPED FROM FACTORY, ST. LOUIS, MO., AT SAME PRICES.

	AECJ

These bags are made of material having the peculiar property of holding water and yet exuding enough moisture to prevent the sun from having any effect on the water inside.

It can be taken on horseback, carried on the arm, or suspended from buggy, wagon, plow or any machinery in use, so that a cool, refreshing drink will always be at hand.

Hang the bag in the air.

The material allows the water to evaporate slightly. Notice a drop of water on the outside of the bag continually. The constant exudation and evaporation keeps the water inside the bag cool and palatable.

First and second time filling, water will evaporate quite rapidly, after which bag is in condition to hold water indefinitely. Some evaporation is necessary to keep water fresh.

Guaranteed to keep water cool for forty-eight hours. When empty or its use is not desired, it can be folded up as a towel and carried in the pocket.

Sanitary Bags have the opening in the center, which is a decided advantage over the old style as they may be easily and thoroughly cleaned in a very few minutes.

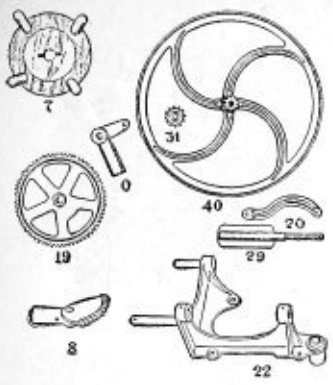
Construction.
The body of these washboards is made of one piece No. 28 gauge special galvanized steel, 18x20 in. The arch over which is placed the rubbing surface is reinforced by ten heavy corrugations, thus insuring the greatest strength. The body is made rigid by the tubular side posts, extending the whole length, into which the wooden legs are received and securely fastened. The face or rubbing surface is of brass or zinc 11x11¾ in. When these posts are assembled the "Solid Metal" is absolutely perfect from every standpoint.

No. 55 Reversible.
Solid Convex Rubbing Surface, Water-Tight Soap Shelf, Hollow Head, Round and Hollow Sides, Wooden Legs and Rounded Ends.
No. 55 Reversible—Zinc face, angle crimp, w't per doz. 34 lbs., per dozen .....**DEJ** $7.50

No. 56 Reversible.
No. 56 Reversible—Brass face, spiral crimp, w't per doz. 34 lbs., per dozen .....**EDJ** $9.00
ONE-HALF DOZEN IN A BUNDLE.

The highest standard of excellence is maintained in the manufacture of our boards.



All these wash boards are fully guaranteed by their maker as to material, construction and finish.

The frames and backs are made of carefully seasoned wood, accurately put together, and you will find that hot or cold water and cleansing acids will not cause them to warp or come apart.

The crimps of the various styles are carefully and scientifically designed so as to give the best results for their particular purpose.

WASHERS AND WASHER PARTS.

REVONOC WASHER PARTS.

No. 7—Pinwheel, w't 2 lbs., each .....**JFG** $1.00

No. 8—Gear segment, for new style, w't 2¼ lbs. .....each **CH** $0.40

No. 0—Handle socket, for new style, w't 2 lbs. .....each **CA** $0.50

No. 22—Main frame, for new style, w't 7½ lbs. .....each **JIC** $1.80

No. 19—Gear wheel, 65 cogs, w't 3½ lbs., each .....**DD** $0.70

No. 20—Pitman, w't 14 oz., each .....**BC** .30

No. 29—Dasher center, w't 1¼ lbs., each .....**CA** $0.50

No. 31—Pinion, w't 7 oz., each .....**BD** .30

No. 40—Fly wheel, 10 cogs, w't 13½ lbs., each .....**ADG** $2.50

Extra wood handles ....each **AE** .30

IMPROVED REVONOC PARTS.

No. 19X

These additional cogs work as so many more levers, thereby increasing the easy motion.

No. 19X. No. 42.

No. 19X—Gear wheel, 94 cogs, w't 3½ lbs. .....each **DD** $0.70

No. 42—Fly wheel, 15 cogs on pinion, w't 13½ lbs.....each **ADG** $2.50

WATER MOTOR BELTS.

Showing REVONOC Washer belted to a Line Shaft.

9 ft., endless belt for No. 1994 water motors, 1 in. wide, made of rubber and cloth webbing ....each **EJ** $0.80

One of these endless belts should be purchased with each water motor, as the regular rubber and leather belts are too heavy and use too much power.

REVONOC POWER PULLEY.

REVONOC Pulley, 8 in., w't per doz. 42 lbs., per dozen .....**ADDJ** $36.00

WATER MOTORS AND BRACKETS.

Cut shows motor and bracket attached. Sold separately.

No. 1194—Motor, 2 in. flat belt double flanged pulley, made of brass, iron and steel, w't per doz. 160 lbs., per dozen .....**JEEJJ** $144.00

No. 1944—Wall or bench brackets, w't per doz. 17 lbs. ..perdozen **DCJ** $6.00

PEERLESS WATER POWER WASHERS.

No. 30—Tub is very substantial, of thoroughly kiln dried clear southern cypress, rack is fully covered with a shield, shipping w't 900 lbs., per dozen .....**AEABJ** $252.00

The pressure in the motor is concentrated so perfectly alternately on each side of the piston head that it only takes a minimum of pressure to produce more strokes per minute than any other water motor, and the "Peerless" water power machine is guaranteed to operate successfully on 20 lbs. pressure.

HAND WASHING.

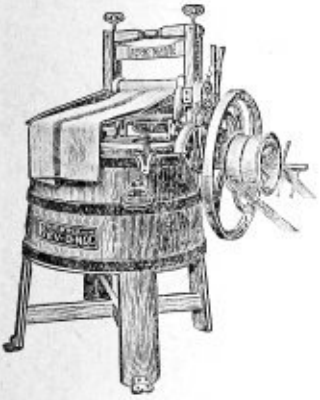
No. 41—Clear grained Louisiana red cypress, height 28 in., diam. at top 21½ in., diam. at bottom 24 in., gearing is entirely enclosed, w't per doz. 1,040 lbs. ..per dozen **AJCBJ** $172.00

The mechanism which operates the dolly consists of two sprockets connected by an endless chain enclosed in an injury proof case securely fastened to the lid of the machine. The lever which operates the mechanism has a detachable wooden handle at the top and a foot pedal at the bottom. The pitman operates a horizontal internal spur gear which engages an intermediate fibre spur gear engaging the pinion on the fly wheel. Fly wheel is carried on a large ball bearing contained in a hardened steel case.

REVONOC POWER AND ELECTRIC WASHERS.

Side Lever Socket.

Top Lever Socket.



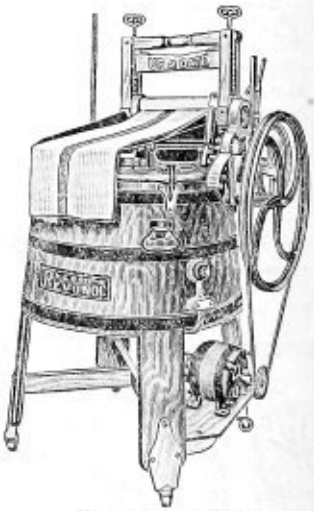
Easy Access to Tub.

No. 10 REVONOC—Height 30 in., width 23 in., diam. of fly wheel 19 in., red Louisiana tub, grained, corrugated interior, double top, hinged cover, strong wringer attachment, double handle socket, cross braced legs, absolutely rigid, w't per doz. 1080 lbs.....per dozen **JHFDJ** $14*.00

The REVONOC lever arrangement is such that the machine when full may be operated by a child, and the motion is such as not to grow tiresome when continued. The fly wheel makes seven revolutions to one downward thrust of the lever. The compound gearing together with the rapid motion of the fly wheel insures a uniform and non-jerking operation of the machine. The top is made double which eliminates warping, and the metal parts are simple and strongly made.

REVONOC FOR POWER.

No. 26 REVONOC.



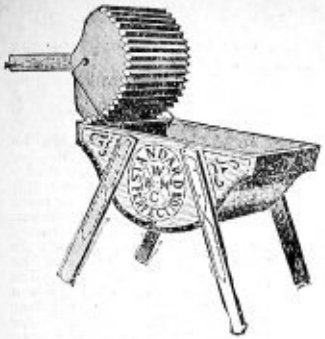
No. 26 REVONOC—Height 28 in., width at top 19½ in., width at bottom 22 in., depth of tub 12½ in., kiln dried cypress tub, grained, corrugated interior, double top, hinged cover, cross braced legs, w't crated 1860 lbs., per dozen .....**BEBJJ** $420.00

The REVONOC is being used successfully with gasoline, steam or turbine power. The best results are produced when provisions are made for 285 revolutions of the fly wheel per minute. Has shift to lead belt from the driving to the loose pulley and vice versa. Proper regulation of speed is an important essential in securing best results with the No. 26 REVONOC.

REVONOC ELECTRIC.

No. 28 REVONOC—For alternating current, w't crated 2160 lbs., otherwise same as No. 26 REVONOC★.....per dozen **JFDHJJ** $1,080.00

No. 29 REVONOC—For direct current, otherwise same as No. 26 REVONOC. per dozen★ .....**JEGFJJ** 1,008.00



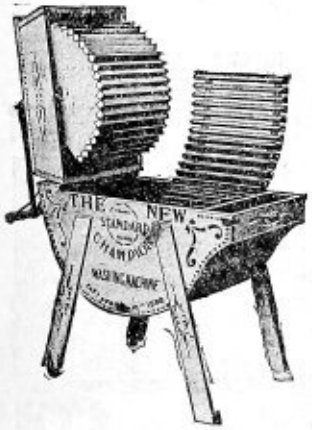
Nos. 28 and 29 REVONOC.

The REVONOC is geared so as to retain a uniform momentum from the fly wheel, thereby relieving the motor from a great strain, and consequently using less current than other machines. The motor is placed on an adjustable base so as to retain the proper tension on the belt at all times. The cut-off switch is directly in front of the machine and may be turned on or off without leaving the washer. The galvanized iron dasher center is covered by a galvanized cap, thereby preventing clothes from being caught between the wood dolly and the dasher center. Furthermore no oil or grease may possibly get down into the tub. The REVONOC Electric Washer is the most efficient and most economical that money can buy. The motors are supplied for both alternating and direct current, and have drop cord to attach to any convenient socket. All machines are supplied with Guarantee Wringers which may be detached. By the use of a simple hand lever, the wringer may be run forward, reversed or stopped instantly.

In ordering we must have the following information—Direct current, number of volts, alternating current, single phase, number of volts and cycles.

HAND WASHING MACHINES, REPAIRS, ETC.

No. 120—Standard Perfection, hardwood body, height 30 in., length 34 in., width 12½ in., wood grip, hardwood frame cylinder, malleable iron castings, hinged cover, w't per doz. 600 lbs.★ ....per dozen **CAJE** $50.00



No. 4—American, family size, hardwood, height 28 in., width 24 in., inside corrugated, hinged cover, galvanized iron, standard and cog wheels, hardwood handle and dasher, w't per dozen 600 lbs., per doz. **DJBE** $70.00

Hardwood Body, and Frame Cylinder, Malleable Iron Castings, Hinged Cover.

No. 1—Boss, medium, height 31 in., length 35 in., width 19 in., 16-in. fly wheel, wood handle, w't per doz. 1,080 lbs. .....per dozen $125.00

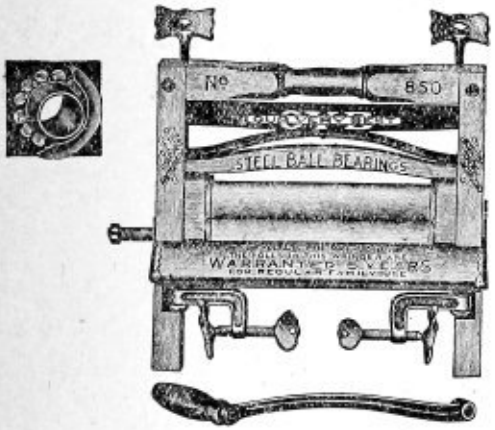
F. O. B. Chicago.....**AJJJJ**
F. O. B. Cincinnati, O....**JIHFJ**

GUARANTEED BALL BEARING WRINGERS.

On this and the following page we illustrate several patterns of Wringers, under the brands ⊕V⊕ and REVONOC. The rolls in ⊕V⊕ wringers are guaranteed for five years, those in the REVONOC are guaranteed for three years, otherwise they are identical.

These wringers embody two very important improvements, namely, the "Enclosed Cog Wheels" and "Ball Bearings," but in connection with these are a number of other points which contribute to their superiority.

Frame—This is made of seasoned hard wood, in the simplest manner, carefully joined and bolted, all of the working parts encased leaving nothing to be desired in the appearance and convenience of the wringer. It is carefully varnished, painted, and well finished in every detail.



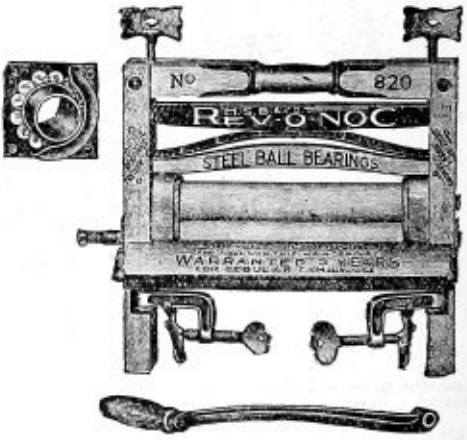
Rolls—These are of exceptional quality and will last the term of years for which they are guaranteed, if used for family washing. The ⊕V⊕ are made from the best solid white rubber, the same quality from outside of cover to shaft, are soft and have the proper elasticity to do good wringing. The rolls of the REVONOC are second only to the ⊕V⊕.

Covered Gearing—This is a very important improvement—there is no danger of clothing catching in the cogs. The appearance is vastly improved. The spring is longer, removing the strain on the rollers when rolls are separated, and the danger of children getting their fingers crushed is entirely removed.

Ball Bearings—These are located on the outside of the cog wheels, and therefore removed a considerable distance from the rolls, so that no water can reach them from wringing of clothes. The ball race is so constructed that should any water reach the bearings, it will drain out immediatley, avoiding rust. The bearings can be oiled without any danger of the oil reaching the rolls. The balls are solid steel of uniform size. The bearings are of large size and reduce friction to a minimum, and ⊕V⊕ or REVONOC wringers can be operated with one half the effort of an ordinary wringer.

Other Points—Everything about these wringers is high grade and made for use. The thumb screws are large and easy to handle. The spring is made of the best quality of steel, adapted for the purpose. The clamps are extra strong, easy to apply, and are made to be attached to wood or galvanized tubs, either round or square.

⊕V⊕



No. 850 ⊕V⊕—10x13¼ in. finest quality rolls, warranted for five years, encased cog wheels, with ball bearings, large frame, folding apron, adjustable clamps, for either wood or galvanized tubs, w't per doz. 275 lbs., per doz. **DFHJ** $76.00
Nos. 12, 16, 51 and 52 rolls will fit No. 850 ⊕V⊕.

No. 851 ⊕V⊕—11x13¼ in. finest quality rolls, warranted for five years, otherwise same as No. 850 ⊕V⊕, w't per doz. 290 lbs. ..... per dozen **EAFG** $84.00
Nos. 41, 42, 61 and 62 rolls, will fit No. 851 ⊕V⊕.

ONE-QUARTER DOZEN IN A CASE.

REVONOC

No. 820 REVONOC—10x13¼ in. rolls, warranted for three years, ball bearings, encased cog wheels and bearings, large frame, folding apron, adjustable clamps, for either wood or galvanized tubs, w't per doz. 275 lbs., per dozen **DBJJ** $68.00
Nos. 12, 16, 51 and 52 rolls will fit No. 820 REVONOC.

No. 821 REVONOC—11x13¼ in. rolls, warranted for three years, otherwise same as No. 820 REVONOC, w't per doz. 290 lbs., per dozen ..... **DFBJ** $75.00
Nos. 41, 42, 61 and 62 rolls will fit No. 821 REVONOC.

ONE-QUARTER DOZEN IN A BOX.

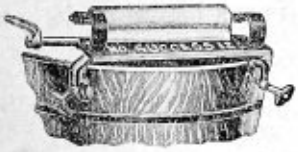
WRINGERS.

If either roll wears out during time of warranty we will replace the same free of charge. When making claim state if it is top or bottom roll, also give us the name and number of the wringer.

This tag to be valid must be signed and dated by the dealer selling the wringer, at time of sale, and must be sent to us when making claim.



Wringers not warranted if operated by power.

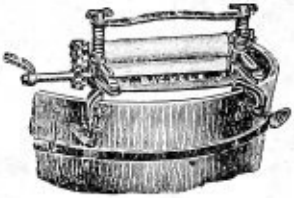
LOVELL MANUFACTURING CO., Erie, Pa.

From Whom Purchased .....
Town and State.....
Date Purchased.....19.....

Washing fluids and oils are injurious to rubber rolls.

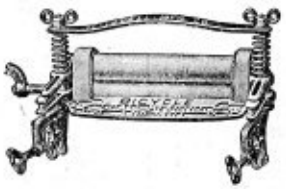
If any wringer should prove defective within the warranty period, do not return the wringer or roll, or give your customer a new one, but send to us for the necessary repairs, enclosing warranty tag, and new roll will be forwarded promptly, free of charge. When ordering roll always state name and number of the wringer.

No. S12—Success, 10x1¾ in. rolls, warranted for one year, malleable iron frame, steel springs, malleable iron



No. M13C—Mendota, 10x1¾ in. rolls, warranted for one year, steel spiral pressure spring, adjustable tension, iron frame, malleable iron apron, adjustable clamps, for either wood or galvanized tubs, w't per doz. 240 lbs., per dozen .....**CAJE** $50.00

No. M131—Mendota, 11x1¾ in. rolls, w't per doz. 260 lbs., otherwise same as No. M130 ....per dozen **CEAJ** $56.00



No. D22—Domestic, 10x1¾ in. rolls, warranted for three years, stationary malleable iron apron, malleable iron frame, adjustable clamps, for either wood or galvanized tubs, w't per doz. 240 lbs. .....per dozen **CFCJ** $58.00

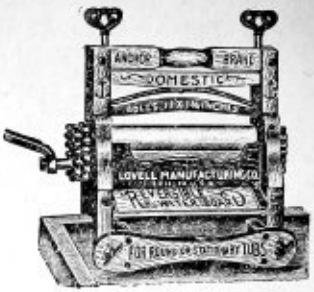
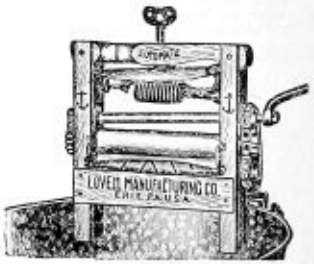
No. 781S—Guarantee, 11x1¾ in. rolls, warranted five years, wood frame, steel spiral springs, steel ball bearings, for round, also stationary wood or soapstone tubs, Lovel's cog wheel shields, w't per doz. 315 lbs., per dozen .....**EDGE** $90.00



No. B770—Bicycle, 10x1¾ in. rolls, warranted for three years, ball bearings, encased cog wheels and bearings, large frame, folding apron, adjustable clamps for either wood or galvanized tubs, w't per doz. 288 lbs., per dozen .....**DBJJ** $68.00



No. B771—Bicycle, 11x1¾ in. rolls, warranted for three years, steel ball bearings, folding apron, adjustable clamps for either wood or galvanized tubs, w't per doz. 290 lbs., per dozen .....**DEEJ** $75.00

No. 761S—Bicycle, 11x1¾ in. rolls, warranted three years, wood frame, steel spiral springs, steel ball bearings, for round, also stationary wood or soapstone tubs, Lovel's cog wheel shields, w't per doz. 315 lbs., per dozen .....**DIJJ** $81.00

No. D341—Domestic, 11x1¾ in. rolls, warranted three years, hardwood frame, metal bearings, flat steel spring, reversible water-board, conducts water into either tub, for round also stationary or soapstone tubs, material of which is not over 2 in. thick, w't per doz. 310 lbs., per dozen .....**DCGJ** $71.00

No. A110—Automatic, 10x1¾ in., extra high grade rolls, warranted five years, hardwood frame, sprocket chain with gear arrangement, automatic adjustment, w't per doz. 260 lbs. .....per dozen **DBEE** $68.00

Rolls Nos. 119 and 120 adapted for this wringer.

The adjustment equalizes the roll pressure as shown in illustration, thus wringing equally dry the thick and thin portions of the garment. The sprocket chain with gear attachment gives more purchase power than in ordinary wringers, and thus makes the wringer turn with very little labor.

ALL ONE-QUARTER DOZEN IN A CASE.

WRINGERS AND MANGLES.

BENCH WRINGERS.

No. S-5—Sunshine, 10x1¾ in. rolls, warranted for one year, steel spring, improved guide board, oscillating drip board, folding bench, w't per doz. 485 lbs.....per dozen **DDHE** $74.00

Rolls 11 *and* 15 *adapted for this wringer.*

ONE IN A CASE.

MANGLES.

No. 25—Niagara, 24x3½ in., hardwood rolls, iron frame, tempered steel ball bearing, screw clamps, w't 55 lbs., per dozen .....**JFGBJ** $112.00

ONE IN A CASE.

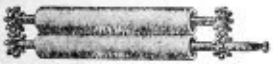
No. 524—Garland, 24x5¼ in., hardwood rolls, malleable iron frame, easy turning gear purchase arrangement, mounted on casters, w't 240 lbs., per dozen .....**CFJJJ** $600.00

Especially adapted for hotels, restaurants and laundry uses.

A mangle can be used for ironing everything that does not have buttons and that is not starched. It not only saves about one-third the time and labor but preserves the clothes, especially linens, as there is no possible chance of the fibre being destroyed with the hot iron. The clothes can be taken from the line, run through the mangle and put away. Bed linen, towels, etc., run through the mangle retain all the freshness that they get by hanging in the open air.

ONE IN A CRATE.

WRINGER ROLLS AND CRANKS, CLAMPS, ETC.



WRINGER ROLLS.

Friction, for Iron Frame.

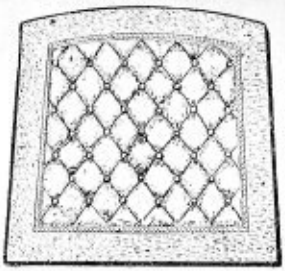
		CDE	DCJ	JFJE

The front standards of the [illegible] are made of hardwood, straight grained maple or birch. The steps are of poplar or basswood, and the back standards of clear spruce. The steps are locked to the standards by means of bolts which are clamped by malleable clips under the head and nut. All danger of splitting the wood is positively eliminated by this arrangement.



Heavy Basswood, Natural Finish, Heavy Japanned Iron Spreading Brace, with Shelf, Steps Braced by Wooden Supports.

Nos.	23	24	25	26
Length, ft.	3	4	5	6

THREE HUNDRED IN A CRATE.

CARPET SWEEPERS.

BALL BEARING.

Ball Bearings.

Dust Proof Axle Tubs.

Brush Release and Anti-Raveler.

Important as are ball bearings to the ease and comfort of sweeping, this is not the most important feature of these sweepers. They represent the experience of almost a generation in the manufacture of this important line, and embody every important improvement which has stood the test of time. They are absolutely noiseless, they sweep thoroughly, and are extremely attractive in appearance.

The Wood Work is the very best, thoroughly seasoned and beautifully finished in oak or mahogany.

Metal Ends—Each end is protected by a single piece of metal, nickel plated and highly polished, which not only serves as a protection, but secures for the working parts a perfect alignment and freedom from damage.

The Brush—The brush can be removed instantly by lifting the spring at either end, and can be as readily replaced. The sweeper has the patent broom action by which additional pressure on the handle will force the brush in closer contact with the floor. It is self-adjusting to all grades of carpet, and no pressure whatever need be put on the handle of the sweeper. A patent device on each end of the brush makes it impossible for ravelings to collect on the axle.

The Dust Pans—The sweeper may be opened on either side instantly by slight pressure on the push knobs.

The Handle—The sweeper will work in either direction, and in sweeping the handle can be held in any position and will remain in an upright position. An improved locking device secures the handle to the bail.

Ball Bearings—The four rubber-tired wheels are equipped with ball bearings of the most approved construction, reducing friction to a minimum. Each bearing consists of ten balls separated by a ball retainer and are absolutely uniform in size.

The Wheels—Made of pressed steel, as true as if turned in a lathe. The hubs are milled to an accurate fit. Fitted with soft rubber tires.

No. 28 —Assortment consists of one No. 24 mahogany, one No. 24 oak, and one No. 26 .
per assortment .....**JIJJ** $15.00

Showing Ball Retainer.

No. 24 —9x14½ in., beautifully finished in oak or mahogany, ball bearing, adjustable broom action, patent opening, braided guard, metal ends, full nickel plated trimmings, dust proof axle tubes, anti-raveler, reversible bail spring, patent brush release, w't per doz. 118 lbs.....per dozen **CABJ** $52.00

ONE-HALF DOZEN IN A CASE.

No. 26 —Special, 9x14½ in. crotch mahogany box, of improved construction and artistic shape, piano finish, ball bearing, adjustable broom action, patent opening, braided guard, metal ends, full nickel plated trimmings, dust proof axle tubes, anti-raveler, reversible bail spring, patent brush release, w't per doz. 136 lbs.,
per dozen .....**DEFJ** $76.00

In this sweeper we have produced the finest machine in points of mechanism and finish., that has ever been offered on the market.

The case of the " Special" is distinctive and highly artistic. It differs from all other sweepers, in that the case is made in one continuous piece of veneer, with no joints or nail holes appearing. With a new and highly improved brush propelling power, it runs so easily a mere touch propels it.

ONE-HALF DOZEN IN A CASE.

CARPET SWEEPERS AND BEATERS.

BALL BEARING CARPET SWEEPERS.

No. 18—American Queen, 14x9 in., reversible bail spring, dust proof axle tubes, nickel plated trimmings, beautifully figured mottled mahogany veneer case, piano finish, hand polished, w't per doz. 72 lbs., per dozen .....**CDHJ** $37.00

No. 19—Elite, 14x9 in., reversible bail spring, dust proof axle tubes, metal handle fastener, anti-raveler brush, nickel plated trimmings, oval case, made in Hungarian ash, curly birch mahoganized and Brazilian rosewood, w't per doz. 90 lbs., per dozen .....**CGBJ** $39.00

No. 20—Parlor Queen, 14x9 in., dust proof axle tubes, anti-raveler reversible bail spring, nickel plated trimmings, imported rosewood case, beautifully figured, highest quality piano finish, w't per doz. 72 lbs., per dozen .....**CHDJ** $40.00

No. 21—Grand, hotel size, 16x10 in., dust proof axle tubes, anti-raveler brush, reversible bail, pressed steel wheels, nickel plated trimmings, quarter sawed oak case, heavy braid furniture protector, w't per doz. 150 lbs., per dozen .....DHJJ $48.00

ONE-HALF DOZEN IN A CASE.

CARPET SWEEPERS.

No. 8—Bissell's Standard, 9x14 in., adjustable broom action, patent opening, rubber guard, patent spring for holding handle upright when not in use, japanned trimmings, w't per doz. 72 lbs. .....per dozen **BDJJ** $28.00

No. 10—Bissell's Universal, 9x14 in., adjustable broom action, patent opening, rubber guard, patent spring for holding handle upright when not in use, cyco bearing, dust proof axle tubes, anti-raveling collector, japanned trimmings, w't per doz. 72 lbs., per dozen .....**BFDJ** $30.00

No. 12—Bissell's Universal, 9x14 in., nickel plated trimmings, otherwise same as No. 10, per doz. **BHHJ** $32.00

ONE-HALF DOZEN IN A CASE.

CARPET BEATERS.

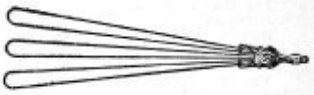
Just-Right.

No. 17—Made of No. 10 coppered wire, length over all 30 in., width at widest spread 14¼ in., raised handle to protect knuckles, double braced, w't per doz. 8 lbs. .....per dozen **AJJ** $2.00

No. 4—Three strands No. 12 galvanized wire, braided, hardwood handle, 1½ in. heavy steel ferrule, length 30 in., w't per doz. 8 lbs. ..per dozen **JIJ** $2.50

ONE DOZEN IN A BUNDLE.

CARPET BEATERS.



No. 12—Cruso, 12 gauge tinned steel wire, hardwood handle, length 28 in., head 9½x12 in., w't per doz. 6 lbs., per dozen .....**AAJ** $2.00

No. 11—Cruso, 11 gauge tinned steel wire, hardwood handle, length 32 in., head 10x14 in., w't per doz. 7½ lbs., per dozen .....**AEJ** $2.50

No. 10—Cruso, 10 gauge tinned steel wire, hardwood handle, length 35 in., head 10x14 in., w't per doz. 11 lbs., per dozen .....**BAJ** $3.50

This "Cleaner" rug beater has six wires in the beater head and the blow is evenly divided over the large surface. There are only four wires in the handle so it is elastic, while its strength is increased by these wires being twisted directly at the handle. Only the best furniture wire used in these beaters.

ONE DOZEN IN A BUNDLE.

No. 45—3 separate pieces of No. 12 coppered spring steel wire, securely held by strong iron braces, wood handle, length 36 in., w't per doz. 9 lbs., per dozen .....**BGJ** $4.00

An ideal carpet whip. It removes the dust quickly, as it strikes a large surface with its strong wire loops at every stroke, doing no damage to the carpet and so hung in the handle as to be perfectly balanced in the hand. Does not strain the wrist of the beater. Impossible to get loose in the handle.

ONE-HALF DOZEN IN A BUNDLE.

No. 42—Rattan, three strand, 12x8½ in. blade, twisted rattan handle, wire wrapped in three places, extreme length 33 in., w't per doz. 5½ lbs., per dozen .....**BDJ** $4.00

ONE DOZEN IN A BUNDLE.

No. 14—Polished spring wire, smoothly woven, length 28 in., hard maple handle, brass ferrule, w't per doz. 4 lbs. .....per dozen **BBJ** $3.50

The reinforcement of rattan running through core and into handle preserves the shape, gives desired flexibility and prevents wires breaking and tearing fabrics.

ONE DOZEN IN A BUNDLE.

POLISHING MOPS, OILS AND WINDOW CLEANERS.

MEDICATED DUST CLOTHS.

No. 30—36x30 in., w't per doz. 2 lbs., per dozen .....AHJ $4.00

The chief advantage of this one over all other kinds of absorbing dusters is that it will not crock, stain or discolor clothing, wall papers, pictures, dainty furniture or anything to which it is applied. It takes away the dirt and leaves no other evidence of its having been around, except that it polishes shiny surfaces.

ONE IN A PACKAGE.

MEDICATED POLISHING MOP HEADS.

No. 6—Sanitary and absorbing, w't per doz. 6 lbs. .....per dozen BIJ $8.00

This is a dry mop, for use with any adjustable mop handle. It will wear almost indefinitely. It cleans the floors and polishes them at the same time.

ONE IN A PACKAGE.

MEDICATED FLOOR MOPS.

No. 07—White handle, 48 in. long, w't per doz. 14 lbs., per doz. JGBJ $12.00

This is especially designed for cleaning and polishing hardwood floors, linoleums, oilcloths, matting and painted and varnished floors. It picks up every particle of dust and lint, and polishes the floors as it goes along. You simply brush the floor lightly. No work at all. Will not stain or discolor white base boards.

FOUR DOZEN IN A BOX.

REVONOC OIL POLISHING MOPS.

No. 90—Small size, 54 in. removable handle, 5 in. head padded to protect furniture, extra quantity of thread, w't per doz. 30 lbs., per dozen .....JIJJ $15.00

No. 95—Large size, 7 in. head, w't per doz. 35 lbs., otherwise same as No. 90, per dozen .....AJHJ $18.00

When soiled, REVONOC mops may be washed and renewed with REVONOC Compound Oil of Cedar.

ONE IN A LITHOGRAPHED TIN BOX; TWO DOZEN IN A CARTON.

REVONOC COMPOUND OIL OF CEDAR.

For Cleaning and Polishing Painted, Varnished or Waxed Woodwork, Furniture and Floors and For Re-Oiling Oil Mops. All Sizes Put Up in Glass Bottles with Patent Self-Sealing Cap.

Directions.

No hard rubbing or polishing required. Simply dampen a piece of cheese cloth, pour on a little REVONOC Compound Oil of Cedar and apply to surface, wiping with a dry cloth. When treating oil mops, allow a few minutes for oil to distribute before using.

One application produces a permanent, highly polished, piano gloss finish, making the surface brighter, richer and more lustrous than ever.

No. 213-P—1 gal. bottles, w't per doz. 100 lbs. .....per dozen AHIJ $31.50
No. 214-P—½ gal. bottles, w't per doz. 55 lbs. .....per dozen ACEJ $24.50
No. 215-P—¼ gal. bottles, w't per doz. 26 lbs. .....per dozen JFCJ $10.50
No. 216-P—⅛ gal. bottles, w't per doz. 12½ lbs. .....per dozen DAJ $6.20
No. 31P—8 oz. bottles, w't per doz. 12 lbs. .....per dozen CAJ $3.80
No. 21P—2½ oz. bottles, w't per doz. 6½ lbs. .....per dozen ACJ $2.00

REVONOC *Compound Oil of Cedar is not gummy or sticky and will not darken the woodwork.*

WINDOW CLEANERS.

No. 7 REVONOC—16 in., double pure gummed rubber 3-32 in., solid brass barrel, malleable handle, iron brass plated, w't per doz. 13 lbs., per dozen .....ABJJ $20.00

No. 112 INTRODUCTORY ASSORTMENT OF IRIS ENAMELED WARE.

The New Line which represents the last word in Enameled Cooking Utensils. The color is the beautiful blue blend of the Iris—made possible by the use of a new process—the enamel being applied evenly and smoothly to the ware by air pressure—producing utensils not only attractive, but strictly sanitary and having unusual wearing qualities.

THIS LINE WILL BE A BIG TRADE WINNER AND PROFIT MAKER.

Display this assortment in your window—the color scheme is new—it is different—it will attract the attention of the passer-by. Packed ready for shipment. Weight 310 pounds.

No. 600 REVONOC—Blended Iris enamel, 18x11x7½ in., w't per doz. 70 lbs., per dozen .....**BBHJ** $40.00

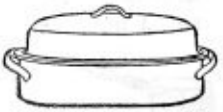
ONE IN A SHIPPING CARTON.

The one piece bottom is made by pulling the stamping inside out with ingenious machinery and is an exclusive REVONOC *feature.*

The outer rim of the bottom acts as a heat retaining jacket imparting it evenly to all parts of the roast. It is impossible for anything to burn as the bottom cannot touch the oven. The juices and flavors which are lost in many roasters are all retained. The steam and juices from the roast collect in the concave bottom and as the roaster is air tight, basting is unnecessary.

Besides being the best roaster made, the REVONOC *is unsurpassed for baking bread, beans and many other things.*

SEAMLESS SELF-BASTING ROASTERS.



Enameled Dark Gray with White Specks Inside and Out, Inside Tray.

No. 2000—16½x11x7⅛ in., w't per doz. 81 lbs. .....per dozen **AIBJ** $30.00

	JFEJ	JGEJ

Beginning with cold water the "Universal" pumps while the water is heating and completes the percolation before the water boils. In this the "Universal" differs from all others. Coffee made in the "Universal" is easily known by its delicious aroma, fine flavor and the absence of the bitter taste, found in coffee BOILED in other devices.

PERCOLATING MACHINES.

ONE DOZEN IN A CARTON.

STAMPED TINWARE.

Stamped tinware, though not sold under guarantee, is as fully anti-rust quality as any stamped ware so called; and merchants, if they charge accordingly, can safely make any guarantee they see fit, as tinware will give satisfaction with any reasonable usage, excepting exposure to alkali water.

CREAM SEPARATORS AND STANDS.

SIMPLEX SEPARATORS.

Single Can, Dilution Type, XXXX Bright Tin, Concave Bottom Slanting to Outlet to Drain Completely, Concealed Straightway Faucet Readily Cleaned and Cannot be Knocked off, Two Gauges, Reversible Combination Ventilating Cover and Strainer, Strainer Removable.

Nos.	206	208	210	212
Milk capacity.	5½	7½	9½	11 gal.
Sizes	15×20	15×23	15×27	15×30 in.
W't crt'd	16	16½	18½	24 lbs.
Each	$4.00	4.50	5.00	5.50
	BEJ	BGJ	CJJ	CCJ

DIRECTIONS: Set in cool place on bench or shelf high enough for pail to go under and extended over edge of bench so faucet will clear; pour fresh milk through reversed cover, add like amount cold water or ice, in cold weather less water answers. When separation is complete (after two or three hours) first draw skim milk, then the cream, after which scald and sun-sweeten for next milking.

Nature's way, with only pure water added.

(Actual capacity is double milk capacity shown.)

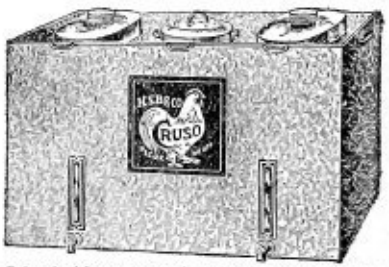
ONE IN A CRATE.

SIMPLEX SEPARATOR STANDS.

Japanned Steel.

No. 301—18 in. high, for mounting Simplex separators, legs of ¾ in. twisted steel rod and bolted to top rim, w't 8 lbs each, stand only.....AAE $2.00

ONE IN A BUNDLE, KNOCKED DOWN.



CRUSO SEPARATORS.

Double Can, Inner Milk Can Removable, Heavy Bright Tin Painted Water Side, Slanting Bottom, Draining Completely, Reversible Combination Cover and Strainer, the Cone Strainer Removable.

Nos.	6	8	9	10
Milk capacity.	6	8	11	13 gal.
W't crt'd	28	31	35	39 lbs.
Each	CDJ $5.00	CIJ 5.50	DEJ 6.50	EJJ 7.50

ONE IN A CRATE.

No. 63—Galvanized iron water tank, containing 2 4½ gal. removable oval tin milk cans, and 1 3-gal. round cream storage can, w't crt'd 52 lbs.....each JGHJ $13.00

ONE IN A CRATE.

Double Can Accommodates Two Milkings, Galvanized Iron Outer Can, Two Oval Inner Cans of Heavy Bright Tin, Painted on Water Side, Concave Perfectly Draining Bottom, Milk Cans Removable by Unscrewing Faucet, Concealed Faucet not Easily Knocked Off, Reversible Strainer and Ventilating Covers.

Nos.	306	308	310
Milk capacity.	9	15	19 gal.
W't crt'd	32½	40	45½ lbs.
Each	EFE $9.00	FJJ 9.50	JFCJ 10.00

ONE IN A CRATE.

DIRECTIONS FOR ALL ABOVE: Set separator where it will not be disturbed, on bench or shelf high enough for pail to go under, and projecting so faucet outlet clears; pour milk into inner can through reversed cover, then cold water into outer can, colder the better, water may run continually. When cream has all raised, draw off skimmed milk, then the cream into another vessel, scalding and sunning inner can for next milking.

DAIRY GOODS.

MILKING TUBES.

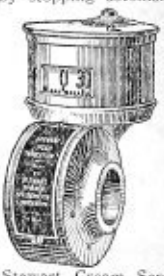
WYANDOTTE DAIRY CLEANER AND CLEANSER.

Sold only in cases and barrels.
For All Kinds of Dairy and Domestic Cleaning.

Cases of twenty-four 5-lb. sacks, per case .....**EDJ** $9.50



Barrels of fifty 5-lb. sacks only, per barrel .....**AJBJ** $12.50

Wyandotte Dairyman's Cleaner and Cleanser is a scientific powder cleaner, free from all organic matter, caustic, lye, acid, poison or preservatives. It is made expressly for cleaning and sweetening milk pails, strainers, separators, cans, churns, etc. It works in perfect harmony with milk. It dissolves and easily and quickly removes all deposits which form on milk and dairy utensils without leaving any harmful after-effect in the utensils to be absorbed by the milk and injure the quality. Its use throughout the household is also strongly recommended.

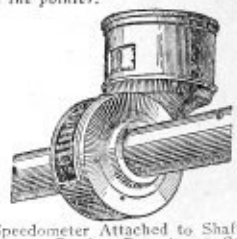
SHIPPED FROM CHICAGO STOCK OR FROM VARIOUS STORE-HOUSES IN ALL PRINCIPAL CITIES OF U. S. AND CANADA.

STEWART SPEED INDICATOR FOR CENTRIFUGAL CREAM SEPARATORS.

Cream is wasted by any separator when turned too fast or too slow. Guessing at the number of turns per minute is very expensive. A reliable speed indicator on any cream separator is an excellent investment, more than paying for itself in a very short time by stopping astonishing waste.

The Stewart Speed Indicator is fitted to and furnished with extra shaft for cream separator for which it is ordered. In ordering it is therefore necessary to always give the name and size number or letter of cream separator to which speed indicator is to be attached.

Stewart Cream Separator Speed Indicator with the Extra Crank Shaft Required.



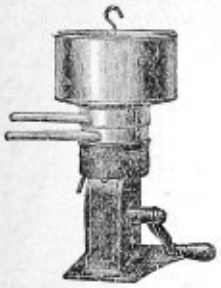
No. 200—For all makes of cream separators operated by hand—except below—w't 2 to 5 lbs. according to size of shaft required.....each **JIJJ** $10.00

No. 200-A—For De Laval, 4, 5, 10 and 12 with clutch on shaft, each .....**JIJJ** $10.00

No. 200-B—For De Laval 15, 17 and 22 with clutch on shaft, serial number above one million, each **JIJJ** $10.00

No. 200-C—For De Laval 15, 17 and 22 with clutch on bowl spindle, serial number under one million, each .....**JIJJ** $10.00

These high grade instruments embody the same principle and design of the high priced indicators used on automobiles. The dial reads from 30 up to the maximum number of turns of any separator. If the crank is to be turned 55 times per minute, it is only necessary to watch the indicator and operate the crank to keep the number 55 directly opposite the pointer.



Speedometer Attached to Shaft.

Tests at Purdue Experiment Station showed tremendous losses from operating separators at the wrong speed. At 55 turns required speed on test a separator delivered the proportion of 90 lbs. skimmed milk to 10 lbs. of cream, the latter testing 4.22 fat. Increasing the speed to 75 turns, the skimmed milk weighed 93 lbs. and only 7 lbs. of cream, showing a lower percentage of fat. Tested at under speed the showing was even worse, illustrating how essential exact speed is to proper skimming.

Special Pattern Speedometer is Required for Power Separators, Quoted on Application.

DOMO CENTRIFUGAL CREAM SEPARATORS.

IMPROVED. PRICES REDUCED.

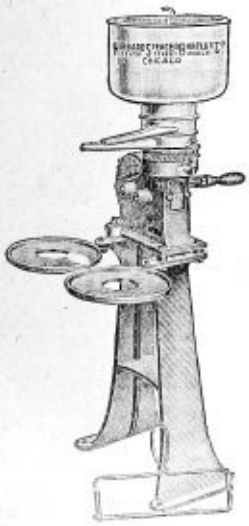
No. A.

Sizes for a Single Cow or Many.
Efficient, Durable, Simple.

Domo has made good as attested by the many agents participating in the distribution of the thousands put into service past seasons, and every one sold by a regular dealer.

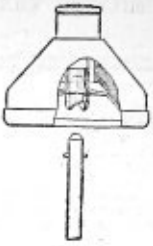
Most substantially built as made of the very best materials suited to its various parts, and all thoroughly well finished, Domo renders the best service indefinitely with proper care.

As improved with an all pressed steel bowl self-balancing, and with all gears running in an oil bath, Domo takes a more advanced position.



Most compact as made with fewest parts possible to perfect skimming, Domo is quickly taken down, most simple to clean perfectly, and readily reassembled, making it most handy, all considerations of utmost importance in its daily use.

A perfect skimmer, with its improved all pressed steel bowl self-balancing and with non-numerical mixable discs, taking apart completely to clean perfectly, and skimming cool milk if desired, though discouraged as bad practice, Domo combines the absolute essentials to highest grade with popular prices, making it the dealer's best separator proposition.



As now made, Domo—excepting "A" continued unchanged—Nos. 11 and larger with oil bathed gears as illustrated—Fig. 1—and with its small, light, highly efficient overhung self-balancing bowl—Fig. 2—with bronze bushed bearings, is lightest draught and sweet running, with the capacity of much larger, heavier separators.

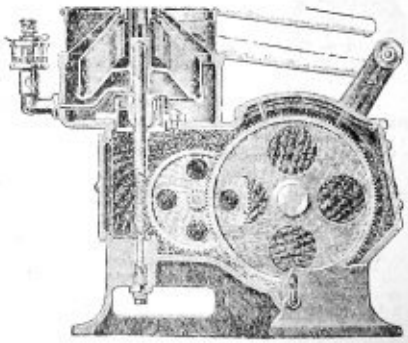
IMPORTANT.

Every Domo, when properly set up, will skim and run perfectly.



Description of details in Directions with every Domo.

Understand the Directions in setting up and operating.

Always place the wood feet between gear case and Stand.

Avoid freezing the bowl and keep it away from hot stove.

Avoid selling smallest size suited to customer's use, as a larger size will skim small lots of milk thoroughly and will skim for more cows, or the increased quantity of milk with fresh pastures, as may be required.

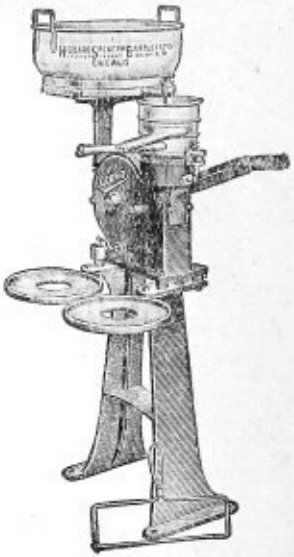
DOMO CENTRIFUGAL CREAM SEPARATORS.



Nos. 23, 24 and 25.

As smooth running as a sewing machine, as simple as a coffee mill, and as perfectly cleaned as a china plate, with a range of sizes suited to use with a single cow or many, Domo provides a cream separator for every cow owner or user of cream.

The small size, No. "A," 10x13 in. base, 16 in. high, for domestic use—not more than two cows—has an open one-piece bowl, easy to operate and quickly cleaned. It will get more cream than possible by setting the milk, skimming a single cow's up to 12 quarts in 10 to 15 minutes. Usually sold without stand, though No. 7 Stand will mount "A" if desired.

Nos. 11 and 12 may be satisfactorily mounted on table or bench to do perfect work if set solid and do not wiggle or vibrate in operation. Possibly one-third the No. 12, and a larger portion No. 11 are sold without stands. No. 13 is always sold with stand as most satisfactorily operated.

No. 23 and larger, chain drive, low models, do not require a stand, other than the low base or foot which is packed in each case with the low models.

No. 13.

No. A—Domo,, capacity 90 lbs. per hour, w't boxed 35 lbs., without stand	each	$15.00

HIBBARD, SPENCER, BARTLETT & CO.
STATE STREET BRIDGE
CHICAGO.

MOUNTED CASSEROLES, BEAN POTS, ETC.

Cooking in earthenware is becoming more popular every day, because of its many advantages. Food cooked in this way is delicious, and is taken direct from the stove to the dining room to be served piping hot.

The dishes being glazed, the work of cleaning is very simple.

In appearance, mounted eathernware is very effective—the bright polished metal with the rich brown pottery—making a handsome showing on the dining table.

CASSEROLES.

Extra Heavy Brass Frames, Cast Britania Metal Handles and Feet, Silver Nickel Plate, Brown, White Lined Pottery Inserts.

REVONOC GUERNSEY EARTHENWARE.

No. 99 ASSORTMENT OF GUERNSEY EARTHENWARE.

No. 99 Assortment—Rich brown outside with white porcelain lining. Earthenware cooking is becoming more popular each year. Food cooked in this way is delicious, and taken direct from the stove to the table to be served piping hot. The utensils are glazed, consequently easily cleaned. Food may be left in the utensil without danger of ptomaine poisoning. This assortment contains staple items which will sell anywhere at all seasons, and show a handsome profit.

The body of REVONOC Guernsey Earthenware is as near fire-proof in construction as earthenware can be made. The exterior appearance is a rich brown with a spotless white porcelain interior, making each item absolutely sanitary and acid proof. Food cooked and served can be left in the vessel indefinitely without danger of ptomaine poisoning. It will stand any heat if not exposed to direct blaze. Like a glass chimney, cold water in basting or sudden chill, will crack it when hot.

GUERNSEY EARTHENWARE AND ROASTERS.

GUERNSEY TEA POTS.

Boston.

No. 600 REVONOC—Blended Iris enamel, 18x11x7½ in., w't per doz. 70 lbs., per dozen .....**BBHJ** $40.00

ONE IN A SHIPPING CARTON.

The one piece bottom is made by pulling the stampjing inside out with ingenious machinery and is an exclusive REVONOC *feature.*

The outer rim of the bottom acts as a heat retaining jacket imparting it evenly to all parts of the roast. It is impossible for anything to burn as the bottom cannot touch the oven. The juices and flavors which are lost in many roasters are all retained. The steam and juices from the roast collect in the concave bottom and as the roaster is air tight, basting is unnecessary.

Besides being the best roaster made, the REVONOC *is unsurpassed for baking bread, beans and many other things.*

Nos. 6 to 116. Nos. 27 to 30.

No. 6—Dover, 8½ in., cast frame and gears, w't per doz. 3½ lbs., per dozen .....**JFE** $1.10
No. 16—Dover, 9½ in., cast frame and gears, w't per doz. 5 lbs., per dozen .....**JFE** $1.30
No. 116—Dover, 12½ in., heavy frame and deep gears, w't per doz. 11 lbs., per dozen .....**AFJ** $3.00
No. 27—Holt's, 9½ in., cast frame and gears, fluted agitators, winged, w't per doz. 6 lbs...per dozen **JIJ** $1.60
A very rapid beater and cream whip.
No. 29—Holt's, 10½ in., cast frame and gears, fluted agitators, winged, w't per doz. 7 lbs...per dozen **ACJ** $2.30
No. 30—Holt's Hotel, 13½ in., heavy frame, otherwise same as No. 29, w't per doz. 10 lbs., per dozen **BDJ** $4.00
ONE DOZEN IN A BOX.

EGG BEATERS.

No. 28. Nos. 34 and 38.

No. 28—Holt's, heavy, 10½ in., with mayonnaise oil dripper attachment, otherwise same as No. 29, w't per doz. 8 lbs. .....per dozen **BCJ** $4.00
This is an exceedingly rapid egg beater or cream whip. The oil dripper can be regulated to any flow desired. Unexcelled for making an absolutely smooth mayonnaise dressing.
ONE DOZEN IN A BOX.

No. 34—Ladd's, all steel, nickel plated, 11 in., 8 beating blades, direct center drive, w't per doz. 5 lbs., per dozen .....**CCE** $5.60
No. 38—Ladd's Hotel, all steel, nickel plated, height 12 in., 8 beating blades, 3 in. direct center drive, w't per doz. 9 lbs. .....per dozen **DHJ** $7.20
The Ladd beater, on account of the eight blades, has double the beating power of the ordinary Dover pattern beaters. It is also a splendid cream whip, easy to turn even after cream is quite stiff.
ONE DOZEN IN A BOX.

CREAM WHIPS.

No. 1. No. 83.

No. 1—Improved Dunlap, perforated German silver agitator, large steel driving wheel, wood handle, with 7 in. glazed stoneware bowl, w't per doz. 30 lbs. .....per dozen **FCJ** $9.50
The Improved Dunlap will whip cream so stiff that it may be cut in slices. Improved drive wheel makes it very easy running.
ONE-HALF DOZEN IN A BOX.

No. 83—Clip, steel agitator, nickel plated steel drive wheel, wood handle, with 7 in. glazed stoneware bowl, w't per doz. 30 lbs., per dozen **CDE** $5.50
The clip cream whip is a slight modification of the construction used on the Dunlap. A very attractive whip.
ONE-HALF DOZEN IN A BOX.

CREAM WHIPS.

No. 02 No. 03. Nos. 84-85. No. 86.

No. 02—Tin cylinder, 2½x5½ in., perforated tin dasher, w't per doz. 7 lbs., per dozen .....**EE** $0.90
ONE DOZEN IN A PACKAGE.

No. 03—"Bing," 3x7 in., heavy glass jar, tinned perforated dasher with tubular shank and wood knob top, w't per doz. 20 lbs., per dozen **CAE** $5.50
The loose wood knob drives the air through to bottom of jar, getting wonderfully quick results with eggs, cream, dressing, etc.
ONE IN A CARTON.

No. 84—Roberts', pint size, height 6¾ in., glass jar, steel dome cover and agitator, nickel plated, white porcelain knob, w't per doz. 17 lbs., per dozen .....**CCJ** $5.50

No. 85—Roberts', quart size, height 8 in., w't per doz. 30 lbs., otherwise same as No. 84 .....per dozen **EDJ** $9.00
The Roberts' Lightning Mixer works with double motion. The up and down whirling of the agitator mixes, stirs, churns, whips, lightens and aerates the material with surprising ease and quickness.
ONE IN AN ATTRACTIVE CARTON.

No. 86—Simplex, 1 pt., 3x6 in. glass jar, wire agitator, height over all 13 in., w't per doz. 15 lbs., per doz. **ADJ** $2.30
The "Simplex" is simple and easy to take care of. The up and down movement of the handle rotatoes the agitator with lightning rapidity. Will churn butter or make ice cream.
THREE DOZEN IN A CASE.

EGG SEPARATORS.

No. 33—3½ in. bowl, holds yolk of egg, allowing white to run through, w't per doz. 1 lb.....per dozen **DJ** $0.70
ONE DOZEN ON A DISPLAY CARD.

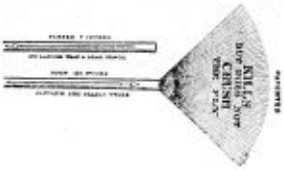
ONE DOZEN IN A BOX WITH A DISPLAY STAND.



No. 17 REVERE—Black cloth with brown felt edging, bright wire handle, killing surface 5x6½ in., length over all 16 in., w't per doz. 2 lbs., per dozen .....**JIJ** $1.60

No. 17½ REVERE—Same as No. 17 REVERE, in quantities of one gross or more, per gross .....**JIHJ** $17.00

The REVERE Fly Swatter is extremely flexible. Will not scratch or mar painted or varnished surfaces. Kills but does not crush the flies. Not a better swatter made.

ONE DOZEN IN A BOX.

TELESCOPIC POCKET FLY SWATTER.

No. 9 B. A.—Length closed 7 in., open 13 in., polished steel spring wire bristles, w't per doz. 2 lbs., per dozen .....**JIJ** $1.70

No. 9½ B. A.—Same as No. 9 B. A., in quantities of one gross or more, per gross .....**AJCE** $18.00

The spring steel swatting head telescopes into the handle, so that when not in use the B. A. Swatter takes up but little more space than an ordinary lead pencil.

TWO DOZEN IN A DISPLAY BOX.

POISON FLY KILLERS.

No. 8—Kill-a-Fly, handsomely lithographed tin, representing a slice of watermelon, 5½ in. diameter, ½ in. deep, contains fly killing material, which becomes instantly effective when container is filled with water, w't per doz. 2 lbs., per dozen .....**AJE** $1.75

Has seven holes, six of which have wicks which absorb and hold the moisture that is so deadly to the fly, and the seventh has a cork which is removed for filling.

THREE DOZEN IN A CARTON.

Daisy, lithographed tin, 3½x6 in., filled with poison which is absorbed by the felt centers of the daisies, w't per doz. 1 lb. .....per dozen **ADE** $2.50

Attractive in appearance, cleanly in use, and very effective as a fly killer.

ONE DOZEN IN A BOX.

FLY PAPER.

No. 1—Box of 25, 9x16 in., double sheets, per box .....**CE** $0.60

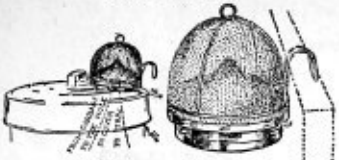
No. 2—Case of 10 boxes, w't per case 28 lbs. .....per case **CAJ** $5.40

FLY TRAPS.

Dixie, 3 in. screw cap, with wire cloth cone and wood feet, w't per doz. 1 lb., per dozen .....**JHE** $1.50

This is the most sanitary fly trap made; the screw cap fits ordinary fruit jars.

THREE DOZEN IN A BOX.
ONE IN A CARTON WITH DIRECTIONS.



No. 49—Yankee, black wire cloth, diam. 5 in., height 5 in., bait pan 4¼ in. in diameter, w't per doz. 6 lbs., per dozen .....**AAE** $1.90

A neat and effective little trap.

THREE DOZEN IN A CASE.

FLY TRAPS, POWDER GUNS, ETC.

FLY TRAPS.

No. 50—Prof. Hodge's brass plated wire cloth, diameter 5 in., height 4 in., tin bottom, with extra open bottom, w't per doz. 10 lbs., per dozen **BFJ** $4.00

This is the extensively advertised Out Door Fly Exterminator. It is intended for use in every possible place where flies come. Strongly braced with reinforcing wires to withstand hard usage. The open bottom is intended for use on garbage cans or for attaching the trap to screen doors. The hook makes it possible to hang on window screens, also can be used as a handle when scalding flies.

ONE DOZEN IN A CASE.

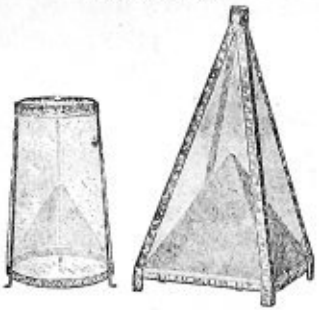
No. 70.

No. 60.

No. 70—Balloon, bright cloth wire, tin bottom, height 7 in., w't per doz. 6 lbs. .....per dozen **ABJ** $2.10

No. 60—Harper, painted cloth wire, wood bottom, height 9 in., w't per doz. 8 lbs. .....per dozen **AGE** $2.40

ONE DOZEN IN A BOX.



No. 177—Perfection, for outdoor or indoor use, galvanoid, rust proof cloth, seamless tin bait pan, diameter 11 in., height 10 inches, w't per dozen 15 lbs., per dozen .....**EGE** $9.60

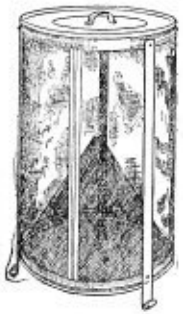
This trap is built along the line of the Prof. Hodge Trap, but in mammoth size. Recommended especially for markets, restaurants, etc., because of its very attractive appearance.

ONE DOZEN IN A BOX.

FLY TRAPS.

No. 178. No. 180.

No. 178—Duke, junior size, out door trap, black cloth with galvanized iron frame, stamped galvanized cover, diameter 7½ in., height 14 in., w't per doz. 20 lbs. ....per dozen **EEJ** $8.00



Although shipped nested, this trap requires practically no assembling, simply push cone in place and the trap is ready for use.

ONE DOZEN IN A BOX.

No. 180—Perfect, galvanized iron frame, with black wire cloth, height 28 in., 12 in. square at bottom, w't per doz. 30 lbs. .....per dozen **JIHJ** $17.00

This is the most substantial out-door fly trap made, it is both wind and weather proof. The best all galvanized out-door fly trap at a very low price.

ONE-HALF DOZEN IN A SHIPPING CARTON.

No. 179—Red Cross, 22 in. high, 12 in. in diameter, black wire cloth body and cone, galvanized iron side strips, tin cover, w't per doz. 30 lbs., per dozen .....**AAEJ** $16.80

This trap is intended for use out of doors. Should be set near restaurants, bakeries, groceries, stables, etc. A pie plate filled with sugar and vinegar set beneath the trap is as good bait as can be found.

ONE-HALF DOZEN KNOCKED DOWN IN A CASE.

POWDER BELLOWS.

No. 14—Polished tin powder holder, wood frame, green leather bellows, length 20 in., w't per doz. 12 lbs., per dozen .....**ABFE** $22.00

This bellows must not be compared with some of the cheaper makes on the market, as these have been made in Switzerland for the past thirty years by one concern. They are particularly well made and closely nailed, which gives considerable more force.

ONE IN A BOX.

POWDER GUNS.

No. 1005—Jumbo, diam. 4½ in., spun zinc, nickel plated, tin top, w't per doz. 3½ lbs. ....per dozen **BIJ** $4.00 *An excellent seller.*

ONE-HALF DOZEN IN A BOX.

No. 1—Magazine and barrel are gold lacquered and the top plate is neatly decorated, w't per doz. 1 lb., per dozen .....**EE** $0.96

ONE DOZEN IN A BOX.

DAVIS SANITARY ROACH TRAPS.

No. 90—Tin base, with wire cloth top, diameter 5½ in., w't per doz. 4 lbs., per dozen .....**AEJ** $4.00

There are three tubular entrances into the trap, through which the roaches may enter. Once inside they cannot find their way out again. Bait with onion, scraps of fish, wet bread, etc. Destroy roaches by pouring hot water into the trap.

Sanitary and far more effective than poison, etc.

ONE-HALF DOZEN IN A DISPLAY BOX.

JAPANNED BIRD CAGE ASSORTMENTS.

These cages are kiln japanned in white and colors. No pigment composed of lead, copper or other substance which would prove injurious to birds is used. Furnished with "Peerless" flint, closed top seed cups. Each assortment is made up of nestable cages of about equal salability, which saves in the cost of package and freight, and to better protect them from damage in transit.

ONE DOZEN IN A BOX.

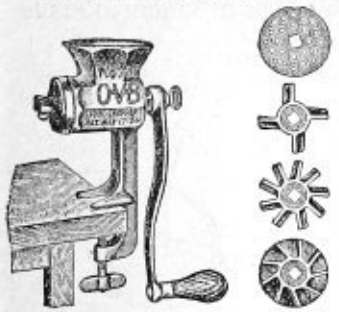
CIRCULAR MINCING KNIVES.

No. 22—Spring steel, nickel plated and well sharpened, ebonized hardwood handle, blade 3½ in. in diameter, w't per doz. 4 lbs., per dozen .....**AJJ** $1.70

This knife has three times the cutting surface of an ordinary mincing knife. A splendid doughnut cutter.

ONE DOZEN IN A BOX.

MILK BOTTLE STOPPERS.



No. 29D—Perfection, nickel plated brass clamp with cap remover, German silver, self-centering cap, w't per doz. 1 lb. .....per dozen **BDJ** $4.00

The cap is held down by a spring, closing the bottle tight. Fits any milk bottle. The handiest device for the purpose made.

ONE DOZEN IN A BOX WITH DISPLAY CARD.

"OUR VERY BEST" FOOD AND MEAT CHOPPERS.

O.V.B. FOOD CHOPPERS.

The O. V. B. chopper does not mash or squeeze, but chops into clean cut, uniform pieces, all kinds of meat, raw or cooked, also vegetables and fruits, fine or coarse as wanted.

There are five spiral channels inside the cylinder, each channel leads up to a separate outlet. The five outlets in the end of the cylinder are large, permitting food to pass without crushing. These large outlets require long knife blades, which mean great cutting surface, and explain the double capacity, as compared with other food choppers of the same sizes.

Every part is heavily tinned, this prevents discoloring food or fruit. All parts are interchangeable and guaranteed against defect. We carry all repairs in stock.

"OUR VERY BEST"

Heavily Tinned, All Parts Interchangeable.

Nos.	7	70	
Hopper	2⅝×3⅛	3⅛×4	in.

NOS. 83 AND 85 HALF DOZEN; BALANCE QUARTER DOZEN IN A CASE.

The "O. V. B." embodies all the best meat cutting principles with several new features, it is thoroughly well constructed of the best materials and is all that its name implies, viz.: THE BEST MEAT CHOPPER ON THE MARKET. The knife and plate are made of the BEST TOOL STEEL and they fit together perfectly so that when the knife revolves against the plate, the meat is CUT in a rotary scissor-like manner. SINEWS and GRISTLE pass through the machine without extra effort and are smoothly and evenly cut. ONE PLATE ⅞ in. hole is regularly furnished with each chopper

The "O. V. B." is furnished with an EXTRA LONG CRANK which gives it good leverage and thus enables it to OPERATE EASILY. The body of the chopper is well UP OFF the TABLE and it has no hind "legs" to interfere with the placing of a dish UNDERNEATH THE END of the machine.

One of the principle features of the "O. V. B." Meat Chopper is that, all of them are readily DETACHABLE from the block or bench to which the bottom plate is attached and thus they MAY BE WASHED and SET ASIDE when not in use, or may be put in the ice box in hot weather to prevent the small particles of meat from becoming tainted.

We will not as do not give the "capacity per minute" on any of our machines. This cannot be estimated with any degree of accuracy on ANY meat chopper, unless the speed at which it is operated is considered.

The "O. V. B." is guaranteed to cut as fast, or faster than any competitive chopper of comparative size.

O.V.B. MEAT CHOPPERS.

SHIPPING FACILITIES

With our immense stock and very modern facilities for shipments, we are enabled to fill orders with unequaled promptness. On some of the roads we have special through cars which enable us to reach distant points 24 hours ahead of shipments made in the regular way.

STUFFERS, JUICERS, PRESSES, CUTTERS AND SLICERS.

RAILROAD SAUSAGE STUFFERS.

Japanned Iron Base, Tin Cylinder.

No. 5—3½x8 in. cylinder, family size, w't per doz. 130 lbs., per dozen .....**ABFJ** $15.00

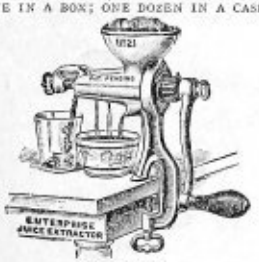
ONE-HALF DOZEN IN A CASE.

PERRY'S SAUSAGE STUFFER.

Cast Iron Japanned, Tin Spout.

No. 1—Diam. of cylinder 3½ in., handle 22 in., w't per doz. 122 lbs., per dozen .....**AJEJ** $15.00

No. 0—Diam. of cylinder 4½ in., handle 25 in., w't per doz. 190 lbs., per dozen .....**AEJJ** $21.00



ONE-HALF DOZEN IN A CASE.

MEAT JUICERS.

No. 10—Japanned frame, tinned cup and plunger, cup 3¼x1½ in., strong and effective, w't per doz. 70 lbs., per dozen .....**AJHJ** $20.00

ONE IN A BOX; ONE DOZEN IN A CASE.

Enterprise.

No. 21—Tinned, length 9 in., height 12 in., w't 7 lbs., per doz. **BFDJ** $30.00

This machine is adapted for the extraction of juice from meat. The machine being tinned, no metalic or inky flavor will be imparted to the material used. The dryness of refuse can be regulated by a thumb screw at the outlet.

ONE-HALF DOZEN IN A BOX.

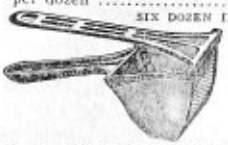
VEGETABLE AND FRUIT PRESSES.

No. 34—Enterprise, tinned, length 12½ in., height 13½ in., w't per doz. 224 lbs. .....per dozen **DJHJ** $42.00

This machine extracts juice and ejects the skins and seeds in one operation. The dryness of the pulp or refuse can be regulated by the thumb screw at the outlet.

ONE-HALF DOZEN IN A CASE.

No. 1—Universal, japanned steel frame, seamless perforated tin cylinder 3¼x3¼ in., w't per doz. 17½ lbs., per dozen .....**BGJ** $7.50

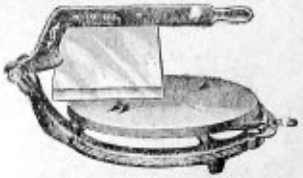


The perforated cup is made of a single piece of sheet steel drawn up in dies, then perforated and heavily tinned. The superiority of this seamless cup over the pieced and soldered ordinary tin cup is apparent. Strong, light and durable.

ONE DOZEN IN A CASE.

No. 65—Japanned malleable iron frame, 12 in., perforated tin cylinder 3½x3¼ in., w't per doz. 17 lbs., per dozen .....**BAJ** $6.00

SIX DOZEN IN A BARREL.



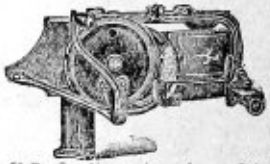
No. 55—Japanned steel frame, w't per doz. 9 lbs. .....per dozen **AEJ** $5.00

No. 57—Tinned steel frame, genuine Henis, w't per doz. 9 lbs., per dozen .....**BAE** $7.00

THREE DOZEN IN A CASE.

★*FOR FACTORY SHIPMENT ONLY.*

IDEAL CHEESE CUTTERS.



No. 10-D—Cast iron enamel frame, nickel trimmings, heavy steel blade well tinned to prevent rusting, blade 9¼ in., wood table 16 in., w't 57 lbs., each★ .....**ABJJ** $15.00

No intricate scale to figure out. The dealer knows the total cost of his cheese; he adds the amount of profit, sets the computing lever on the total selling price and tightens the thumb screw on the left of the scale. Each full stroke of the operating lever moves the cheese so that a five cent piece may be cut off, two full strokes ten cents worth, etc.

ONE IN A CASE.

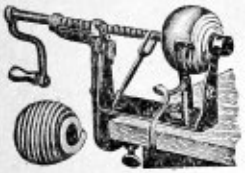
BREAD SLICERS.

No. 50-B—Sterling, size of cut 5½x5½ in., w't 56 lbs.....each **AIHJ** $20.00

No. 70—Sterling, size of cut 8½x7½ in., w't 90 lbs.....each **BDJJ** $28.00

These slicers are a necessity where slicing of bread, meat, fruit, etc., is done in quantity. The cutting is done by a round tool steel knife of the highest grade, finely ground and tempered, which revolves as the carriage moves across the face of the material to be cut, both of which movements are produced by the rotary motion of the handle. The speed at which the knife travels makes it enter the work easily and cut through quickly any material hard or soft, without squeezing, like a circular saw.

FRUIT AND VEGETABLE SLICERS.



No. 5—Sterling, walnut bronzed frame with screw clamp, height 12 in., heavy tempered steel double blades, nickel plated adjustable disc, diam. 8 in., safety feed, w't per doz. 96 lbs., per dozen .....**AFHJ** $24.00

Slices all kinds of vegetables and fruits —any thickness—all slices even.

ONE-HALF DOZEN IN A CASE.

PARERS AND STONERS.

APPLE PARERS.

No. 80—White Mountain, apple parer, corer and slicer, with push-off, lacquered, height 4 in., w't per doz. 25 lbs. .....per dozen **FJJ** $7.00

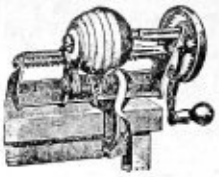
This machine pares and slices at the same time or can be used to pare only.

ONE DOZEN IN A CASE.

No. 98—Goodell's, turn table, apple parer with automatic push-off, lacquered, height 8 in., w't per doz. 45 lbs. .....per dozen **GHJ** $9.00

The above parer is superior to all others for household use where paring only is desired.

ONE DOZEN IN A CASE.



No. 78—Reading, apple parer, upright, with covered works, lacquered, height 8½ in., w't per doz. 70 lbs., per dozen .....**JGHJ** $10.00

The oldest and best known apple parer made. The mechanism is arranged so that the juice and peelings fall below the parer, not on it.

ONE DOZEN IN A CASE.

APPLE PARERS.

No. 90—Goodell's Bay State, family, apple parer, corer and slicer, with automatic core push-off ,lacquered, height 5¾ in., w't per doz. 60 lbs., per dozen .....**AEJJ** $19.00

ONE-HALF DOZEN IN A CASE.

PEACH AND APPLE PARERS.

No. 65—Scott's peach and apple parer, detachable from stand, with rotary knife, lacquered, height 5½ in., w't per doz. 52 lbs., per dozen **ADDJ** 18.00

The only successful peach parer made.

ONE DOZEN IN A CASE.

CHERRY STONERS.

No. 3—Goodell's, family, lacquered, height 5 in., w't per doz. 18 lbs., per dozen .....**DHJ** $6.50

This machine removes stones from cherries, two at a time, without grinding or mashing the fruit.

ONE DOZEN IN A CASE.

CHERRY STONERS.

No. 8—Rollman' tinned, with screw clamp, height 10½ in., w't per doz. 21 lbs. .....per dozen **GHJ** $9.00

This cherry stoner will seed from 20 to 30 qts. per hour. It picks the cherry up, drives the seed out, leaves the fruit whole and throws it into a dish, there being no grinding, mashing or loss of juice.

ONE-HALF DOZEN IN A CASE.

No. 1—Enterprise, japanned, height 8 in., w't per doz. 50 lbs., per dozen .....**GGJ** $8.00

No. 2—Enterprise, tinned, otherwise same as No. 1..per dozen **HBE** $9.00

These stoners are recommended to those desiring rapid and effective work.

TWO DOZEN IN A CASE.

No. 75—Tinned, height 7 in., w't 38 lbs., per dozen .....**JGHJ** $12.00

Adjustable for cherries of any size. Works rapidly, with least possible, cutting and disfiguring of cherries. All parts heavily coated with tin to prevent rust.

ONE-HALF DOZEN IN SHIPPING CARTON.

LEMON SQUEEZERS AND JUICERS.

LEMON SQUEEZERS.

No. 6—White maple, hardwood ball, 2 in. cup, length 10 in., w't per doz. 7 lbs.....per dozen **AAE** $1.75
THREE DOZEN IN A CRATE.

No. 9—White maple wood, porcelain ball and bowl, strap iron hinges, length 9½ in., w't per doz. 10 lbs., per dozen .....**AGJ** $3.00
THREE DOZEN IN A CRATE.

No. 5—Boss, malleable iron, tinned, length 8 in., w't per doz. 10 lbs., per dozen .....**JIE** $1.75
ONE-HALF DOZEN IN A BOX.

No. 15—Improved Boss, malleable iron, heavily tinned, ribbed bowl and cone, length 9 in., w't per doz. 12 lbs., per dozen .....**ABJ** $2.25
ONE-HALF DOZEN IN A BOX.

No. 4—Malleable iron, heavily tinned frame and strainer bowl, length 10½ in., w't per doz. 20 lbs., per dozen .....**AGJ** $3.25
ONE-HALF DOZEN IN A BOX.

No. 50—Malleable iron, nickel plated, hardwood ball plunger, length 8 in., w't per doz. 12½ lbs., per dozen .....**ABE** $3.00
ONE-HALF DOZEN IN A BOX.

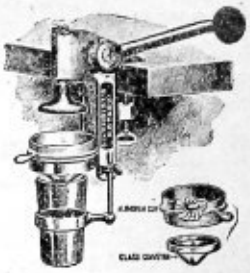
LEMON SQUEEZERS.

No. 100—Japanned iron frame, porcelain bowl resting on rubber ring, hardwood ball plunger, length 8½ in., w't per doz. 18 lbs...per dozen **BCE** $4.00
ONE-HALF DOZEN IN A BOX.

No. 14—Japanned iron frame, large glass cup with ribbed cone, length 10 in., w't per doz. 20 lbs., per dozen .....**BDJ** $5.00

No. 140—Aluminum cup, otherwise same as No. 14, w't per doz. 19 lbs., per dozen .....**BDJ** $5.00

Glass cup is easily removed and can be used separately as a juice extractor.
ONE-HALF DOZEN IN A BOX.



No. 22—Little Giant, malleable iron, tinned, with plate to retain lemon, length 9¾ in., w't per doz. 16 lbs., per dozen .....**DAJ** $8.00
ONE-HALF DOZEN IN A BOX.

No. 10—Drum, japanned malleable iron frame, extra deep porcelain bowl, hardwood combination plunger and strainer, length 9½ in., w't per doz. 25 lbs.....per dozen **CIJ** $8.50
ONE IN A BOX.

LEMON SQUEEZERS.

No. 43—Rotary, nickel plated, highly polished, cast aluminum crusher head and cup, glass juice conveyor, adjustable glass support, w't per doz. 103 lbs. .....per dozen **DAJE** $68.40
ONE IN A BOX.

LEMON JUICERS.

No. 3—Glass, saucer pattern, diameter 4½ in., w't per doz. 7 lbs., per dozen .....**EJ** $0.80
Extracts all juice and separates seeds and pulp, is of exceptional value and a leader at 5 cents each.
ONE DOZEN IN A BOX.

LEMON JUICERS.

No. 1. No. 2.

No. 1—Clear glass, ribbed cone, strainer base, for use on tumbler, w't per doz. 4 lbs.....per dozen **JDJ** $1.00
No. 2—Clear glass, ribbed cone, deep saucer, w't per doz. 10 lbs., per dozen .....**JHE** $2.00
NO. 1, ONE-THIRD DOZEN; NO. 2, ONE-HALF DOZEN IN A BOX.

LIME SQUEEZERS.

No. 16—Solid cast aluminum, highly polished, the strainer is cast solid with one of the jaws, length 7 in., opening of jaw 2¾ in., w't per doz. 10 lbs. .....per dozen **ACBJ** $22.50
This is a very high grade squeezer.
ONE IN A BOX.

ICE PICKS, CHISELS AND CHIPPERS.

ICE PICKS.

No. 73—Tempered tool steel, needle point, hard maple handle with nickel plated iron cap, length 9½ in., w't per doz. 4 lbs., per dozen.....JIE $1.60
ONE DOZEN IN A BOX.

No. 2—Tempered tool steel, nickel plated, 3½ in. evenly tapered needle point, imitation cocoonolo handle, length 8¼ in., w't per doz. 1¾ lbs., per dozen .....JIJ $2.00
ONE-HALF DOZEN IN A BOX.

No. 18—Tempered steel point, japanned iron sliding handle, length closed 8¼ in., w't per doz. 7 lbs., per dozen .....AAE $3.00
ONE-HALF DOZEN IN A BOX.

REVONOC

6 in. REVONOC—Tempered steel needle point, finely drawn, rubed maple file handle, length 10½ in., w't per doz. 2 lbs.....per dozen ABJ $3.00

4½ in. REVONOC—Point, otherwise same as above, w't per doz. 1½ lbs., per dozen .....ABJ $3.00

Though plain in appearance, this is an extra fine pick, and is intended for expert icemen's use. The sharpness and high temper of point makes this pick the icemen's pet.
ONE DOZEN IN A BOX.

No. 80—Tempered tool steel, nickel plated, 1½ in. taper needle point, hardwood handle with heavy tinned cap, length 9½ in., w't per doz. 9 lbs.....per dozen ABE $3.50
ONE DOZEN IN A BOX.

No. 700.

No. 7—Hurwood, polished tempered steel needle point running through handle, riveted and headed, 3 in. drawn point, ebonized handle, diam. 1¼ in., polished steel ferrule, length 9¾ in., w't per doz. 1½ lbs., per dozen .....AHJ $4.00

No. 70—Hurwood, 4½ in. drawn point, ebonized handle, diam. 1½ in., otherwise same as No. 7, w't per doz. 2½ lbs.....per dozen BIJ $4.50

No. 700—Hurwood, 4½ in. drawn point, ebonized handle, diam. 1½ in., ⅝ in. nickel plated octagon steel ring, forced and riveted on handle, otherwise same as No. 7, w't per doz. 3½ lbs.....per dozen BIJ $5.50

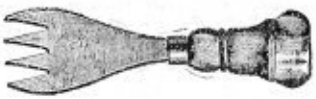
The ring serves as an ice breaker and also prevents pick from rolling.
ONE DOZEN IN A BOX.

ICE PICKS.

No. 1 REVONOC—Fine tool steel, entire length forged and gradually tapering to needle point with proper temper to spring without bending, heavy blued steel ferrule, large hardwood ebonized handle, pick 6 in., entire length 10½ in., w't per doz. 6 lbs., per dozen .....BDJ $5.50

The smooth gradual taper of this pick gives it a penetrating power unequaled by any other pick on the market.
ONE DOZEN IN A BOX.

No. 6½ REVONOC—Tempered steel, finely drawn, large flat sided maple handle, length 10¼ in., w't per doz. 4 lbs., per dozen .....ABJ $2.00



No. 200—Tempered tool teel, needle point, rubberoid handle, length 8¼ in., w't per doz. 3 lbs., per dozen JGJ $1.20
ONE DOZEN IN A BOX.

ICE CHISELS.

No. 25—Cast steel polished blade, cast iron handle, black japanned, length 7½ in., w't per doz. 8½ lbs., per dozen .....JIE $1.75
ONE DOZEN IN A BOX.

No. 100—Polished steel blade, natural finish hardwood handle, nickel plated cast iron cap, length 8½ in., w't per doz. 7 lbs.....per dozen JHE $1.75
ONE DOZEN IN A BOX.

No. 50—Nickel plated steel blade, fancy hardwood handle, nickel plated, malleable iron cap, length 10 in., w't per doz. 6½ lbs.....per dozen AAJ $2.75
ONE DOZEN IN A BOX.

ICE CHISELS.

No. 75—Polished tool steel blade, teeth ground to knife-like edges, length over all 10½ in., w't per doz. 10 lbs., per dozen .....BAE $4.40
ONE DOZEN IN A BOX.

No. 14—6 in. blade, 9 in. handle, w't per doz. 12 lbs., per doz. DEJ $9.50

No. 19—9 in. blade, 10 in. handle, w't per doz. 16 lbs., per dozen .....JFFJ $12.50

No. 22—10 in. blade, 12 in. handle, w't per doz. 20 lbs., per dozen .....JGHJ $15.50

The blade is made of tool steel fully tempered and polished; the teeth are properly shaped and ground to a knife-like edge, elegantly finished hardwood handle.
ONE-QUARTER DOZEN IN A BOX.

No. 600—Heavy forged steel blade, 8x 4¼ in., half polished, teeth properly shaped and ground to a knife edge, hardwood handle with malleable D, length 42 in., w't per doz. 42 lbs., per dozen .....AJAJ $30.00
ONE-HALF DOZEN IN A BUNDLE.

No. 97—Heavy forged steel blade, 2½ in. wide, teeth sharpened to knife edges, nickel plated and highly polished, maple handle, length over all 19½ in., w't per doz. 8 lbs., per dozen .....DEE $7.60
ONE DOZEN IN A BOX.

ICE CHIPPERS.

No. 44 REVONOC—Six finely drawn ice pick needle points driven into solid composition metal head, hardwood handle, length 9½ in., w't per doz. 6 lbs. .....per dozen BDJ $4.00

No. 66—Tinned cast head, four tool steel teeth, sharpened and tempered, hardwood handle, held to head by large bolt, which runs through handle, length 10 in., w't per doz. 14 lbs., per dozen .....DBJ $7.50
ONE DOZEN IN A BOX.

ICE TONGS, SHAVES AND SHREDDERS.

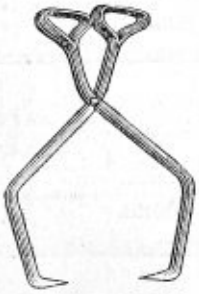
ICE SHAVES.

No. 3.

No. 3—Tinned iron, adjustable tool steel knife, which is removable for sharpening, length 6½ in., w't per doz. 23 lbs. .....per dozen **BIJ** $6.50

This is a very high grade article, recommended for making frappe and fruit ices.

ONE-HALF DOZEN IN A BOX.



ICE SHREDDERS.

No. 10—Tinned bowl, 3¼ in. diam., patent self-emptying cover, tempered steel knife tooth edge, length 7¼ in., w't per doz. 13 lbs., per dozen .....**BDJ** $6.00

ONE-HALF DOZEN IN A BOX.

ICE TONGS.

No. 160—Family, ¾ in., oval steel, points well sharpened, span 12 in., w't per doz. 15 lbs., per dozen **ADJ** $2.30

ICE TONGS.

No. 4—Family, steel points, self-adjusting, span 12 in., w't per doz. 16 lbs., per dozen .....**BDJ** $4.00

No. 6—Solid steel, malleable grips, self-adjusting, span 16 in., w't per doz. 24 lbs. .....per dozen **DAJ** $6.80

No. 117—Iceman's special tool steel jaws with carefully sharpened and tempered points, 1 in. hollow handles, 17 in. span, painted red, w't per doz. 45 lbs. .....per dozen **AJGJ** $17.00

CINCINNATI CHAIN, File Steel, Concave Grips.

No. 12—Span 12 in., w't per doz. 21 lbs., per dozen .....**JFGJ** $11.20

No. 14—Span 14 in., w't per doz. 24 lbs., per dozen .....**JGHJ** $13.00

Having the correct curve, these tongs will hold securely at any span. The rivet is extra large and made of steel. Very easy working, will stand hard usage and especially adapted for handling large quantities of ice.

ICE TONGS.

No. 00—Solid steel forged, duck bill points, span 12 in., w't per doz. 28 lbs., per dozen .....**CGJ** $6.10

Solid Steel, Forged, Swelled Grips, Duck Bill Points, Painted Red.

No. 1—Span 15 in., w't per doz. 45 lbs., per dozen .....**JHBJ** $13.70

No. 2—Span 17 in., w't per doz. 54 lbs., per dozen .....**JICJ** $15.50

No. 3—Span 24 in., w't per doz. 72 lbs., per dozen .....**AAAJ** $18.50

These tongs are extra wide at the hinge and will stand very hard usage.

No. 24—Solid forged steel, double jointed self-adjusting, duck bill points, steel handles, wood grips, 24 in. span, w't per doz. 50 lbs., per dozen .....**JGIJ** $13.20

Made heavy for hard use. Extensively used for handling wood logs in ice harvesting.

ICE CUTTING AND BREAKING MACHINES.

ICE CUTTING MACHINES.

CHANDLER'S Improved.

No. 1 —Counter size, height 10 in., w't 7½ lbs.....each CCJ $ 6.35
No. 2 —Family size, height 15 in., w't 14 lbs.....each DIJ 9.50
No. 2½—Hotel size, height 18 in., w't 25 lbs.★.....each JGEJ 14.50

No. 1 is a small, compact, simple, strong and cheap machine, which cuts the ice into small diamond-shaped pieces with the utmost ease and rapidity. Can be attached by screws to any table, counter or shelf, and occupies a space only 8 in. square.

No. 2½ stands 18 in. high, occupying a space 8×11 in., and will take in a piece of ice weighing 12 lbs.

No. 2 stands 2 ft. high, occupying a space 15 in. square, and will take in a cake of ice weighing 25 lbs.

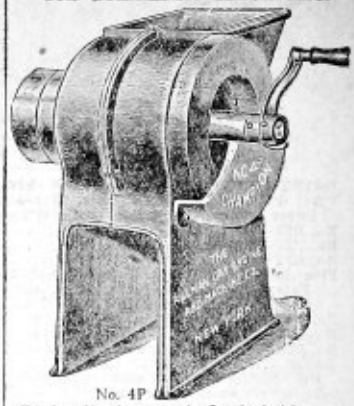
Special attention is called to the largest size No. 2½ designed for hotels and confectioners, hospitals and other institutions where crushed ice is used in quantities for table, ice cream and other purposes.

ICE BREAKING MACHINES.

No. 5.

No. 5 —LITTLE GIANT, hopper 8½×12 in., height 46 in., floor space 24×24 in., capacity 150 to 300 lbs. per minute, hand power, w't 270 lbs.★.....each CDEJ $66.75
No. 5P—LITTLE GIANT, for power, with tight and loose pulleys, diameter 2½ in., face 2½ in., tight pulley has handle so that it can also be operated by hand, otherwise same as No. 5★.....each CHFE 75.00

When ordering state whether fine or coarse cut is desired.



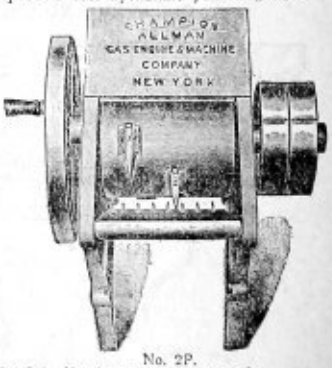
Showing Drum used on all Little Giant Machines.

No. 7—LITTLE GIANT, for power, hopper 11×12 in., height 29 in., floor space 24×24 in., pulley 24 in., face 4 in., requires about one horse power and can also be operated by hand, capacity 7 ton per hour, w't 500 lbs. each ★.....JEGIE $112.00

These machines are regularly furnished with but one tight pulley. If requested, loose pulley will be furnished without extra charge. The shaft extends long enough on each side so that either one or two pulleys can be used on either side.

ICE BREAKING MACHINES.

No. 4P



No. 4 —Hand power only, fly wheel with crank, will break ice 11×14 in., of any length, height 30 in., width between frames 11 in., floor space 2×2 ft. w't 350 lbs.★.....each CEAJ $67.50
No. 4P—Hand and power, with 9×3 in. tight and loose pulleys, otherwise same as No. 4★.....each CIDJ 76.00

As the ice enters the machine it is cut into smaller pieces by teeth which are mounted on a very heavy drum. This drum revolving very rapidly forces these smaller pieces against the comb, where they are further reduced to the size desired by the action of the teeth passing through the comb.

The teeth are made of the very best tempered steel and are drop forged to make them interchangeable. These teeth are fastened into dove-tailed lugs on the drum so that they become tighter from use, and yet may be easily removed for sharpening.

The comb is a reversible triangular with a row of teeth on each side spaced differently so as to regulate the size of the broken ice.

Champion Ice Breakers are very heavily constructed, the strain equally distributed, and require the least expenditure of time and labor.

No. 2P.

No. 2H—Hand power only, rear outlet, fly wheel and crank, will break ice 14½×14½ in., of any length, height 33 in., width between frames 14½ in., floor space 3×2 ft., w't 750 lbs., each★.....JFJ GJ $117.00
No 2P—Hand and power, tight and loose pulleys, 14×3 in., otherwise same as No. 2H★.....each JFH BE 130.00

	ADDJ	AHCJ

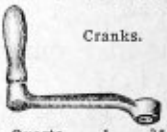
This machine is designed especially for hotels, cafes and ice cream parlors. It is the regular hand freezer, with fly wheel substituted in place of crank. Other power should never be used. It has the celebrated duplex dasher, with single self-adjusting wood scraping bar.

SAMSON POWER.

Samson, Power, Triple Motion.

Quarts	25	40
W't, lbs.	292	432
Each	$90.00	121.50
	EBBJ	JFIIJ

The platform and stand are of cast iron. The gear frame extends across the top of the tub, and is fastened by a latch bolt and thumb screw. When the frame is released it can be raised to an upright position, and is there held firmly. The can and tub may be removed and replaced at pleasure, while the frame is in this position.



The beaters are malleable iron and tinned, with single self-adjusting wood scraping bar. The tubs are exceedingly heavy and durable. The cans are of the heaviest tin plate. The pulleys on the 25 qt. are 10x4, and on the 40 qt. 16x5. The freezer should be operated at a speed of about seventy-five revolutions per minute.

PAILS are made of the celebrated everlasting Virginia White Cedar, which resists the action of brine, and will outlast several of the old style pine pails. These are bound with heavy galvanized wire hoops, which are sunk into grooves preventing them from falling down.

FRAME—The frames, locks and catches are made of non-breakable, stamped steel, will withstand the hardest usage and are much more serviceable than the old style cast-iron frames and locks. They cannot break, are rust proof, and present a very handsome appearance.

CANS—Are of the long narrow model, which present a maximum surface to the ice, insuring rapid freezing—a very strong feature of the REVONOC.

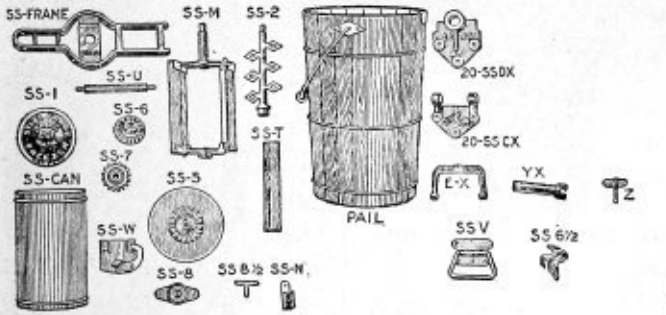

TABLE CLAMPS—One of the newest and strongest features about the REVONOC is the patented table clamp, a small device fitted to the bottom of each freezer, which enables the operator to clamp the freezer securely to a table or bench, preventing the usual slipping or wabbling motion so troublesome to the housewife. This little device, which is included in the regular price of the REVONOC is a gem in itself and will be greatly appreciated by all users.

MECHANISM—The mechanism of the REVONOC gives the freezer two distinct motions—the can turning from left to right while the dasher turns from right to left, and the wood scrapers on the dasher removing the cream from the sides of the can as fast as it is frozen. The centrifugal motion of the dasher throws the cream from the center of the can back to the side, which is revolving in the opposite direction, where the scrapers remove it instantly and return the cream to the center, repeating the operation, the result being a smooth, well-beaten, velvety cream.

These coolers are made of indurated fibre, moulded in one piece without hoops or bands. Indurated fibre is a non-conductor of heat, and therefore these coolers are very economical in ice consumption. It is tasteless and odorless, and very easily cleaned, as there are no joints or cracks to collect impurities.

WATER FILTERS AND STILLS.

STONEWARE WATER FILTERS.

FULPER, Glazed Gray Stoneware, Filter Disc of Natural Tripoli Block.

Nos.	76	77	78
Capacity, top	5	7	9 qts.
Capacity, bottom	8	11	15 qts.
Filter capacity, per day	3	4	6 gals.
W't crated	23	28	35 lbs.
Each	$3.85 DAE	4.95 BGE	6.05 CCE
Nos.	**79**	**710**	**712**
Capacity, top	13	18	25 qts.
Capacity, bottom	20	26	40 qts.
Filter capacity, per day	9	13	18 gals.
W't crated	43	50	60 lbs.
Each	$7.70 DBE	9.90 EDE	12.65 JGJJ

The stoneware used in these filters is sanitary and durable and very easily cleaned. Tripoli block of which the disc is made is regarded by science as the best filtering material known.

In operation the water percolates through the filter disc in the bottom of the upper receptacle into the lower receptacle. All the impurities collect on the surface of the filter disc (not inside) and can be easily brushed off with a stiff brush which is included with each filter.

ONE IN A CRATE.

Cruso, Glazed, Gray Stoneware with Blue Stripe, Natural Tripoli Filter Disc.

Nos.	2	3	4
Size Disc, in.	8¼	9	10
Cap. Top, qts.	9	12	17
Cap., bottom, qts.	12	17	21
Filter cap. per day, gals.	3 to 5	4 to 8	6 to 10
W't crated, lbs.	30	40	45
Each	$4.00 BBE	4.70 BIJ	6.00 CFJ

Anything contained in the water is arrested upon the extreme surface of the filter disc, from which it may be removed by brushing. Even muddy rain or river water is pure and sparkling clear after filtration through a Cruso water filter.

ONE IN A CRATE.

WATER FILTERS.

The lower jar of No. 15 filter contains a separate ice chamber so that filtered water does not come in contact with the ice, thus insuring a clean drink.

Stoneware.

No. 15—Success, two 4 gallon glazed stoneware jars, upper one fitted with 4 in. natural tripoli stone filtering block, lower one has separate stoneware ice chamber, nickel plated faucet, w't 55 lbs. ..... each CGJ $7.50

TRIPOLI STONE SYPHON WATER FILTERS.

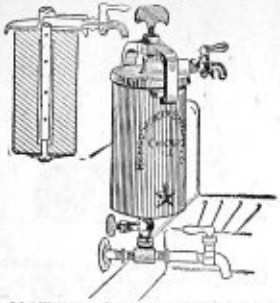
No. 6—3¾ × 5½ in., with rubber tube, w't per doz. 21 lbs. per dozen AAJJ $26.00

This filter is designed for a family supply of drinking water, and when the stone is kept fairly clean, will filter from 15 to 20 gals. per day. The filter can be used by placing mouthpiece in mouth and drawing water through the stone by suction, or started on the syphon plan, and it will go right along doing its work.

WATER STILLS.

No. 11—Rose Automatic, heavy copper, nickel plated outside, all parts exposed to water are block tin lined, height 25 in., diam. of bottom 10½ in., capacity ½ gal. per hour, each ..... AIHJ $33.00

ONE IN A BOX. W'T 25 LBS.



In operation vessels A and B are filled with cold water. Set still on fire, just like an ordinary tea kettle, and in a very short time pure, aerated distilled water will collect in reservoir C. The water feeds automatically from supply reservoir A to boiling chamber D, and when water has reached proper height, it is shut off by automatic valve at F. Gauge E indicates height of water in boiling chamber and gauge G shows distilled water in reservoir C.

The system of aerating is such that the distilled water becomes charged with all the oxygen it can possibly carry at normal temperature, therefore making it palatable to the taste, and beneficial to the health.

NOTE—Deflector H prevents heat from stove or boiling chamber striking distilled water reservoir to drive off oxygen.

FAUCET FILTERS, ATTACHMENTS, ETC.

FILTERS.

No. 96 REVARC—Germ proof Tripoli filter block 3x5½ in., heavy galvanized iron cylinder, nickel plated brass adjustable tee to fit either ½ or ¾ in. standard fuller bibb, nickel plated valve and filtered water faucet, w't per doz. 150 lbs.,
per dozen .....**EJDJ** $84.00

Natural Tripoli stone of which the filter block in above filter is made is regarded by science as the very best filtering medium known.

The wonderful formation of this stone is such that, while allowing the water to pass freely through the pores, all impurities of every description contained in the water are arrested on the extreme outer surface, from which they can be easily removed, the stone remaining white and pure.

The REVARC *adjustable tee is threaded so one end fits the thread on the faucet and the other the threads in the faucet wall piece. The filter is connected to the tee and requires no brackets or screws to hold it in position. Does not interfere with porcelain or enameled sink backs. With this arrangement the unfiltered water is drawn off through the regular faucet just as before. Capacity 15 to 30 gallons per hour, depending upon pressure and condition of water.*

The filter block in the Advance water filter is very similar to that used in the REVARC, *described above. The filtered water is drawn from a small faucet at the top of the filter, and the unfiltered water from the large faucet below.*

No. 94—Advance, Tripoli germ proof filter block 3x5½ in., heavy galvanized cast iron cylinder, diam. 4 in., with polished brass faucets, height over all 12 in., complete with attachment to fit any size smooth faucet, w't per doz. 150 lbs.,
per dozen .....**DGEJ** $79.20

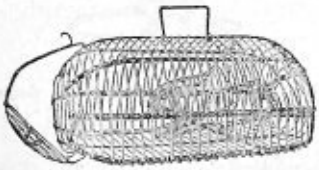
TRAPS.

WIRE.



No. 305—Midget, mouse, 5 in. diam., 3 in. high, 19 gauge coppered wire, six sheet steel coppered ribs, lacquered with patent rust proof lacquer, w't per doz. 3 lbs. .....per dozen **JIE** $2.00

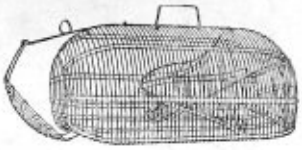
ONE DOZEN IN A PACKAGE.

No. 50—Mouse, 6½x3¼ in., wood base, with revolving wheel, w't per doz. 5½ lbs. .....per dozen **AEJ** $3.25

No. 315—Coppered iron wire, flat steel ribs, lacquered to prevent rust, self-closing trap door, 15x8½x6½ in., w't per doz. 25 lbs...per dozen **CCJ** $5.50

ONE-HALF DOZEN IN A CRATE.

AUTOMATIC.

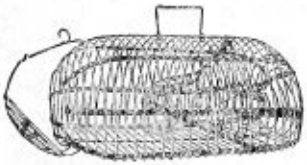


No. 150—Mouse, made of wood, galvanized iron, tin and best galvanized wire netting, height 9½ in., width 3 in., length 8½ in., w't per doz. 15 lbs., per dozen .....**JGBJ** $15.00

The rodent entering the trap causes the door to close and, as there is no escape this way, it runs forward up the wire covered passage to the balanced chute. Once on the chute the animal is by its own weight, thrown into a tank of water, and the movement of the chute automatically opens the door and the trap is reset.

ONE IN A CARTON.

REVONOC COMBINATION WIRE.



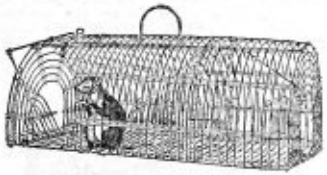
Coppered Iron Wire, Flat Steel Ribs, Patent Flange, Safety Door.

No. 416 REVONOC—16x8½x6½ in., No. 18 wire, nine flanged steel ribs, w't per doz. 32 lbs.....per dozen **JFCJ** $15.00

These traps are designed to catch and hold both rats and mice. Mesh wires are spaced ¼ inch apart, and so locked that they cannot be forced apart. Patent flange around the opening makes it impossible for the rodent to pull down the trap door and escape.

ONE-HALF DOZEN IN A CRATE.

Coppered Iron Wire, Flat Steel Ribs, Lacquered to Prevent Rust, Self-Closing Trap Door.



No .408 REVONOC—Mouse, 9x5x5 in., w't per doz. 6 lbs., per dozen **BDJ** $4.00

REVONOC RAT.

No. 415 REVONOC—Rat, 15x8½x6 ¼in., w't per doz. 25 lbs., per dozen **CFJ** $6.00

No. 422 REVONOC—Rat, 23x13½x7 in., w't per doz. 70 lbs., per doz. **JIFJ** $18.00

NO. 408, ONE-HALF DOZEN IN A BUNDLE; NO. 422, TWO IN A BUNDLE; NO. 415, ONE-HALF DOZEN IN A CRATE.

Coppered Iron Wire, Sheet Steel Ribs, Self-Closing Tin Trap Door with Flanged Edge.

No. 417 REVONOC—Rat, 17x9½x7 in., No. 17 wire 9 flanged steel ribs, w't per doz. 34 lbs. .....per dozen **JDHJ** $10.80

No. 419 REVONOC—Rat, 19x10½x8 in., No. 16 wire, 11 flanged steel ribs, w't per doz. 41 lbs., per doz. **JFJJ** $13.20

The lace wires are rigidly held in place by the heavy flanged sheet steel ribs and the trap is almost indestructible. There is a patent flange around the opening of the trap door, which prevents a rat from pulling it down after getting inside. Each trap is thoroughly lacquered to prevent rust.

ONE-HALF DOZEN IN A CRATE.

O. K. GOPHER.

No. 61—6½x4x3 in., hardwood box, stained red, flat, galvanized trigger, round coppered iron sticking bar, two strong springs, w't per doz. 7 lbs., per dozen .....**AGJ** $3.60

The most perfect and practical gopher trap on the market. Very easy to manipulate and very sensitive.

ONE GROSS IN A CRATE.

NEWHOUSE GOPHER.

No. 84—All steel, length 5 in., 2¼ in. opening, w't per doz. 3¼ lbs., per dozen .....**ABJ** $2.50

ONE DOZEN IN A BOX.

2-RING GOPHER.

Showing trap set.

Showing trap sprung.

No. 40—Galvanized wire, non-rusting finish, length 6½ in., w't per doz. 3 lbs. .....per dozen **BAJ** $4.00

A protection to the gardener, fruit grower or farmer against gophers and all other burrowing animals. It disables and effectively holds the animal and allows no possibility of escape.

ONE DOZEN IN A BOX.

MOLE.

No. 16—Reddick, steel frame, six sharp steel tines, very strong, heavily tinned to prevent rusting, japanned steel spring, w't per doz. 38 lbs., per dozen ....**JFIJ** $12.00

This is a sure, sensitive and effective trap.

No danger in setting this trap. Set by pulling up plunger rod. The trigger catches itself.

ONE-HALF DOZEN IN A CRATE.

TRAPS.

REVONOC GAME TRAPS.

Steel With Chain.

No. 100 REVONOC—Rat, single spring, 3½ in. jaw, w't per doz. 6 lbs., per dozen .....**AAE** $4.25

No. 101 REVONOC—Muskrat, single spring, 4 in. jaw, w't per doz. 8 lbs., per dozen .....**ACE** $5.00

No. 101½ REVONOC—Mink, single spring, 4⅜ in. jaw, w't per doz. 11½ lbs., per dozen .....**BJE** $7.50

No. 102 REVONOC—Fox, double spring, 4⅜ in. jaw, w't per doz. 14 lbs., per dozen .....**JBHE** $10.50

No. 103 REVONOC—Otter, double spring, 5½ in. jaw, w't per doz. 23 lbs., per dozen .....**JCHJ** $14.00

No. 104 REVONOC—Beaver, double spring, 6½ in. jaw, w't per doz. 27 lbs., per dozen .....**JDDE** $16.50

REVONOC *Traps are of superior quality. The springs are made from spring steel, carefully tempered. When opened the* REVONOC *Traps lie very flat so that they can be easily secreted in the runways of animals. The chain is strong, well made and will stand the severest test.*

NO. 100 THIRTY-FIVE, NO. 101 TWENTY-FIVE, NO. 101½ TWENTY, NO 102 TWELVE, NO. 103 EIGHT, AND NO. 104 FIVE DOZEN IN A BARREL.

No. 1.

All Steel, with Chain.

No. 0 REVONOC—Rat or Gopher, single spring, w't per doz. 6½ lbs., per dozen .....**ADE** $4.25

No. 1 REVONOC—Muskrat, single spring, w't per doz. 8 lbs., per dozen .....**AGJ** $5.00

No. 1½ REVONOC—Mink, single spring, w't per dozen 10 lbs., per dozen .....**BEE** $7.50

Traps of this pattern are popular with trappers because they are light weight, yet strong. They are easily transported and a greater number can be taken to the trapping grounds. Easily secreted in the narrow runways of animals because so compact in form.

REVONOC *traps are strongly made, carefully inspected and guaranteed.*

TWELVE DOZEN IN A CASE.

TRAP CLAMPS.

No. 5—For setting No. 5, w't per doz. 36½ lbs. .....per dozen **CDJ** $6.00

No. 5—For setting No. 6, w't per doz. 24 lbs. .....per dozen **JEGJ** $10.00

NEWHOUSE, WITH CHAIN.

No. 2.

No. 0—Rat, 3½ in., single spring, w't per doz. 7¼ lbs., per doz. **BDJ** $4.25

No. 1—Muskrat, 4 in., single spring, w't per doz. 10 lbs., per doz. **BHE** $5.00

No. 1½—Mink, 4⅝ in., single spring, w't per doz. 15 lbs., per doz. **DBE** $7.50

No. 2—Fox, 4⅝ in., double spring, w't per doz. 18 lbs., per doz. **JFJJ** $10.50

No. 2½—Otter, 5½ in., single spring, w't per doz. 26 lbs., per doz. **JIDJ** $16.50

No. 3—Otter, 5⅝ in., double spring, w't per doz. 28 lbs., per doz. **JHJJ** $14.00

No. 4—Beaver, 6¼ in., double spring, w't per doz. 38 lbs., per doz. **JIDJ** $16.50

No. 5—Bear, 11¾ in., double spring with teeth, w't per doz. 234 lbs., per dozen .....**JFHDJ** $120.00

No. 6—Grizzly Bear, 16 in., double spring with teeth, w't per doz. 525 lbs., per dozen .....**AEIFJ** $280.00

These traps are most carefully made in every detail, of the finest materials and are all thoroughly tested, guaranteed in every way.

NOS. 0 AND 1 TWELVE DOZEN IN A CASE, NO. 1½ TWENTY-FIVE, NO. 2 FIFTEEN, NO. 3 TEN DOZEN IN A BARREL, NO. 4 SEVEN DOZEN IN A BARREL.

No. 81—Webbed jaws, spread of jaws 4 in., with chains, w't per doz. 11 lbs., per dozen .....**CAE** $5.50

Corresponds in size with a regular "Newhouse" No. 1.

From the cross section at the left, it is plain the animal can only gnaw off its leg at a point below the meeting edges. The flesh left above the point of amputation and below the jaws will swell, and make it impossible to pull the leg stump out of the trap.

12 DOZEN IN A CASE.

No. 91—Double jaw, spread of jaws 5½ in., with chains, w't per doz. 11 lbs., per dozen .....**CDJ** $6.00

No. 91½—Double Jaw, spread of jaws 6¼ in., with chains, w't per doz. 17 lbs., per dozen .....**EAE** $9.00

The double jaws take a firm grip so high up on an animal that he cannot twist out.

For Muskrat, Skunk, Mink, Raccoon, Fox or Woodchuck.

NO. 91 THIRTY DOZEN, NO. 91½, TWENTY DOZEN IN A BARREL.

No. 5.

ONEIDA JUMP TRAPS.

Double Jaw with Chains.

No. 91—Muskrat or skunk, 4¾ in., single spring, w't per doz. 8 lbs., per dozen .....**BJE** $6.00

The double jaws take an easy and firm grip so high up on the muskrat that he cannot twist out, neither can the skunk gnaw out. Double jaws rarely brake the leg bones because of the double surfaces.

TWELVE DOZEN IN A CASE.

Single Spring.

All Steel With Chain.

No. 0—Rat or Gopher, 4 in., single spring, w't per doz. 5½ lbs., per dozen .....**ADE** $4.25

No. 1—Muskrat, 4¾ in., single spring, w't per doz. 8 lbs., per dozen .....**AGJ** $5.00

No. 1½—Mink, 5½ in., single spring, w't per doz. 10 lbs., per dozen .....**BEE** $7.50

No. 2—Fox, 5½ in., single spring, w't per doz. 14 lbs., per doz. **JCEJ** $10.50

No. 3—Coyote or Badger, 6½ in., single spring, w't per doz. 22 lbs., per dozen .....**JDHJ** $14.00

No. 4—Otter, 7¼ in., single spring, w't per doz. 28 lbs., per doz. **JEFE** $16.50

Jump Traps are light, compact and guaranteed as to quality.

NOS 0, 1 AND 1½, TWELVE DOZEN IN A CASE, NO. 2, TWENTY, NO. 3, TWELVE, NO. 4, TEN DOZEN IN A BARREL.

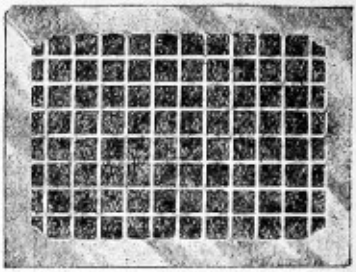
ONE SET IN A BOX.

H. S. B. & CO.'S REGISTERS



Entire page G J ℅

Register.

Border.

Face.

H. S. B. & Co.'s Semi-steel Registers are light in weight and combine the desirable features of both the cast and the steel registers. The faces made of a special composition of new iron, are strong, and very highly finished. The boxes, or bottoms, are of wrought steel, very shallow and riged The fans, or leaves, are ribbed, and fit the boxes snugly. The boxes and fans are finished in japan, baked on, which protects them from rust and assures easy working. All plated faces and borders are coated by the electro process, and, when finished, look exactly like the solid metal. Plain lattice design, illustrated above is growing very popular, as it matches the modern design of hardware and woodwork.

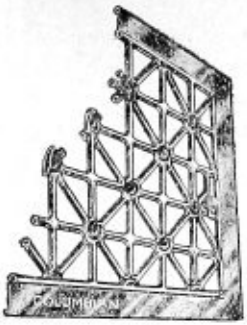
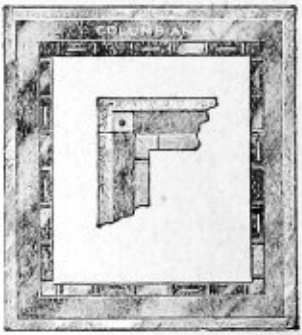
Any of the above registers can be used as ventilators, and when placed in wall or ceiling above easy reach, they can be operated by means of chain or cord.

Ventilators for Cords, 50 cents list extra on sizes up to 14x14, and $1.00 list extra on sizes above.



Indicator Handles, one "open," one "closed," and 10 feet of cord, extra ..... per set $0.75

"TUBO" WROUGHT STEEL REGISTERS.



GE-AJ%

Register.

Face

Border.

Owing to the shallowness of these registers they can be used equally well in the floor, wall or ceiling.

FACES—The Grecian design of the faces is both simple and artistic. They are made of two heavy plates of sheet steel, so closed over each other as to give a tubular construction. The tubular construction provides a greater carrying capacity and makes the faces so strong that they require no supporting bars or braces to strengthen them. It also enables them to withstand a sudden blow or strain without warping or cracking.

BOXES—The register boxes are made of wrought steel, very shallow and rigid. A set screw in one corner permits of taking them apart with ease. The faces are ribbed, and lap over each other and fit the box so snugly that when closed, there are no gaping spaces through which the air may escape.

BORDERS—The borders are stamped out of heavy steel, with corners reinforced securely. The slots for tin box loops are located as in standard cast iron borders. The borders are beveled, which makes them very strong and rigid.

9x12	3	2.10	2.55◀	4.00◀
10x12	4	2.40◀	2.90◀	4.40◀
10x14	5	3.15◀	3.80◀	6.55◀

Order by number. List is same on both Nos. 350 and 340.

This register is very easy to install, has positive operating handle which can be operated readily with hand or foot. The convex face covers any defects in the plaster around the tin box opening, and makes a finished job.

ROUND REGISTERS.

New Idea, cast face, black japanned with steel valves, 6 in., extreme measurement of face 7 in., w't 2 lbs., each ..... JDJ $1.50

This register is made especially for use with "double heater" stoves, but is equally well adated for furnace work or for ventilators.

AIR MOISTENERS.

For Steam or Hot Water Radiators.

No. 2-D—Princess, made of galvanized iron, 1½x9¾ in. opening at top, 7 in. deep, 12 in. across bottom, with hook to fit any radiator, finished in aluminum bronze, w't per doz. 10 lbs., per dozen ..... CFJ $6.00

Makes rooms which are heated by hot water or steam more comfortable and much more healthful.

REGISTER FACES, VENTILATORS, ETC.

STOVE PIPE REGISTERS.

Floor Plate.

Ceiling Plate.

No 366—Adams, 15½ in. square, openings for 6 in. stove pipe, black japanned floor plate with sliding damper, with grate cover and extra solid cover, white japanned ceiling plate with removable center cap, w't per doz. sets 260 lbs., per dozen sets **AIHJ** $30.00

The square stove pipe register meets with great favor on account of the case with which it can be installed, since it is much easier for the average person to cut a square hole than a round one.

ONE-QUARTER DOZEN SETS IN A CASE.

Floor Plate.

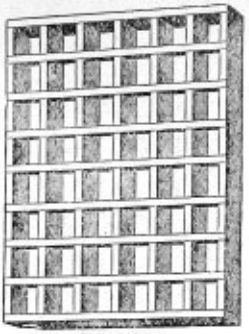
The floor plate consists of three pieces, having a removable cap for use when pipe is taken down, and a sliding plate to regulate the air from below.

The ceiling plate has a removable cap for use when pipe is taken down.

Ceiling Plate.

Floor Plate Black Japanned, Ceiling Plate White Japanned.

No. 166—6 in., complete, w't per doz. sets 212 lbs., per dozen sets **ABFJ** $18.00



No. 177—7 in., complete, w't per doz. sets 252 lbs., per dozen sets **ABFJ** $19.00

No. 266—Adams, 6 in., complete, w't per doz. sets 216 lbs., per dozen sets .....**ADDJ** $20.00

No. 267—Adams, 7 in., complete, w't per doz. sets 220 lbs., per dozen sets .....**ADDJ** $20.00

ONE-QUARTER DOZEN SETS IN A CASE.

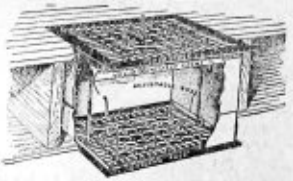
24x22 in.	3.67	36x28 in.	7.00
24x24 in.	4.00	36x30 in.	7.50



The last named dimensions refer to the wide strips or stringers.

Other sizes made to order.

The square strips are let into the larger strips in these registers in such a manner as to make the top of the face even. When in place the top of the face is flush with the floor, wall or ceiling and when finished to match the other woodwork, a pleasing effect is produced. Are ready for use when received and easily fitted into the opening. These wood register faces are practical in every way and are coming into general use.

★*SHIPMENT FROM FACTORY DIRECT OR FACTORY TO STORE TO GO FORWARD WITH OTHER GOODS.*

ADJUSTABLE VENTILATORS.

Black Floor Register with Valves, White Ceiling Plate, Sheet Metal Box Connecting the Two, Which is Adjustable from 7 to 12 Inches

Size, in.	8x10	8x12	9x12	10x12
W't, lbs.	9½	11	13	13
Each	$4.40	4.80	5.40	6.40

Size, in.	10x14	12x14	12x15
W't, lbs.	15	17	17½
Each	$7.60	10.00	10.40
	BDE	JCBE	JCCE

The box consists of two bright tin sections of which one is attached to the floor register and the other to the white ceiling face, one section sliding into the other, the two being held together by springs. The ceiling face has a removable cap to allow access to the springs. Can be placed in position in a minute.

Combination Pattern.

Nos.	108	1210
Size, in.	8x10	10x12
W't, lbs.	10	13
Each	$4.40	6.40
	ADJ	BJE

Can be used either as a smoke pipe register or an adjustable ventilator. Consists of a black floor register with valves and a white ceiling plate, both of which have opening in center for a 6 in. smoke pipe. Supplied with removable center pieces to close smoke pipe openings, which make this an adjustable ventilator performing the same service as the regular pattern, viz., allowing the surplus heat to pass from a lower room to an upper one.

ONE IN A PASTEBOARD BOX; THREE IN A CRATE.

To avoid breakage in shipment and high freight rates glass is omitted.

The heavy cast frame will withstand the hardest usage and will even outlast the wall. Locks automatically from outside by pushing steel sheet, which protects glass when window is open, over locking lugs provided on lower side of wall frame.

★*FOR FACTORY SHIPMENT ONLY.*

HEAT REGULATORS.

No. 35-D—Minneapolis, complete with clock ready to install, w't each 30 lbs., each .....**BAJJ** $35.00

The Minneapolis Heat Regulator consists of a thermostat, or a mechanical thermometer, and a motor which opens the drafts when the heat falls below the desired temperature, and closes them again when it reaches the temperature at which the regulator is set.

The clock attachment allows a lower temperature at night and, at any set hour in the morning, will automatically turn the indicator to seventy degrees, thereby giving the occupants of the house warm and comfortable rooms when they arise.

The motor is designed to be attached to the basement ceiling. It is small and compact, and presents a very neat appearance. It is provided with an automatic switch which leaves the dampers closed when the motor is run down, thus eliminating all dangers resulting from forgetting to wind motor and letting it run down with drafts open.

The motor has a governor which controls the speed and allows the drafts to open slowly and steadily, thereby avoiding the banging and clatter of dampers so objectionable in other makes.

PACKED ONE IN A BOX WITH FULL DIRECTIONS FOR INSTALLING.

	BDEJ	CAGJ

The easiest turning ventilator or chimney top made. Will respond to the slightest breeze, makes a splendid ventilator because the hood is so shaped that it is impossible for rain or snow to blow down the chimney.. Prevents down draughts and will improve any chimney.

May be used on smoke flue as well as ventilator flue.

Especially recommended for use on low houses adjoining high buildings.

CHIMNEY CAPS.

Nos. 110 to 112.

Dampers have extra sharp steel spindles and can be put in any pipe without the aid of tools. The nickel plated coil handle never gets hot. The best damper made.

OVAL DAMPERS.

No. 505—6 in. OVAL cast blade 6⅝ in. long, 3½ in. wide, fits 6 in. stove pipe, w't per doz. 10 lbs., per dozen ..... AAJ $1.80

No. 507—7 in. OVAL cast blade 7⅝ in. long, 3¼ in. wide, fits 7 in. stove pipe, w't per doz. 12 lbs., per dozen ..... ADJ $2.30

These dampers are intended for use in taper joints near collar of stove, and are particularly convenient where warming closet or shelf is used, as the damper can be placed low enough to permit easy reach from the floor.

PACKED IN BARRELS.

Per dozen	$90.00	90.00	90.00
	EAGE	EAGE	EAGE

ONE IN A CARTON WITH FULL DIRECTIONS FOR INSTALLING.

The Arnold Damper saves one-third the fuel. It is designed to fit between the joints of the smoke pipe, usually between the first and second joints. Works automatically; no batteries, no springs. Works entirely by the fire itself. The damper can be set for any fire desired. When the fire reaches the degree of heat desired, the damper automatically closes just enough to keep the fire steady at that point. Heat causes draught up stove or furnace pipe, and velocity of the draught increases as heat increases. It is the power of the draught that operates the Arnold Damper. Responds instantly to any change in draught. Provides uniform heat. Prevents overheating.

No. 165—Reduces from 6 to 5 in., w't per doz. 9 lbs. .....per dozen ADE $2.20
These thimbles are used where the flue is of a size different from the pipe, also where necessary to use a pipe of a size different from the stove collar.

ONE DOZEN IN A CRATE.

REDUCERS, CAPS, FLUE STOPPERS AND TONGS.

STOVE PIPE REDUCERS.

Star—7 to 6 in., made of No. 27 smooth blued sheet steel, w't per doz. crated 12 lbs..... per dozen BBJ $3.40

Star Reducers are useful where it is necessary to use stove pipe of different size than the stove collar and where the pipe is not the same size as the flue which it enters.

ONE DOZEN IN A CRATE.

STOVE PIPE CAPS.

No. 96—6 in., for 6 in. stove pipe, stamped from sheet steel, nestable and very strong, w't per doz. 9 lbs., per dozen .....AAJ $1.90

No. 960—Galvanized iron, otherwise same as No. 96.....per dozen ADJ 2.40

These caps prevent rain and wind from blowing down the pipe. Being nestable, they occupy but small space in the merchant's store and also take a low freight rate.

STOVE PIPE BRACES.

No. 196—6 in., black japanned, flexible steel bands with rigid locking lever, w't per doz. 4 lbs., per dozen .....JIJ $1.50

Easily attached, requiring only the tightening of two bolts. Holds pipe rigid. Prevents pipes sagging or pulling apart. Overcomes necessity of wires or hooks to ceiling.

ONE DOZEN IN A BOX.

FLUE STOPPERS.

No. 10—KIRCH'S, corrugated and lacquered, heavy sheet steel cone lock, for 5, 6 or 7 in. flues, w't per doz. 5½ lbs., per dozen.....AAJ $1.00

Prevents gas, smoke, water, soot or fire escaping from flue. It is absolutely clean, as it holds soot back 8¼ in. from the front.

ONE DOZEN IN A BOX.

FLUE STOPPERS.

No. 6. No. 16. No. 3.

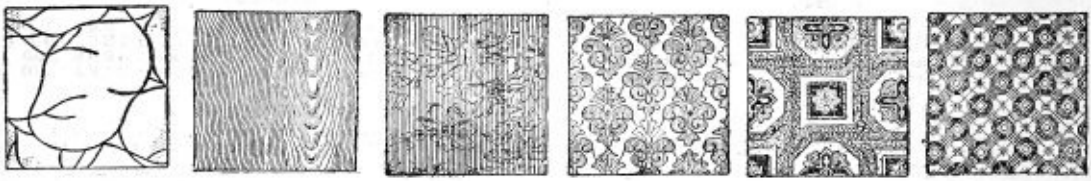
PRINTED LINOLEUMS.

Illustrated in Colors on the Opposite Page.

D GRADE LINOLEUMS.



8x4, or 2 yds. wide, w't per roll approximately 285 lbs.★ ..... per square yard **EJ** $0.84
10x4, or 2½ yds. wide, w't per roll approximately 355 lbs.★ ..... per square yard **EJ** .84
16x4, or 4 yds. wide, w't per roll approximately 570 lbs.★ ..... per square yard **FJ** .95

E GRADE LINOLEUMS.

8x4, or 2 yds. wide, w't per roll approximately 250 lbs.★ ..... per square yard **DE** $0.75

Approximately 30 running yards in a roll.
Linoleum is peculiarly adapted for a floor covering, especially in the hall, vestibule, bathroom, kitchen, also churches, offices, banks, restaurants, etc. It is elastic, noiseless, not readily stained, sanitary and easily kept clean.

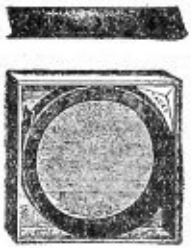
TABLE OIL CLOTH.

Vein. Wood Grain. Floral. Scroll. Large Check. Small Check.

Gold vein, black vein, blue vein, plain white and plain black, w't per roll 11 lbs. ..... per roll **BBJ** $3.50
Fancy patterns, w't per roll 11 lbs. ..... per roll **BAJ** $3.30

We have a large and attractive assortment of patterns and will send sample book on request. In ordering specify colors desired.

TABLE OIL CLOTH IS 5-4 OR 1¼ YDS. WIDE AND A ROLL CONTAINS 12 LINEAL OR 15 SQ. YDS.



LINOLEUM BINDING.

For Covering Seams in Linoleum.
No. 50—¾ in. brass, w't per doz. boxes 60 lbs., per dozen boxes **BHHJ** $48.00

FIFTY YARDS IN A BOX.

LINOLEUM EDGE BINDING.

No. 75—Heavy brass, highly polished, to protect edge of linoleum or cork carpet where exposed, w't per doz. 60 lbs., per dozen boxes **DCBJ** $72.00

SEVENTY-FIVE FEET IN A BOX.

★*FOR FACTORY SHIPMENT ONLY.*

FLOOR OIL CLOTHS.

Illustrated in Colors on the Opposite Page.

B grade, w't per roll approximately 175 lbs., 2 yds. wide .....per square yard **CE** $0.60
D grade, w't per roll approximately 150 lbs., 2 yds. wide .....per square yard **CD** .55

Both B and D grades furnished 4x4 or 1 yd., 6x4 or 1½ yds., 8x4 or 2 yds. wide. All patterns in rolls of approximately 30 running yards.

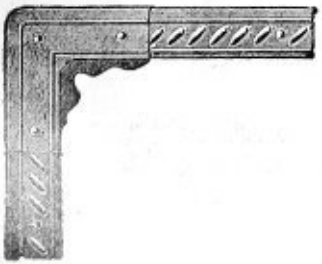
OIL CLOTH RUGS.

B Grade.

4x4, or 1 yd. square .....per dozen **EHJ** $9.70
5x4, or 1¼ yds. square .....per dozen **JIJJ** 15.00
6x4, or 1½ yds. square .....per dozen **ABIE** 21.60
8x4, or 2 yds. square .....per dozen **BBDE** 37.40

D Grade.

4x4, or 1 yd. square .....per dozen **EEJ** $9.20
5x4, or 1¼ yds. square .....per dozen **JHEJ** 14.20
6x4, or 1½ yds. square .....per dozen **ABBE** 20.40
8x4, or 2 yds. square .....per dozen **BAFJ** 36.00



Made on a heavy canvas or burlap backing, on which the filler consisting of best material available for obtaining a smooth surface is applied under pressure, producing the highest wearing quality, and a perfectly smooth surface on which the design is printed.

INLAID LINOLEUMS.

8x4, or 2 yds. wide, A grade, w't per roll approximately 550 lbs. .....per square yard **ABJ** $2.00
8x4, or 2 yds. wide, B grade, w't per roll approximately 475 lbs. .....per square yard **AAJ** 1.80

Inlaid linoleums are most satisfactory for offices, banks, theaters, schools and all floors subject to constant wear. They differ from printed linoleums in that the pattern is made in the fabric and goes clear through to the burlap back.

OIL CLOTH BINDING.

This binding is cut into four strips of equal length to exactly fit square oil cloth rugs 4-4, 5-4, 6-4 and 8-4 yds. in size. These measures have reference to the measurement of one side of rug, consequently for a 6-4 rug it will require 6 yds. of binding.

H. S. B. & Co.'s, Complete with Corners and Brads.

LUBRICATING GRAPHITE.

Nos. 632 to 644. Nos. 1 to 25.

DIXON'S FLAKE.

	Grade 1.	Grade 2.
No. 632—1 lb. cans, each .....BE	$0.36	$0.36
No. 633—5 lb. cans, each .....AAE	1.70	1.70
No. 644—25 lb. boxes, per pound .....BJ	.32	.32

Flake Graphite forms a coating on the metalic surfaces, which brings about a reduction of the solid friction between those surfaces. The minute flakes fill up all depressions and bring the surfaces of the bearings much nearer a state of perfect smoothness.

Grade 1 is standard flake and is intended for the great majority of uses; grade 2 is fine flake for valves and very delicate parts.

NO. 632, THIRTY-SIX; NO. 633, TEN AND NO. 644, ONE IN A CASE.

MEXICAN POWDER.

No. 1—1 lb. cans.....each BJ $0.35
No. 5—5 lb. cans.....each JIJ 1.50
No. 10—10 lb. cans.....each AGJ 2.80
No. 25—25 lb. cans, per pound AB .20

Air floated graphite powder, impalpably fine and absolutely free from grit. It will remain perfectly suspended in oil for an indefinite period, thus feeding through any lubricator without clogging. Graphite if regularly mixed with lubricants will very much reduce the oil consumption. If mixed with linseed oil, air floated graphite makes a splendid graphite paint for painting boiler fronts, etc.

NO. 1, THIRTY; NO. 5, TWELVE; NO. 10, SIX AND NO. 25, TWO IN A CASE.

STOVE PIPE ENAMEL.

Jet Black, Permanent and Elastic.

½ pt. cans, with brush, w't per doz. 7 lbs.....per dozen ADE $2.40
1 gal. cans, w't 8 lbs., per gallon .....AAJ $1.80
¼ pt. cans, without brushes, ten cent size, w't per doz. 5 lbs., per dozen .....JHJ $1.20

Dries with a brilliant lustre. Prepared especially for gas stoves, boilers, smoke-stacks, registers, furnaces, ventilators, radiators, sewing machines, machinery, and all iron work where a bright gloss black is required. Will not turn dull, crack, scale or rub off, and will resist heat.

ONE DOZEN IN A HANDSOME BOX, WITH HINGED COVER; ONE-QUARTER PINT CANS WITHOUT HINGED COVER.

RANGE AND IRON ENAMEL.

No. 76-D—Black Silk, in ½ pt. friction top cans, with good brushes, w't per gro. 100 lbs....per gross AHJ J $30.00
BONNELL'S NUBIAN, ½ pt. cans with brush, w't per gro. 100 lbs., per gross .....BAF J $39.60

ONE DOZEN IN A CASE.

STOVE ENAMEL.

No. 43-D—Aluminum, liquid, in 4 oz. friction top cans, w't per gro. 65 lbs., per gross .....BHH J $48.00
No. 44-D—Aluminum, liquid, in 8 oz. friction top cans, w't per gro. 90 lbs., per gross .....EGF J $96.00

Aluminum preparations are mixed ready for use. For stove trimmings, radiators, gas ranges, lawn mowers, plumbing, etc.

No. 654-D—21 oz. friction top cans, per gross .....AHJ J $36.00

Black-Lusta Enamel is a very thin preparation of great covering capacity and which dries very quickly.

Especially adapted for gas ranges, stove pipes, window screens, etc.

ONE QUARTER GROSS IN A CASE.

SOOT DESTROYER.

No. 1—Anti-Carbon, in 1½ lb. packages, 48 packages in a case, w't per case 80 lbs.....per case EDJ $9.00
No. 2—Anti-Carbon, assorted, 24 only 1½ lb. packages and 12 only 3 lb. packages in a case, w't per case 80 lbs.....per case EAJ $8.50
No. 3—Anti-Carbon, in 3 lb. packages, 24 packages in a case, w't per case 78 lbs.....per case DBJ $8.00

Anti-Carbon Soot Destroyer is a composition which when sprinkled on the red hot coals, creats and expels hot chemical fumes which destroy all soot in the stove, pipes and chimney.

STOVE OR FIRE CLAY.

Nos. 3-D to 10-D. Nos. 31-D to 101-D.

RUTLAND.

No. 3-D—Packages of about 3 lbs., 24 packages in a case, per case .....BCE $3.96
No. 6-D—Packages of about 5 lbs., 24 packages in a case, per case .....CIE $6.60
No. 10-D—Packages of about 10 lbs., 24 packages in a case, per case .....EEE $9.24
Bulk, in bags of 100 lbs. or bbls. of about 400 lbs., per 100 lbs. BJ J $3.30

EAGLE.

No. 31-D—Packages of about 3 lbs., 12 packages in a case, per case .....ABJ $1.98
No. 61-D—Packages of about 5 lbs., 12 packages in a case, per case .....BJ J $3.30
No. 101-D—Packages of about 10 lbs., 12 packages in a case, per case .....BGE $4.62

Both of above are durable, fire proof mixtures which require the addition of water only to make a splendid stove clay for new fire box linings as well as repairing old ones.

STOVINK.

Stovink is not polish, it is an ink or dye. Will withstand heat better and last longer than any other preparation yet discovered. To be used on stove lids which have been burned red, also on the grates for gas, gasoline and oil cook stoves where stove polish will not stick.

No. 34-D—In 4 oz. glass bottles with complete directions, w't per gross 80 lbs. .....per gross BHH J $48.00

ONE DOZEN IN A PACKAGE; ONE-QUARTER GROSS IN A CASE.

SHEET STEEL ROOFING.

Roll and Cap.

Painted—28 gauge, approximate w't per roll 77 lbs.★ .....per roll $

Galvanized—28 gauge, approximate w't per roll 93 lbs.★.....per roll $

Heavier gauges furnished if desired.

The distinctive feature of this roofing is the locking of the cleats into the cap, which holds it firmly to the standing seam. The construction is simple, and is easily and rapidly laid. The metal caps are made in 2 to 6 ft. lengths, which we furnish with each square, cleats included. Each roll is 50 ft. long; the covering width is 24 in., and will lay 100 sq. ft. on building.

Caps and cleats shipped unless otherwise instructed.

Tools necessary to lay are: 1 edging tong, 1 cap seamer, 1 pair snips. These are charged for when sent and if returned in good order, free of expense to us, we will refund the full amount.

★*FOR FACTORY SHIPMENT ONLY.*

BABBITT METAL.

No. R—Special high grade anti-friction metal, for all general bearing work, light or heavy pressure, fast or slow speed, positively the best for all round use, in flat rectangular bars, w't about 4 lbs. .....per pound $

Babbitt is made of selected new metals, double refined, and mixed in accurate proportions for uniform and dependable work. Superior in anti-friction and anti-compression qualities to most of the highest priced, so-called "genuine" babbitts. Equally suitable for light bearings, or for heavy duty, high speed machinery.

LOOSE.

WALL TIES.

Stamped from Best Galvanized Sheet Steel.

No. 75—Niagara wall ties, ⅝ in. wide, 7½ in. long, guaranteed to have an average breaking strain of 800 lbs. each, w't per 1,000 about 43 lbs., per 1,000 ..... CIJ $6.50

When it is considered that bedded in a wall, ten of these ties represent a resistance of 8,000 pounds to any tendency to spread or bulge, some idea will be formed as to their value in stiffening and strengthening a wall. Their use strengthens a brick wall more than an addition of one width of brick. A hollow wall where they are used is stronger than a solid wall of the same thickness where they are not used.

ONE THOUSAND IN A BOX.

TINNERS' MACHINES.

BURRING.

Columbian, Solid Frame, with Extra Upper Face, for 22 Iron and Lighter.

No. 77—Large, diam. of face 2¼ in., with stand, w't 25 lbs . . .each IJJ $9 00

No. 78—Small, diam. of face 1½ in., with stand, w't 21 lbs.....each HEJ 8.50

Encased, Adjustable Boxes, with Extra Upper Face, for 24 Iron and Lighter.

No. 80—Large, diam. of face 2½ in., with stand, w't 23 lbs.....each AJEJ $10.50

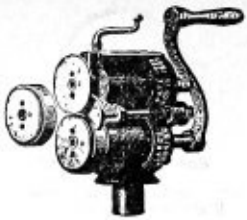
No. 80½—Large, without stand, otherwise same as No. 80, w't 12 lbs., each ....IGE 9.75

No. 79—Small, diam. of face 1½ in., with stand, w't 21 lbs.....each AJJJ 10.00

No. 79½—Small, without stand, otherwise same as No. 79, w't 10 lbs., each ....IBE 9.25

Burring machines are used for crossing, edging rims of covers for pails, boilers, etc., and for preparing circular edges of bottoms and bodies of vessels for double seaming.

TURNING.



Columbian, Solid Frame, with Two Sets of Faces, for 22 Iron and Lighter.

No. 42—Large, diam. of faces 3 in., with stand, w't 31 lbs.....each AJBJ $10.25

No. 41—Small, diam. of faces 2⅜ in., with stand, w't 25 lbs.....each AJJJ 10.00

TURNING.

Encased, Adjustable Boxes, with Two Sets of Faces, for 22 Iron and Lighter.

No. 46—Large, diam. of faces 3 in., with stand, w't 28 lbs.....each AAEJ $11.50

No. 46½—Large, without stand, otherwise same as No. 46, w't 17 lbs., each ....AJGE 10.75

No. 45—Small, diam. of faces 2⅜ in., with stand, w't 23 lbs....each AABE 11.25

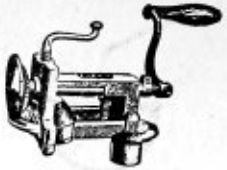
No. 45½—Small, without stand, otherwise same as No 45, w't 12 lbs., each ....AJEJ 10.50

Turning machines are used for turning the tops of vessels to receive wire.

WIRING.

Columbian, solid Frame, for 22 Iron and Lighter.

No. 25—Diam. of faces 3 in., with stand, w't 31 lbs.....each ABJJ $12.00



Encased Adjustable Boxes, for 24 Iron and Lighter.

No. 26—Diam. of faces 3 in., with stand, w't 28 lbs.....each ADJJ $14.00

No. 26½—Without stand, otherwise same as No. 26, w't 17 lbs..each ACBE 13.25

Wiring Machines follow the Turning Machines. They are intended for rolling sheet metal tightly around wire after its seat has been prepared by the Turning Machine.

SETTING DOWN.

Columbian, Solid Frame, for 24 Iron and Lighter.

No. 56—With stand, w't 21 lbs. each IGE $9.75

Setting Down Machines follow the Burring Machines pressing the edge of bottom onto the flange of body in preparation for double seaming.

Improved with Adjustable Gauge.

No. 86—For seams up to 3/16 in., capacity 24 iron and lighter, with stand, w't 31 lbs..... ..... each ACEJ $13.50

No. 87—Heavy, for seams up to ½ in., capacity 18 iron and lighter, with stand, w't 100 lbs★.....each BBJJ 22.00

The improvements on these machines adapt them for setting down the seams of different shaped vessels to better advantage than any other design. The inclined position of both upper and lower faces allows work to be held up or down and seams to be started inward while setting down, thereby facilitating the operation of double seaming.

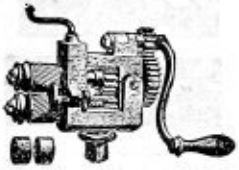
No. 87 can be fitted with pulley for power at extra cost.

★*FOR FACTORY SHIPMENT ONLY.*

STOW'S IMPROVED MACHINE STANDARDS.

Improved Machine Standards, w't 11 lbs.

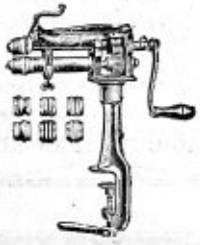
Each ....AJJ $1.00



These standards are so made as to be used on any bench, varying in thickness from one to three and one-half inches. The necessity of cutting holes in the bench is obviated, and the tinner is enabled to use a machine in any part of his shop most convenient to his work. The wrench is always attached to the standard.

TINNERS' MACHINES.

CRIMPING.



Packham's, for stove and conductor pipe. with standard, w't 24 lbs..each JGEJ $20.00

No. 7—Stove pipe crimper and beader, complete with standard, w't 47½ lbs., each.....AAJE $24.00

These Machines are designed to facilitate the making and putting together of metal pipe of different diameters. They crimp and contract the edges of stove and conductor pipe, so that the lengths are put together easily. They have steel rolls and are adapted to material as thick as No. 22 gauge.

BEADING.

No. 4, With Standard.

Stow's Patent, with Adjustable Boxes and Duplicating Parts.

No. 4—6 in., with 4 pairs of rollers and rotary standard, w't 50 lbs..each BJDE $39.50

No. 5—4 in., for tin, with 5 pairs of rollers and rotary standard, w't 37 lbs., each ★.....AGCE 33.50

The 4 pairs of rollers accompanying the No. 4 beader are the single bead, open bead, small triple bead and triple coffee pot bead.

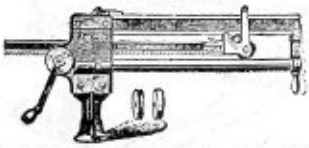
These machines are adapted to material not thicker than No. 28 gauge. All parts are made to standard gauges so that any piece can be replaced by designating number of machine and the part wanted.

BRASS MOUNTED GROOVING.

With Steel Bar and Milled Horn, for No. 24 Iron and Lighter.

No. 01—20 in., three grooving rolls, one each ⅛, ¼ and ⅜ in., with standard, w't 100 lbs..... each ACIE $27.00

IMPROVED PATENT GROOVING.



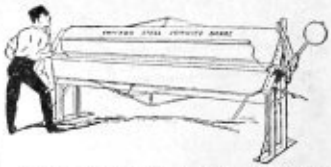
For No. 22 Iron and Lighter.

No. 120—30 in., rolls ⅛, ¼, ⅜ and smooth or flattening, w't 110 lbs., each .....AHFE $36.00

Adapted for grooving the seam of furnace and leader pipe, sheet iron can bodies, etc. Pipe can be grooved as small as 2 in. in diameter. Grooving horn is reversible so that either the flat surface or one of the grooves that are planed into the horn can be turned upward. When the seam is to be located on the outside of the work a roll with a groove of the proper width is used on the flat surface of the grooving horn.

For inside seaming, a flat roll is provided for pressing the seam into one of the grooves planed into the horn. These machines are made with a flat supporting bar, and an adjustable stop is provided on grooving horn to prevent work from slipping, while being grooved. When the rack is thrown back to the standard, the grooving roll is lifted from the horn and can be easily released for the purpose of changing the rolls.

IMPROVED PATENT GROOVING.



No. 210, With Kennedy's Attachment, for No. 24 Iron and Lighter.

No. 210—30 in. rolls ⅛, ⅜, ¼ and flattening, will groove work 20 in. in length, w't 105 lbs. ★ ....each BJGJ $40.00

These machines are constructed on the same principles and are adapted for the same work as No. 120, but have an attachment which grooves and flattens the seams of cylinders at one operation.

STEEL CORNICE BRAKES.

Constructed of steel by patented process giving greatest possible strength. The arrangement is such that in all cases the strain and pressure is directly against the edge of the various plates.

The Apron or Bending Leaf reinforced by angular shaped strengthening plate. Substantial truss rods provided for additional support and adjustment.

Edges of Special Steel screwed to upper jaw and apron.

The Hinges and Other Parts where strength is required, of crucible steel castings and unbreakable, legs made of angle steel.

Five Formers, all sizes in general use for making moulding, furnished.

A Steel Angle Bar is bolted to apron to give additional leverage when bending extra heavy material.

Stop Gauges furnished free of cost.

The Clamping of material is done by means of an eccentric on each end.

The Hand Levers operate independently, on short work only one end need be used.

When ordered with Eccentric Levers, connected brakes are so fitted without additional cost.

Set Screws provided on ends which move the upper jaw forward and back to accommodate heavy or light material and for sharp or rounding bends.

An Eccentric Bushing in lower part of connecting link allows for greater or less pressure on material.

The Angle Bar, as well as the special steel bar, is removable from the apron and narrow opposing members can then be formed. Apron edge is ½ inch, from which ¼ inch is detachable.

Balance Weights on apron offer easy operation.

The Unusually Large Opening of Jaws allows the insertion of bent parts and facilitates the doing of moulding and other work.

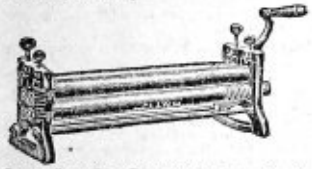
No. 3—Forming edge 8 ft. 1 in. long, for moderately heavy, also light bending and cornice work, as small as 1 in. and larger edge can be bent on No. 16 gauge, complete with angle extension and five formers, w't 1,500 lbs., each★.....AEE.JJ $310.00

No. 4—Forming edge 8 ft. 1 in. long, for cornice and other light work as well as ¾ in. and more, bends on No. 18 gauge, complete with angle bar and five formers w't 1,000 lbs.★.each AAJ.JJ 220.00

No. 4B—Forming edge 6 ft. 1 in. long, for working No. 18 gauge with ¾ in. edge and wider, complete with angle extension to apron and five formers, w't 800 lbs.★..... each JIJ.JJ 180.00

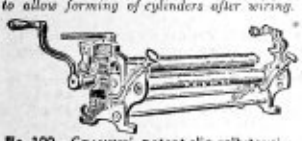
No. 5—Forming edge 4 ft. 1½ in. long, adapted for automobile and manufacturing work, to bend 1 inch and wider edge on No. 14 gauge and lighter, complete with angle reinforcement for apron, w't 800 lbs.★....each JGE.JJ 150.00

No. 6—Forming edge 4ft. 1½ in. long, suitable for medium and light bending, will form No. 16 gauge with 1 in. edge and wider, with formers and steel angle, w't 500 lbs.★....each JFJ.JJ 120.00



Made in sizes from 3 to 16 feet to bend from the lightest material up to ½ inch mild steel plate, by hand or power.

TINNERS' MACHINES AND RULES.



FORMING MACHINES.

No. 2—30 in. long, 1¾ in. rolls, w't 115 lbs.....each ADGE $36.00
No. 1—30 in. long, 2 in. rolls, w't 140 lbs.....each AEEE 38.00
No. 1 will form 20 iron into 10 in., or 22 iron into 8 in. cylinders
No. 2 will form 22 iron into 8 or 10 in. cylinders.
Grooves are cut in rolls to allow work being formed after wiring.

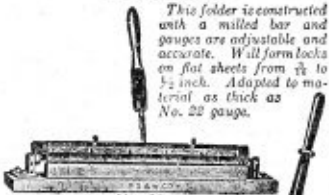
Patent Stove Pipe Formers, Compensating Gear.
No. 11—30 in. long, 1¾ in. rolls, w't 115 lbs.....each AEEE $38.00
No. 12—30 in. long, 2 in. rolls, w't 140 lbs.....each AFDJ 40.00
No. 12 will form 20 iron into 10 in., or 22 iron into 8 in. cylinders.
No. 11 will form 22 iron into 8 or 10 in. cylinders.
Gears are machine-cut steel, and rolls are made of special rolled hard steel. Grooves are cut in rol s to allow forming of cylinders after wiring.

No. 100—GRAINER'S, patent slip roll stove pipe former, with compensating gear, 2 in rolls, 30 in. long, w't 150 lbs.....each AHJE $22.00
Will form 20 iron into 10 in., or 22 iron into in. cylinders.
These Machines are much more easily adjusted, and can be set for forming any desired size of cylinder in much less time than is required to set others. They are made with Slip Rolls, so that small work can be readily taken from the end after it has been formed.

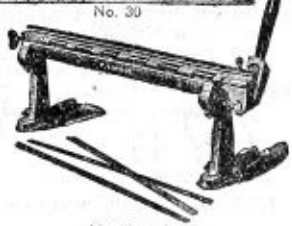
PATENT SLIP ROLL FORMERS.

Compensating Gear, Back-Geared.
For No. 20 Iron and Lighter.
No. 400—31 in. long, 2½ in. rolls, w't 275 lbs★.....each CDIE $45.00
No. 300—37 in. long, 2½ in. rolls, w't 330 lbs★.....each CHHJ 50.00
These formers are substantially made, accurately fitted and back-geared 2 to 1. Gears are machine-cut steel. They are constructed with slip rolls, so that work can be taken from end after being formed. The rolls are finely finished and are made from special rolled hard steel. As furnished readily, the rolls are plain, but at extra cost grooves can be cut for the purpose of forming cylinders after wiring. Can be furnished with legs to stand on floor at extra cost.

FOLDING MACHINES.



Stow's Patent Improved Adjustable Bar Folder.
For No. 22 Iron and Lighter.
No. 152—20 in., w't 100 lbs. each BIEJ $60.00
No. 154—30 in., w't 180 lbs. each CIDJ 80.00
The gauge is operated by hand wheel in front of machine. Set screw in front at left holds gauge firmly in place and secures a fold or lock of uniform width the entire length. These machines form square joints or angles, and turn sharp edges, also round edges for inserting wire. Locks ⅛ in. to 1 in. can be formed.



For No. 22 Iron and Lighter.
No. 252—20 in., w't 100 lbs. each BIIJ $60.00
No. 254—30 in., w't 190 lbs. each DJBE 80.00
The gauge is moved by the drop lever, and its adjustment in fractions of in. is indicated on the graduated scale. Forms closed or open locks. Fitted with adjustable stop in addition to the square or angle stop. Adjustable stop is graduated and has indicator so folder can be quickly and easily adjusted. Admirably adapted for binding or mounting show cards or calendars, edging strips for show case frames, etc. Locks can be formed as narrow as ⅛ in. and as wide as 1 in.

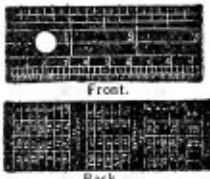
SHEET IRON FOLDING MACHINES.

This folder is constructed with a milled bar and gauges are adjustable and accurate. Will form locks on flat sheets from ⅛ to ½ inch. Adapted to material as thick as No. 22 gauge.

No. 30

Nos. 1 and 12.

For No. 22 Iron and Lighter.
No. 1—WRIGHT'S, 32 in., improved, will turn locks ⅛ and ¼ in., w't 80 lbs. each.....ABDJ $24.00
No. 12—WRIGHT'S, 32 in., improved, will turn locks ⅛, ¼, ½ and ¾ in., w't 88 lbs.....each AEEE 30.00
This machine will turn locks of different widths on any length of sheet. May be used on material as thick as No. 22 gauge.
No. 30—30 in., wood bottom, w't 75 lbs., each.....AJJE $20.00



EAVE TROUGH END FORMERS.

The Tool.		The Work.	
No. 6—BISHOP'S, cast		iron	
Trough....	3½, 4.	5,	6 in.
W't.....	3, 3½,	5,	7 lbs.
Each.....	$1.00 1.20	1.50	2.00
	JEJ JFE	JHJ	AJE

For closing end of eave trough in corrugations as shown in illustration.

RULES AND STRAIGHT EDGES.

Front. Back.

No. 5—Plain polished, 36 in. long, w't 1¼ lb.....each BFJ $7.00
No. 95—Nickel plated, 36 in. long, w't 1¾ lb.....each BIJ 8.00
Laid off on one side with two rows of figures, the first like an ordinary steel square, by eighths and inches up to three feet. The second is a line of circumferences divided into 113 equal parts; each of these divisions is again sub-divided into 8 equal parts, the large divisions representing an inch to a scale and sub-divisions an eighth of an inch. Therefore, against any diameter the circumference in this line to a scale in inches and eighths of inches can be found.
The reverse side of rule gives dimensions of measures and cans. The first two tables are for flaring measures. 1st. Liquid measures, 1 to 5 gal. 2d. Dry measures, 1 to 2 bu., giving diameter of top and bottom, and height of each size and kind.
Third table is for cans with pitch or cone tops, 1 to 10 gal., giving diameter of top and body, and compass mark for striking bread.
Fourth table is for flat top cans from 100 to 200 gal. (thirty-one different sizes), giving height and diameter.
Fifth table is for dry measure, from 1 qt. to 5 bu., giving height and diameter.

MAGIC PATTERN RULES.

No. 7—LUFKIN'S, nickel plated steel bar, length 4 ft. ⅞ in., square, with two slides, trammel points and flexible steel ribbon, with pattern chart mounted on linen, 19×23 in., in hinged wooden case, w't 7 lbs.....each DJE$10.00
The Magic pattern rule is marked in circumference inches on the front, and in inches and eighths on the back. The two slides have set screws into which trammel points are fastened. For laying out elbow patterns, the left hand slide is fastened to the end of the bar by the set screw, and the right hand slide is set according to what diameter elbow is wanted. A flexible steel ribbon on the top of bar is then raised to the required height, according to angle of elbow wanted; one glance at the chart giving each height necessary according to the elbow required.

TINNERS' TOOLS.

SQUARING SHEARS.

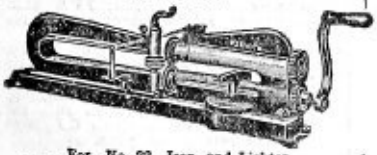
For Cutting Sheet Metal.

No. 120—Stow's improved, for No. 20 iron, cuts 22 in., w't 350 lbs. each CBEE $74.00★

No. 130—Stow's improved, for No. 18 iron, cuts 31 in., w't 500 lbs .. each DEGE 104.00

No. 136—Stow's improved, for No. 18 iron, cuts 37 in., w't 785 lbs... each GBAB 164.00

These squaring shears are made with top and side extension tables and patent quick-acting back gauge. They are also provided with front gauges and front extension arms as shown above. The springs are arranged with a set screw for regulating the tension and compensating for wear. Every squaring shear, when it leaves the factory, will cut wet tissue paper the whole length of the blade.



For Cutting Sheet Metal.

No. 730—HULL'S ACME, for No. 18 iron, cuts 31 in., w't 425 lbs. each DDJJ $100.00★

They are arranged with table, back and front gauges, for squaring, stripping and cutting at any desired angle without necessity of marking the sheets.

WAUGH'S CIRCULAR SHEARS.

For No. 22 Iron and Lighter.

No. 1—With one pair discs and cutters, will cut circles 2¾ to 18 in., w't 120 lbs.....each BHDE $33.00

No. 2—With one pair discs and cutters, will cut circles, 2¾ to 25 in., w't 125 lbs.....each CBHJ $38.00

A graduated scale is attached to the bed for the purpose of securing quick and accurate adjustment of the sliding arm. They are fitted with quick-acting eccentric lever, which clamps material between discs with great rapidity and releases the blank instantly.

CONTINUOUS CUTTING OR GAP SHEARS.

For No. 16 Iron and Lighter.

No. 85A—Foot power, 37 in., 15 in. throat, w't 1275 lbs. ★..each AGEBJ $300.00

No. 88A—Foot power 37 in., 18 in. throat, w't 1450 lbs. ★..each BJEBJ 350.00

These shears are arranged with gauges for cutting sheet metal of any length into strips from ½ in. to 18 in. in width, sheet metal 30 in. wide may be cross cut at any point desired.

The hold-down attachment is operated by hand and slides on independent ways so that when the blades are in motion the hold-down remains in a fixed position. It can be operated from either end of the shears by means of small hand wheels. They are fitted with side extension tables for supporting long sheets of metal. The bed plate is graduated in inches and fractions which materially aids the adjustment of gauges.

Adjustable gauges are provided for the side extention tables to be used when cutting long sheets. The treadle is arranged so that connecting rod can be instantly changed to give increased leverage for cutting heavy metal.

MARVEL SPLITTING SHEARS.

No. 1—4 in. blades, cuts sheets ⅛ in. thick or less, any length or width, w't 55 lbs.....each ADEJ $28.00

This machine is well made and very strong. The upper shear bearing is on an angle, and thus lessens the strain on the machine. The stripper, or hold down, is so placed that a line on material can be easily followed. It shears swinging lever either way.

COMBINATION SHEARS AND PUNCHES.

No. 01—4½ in. cut, will punch ⅛ in. iron, w't 105 lbs.....each AIJJ $40.00

No. 02—5½ in. cut, will punch ¼ in. iron, w't 122 lbs.....each BCJJ 50.00

These machines are suitable for both cutting and punching metal. They may be used for cutting ¾ inch iron, and ⅛ and ¼ inch narrow bars. The No. 1 will punch the centre of a circle 5¼ inches in diameter and the No. 2, 6½ inches. Four Punches are put up with No. 1, viz., ⅛, ⅛, ¼ and ⅛ inch. Five Punches are put up with No. 2, viz., 1/16, ⅛, ¼, ⅛ and ⅜ inch.

MARVEL PORTABLE PUNCHES.

Made Entirely of Steel.

No. 20—Cuts ¾ in. hole in ¼ in. stock, w't 16 lbs.....each AEJJ $29.00

Punches sheets, bars, angles, circles, etc. A splendid tool for punching a number of holes around the edges of sheets.

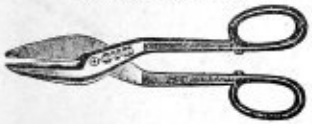
PORTABLE LEVER PUNCHES.

No 101—Improved, adjustable gauge, depth of throat 1¾ in., 3 sets of dies and punches, ⅛, ⅛ and ¼ in., w't 10 lbs.....each JGEJ $13.00

The toggle movement is powerful and it works easily and rapidly and combines light weight with strength. Can be used on material as thick as No. 20 gauge.

SAMSON PUNCHES.

Will punch No. 9 iron with, and No. 12 without "stay bolts," and will cover on 50 in. sheets without, and on 7 in. sheets with them.



No. 51—Improved, bolt fastened, adjustable gauge depth of gap 15 in., 3 sets of dies and punches, ⅛, ⅛ and ¼ in., w't 125 lbs.....each BCJJ $40.00

All illustrations show left hand shears which have the lower blade on the left side.

Left hand shears are generally used, and are always sent unless otherwise specified.

Shears for left handed men are subject to an advance in price.

ONE PAIR IN A BOX.

STRAIGHT SNIPS.

No. 19—Cruso, solid forged steel, 12½ in. long, cut 3 in., w't per pair 1¾ lbs., per pair .....JFE $1.25

ONE PAIR IN AN ENVELOPE; FOUR PAIRS IN A BOX.

No. 20—Chilled iron, ground blades, 11¼ in. long, 2½ in. cut, w't per pair 2¼ lbs. .....per pair BE $0.50

No. 30—Chilled iron, ground blades, japanned handles, length 12 in., cut 2¾ in., w't 1¾ lbs., per pair CJ $0.60

ONE PAIR IN AN ENVELOPE.

CRUSO HOUSEHOLD SNIPS.

No. 18—Solid forged steel, length 10 in., cut 2¾ in., w't per pr. 1 lb., per pair .....JEJ $1.25

A good serviceable snip, suitable for general use, at a low price.

ONE PAIR IN AN ENVELOPE.

TINNERS' HAND AND BENCH SHEARS.

SEARIGHT'S COMPOUND LEVER MECHANICS.'

Finest Quality Crucible Steel, Tempered by the Most Approved Process.

No. 108—Length 8 in., length of cut 1½ in., cutting power of a 12 in. snip, w't per pair ¾ lb.....per pair AAE $2.00

A handy tool for all kinds of work.

No. 110—Length 10 in., length of cut 2⅜ in., cutting power of a 14 or 15 in. snip, w't per pair 1½ lbs. per pair AGE 3.00

No. 112—Length 12 in., length of cut 3 in., cutting power three times that of an ordinary snip, w't per pair 2¾ lbs., per pair .....BCE 4.00

No. 114—Extra strong, length 14 in., length of cut 3½ in., w't per pair 3 lbs., per pair .....BGJ 4.75

This snip has three times the power at the point as the ordinary snip and is but a trifle heavier.

Pocket Size.

No. 107—Tool steel, bright finish, length 7 in., length of cut 1¼ in., w't per pair 5 oz.....per pair JHJ $1.40

A handy tool for all kinds of small work. They have the cutting power of a 12 in. snip, but should not be used to cut heavier than 26 gauge at the point. Made on the same general principle of the snips shown above.

From the illustration it will be seen that each snip is composed of three principal parts—a main blade, a shear blade and a lever handle, with a connection from the rear end of the shear blade to the forward end of the lever handle at a point considerably above the center line of the shears. When open the point of connection to the handle is slightly below the center line, and the connecting links are thrown back from the handle hinge, because of the greater distance of the shear blade's connection to its hinge, thereby gaining in leverage at the rear end of the shear blade as fast as lost in cutting towards the point.

They will cut with practically the same ease the full length of the blade, permitting the workman to make long, easy cuts in heavy stock, following lines with precision, instead of making short cuts of one-half to three-fourths of an inch as compelled to do with other snips. They reduce the labor at least one-half and will therefore practically double the amount of a day's work. With them notching becomes an easy task.

The back part of the inside of the blades is cut away so as to allow them to more easily pass over or under the stock in cutting inside or outside curves.

ONE PAIR IN A BOX.

"TROJAN" SHARP POINTED SNIPS.

No. 79—High grade steel, japanned handles, length 13 in., 3 in. cut, w't per pair 1 5/6 lbs.....per pair BDJ $3.00

These snips are adapted for cutting sheet metal, pasteboard, mica, linoleum, veneering, etc. Will cut straight or curved lines and are serviceable for scroll or cornice work.

ONE PAIR IN A BOX.

POCKET SNIPS.

No. 514 —Solid forged steel, polished blade, polished and blued handle, 7 in. long, cut 2 in., w't per pair ½ lb.....per pair JFE $1.00

The design is such as to provide unusual strength; the size is convenient for carrying in the pocket or tool kit. Useful for many purposes.

ONE PAIR IN AN ENVELOPE; SIX PAIRS IN A BOX.

"REV-O-NOC" DENTAL SNIPS.

Japanned Handles, Nickel Plated Blades.

No. 21 —Length 6½ in., 1½ in. cut, w't per pair ½ lb....per pair JFJ $1.75

No. 22 —Length 6½ in., 2 in. cut, w't per pair ⅝ lb.....per pair JFE 2.00

For cutting wire cloth, etc., especially adapted for milliners.

HALF DOZEN IN A BOX.

HAWK'S BILL SHEARS.

Japanned Handles, Forged Steel Blades.

No. 15—Pointed snips (actual cut 2¼ in.), length over all 9¼ in., w't per pair 1 lb., per pair.....BGJ $3.00

SOLDERING COPPER HANDLES.

No. 1—Soft wood, wire bound, assorted, w't per doz. 2 lbs., per doz. CF $0.60

SOLDERING SETS.

No. 7.

No. 6—One light copper soldering iron, one small round stick of solder, one box of rosin and one piece of tin, complete in pasteboard box, w't 3 lbs., per dozen sets ..... AAJ $2.50

No. 7—One heavy copper soldering iron, one scraper, one large triangular stick of solder, one box rosin, one piece of tin, complete in pasteboard box, w't 7 lbs. .....per dozen sets BBJ $5.00

ONE SET IN A PASTEBOARD BOX.

TINWARE MENDERS.

No. 10—Universal, consisting of 3 strips of self-fluxing solder, sand paper and directions in paper package, will mend tin, copper and enameled ware, w't per doz. 1 lb., per doz. JIE $1.60

The solder is made in wire form, easy to handle and apply. All that is necessary is to heat the article, and touch the solder to the part to be soldered, when it will flow and close the hole or crack.

To mend enameled ware, scrape off the enamel around the part to be mended before applying the solder.

ONE DOZEN IN A BOX.

HOLLENBECK'S METAL COURT PLASTER.

No. 25—15 sq. in. metal plaster, bottle of acid and directions in round screw-cap carton, 1¼x3¼ in., w't per doz. 2½ lbs. .....per dozen BDJ $5.00

Mends leaks in any metallic surface (except aluminum). Can be used in repairing larger holes than other menders. Anyone without special tools can repair quickly and permanently enameled ware, tinware, hot water tanks, water pipes, metal roofs, etc.

ONE DOZEN IN A DISPLAY CARTON.

SOLDERING SALTS.

2 oz. bottles	.....per dozen	ABJ	$2.00
8 oz. bottles	.....per dozen	BGJ	3.50
1 lb. bottles	.....per dozen	EAJ	7.00
5 lb. jars	.....each	ABJ	2.00
10 lb. jars	.....each	BBJ	3.50
25 lb. jars	.....each	JFCJ	10.00

A complete substitute for the usual mixture used for soldering purposes. It makes a beter joint, is safer, cleaner, more convenient, and cheaper than the old-fashioned method. Uniform in strength, and unaffected by climatic changes.

SAL AMMONIAC.

No. 913—Lump in bulk, for soldering, per pound ..... CF $0.60

ABOUT 600 LBS. IN A CASK.

TINNERS' TOOLS.

FIRE POTS.

No. 10—Torrid, gasoline, 11x6x4 in. sheet steel reservoir, capacity 1 gal., aluminum bronzed, cast iron horse-shoe burner, iron top, height 11½ in., w't 26 lbs.....each **F F J** $9.00

No. 3—Gem, gasoline, aluminum bronze, cast iron furnace, removable top, feed regulator, all cast brass fittings, japanned wood handle, sliding drip cup, rubber pump bulb, 21x7 in. sheet steel base, 10½x4½ in. sheet steel reservoir, w't 24 lbs.....each **G H J** $8.00

ONE IN A CRATE.

No. 1—C. and L., gasoline, tank made of seamless drawn steel, with large funnel and filler and all fittings welded in, not soldered, making it strong and durable, capacity 7 pts., fixed brass pump, 12½ in. high, 9¼ in. diam. at base, 6¾ in. diam. at top, w't each 14 lbs.....each **F F J** $9.00

No. 5—C. and L., gasoline tank, 5 pts. capacity, 12 in. high, diam. at base 6½ in., at top 6 in., otherwise same as No. 1, w't 14 lbs..each **D I E** $6.75

These pots will heat irons and a pot of metal at same time. Top section may be removed and open flame used as a torch.

ONE IN A BOX.

FIRE POTS.

No. 2—Gasoline, heavy, welded steel tank, capacity 5 pts., fixed brass air pump, never leak type, positive needle valve, height 12 in., diam. at base 8½ in., top 6 in., w't 13 lbs., each .....**D I E** $6.00

The burner produces an intensely hot flame, free from smoke, and will quickly heat irons and a pot of metal at the same time. Top section may be removed and open flame used as a torch for brazing, melting out lead joints, thawing frozen water pipes, etc.

No. 21—C. and L., gasoline, seamless, drawn steel tank, large funnel and filler, heavy uprights, large valve, and heavy malleable top plate and one piece steel shield, burner and coils of extra heavy steel, needle point valve, automatic brass pump, height 17½ in., diam. at base 8½ in., w't each 9¾ lbs.....each **D D J** $6.00

Buttles Patent.

No. 76—Charcoal, sheet iron, japanned, height 14 in., diam. at base 6 in., top 8 in., w't 32 lbs.....each **B B E** $4.00

This fire pot is so constructed that the ashes fall into a pan beneath the coal, and the fire is kept clear and the draft is good.

ONE IN A BOX.

FIRE POTS.

No. 22—Lundy, double blast, galvanized 5x12 in., steel tank, capacity 1 gal., aluminum finish, 1x10 in. brass pump, 7¼x17 in. japanned iron base, w't 28 lbs....each **J I H J** $12.00

Forces both hot blasts from outside to center; heats iron quickly. Can be generated either out doors or inside, and regenerated while in operation.

ONE IN A CRATE.

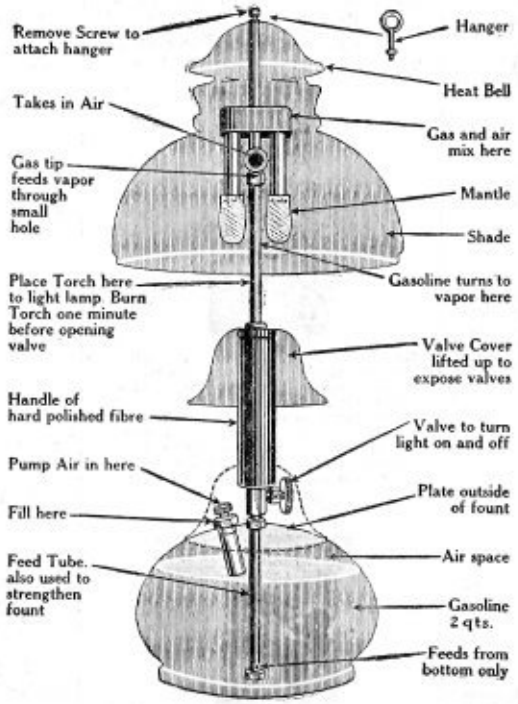
RUBBER BULBS.

No. 45—For gasoline fire pots, w't ¼ lb., each .....**C E** $1.00

MELTING POTS.

No. 65—Size 5 in., w't each about 3¼ lbs.....each **J C J** $0.50

STANDARD WIRE GAUGES.



No. 2—Cast steel, round, small, gauges Nos. 6 to 36, w't per doz. 1 lb., per dozen .....**A E H E** $15.00

No. 1—Cast steel, round, large, gauges Nos. 0 to 36, w't per doz. 2¼ lbs., per dozen .....**B D E J** $24.00

Oil Cans, Page 879. Oilers. Pages 881 to 884. Lanterns, Pages 1001 to 1005. Boilers, Pages 869 and 870.

LANTERNS.

All Lanterns have special Globe Lift, Basket Globe Guards and Extra Heavy Brass Burners. All Lanterns have extra large oil hole with brass screw cap set at such an angle that the lantern can be easily filled without removing the globe. The large tinned handle is made to remain upright when desired.

Lanterns burn a clean and exceedingly white light. The flame is white to the very feather edge, and entirely free from smoke.

SUPREME LANTERNS.

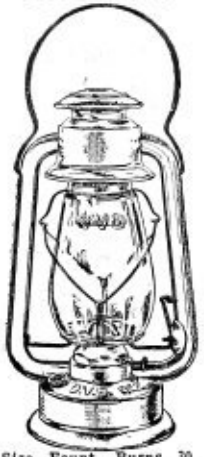
Large Fount, Burns 30 Hours, Heavy Brass Burner, 1 Inch Wick, No. 616 Selected Crystal Globe, Height 14 Inches.

No. 162—Supreme, bright tin, retinned, w't per doz. 50 lbs., per dozen ..... **AJEJ** $21.90

No. 165—Supreme, polished brass fount and top cap, heavy steel wire grooved under bottom edge, w't per doz. 50 lbs., per doz. **ACBJ** $27.50

These lanterns have a new globe-holding device which permits of some variation in the height of the globe, and at the same time makes unnecessary the use of a spring in the top. The guard, the lift, and the reinforced bottom are exclusive features.

ONE-HALF DOZEN IN A CASE.



No. 182—Supreme Dash, large size fount, burns 30 hours, heavy brass burner, 1 in. wick, bull's eye attached to globe plate, retinned reflector, with dash spring, No. 616 selected crystal globe, black japanned, w't per doz. 50 lbs., per dozen ..... **ADEJ** $28.75

These lanterns will not blow out in any wind.

ONE-HALF DOZEN IN A CASE.

COLD BLAST.

Large Size Fount, Burns 30 Hours, Heavy Brass Burner, 1 Inch Wick, No. 2 Selected Crystal Cold Blast Globe No. 611.

No. 2—Tin fount, full weight IX-AAA charcoal plate, heavily retinned ..... per dozen **JHDJ** $17.50

No. 22—Entirely red enameled, baked on ..... per dozen **JIBE** $19.25

No. 2600—Blue enameled tubes and dome, otherwise same as No. 2500, per dozen ..... **ABCJ** $25.65

W'T PER DOZ. 40 LBS.

"BANTIE" COLD BLAST.

Fount Holds Oil to Burn Twenty Hours, Extreme Height 12½ Inches, Width Over Tubes 7½ Inches, Brass Burner with ⅝ Inch Wick, Crystal "Bantie" Cold Blast Globe No. 610.

No. 1—Bantie, tin fount, heavily retinned, per dozen **JGEJ** $15.65

No. 10—Bantie, polished brass, per dozen ..... **ABCJ** $25.65

These lanterns will not blow out in any wind.

ONE-HALF DOZEN IN A CASE. W'T PER DOZ. 30 LBS.

MAMMOTH COLD BLAST.

No. 300—Mammoth size tin fount, full weight IX-AAA charcoal plate, heavily retinned, burns forty hours, No. 2 one inch wick, No. 2 selected crystal cold blast globe No. 611, w't per doz. 44 lbs., per dozen ..... **JIFJ** $20.00

This lantern is truly the farmer's friend. The large fount and the perfect clean light, make it require but little care, for which reason it is so popular, especially for a barn lantern.

ONE-HALF DOZEN IN A CASE.

COLD BLAST DASH.

Large Size Fount, Burns 30 Hours, Heavy Brass Burner, 1 Inch Wick, Bull's Eye Attached to Perforated Globe Plate, Corrugated Reflector with Spring Dash Board Attachment, Selected Crystal Cold Blast Globe No. 611.

No. 200—Blue lacquered, per dozen ..... **ABCJ** $25.65

No. 202—Red enameled, baked on ..... per dozen **ABCJ** $25.65

These lanterns will not blow out in any wind.

ONE-HALF DOZEN IN A BOX. **W'T PER DOZ. 50 LBS.**

LANTERNS.

All Lanterns have special Globe Lift, Basket Globe Guards and Extra Heavy Brass Burners. All Lanterns have extra large oil hole with brass screw cap set at such an angle that the lantern can be easily filled without removing the globe. The large tinned handle is made to remain upright when desired.

Lanterns burn a clean and exceedingly white light. The flame is white to the very feather edge, and entirely free from smoke.

ORDINANCE.

No. 104—Red enameled, height 12½ in., corrugated bright tin reflector with 2¼ in. ruby lens rear signal, steel burner with ⅝ in. wick, bull's eye mounted on globe plate, crystal "Bantie" cold blast globe No. 610, extra strong steel side holder, w't per doz. 38 lbs. ...per dozen **AAGJ** $24.40

This lantern is made to meet the requirements of various state and city laws. Throws a strong, white light forward, and the rear signal is visible many hundred feet from the rear. This lantern is a necessary road protection against speeding automobiles. The flat steel holder is made extra strong and with a very long tongue so that the lantern cannot jar off. It is the modern road lantern.

ONE-HALF DOZEN IN A CASE.

DASH.

No. 299—Tubular Dash, fount holds kerosene to burn eighteen hours, extra size funnel shape filler cap and screw, heavy steel burner, ⅝ in. wick, brass bound globe lift between tubes, substantial globe guard, No. 0 tubular globe, with bull's eye lens mounted on perforated globe plate, japanned tin with corrugated reflector and spring dashboard attachment, w't per doz. 35 lbs. ...per dozen **JBAJ** $16.50

TUBULAR.

Fount Holds Kerosene to Burn Eighteen Hours, Extra Size Funnel Shape Filler Cap and Screw, Heavy Steel Burner, ⅝ Inch Wick, Brass Bound Globe Lift Between Tubes, Substantial Globe Guard, Tubular Globe.

ONE-HALF DOZEN IN A CASE.

LANTERNS AND SEARCHLIGHTS.

REVONOC LANTERNS.

No. 262 REVONOC—Large fount, heavily retinned, No. 2 retinned burner, 1 in. wick, large filler cap, No. 616 selected crystal globe, top lift, standing bail, height 13⅝ in., w't per doz. 50 lbs., per dozen .....**AJEJ** $21.90

No. 265 REVONOC—Polished brass fount with steel reinforcement, brass cap, retinned tubes and dome, otherwise same as No. 262, per doz. **ACBJ** $27.50

A new top lift lantern, simple and substantial in construction. The top is supported on four sides, and slides up and down on the smooth, turned edge slots in the inner cylinder. Side catch locks top regardless of the globe, thereby adapting itself to the unavoidable variations in the height of globes. The most durable lantern ever made, as there are no delicate parts to become easily damaged.

ONE-HALF DOZEN IN A CASE.

LITTLE GIANT LANTERNS.

No. 775—Heavy tin, retinned, No. 2 steel burner, 1 in. wick, No. 616 short cold blast globe, w't per doz. 50 lbs., per dozen .....**JIEE** $16.00

This is a good lantern at a very special price.

ONE-HALF DOZEN IN A CASE.

ONE-HALF DOZEN IN A PACKAGE.

INCANDESCENT GASOLINE LAMPS.

These lamps are simple in construction and very easy to operate. The burners are entirely of brass and have only one valve. Are generated by placing alcohol torch (which is supplied with each lamp) into openings in burner shell, and after burning about 50 seconds holding torch over chimney to light. Each lamp is guaranteed for one year from date of purchase, mantles and glassware excepted. Are approved by the National Board of Fire Underwriters and insurance companies will issue permits for their use without extra premium.

BURNERS.

Burners, with shut-off valves for Nos. 120 to 01 gasoline lamps.....each JHJ $1.75

OUT DOOR PRESSURE LAMPS.

No. 25—B. & W. pressure lamp, 800 C. P., brass oxidized copper finish, burns 24 hours on one gallon of gasoline; 3×7 in. mica chimneys, high pressure mantle (No. 11), complete with pump and lighting torch, w't 25 lbs each. ADDJ $24.00

This is a handy, portable lamp. Guaranteed to burn in any wind; an ideal light for fruit stands, side shows, fairs, photo galleries, contractors, etc., also an ideal street lamp.

ONE IN A BOX.

No. 1138.

No. 1138—B. & W. boulevard arc lamp, inverted four mantle, storm proof arc lamp (No. 138), ornamental iron bracket, 6 gal. tank with gauge and pump, hollow wire, without post or tank box, otherwise complete..each $62.50 BHGE

No. 2114—B. & W. boulevard arc lamp, inverted two mantle, storm proof arc lamp (No. 114) otherwise same as No. 1138, each BDAE $52.50

These lamps can be lighted and turned out from the ground. They are guaranteed storm proof. A suitable post can easily be made from two 2 × 4's. These lamps offer the highest grade lights at a minimum cost.

No. 224—Astley, portable, nickel plated on brass, height 25 in., capacity 3 pints gasoline, burning from 15 to 30 hours, depending upon light wanted, 12 in. 6 panel amber glass art shade with fringe to match, complete with pump, non-overflow funnel, alcohol can, cleaning needle, etc., w't 21 lbs., each.....JIJJ $15.00

The Astley lamp has a patent sliding generating cup which does away with use of alcohol swab. Shade rests on a cast ring and can be instantly placed or removed without touching a screw. Has 9 in. base, so that lamp is not top-heavy.

ONE IN A BOX.

MANTLES AND GLASSWARE ON OTHER PAGES.

IMPROVED READING LAMPS AND AIR-O-LANTERNS.

REVONOC

No. 307 REVONOC—Brass, nickel plated, height 22 in., capacity 3 qts.—2 qts. gasoline, 1 qt. air—10 in. ribbed opal dome shade No. 1004, two No. 121 Junior Rag mantles, burns 25 hours to one filling, complete with pump and all accessories, w't 10 lbs., each ..... JFJJ $10.00

No. 317 REVONOC—Satin finished fancy shade with 3½ in. crystal fringe, w't 12 lbs., otherwise same as No. 307, each ..... JFEJ $10.80

The REVONOC reading lamp is the most improved gasoline reading lamp made. The air intake is away from the center of heat, so that the gas is mixed with a large proportion of oxygen, resulting in the most perfect combustion. Really burns more air than gasoline. The filler cap and pump connection are concealed under the fount shell. Just set pump in valve seat and work plunger. No threaded connections to bother with. Ball check in the standard near the fount allows only a drop of the gasoline to get through at a time. This regulates the flow so that even if lighted lamp should be dropped and entire upper structure smashed to pieces, the gasoline is still held in the fount safe from the flame. The shade can be removed in 15 seconds without in any way disturbing the mantles. Light can be turned up or down to any brilliancy desired up to 300 C. P. Special hanger supplied with each lamp so it can be used as a hanging instead of a table lamp.

ONE IN A BOX.

REVONOC

No. 318 REVONOC—Fancy decorated shade, otherwise same as No. 317, each ..... JFEJ $10.80

ONE IN A BOX.

REPAIR PARTS FOR REVONOC LAMP.

No. NA59—Tip screen, each ..... JF .10
No. NA007—Cleaning needle, each ..... JF .10
No. NA59-12—Set of generator wick, tip screen and cleaning needle, in envelope ..... per set AH $0.30

AIR-O-LANTERNS.

No. 319—Brass, nickel plated, diameter 7 in., height 16 in., capacity 1 qt., burns 12 hours, mica chimney, two No. 121 Junior Rag mantles, with extra generator, w't filled 7 lbs., each ..... JFJJ $10.00

The Air-O-Lantern is a great outside lamp. Guaranteed storm proof. As handy as a lantern and as brilliant as a street light. Made extra heavy. Explosion is impossible. Uses two small durable mantles which usually last a long time. Light burns all right with one mantle gone. Just the thing for threshermen, contractors, campers, etc.

ONE IN A BOX.

CRUSO KERO-VAPOR LAMPS.

No. 111—Cruso, nickel plated brass, complete with 10 in. opal shade No. 1001, 12 in. Rochester chimney No. 132½, and Kero-Vapor mantle No. 114, w't 12 lbs., each EIJ $9.80

No. 112—Cruso, brushed brass, otherwise same as No. 111, each ..... EIJ $9.80

No. 116—Cruso, with fancy green shade No. 181, w't 13 lbs., otherwise same as No. 111.....each JFCJ $10.50

The Cruso Kero-Vapor Lamp burns ordinary kerosene and gives a positively reliable light. It burns a steady, white light, free from smoke, soot, noise and odor, and requires no attention whatever as long as there is a drop of kerosene in the fount. Burns 45 hours on one gallon of common kerosene.

The kerosene is steamed from the wick into a vapor or gas which rises between the perforated burner tubes and is mixed with a large quantity of air, resulting in the most perfect blue flame possible. This blue flame gives a beautiful light in the mantle, which although very bright, is nevertheless pleasing and restful to the eye. An ideal reading light. Requires no pumping, and has no delicate parts to get out of order. Requires no more care or attention than any common kerosene lamp.

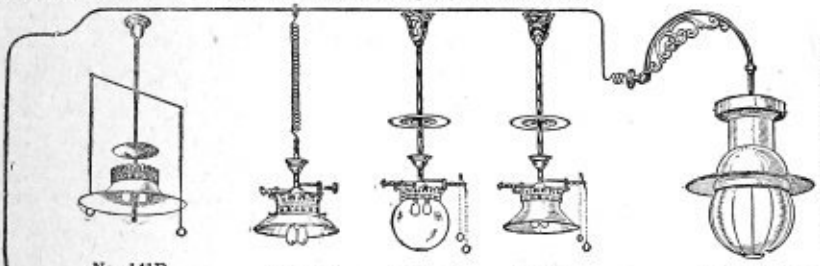
ONE IN A BOX.

"REV-O-NOC" GASOLINE LIGHTING SYSTEMS.

The REV-O-NOC gasoline lighting system is the result of many years' experimenting to meet the most exacting requirements of use in different climates and of various grades of gasoline.

In operation the intense heat of the generator changes the gasoline to gas, which after mixing with the air burns at the mantle and gives an exceedingly brilliant light. The gasoline is forced to the lamps from the supply tank (which may be placed out doors) through a hollow brass wire which is no larger than an ordinary electric wire.

The generator in a gasoline system lamp in importance is equal to the main spring in a watch. The generator in every REV-O-NOC system lamp is made of extra heavy brass tubing, and shielded with a copper deflector to prevent it from cooling while the lamp is burning. It is almost self-cleaning. A few turns of a thumb screw forces a steel cleaning needle through the orifice in the generator tip from the inside, and drives out any impurities that may have been in the gasoline. This is a very important feature, as the orifice is about the diameter of a human hair, and might quite easily become stopped up. It also prevents the enlargement of this orifice, which is the most frequent cause of complaint in other makes of lamps.



The generator in two-mantle lamps may be easily removed or replaced without disturbing the mantles. This is a patented feature, and as it makes it so easy to clean the generator, will be much appreciated by every user.

Almost as easy to operate as city gas. Generated by placing lighted alcohol torch through opening in lamp frame for about 60 seconds, and lighted by pulling chain or opening gasoline valve.

Comparative Cost of Producing 1000 Candle Power Light for 100 Hours.

	TOTAL COST.		TOTAL COST
REV-O-NOC lamps, 3½ gallons at .15	$0.52	6 ft. open gas jet, 30 M ft. at .85	$25.50
No. 3 Rochester oil lamps, 28 gallons at .14	3.92	16 C. P. Edison electric lamps, 347 K. W. at .10	34.70

When regular systems are ordered we include hollow wire cut in lengths of 25 feet with connections brazed on, but we can supply the hollow wire in any lengths desired. Any handy man can install our 5-light system in half a day.

No. 141D. No. 127. No. 457. No. 417. Nos. 138 and 114

Every REV-O-NOC system is guaranteed for five years (mantles, glassware and burner tips excepted), and with ordinary care it should last a lifetime. There is absolutely no danger involved in the use of these improved systems. REV-O-NOC lighting systems are permitted by the National Board of Fire Underwriters with out any increase in insurance rates.

One mantle lamp burns 60 hours on one gallon gasoline and produces 400 C. P.; two mantle lamp burns 36 hours on one gallon gasoline and produces 800 C. P. light.

MANTLES AND GLASSWARE ON OTHER PAGES.

GASOLINE LIGHTING SYSTEMS.

OVERHEAD GENERATOR SYSTEMS.

These lamps use upright gasoline system mantles (No. 8). The generator is over the globe. Lighted by placing alcohol torch across the top of globe, and after burning about one minute opening the gasoline valve. The heat from the mantle keeps the generator hot. Give 500 candle power light. Approved by the National Board of Fire Underwriters. Insurance Companies will issue permits to use these systems without increasing the rates.

No. 38. No. 40.

Mantles on page 1018, glassware on pages 1018B and 1018C.

GASOLINE GAS LAMPS.

These burners are constructed especially for use on cold process or machine gasoline gas. Have simple regulator which adjusts gas and air at same time. May be adjusted so that a large volume of air is supplied to a small volume of gas when the gas is rich, and a small volume or even no air, to a large volume of gas when the gas is poor.

Lock nut adjustment to hold regulator at any desired point.

These burners are made extra strong to withstand the hard use of gasoline gas.

No. 16—PEERLESS UPRIGHT, polished brass, extra heavy, with high grade mantle (No. 41) and opal air hole globe (No. 14), w't per doz. 24 lbs. ..... per dozen AJCE $22.50

No. 016—PEERLESS burners only ..... " JEGE 12.50

No. 17—PEERLESS INVERTED, polished brass, extra heavy, with high grade inverted mantle (No. 1140) and half frosted globe (No. 555), w't per doz. 24 lbs. ..... per dozen ACHJ $25.50

No. 017—PEERLESS burners only ..... " JIFE 16.00

★FOR FACTORY SHIPMENT ONLY.

GAS LIGHTS, BURNERS AND BY-PASSES

LAMPS AND BURNERS.

No. 950—Triplex, brush brass, with bent tube, air shutter and side screw regulator, new spring globe holder, magnesia mantle support, for artificial or natural gas, with octagon globe and high grade mantle, w't per doz. 6 lbs., per dozen .....**JIDJ** $17.60

The design is graceful and artistic. Very accurately proportioned to secure the most perfect mixing and combustion of the gases. Can be used with bent tube as illustrated, straight down without bent tube or as an upright burner.

ONE COMPLETE IN A BOX.

No. 550—Tanivy, brush brass, air shutter and side screw regulator, new spring globe holder, magnesia mantle support, for artificial or natural gas, with half frosted ball globe and standard grade mantle, w't per doz. 6 lbs., per dozen .....**JFEJ** $10.80

No. 551—Tanivy, made especially for natural gas, otherwise same as No. 550 .....per dozen **JFEJ** $10.80

These burners have the same style of gas regulator as the Triplex and Perfect, and represent the highest degree of excellence that ever has been attained in this type of gas burner.

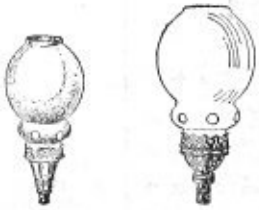
ONE COMPLETE IN A BOX.

No. 450—Cruso, bright brass, magnesia mantle holder, with needle regulator and air shutter, for natural or artificial gas, with No. 555 half frosted ball globe and No. 1160 Flyer mantle, w't per doz. 6 lbs., per dozen .....**CFJ** $6.00

The CRUSO is a low-priced light, having a gas regulator as well as an air shutter.

ONE COMPLETE IN A BOX.

LAMPS AND BURNERS.



No. 750—American Cottage Arc, white enameled steel, gold striped, 3¼ in. fitter, with highest grade mantle, closed bottom ball globe, for artificial gas, w't per doz. 8 lbs., per dozen .....**ACJJ** $21.60

No. 751—American Cottage Arc, for natural gas, otherwise same as No. 750 .....per dozen **ACJJ** $21.60

The American Cottage Arc Light has a steel inner cylinder which makes possible the use of a closed bottom ball globe as used on electric fixtures. This is a lamp of high candle power and no noise; no glass inner cylinder required. Standard glassware, either open or closed bottom, may be used.

ONE IN A BOX.

No. 5. No. 65.

No. 5—Lindsay, heavy brass burner with needle gas regulator, complete with No. 5 Lindsay center rod mantle and No. 14 Opal "Q" globe, height 9⅝ in., w't per doz. 18 lbs., per dozen .....**JFEJ** $10.80

This light has gained a splendid reputation. Easily installed and regulated. For natural or artificial gas.

No. 65—Flyer, brass burner with needle gas regulator, complete with No. 31 Flyer mantle for artificial gas and No. 14 Opal "Q" globe, w't per doz. 16 lbs. .....per dozen **CIJ** $6.50

This is a good burner at a competitive price.

ONE IN A BOX.

GAS LAMPS.

No. 101—Special, highest grade brass burner, with No. 99 clear air hole cylinder and No. 10 opal shade, with by-pass complete, w't per doz. 15 lbs., per dozen .....**ABBE** $30.40

This is a very high grade light. Recommended for show window lighting, and any place where a very bright light is desired.

INVERTED GAS MANTLES.

No. 1135. No. 1140. No. 1150.

No. 1135—Inverted, mounted on standard magnesia support, per dozen .....**BAE** $3.60
This mantle is of very highest possible quality. It is double impregnated, resulting in high candle power and long life.

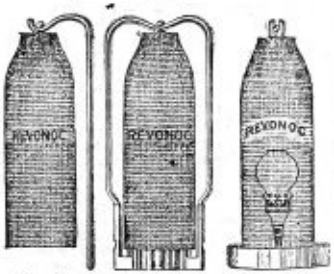
No. 1140—Inverted, mounted on standard magnesia support, per dozen .....**AGE** $2.90
This mantle is of the celebrated cross weave, of highest quality, strength and candle power.

No. 1145—H. S. B. & Co., inverted, mounted on standard magnesia support .....per dozen **AEE** $2.60
This is a high grade mantle, both in candle power and strength; single strength.

No. 1150—Tanivy, inverted, mounted on standard magnesia support, per dozen .....**ADJ** $2.30
A high grade mantle both in candle power and strength. Triple weave.

INVERTED GAS MANTLES.

No. 1160. No. 130.



No. 1160—Flyer, inverted, mounted on standard magnesia support, per dozen .....**JIJ** $1.50
This is a good competitive mantle. Exceptional value at the price.

No. 130—Lindsay, soft inverted, mounted on standard magnesia ring, per dozen .....**AJJ** $1.70
This mantle is made of silk fibre and is soft and pliable until burned. Is preferred by many because being pliable, can be handled without fear of breaking.
ONE DOZEN IN A BOX.

UPRIGHT MANTLES.

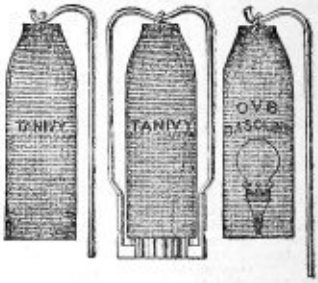
No. 51—Special weave, double impregnated, mounted on corrugated brass cap with coated wires, for artificial gas .....per dozen **BAE** $3.60
The is the highest possible quality. Guarantees long life with extreme high candle power.

No. 40. No. 41. No. 41½.

No. 40—Loop mantle, with wire hook support for natural or artificial gas .....per dozen **AEE** $2.60

No. 41—Cap mantle, mounted on coated wire, corrugated cap, for artificial gas .....per dozen **AHJ** $3.00

No. 41½—Center rod mantle, mounted on extra heavy corrugated center rod cap, for artificial gas, per dozen .....**BAE** $3.60
mantles are highest grade it is possible to make. Great durability and high candle power are distinctive qualities of mantles. Nos. 41 and 41½ will fit any standard style of incandescent gas burner.



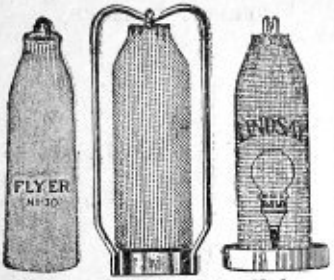
UPRIGHT MANTLES.

No. 39.

No. 39—H. S. B. & Co., cap mantle, mounted on heavy coated wire, corrugated cap for artificial gas, per dozen .....**AEE** $2.60
H. S. B. & Co. mantles are double weave, and are preferred by many of the trade. The best thread and chemicals are used in their construction, and they are first-class in every particular.

GAS AND GASOLINE.

No. 20. Nos. 21 and 22. No. 26 Gravity.



No. 20—Tanivy, loop mantle with wire hook support for natural or artificial gas or gravity gasoline lamps, per dozen .....**AAE** $1.90

No. 21—Tanivy, cap mantle, on double coated wire cap for artificial gas, per dozen .....**ADJ** $2.30

No. 22—Tanivy, cap mantle with plain gauze, double coated wire cap for natural gas ....per dozen **ADJ** $2.30
Tanivy mantles are high grade, medium priced, single weave mantles. They give splendid satisfaction.

No. 26—Gravity gasoline loop mantle, single weave, with wire hook support .....per dozen **AGJ** $2.80
The No. 26 mantle is made especially for gravity gasoline lamps; the best mantle made for the purpose.

INCANDESCENT MANTLES, GAS LIGHTERS, ETC.

No. 30. Nos. 31 and 32. No. 5.

No. 30—Flyer, loop mantle, with wire hook support for natural or artificial gas or gravity gasoline lamps, per dozen .....JGJ $1.20

No. 31—Flyer, cap mantle on coated double wire cap for artificial gas, per dozen .....JIJ $1.50

No. 32—Flyer, cap mantle on coated double wire cap for natural gas, per dozen .....JIJ $1.50

The Flyer mantle is made to meet the demand for a low priced, serviceable mantle. It is as reliable a mantle as can be made for the money.

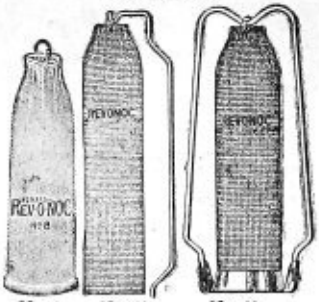
No. 5—Lindsay, center rod mantle mounted on extra heavy corrugated center rod cap for artificial gas, per dozen .....BAE $1.60

The No. 5 Lindsay center rod mantle is made particularly for the No. 5 Lindsay light, but will fit any standard gas burner.

No. 15—Welsbach, junior size mantle mounted on combination cap, per dozen .....ADE $2.40

ONE DOZEN IN A BOX.

No. 15½—Welsbach, packed 50 in a box, otherwise same as No. 15, per hundred .....AJHJ $18.00



KERO-VAPOR.

No. 114—Cruso, for Cruso Kero-Vapor lamps .....per dozen AHJ $3.00

ONE DOZEN IN A BOX.

GASOLINE.

No. 8. No. 10. No. 11.

No. 8 REVONOC—System mantle, 4½ in., extra heavy for overhead generator systems, with wire supports and magnesia center rods, per doz. AGJ $2.80

No. 800—Magnesia center rods for above, per dozen .....JF $0.10

No. 10 REVONOC—Pressure loop mantle, 5 in., extra heavy, with roll bottom and new pattern wire support, per dozen .....AHJ $1.00

No. 11 REVONOC—Pressure cap mantle, 5 in., extra heavy, on double wire adjustable cap, will fit any style gasoline pressure lamp, per dozen .....BAE $1.60

REVONOC *system and pressure mantles are made of extra heavy thread and heavy solution, especially to withstand the strain of use on overhead generator systems and pressure lamps. They are of very best quality, highest candle power and of great durability.*

No. 122 [illegible]—"Blue Cord," soft tie on mantle for inverted gasoline system lamps .....per dozen AJJ $1.70

No. 121 [illegible]—Junior, "Blue Cord," soft tie on mantle for REVONOC and other gasoline table or reading lamps, per dozen .....JHE $1.50

The [illegible] *"Blue Cord" mantle is of the very highest quality and is made extra heavy for candle power and strength. Patented cross-sewed bottom insures perfect shaping. Burns without shadow.*

No. 120—H. S. B. & Co., soft "Tie on" for inverted gasoline system lamps, per dozen .....JHJ $1.30

A high grade, high powered mantle.

ONE DOZEN IN LARGE ENVELOPE.

No. 0120—H. S. B. & Co., soft "tie on," for inverted gasoline system lamps, per dozen .....JFE $1.10

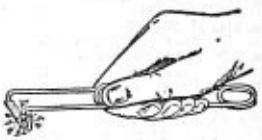
No. 0120½—In full gross lots, otherwise same as No. 0120, per gro. JFIJ $11.50

This is a six cord mantle, full size and will give excellent service. It has a gathered bottom, and for that reason is not quite as desirable as our Nos. 122 and 120, which have sewed bottoms, but is made of the same thread as our No. 120 and will withstand the same service, but will not give quite as much light because of the difference in bottoms.

Each mantle in a waved envelope with full directions for use.

ONE DOZEN IN A PACKAGE.

GAS LIGHTERS.



No. 25D—Cruso, friction gas lighter, produces an intensely hot spark which will positively light any kind of gas or inflammable vapor, per dozen .....BDJ $4.00

Lights instantly. Will light mantle burner, plain tip, gas stove, acetylene lamps, bicycle and automobile lamps.

No. 26D—Extra spark tips for above, produce 2,500 to 3,500 sparks, per dozen .....AAJ $1.80

ONE DOZEN IN A PACKAGE.

No. 27D—Perfection, tinned spring holder, length 7 in., tempered steel file, good quality spark tip, w't per doz. 2 lbs. .....per dozen JGE $1.40

Produces a spark sufficiently hot to light instantly any kind of inflammable vapor or gas.

No. 28D—Extra spark tips for No. 27D gas lighters .....per dozen DJ $0.70

TAPER HOLDERS.

No. 357—Medium grade, gas key, wood handle, 29 in. long, per dozen .....JHE $1.40

No. 358—Splendid value, nickel plated gas key, wood handle 29 in. long, per dozen .....AAE $1.90

No. 360—Best grade, gas key, select wood handle, 29 in. long, per dozen .....AGE $2.90

ONE DOZEN IN A BOX, W'T 5 LBS.

WAX TAPERS.

No. 108—Second quality, 17 in. long, per dozen boxes .....CE $0.60

No. 172—First quality, 17 in. long, per dozen boxes .....JFJ $1.00

No. 305—Non-dripping, extra quality, 17 in. long, per doz. boxes JIE $1.60

30 TAPERS IN A BOX, ONE DOZEN BOXES IN A PACKAGE.

GAS AND GASOLINE GLOBES AND SHADES.

ONE GROSS IN A BOX.

LAMP CHIMNEYS.

REVONOC Brand Chimneys are made of the best quality lead glass, oil finished and carefully tempered, will not break from heat, each chimney wrapped in tissue paper and packed in printed carton.

CRUSO Brand Chimneys are made of highest quality flint glass containing some lead. Unusually clear, carefully tempered and selected. Each chimney in printed carton.

Common Grade Chimneys are made of lime glass, which, although not nearly so serviceable as REVONOC or Cruso Brand, will give satisfaction in ordinary use. Each chimney in corrugated paper tube.

SUN BULB, CRIMP TOP.

No. 2—Cruso, fits No. 2 collar, takes 1 in. wick .....per dozen **JHE** $1.45

These burners are strong, carefully assembled, symmetrical in appearance and give a large white light. These burners are big sellers.
ONE DOZEN IN A BOX; FIFTY DOZEN IN A CASE.

LAMP BURNERS.

COMBINATION, Brass Plated, Cold Rolled Steel, Brass Cone.
No. 151—Fits No. 1 collar, takes ⅝ in. wick .....per dozen **DJ** $0.65
No. 152—Fits No. 2 collar, takes 1 in. wick .....per dozen **JEJ** $0.85
This burner is intended to supply the demand for a cheaper burner than those shown below.
ONE DOZEN IN A BOX; FIFTY DOZEN IN A CASE.

PREMIER, Brass Burner, Brass Plated Cold Rolled Steel Chimney Guides and Ratchet Shaft.
No. 100—Fits No. 0 collar, takes ⅜ in. wick .....per dozen **EE** $0.95
No. 101—Fits No. 1 collar, takes ⅝ in. wick .....per dozen **DE** $0.75
No. 102—Fits No. 2 collar, takes 1 in. wick .....per dozen **JFJ** $1.05
This burner has been on the market many years and has given satisfaction. More of them are now sold than of any other make.
ONE DOZEN IN A BOX; FIFTY DOZEN IN A CASE.

Extra Heavy Gauge, All Brass.
No. 42—Venus, fits No. 2 collar, takes 1 in. wick .....per dozen **ABJ** $2.00
No. 43—Queen, fits No. 2 or No. 3 collar, takes 1½ in. wick,
per dozen .....**AFJ** $2.70
The body braces and heavy chimney guides are securely riveted to the deck of the burner, thereby making them strong and durable.
ONE DOZEN IN A BOX; FIFTY DOZEN IN A CASE.

SUN HINGE, All Brass.
No. 292—Fits No. 2 collar, takes 1 in. wick .....per dozen **AGE** $2.90
No. 293—Fits No. 3 collar, takes 1½ in. wick .....per dozen **DAJ** $6.80
These burners are extensively used on incubator heaters.
ONE DOZEN IN A BOX.

LAMP BURNERS.

BING, Glass Top, Brass Burner.
No. 72—Fits No. 2 collar, takes 1 in. wick .....per dozen **BDJ** $4.00
No. 74—Extra glass cones for No. 72, per dozen .....**DE** $0.75

Top made in two sections to allow for expansion and contraction. Gives full benefit of the flame down to the very wick tube, gives 33⅓ per cent more light than ordinary burner.
ONE DOZEN IN A BOX.

No. 22—Fender patent, heavy brass, for No. 2 collar, 1 in. wick,
per dozen .....**AEJ** $2.50

This burner is constructed with a wide open air passage from base to flame. The extra air supplied to the flame removes much of the red color, making the light 50 per cent brighter than with ordinary burners. Burns any grade of kerosene oil without smoke or smell.

Guaranteed to burn without smoke.
ONE IN A BOX; ONE DOZEN IN A CARTON.

STEEL MANTLE.

No. 31—Improved steel mantle lamp burners, size 1, with No. 1, ⅝ in. wick .....per dozen, **BDJ** $4.00
No. 32—Size 2, with No. 2, 1 in. wick, otherwise same as No. 31,
per dozen .....**BDJ** $4.00

These burners have a "steel mantle" in the cone which makes them give double the light of an ordinary burner without increasing consumption of oil. Burn without smoke or odor. A perfect light whether burning low or full flame.
ONE DOZEN IN A BOX.

ALL BURNERS ON THIS PAGE WEIGH FROM 2 TO 5 LBS. PER DOZEN.

LAMP SUNDRIES.

LAMP BURNERS.

Steel Mantle.

No. 192—Improved steel mantle cold blast lantern burners, size 2, with No. 2, 1 in. wick, per doz. **BDJ** $4.00
Made to fit regular cold blast lanterns. Steel mantle in the cone increases the light. No smoke. No odor.
ONE DOZEN IN A BOX.

All Brass.

No. 123—Regal, fits No. 2 or 3 collar, takes 1½ in. wick, per dozen .....**AJE** $1.75
No. 23—Pilot, fits Nos. 2 or 3 collar, takes 1½ in. wick, per dozen .....**AGE** $2.90
Regal burners are intended for use on lamps with No. 3 collars, but they also may be used on No. 2, as each burner is made with two separate threads.
The Pilot is heavier than the Regal, but otherwise is similar.
Above burners weigh from 2 to 5 lbs. per dozen.
ONE DOZEN IN A BOX; 25 DOZEN IN A CASE.

BRASS LAMP COLLARS.

No. 1—Inside diameter ⅞ in., made to fit No. 1 burner, per dozen **AB** $0.20
No. 2—Inside diameter 1 1/16 in., made to fit No. 2 burner, per dozen **AC** $0.25
No. 3—Inside diameter 1⅛ in., made to fit No. 3 burner, per dozen **CJ** $0.55

LAMP WICKS.

GAUGE GLASS CUTTERS.

No. 10—Steel, nickel plated, adjustable slide with set screw, steel cutting wheel, length 8 in., diameter 7/16 in., w't per doz. 3 lbs., per dozen .....**CJJ** $6.00

No. 9—Fletcher, steel, nickel plated, adjustable guide with set screw, improved lever attachment, highest grade cutters, length 11 in., w't per doz. 8 lbs. ...per dozen **JGBJ** $12.00

The lever attachment makes this a very quick, easy and accurate cutter.

ONE DOZEN IN A BOX.

No. 7—Wilkins, nickel plated steel beam, accurately graduated in eighths up to 8 in., enameled wood handle, length over all 13¾ in., w't per doz. 5 lbs., per doz. **ACJJ** $21.00

This is the finest tool for the purpose ever produced. An extra cutter wheel packed in each box.

Cuts easily and quickly any length from one-eighth to eight inches.

Light pressure on thumb latch holds cutting wheel against inside of glass.

ONE IN A BOX.

MINERS' LAMPS.

OIL.

No. 18—Cruso, miner's, height 2¾ in., bottom 1⅛ in., double spout, ⅜ in. inner spout, seamless brass collar, single hook, w't per doz. 3 lbs., per dozen .....**ADE** $2.40

No. 28—Cruso, driver's, height 2½ in., bottom 1⅜ in., double spout, ⅛ in., inner spout, seamless brass collar, single hook, w't per doz. 3 lbs., per dozen .....**AEE** $2.60

The seamless brass collar insures a perfect fitting cover. Cover hinge is formed from solid metal of cover and collar, avoiding use of solder at this point.

ONE DOZEN IN A BOX.

ACETYLENE.

No. 310.

No. 310—Baldwin, brass, height 3¼ in., reflector 2⅛ in., bottom 2⅛ in., with flat hook to be used where Sunshine lamps have been used, with extra brass carbide container, w't per doz. 5 lbs. .....per dozen **AJHJ** $18.00

No. 320—Baldwin, with single wire hook, otherwise same as No. 310, per dozen .....**AJHJ** 18.00

The carbide container holds sufficient to burn four hours continuously. The extra container has air proof screw cap to permit carrying extra charge.

No. 290D—Baldwin, brass, nickel plated and highly polished, height 3½ in., hinged handles, hook for cap or belt, concentrating reflector, with extra carbide container, w't per doz. 5 lbs., per dozen .....**AFBJ** $27.00

An ideal light for mine superintendents, mechanics, sportsmen, for hunting, camping, fishing, etc. Weight, ready for use, only 6 oz., and gives a light of nearly 14 candle power for three hours on one filling.

ONE IN AN ATTRACTIVE CARTON; ONE DOZEN IN A BOX.

ACETYLENE.

No. 250.

No. 80.

No. 250—Baldwin, lever feed, polished brass, height 3¾ in., reflector 2⅛ in. diam. with automatic lighter, with extra carbide container, w't per doz. 5 lbs. .....per dozen **AJHJ** $18.00

This is a new Baldwin Lamp embodying all latest improvements without increasing the weight.

No. 80—Justrite, 18½ C. P. polished brass, German silver reflector, new lever feed, complete with one extra carbide container, w't per doz. 3¼ lbs., per dozen .....**AJHJ** $18.00

The new lever feed places the flame under absolute control. Safety outlet through center of valve makes lamp proof against possible explosions.

No. 50-D—Jumbo Miner's Lamp, cast aluminum, height 6¾ in., diameter of reflector 3¼ in., aluminum burner tip with self-lighting attachment, burns 5 hours, with steel candlestick and pocket carbide can, w't per doz. 28 lbs.....per dozen **CIFJ** $66.00

The strongest and most durable lamp made. Designed to hang from mine timber or from projecting rocks.

ONE IN A CARTON.

No. 444-D—Justrite Headlight, 2½ in. lens, fish tails acetylene burner tip, with self-lighting attachment, weight only 5 oz., black rubberoid finish generator, capacity 10 hours, with heavy canvas belt, high grade flexible tubing to connect headlight to generator, w't per doz. 30 lbs., without cap.....per dozen **CFJJ** $60.00

Gives a penetrating light which will not blow out. Especially designed for mine drivers, motormen, inspectors, etc. Also an ideal sportsman's light.

ONE IN A BOX.

CARBIDE.

¼x1-12 in. calcium carbide is recommended for use in above lamps, although satisfactory results may be obtained from ½ in. size known as bicycle size. For price and shipping points on calcium carbide, see page 2314B.

ACETYLENE.

No. 85—Justrite, 18½ C. P. polished brass, with 2½ in. polished brass reflector, with lighting attachment, lever feed, complete without extra carbide container, w't per doz. 4½ lbs. .....per dozen **AJHJ** $18.00

The lighting attachment consists of a file wheel which is rotated by a downward stroke of the hand across a piece of pyrophoric metal, producing a spark which instantly lights the gas.

No. 91—Justrite, 18½ C. P. metal miners' half shift lamp, burns 5½ to 6 hours to a filling, 2½ in. polished brass reflector, with lighting attachment, new lever feed, steel hook, steel stick for attaching lamp to mine timber, complete without extra carbide container, w't per doz. 9 lbs., per dozen .....**ADDJ** $24.00

Just the lamp for the metal miner or for the mine superintendent. Produces the best possible light, always under perfect control for from 5½ to 6 hours.

ONE IN A CARTON, ONE DOZEN IN A BOX.

CAMP.

No. 100D—Justrite, nickel plated brass, height 3¼ in., 2 in. German silver reflector, with hood, improved soot proof burner tip, cap hook and handles, complete with one extra carbide container and directions, w't per doz. 8 lbs. .....per dozen **ADDJ** 24.00

Burns four hours to one filling. The German silver reflector hood concentrates the light, also protects the flame from wind and rain. An ideal fishing lamp.

ONE IN AN ATTRACTIVE WOOD BOX; ONE DOZEN IN A PACKAGE.

The Justrite is a new patent lamp. It burns four hours to one charge. Has new improved soot-proof burner tip. The reflector is solid German silver and can be kept bright with ordinary metal polish. It is a miniature searchlight or headlight.

MINERS' CANDLESTICKS AND MINE LAMP REPAIRS.

MINE LAMP REPAIRS.

No. 2—Justrite, repair assortment, w't per asst. 2 lbs., per asst. **DHJ** $8.00

JUSTRITE Repair Assortment Consists of—

6 doz. No. 97D rubber gaskets	each $0.05	3.60
3 doz. No. 95D felt packing, each	.05	1.80
6 doz. No. 98D burner tips, each	.05	3.60
1 doz. No. 94D raking wires, each	.05	.60
1 doz. No. 93D felt holders, each	.05	.60
½ doz. No. 92D valve stems, each	.15	.90
Total retail value		$11.10

This is put up in a good strong display box. Affords a convenient, clean and safe way to handle the small acetylene lamp supplies.

ONE IN A PACKAGE.

No. 26—Combination reflector with lighter, 2½ in. polished brass reflector with adjustable clamp to fit all makes of carbide mine lamps, w't per doz. 12 oz., per dozen **BDJ** $4.00

ONE DOZEN IN A PACKAGE.

No. 172—Flints for No. 26 Reflector, per dozen .....**BE** $0.40

No. 323D—Reflector, for all numbers of Baldwin mine lamps, per dozen .....**BE** $0.40

No. 97D—Rubber gaskets, square edge, for all numbers of acetylene mine lamps .....per dozen **BE** $0.40

MINE LAMP REPAIRS.

95D.

No. 95D—Felt packing for Nos. 99, 88, 100D, 310, 290 and 320 lamps, per dozen .....**BE** $0.40

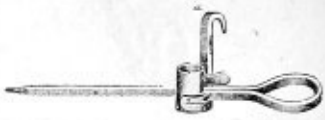
No. 94D—Raking wires, for Nos. 99, 88, 100D, 290, 310 and 320 lamps, per dozen .....**CJ** $0.50

No. 74—Justrite burner cleaner, per dozen .....**JIE** $1.60

The fine cleaning drill is always protected. Arranged so it may be used as a watch charm. A handy and necessary little tool.

ONE DOZEN IN A PACKAGE.

No. 91D—Burner drills for cleaning acetylene lamp burner tips, per dozen .....**CJ** $0.50



No. 322D—Rubber gaskets, round edge, for all numbers of acetylene mine lamps .....per dozen **BE** $0.40

No. 321D—Burner tips, for all numbers of acetylene mine lamps, per dozen .....**AH** $0.30

No. 98D—Improved soot-proof burner tips, to fit all numbers of acetylene mine and camp lamps, per dozen .....**BE** $0.40

MINER'S CANDLESTICKS.

No. 10—California pattern, length 10 in., forged steel rod and hook, spring steel candle holder, w't per doz. 3 lbs. .....per dozen **CCJ** $5.50

TWO DOZEN IN A BOX.

No. 11—Varney, made from one piece ⅝ in. octagon tool steel, blued finish, length 12 in., w't per doz. 6 lbs., per dozen .....**CIJ** $6.50

This is an extra well made candlestick. The point is extra sharp.

MINERS' CAPS.

White Duck, Lined, Duck Covered Peak, Tin and Hard Fibre Lamp Holder.

No. 63D—Size 7, w't per doz. about 6 lbs. .....per dozen **AHJ** $3.00

No. 64D—Size 7⅛, w't per doz about 6 lbs. .....per dozen **AHJ** $3.00

No. 65D—Size 7¼, w't per doz. about 6 lbs. .....per dozen **AHJ** $3.00

No. 62D—Assorted sizes in a box as follows—one 6⅞, two 6⅞, three 7, three 7⅛, two 7⅛, one 7¼, w't per doz. about 6 lbs., per doz. **AHJ** $3.00

HSB&CO REV-O-NOC

STOVES AND RANGES.

INTRODUCTION.

In buying stoves, a merchant is governed by at least three prime factors—Quality, Design, Price.

The quality of REV-O-NOC stoves is the very highest, the castings are continually made smoother, the nickel brighter, mounting and fitting better, crating first-class, at prices just as low as is consistent with such unquestioned quality.

All REV-O-NOC stoves are inspected by two competent men, and any failure to perform that duty we request be reported promptly to us by merchants and salesmen.

Changes in design will occur at repeated necessary intervals, always with the object of keeping the line in the lead.

WHY OUR PRICES ARE LOW.

Our prices are lower than those of the regular manufacturers on equal goods for the reason that our selling expenses, etc., are divided among so many different lines of goods. The expense of sending our salesmen to your town is not charged to our stove department alone. The entire expense born by so many different departments makes the expense added to one line of goods very small, which benefit our customers share in.

SPECIALTIES.

We aim to supply our customers with "specialties"—money makers for the merchant. Stoves that are different from those made by any one else, containing talking points and features that place them in a class by themselves. We refer to our REV-O-NOC Malleable Range, the REV-O-NOC Base Burner, the REV-O-NOC Hot Blast, the REV-O-NOC Oak Heater, the REV-O-NOC Oil Cook Stove, etc.

REV-O-NOC NUMBERING.

In ordering stoves, always use the full name and full number of the stove desired.

A letter before a number indicates the first letter of the name of the stove. The letter "C" after the number means High Closet. The letter "R" means reservoir. "C. R." means High Closet and Reservoir. "S" indicates High Shelf.

Thus, S69-18CR is the Supreme REV-O-NOC Range with 9 in. lids, 18 in. oven, high closet and reservoir.

ABOUT SHIPPING.

Cooking stoves will always be shipped without reservoirs, unless otherwise specified.

Steel ranges will always be shipped with high closets unless ordered otherwise.

Cast ranges are always shipped with low back guard and tea shelves, unless otherwise ordered.

All stoves not "starred" are carried in our warehouse, and prompt shipment can be made. Where "starred" for factory shipment, there will be no delay as we carry a stock on hand at the factory warehouse at all times.

REPAIRS.

In ordering repairs, always furnish the full name and number of stove. Do not use number on invoice. If not able to describe the repair, make a drawing of it. Give a full and detailed description, and delays and mistakes will be avoided.

We aim to furnish all repairs promptly and correctly. We are not mind readers and when "we take chances" and go wrong, we want the merchants to appreciate that in order to save delays occasioned by asking a number of questions, we "took the chance" and shipped the goods.

HANDLING CAR LOADS.

Combination or Pool cars are very successful as they enable merchants at distant points to order goods in less than carload quantity and still receive the carload rate of freight to a central distributing point in their near vicinity. These cars are loaded out very carefully by ourselves, and we have yet to receive any complaints thereon.

Salesmen and merchants will be greatly surprised at the ease with which a car can be made up, especially so when they take into consideration that stove pipe, stove furniture, etc., can usually be loaded in car with stoves. The advantage, therefore, of buying from a jobber is apparent. A merchant can purchase, for instance, half a car or more of stoves and make up the balance with stove furniture. It will save him a considerable amount of freight and his goods will usually arrive in much better shape than local. This applies not only to the merchant who buys in straight carload, but also to those who buy in combination or pool cars. We have stove cars for all central points west, northwest and southwest and south.

LOCAL ADVERTISING.

Good advertising is absolutely essential to business success nowadays, and those who are handling REV-O-NOC stoves can promote their business very greatly by the judicious use of the local newspapers, and we will assist customers in preparation of advertisements, that announcements may be as effective as possible. For that purpose we keep on hand electrotypes of our various stoves and ranges, and also of our trademark, suitable for use in newspaper ads and in circulars or price lists. These we shall be pleased to furnish without charge to those who will use them.

In addition to supplying these cuts, we are prepared to offer suggestions as to the text-matter to be employed and as to the methods of advertising which we would consider most desirable in each particular locality. In that way, we hope to save our customers a great deal of time and trouble, besides helping materially to increase their sales and their profits.

SETTING UP AND OPERATING REV-O-NOC STOVES.

First—See that the flue stopper leading into flues under over of cooking stove, or under base of base-burner is tightly in place.

Second—That the chimney is clear and has a good draft at pipe hole. Many chimneys are made too low and draw better when a "smoke stack" is put on. Chimney must be higher than any point of house.

Third—That the pipe fits closely on the stove and in the chimney.

Fourth—That the pipe does not go too far into the chimney.

Fifth—That there are no pipe holes open on the opposite side of the chimney, either above or below, and that there is no unused stove with draft slide open, leading into the same chimney.

Sixth—Avoid having the pipe telescope at the elbows. If you have all these parts properly adjusted and well arranged, open the direct draft damper—see "Dampers"—and see if you can get a good fire in the stove, together with a strong draft. If the stove will not burn well, then the trouble is not in the stove, but above it.

If the fire burns well on the above direct draft, close the oven damper, then if it will not heat the oven and bake well, please examine the flues and damper, and see—

First—That all the flues are open and clear so that smoke can pass freely through them. In cleaning out flues be sure to scrape all sides of flues, and especially scrape off all soot that hangs to oven-bottom. Pull all soot towards you, and be careful not to push any of it back into the back flues, but scrape from the extreme back forward. When using soft coal, clean flue often.

Second—Examine all the dampers in the flues and see that they open and close tightly, and do not get out of place.

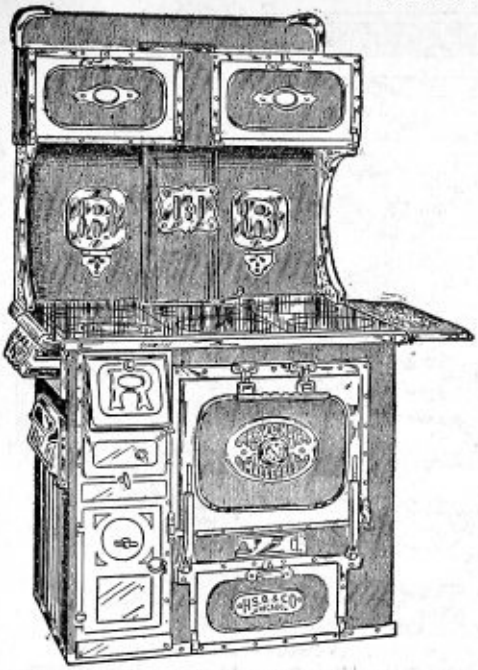
Third—Be sure that you know how they operate, so they may not be open when you think they are closed.

If you have a stove with reservoir, be sure that the damper—if one is in stove—to force the heat under the reservoir is closed, so that all the heat must go around the oven. Lift out reservoir and ascertain by examination the operation of reservoir damper.

DAMPERS.

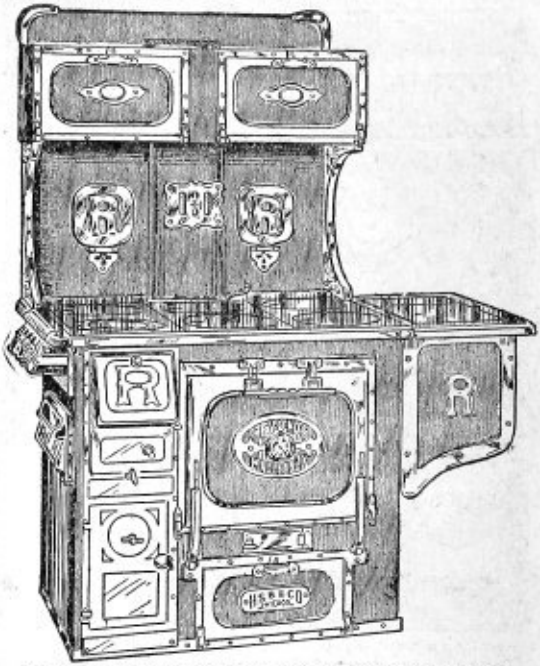
Almost all cook stoves or ranges having reservoirs have two dampers, the direct draft damper opening directly into the chimney and reservoir damper. The direct draft damper when open throws all heat directly up chimney and should be used only in starting fire to hurry it. When closed it forces heat around oven. The reservoir damper must be closed when baking.

Hard coal base burners have the direct draft damper on the right or left side just below pipe collar. When open, it permits the heat to go straight up the chimney, and when closed, heat passes down to the base, around it and then up into the chimney. The check damper is just below the direct draft damper.



GUARANTY.

WE GUARANTEE ALL REV-O-NOC STOVES AND RANGES TO WORK PERFECTLY OUT OF DOORS—AWAY FROM ALL BUILDINGS—WITH FOUR JOINTS OF PIPE. ANY STOVE THAT WILL OPERATE UNDER SUCH CONDITIONS WILL WORK PERFECTLY WHEN PROPERLY CONNECTED TO A GOOD CHIMNEY.



If a stove is complained of, never take it back without trying to correct the difficulty. If you cannot do so, write us and we will be glad to offer suggestions.

REVONOC MALLEABLE STEEL RANGES.

FOR ANY COAL OR WOOD.

Without Reservoir, with High and Low Closet, and Oven Thermometer.

With Copper Reservoir, High and Low Closet, and Oven Thermometer.

Description—The REVONOC Malleable is in every way **The Best** in steel range construction possible for unlimited capital and skilled workmen and high grade material to produce.

Malleable Iron Features—All outside castings, liable to breakage, such as door frames, tops, etc., are malleable iron. This is not a "semi-malleable," but a FULL MALLEABLE range, strictly built on honor.

Walls—are made of 18 gauge genuine blue polished steel, thoroughly protected by heavy sheets of asbestos, and an inner wall of steel firmly riveted together, making it rigid.

Oven—is 16 gauge steel, rigidly braced, making it absolutely impossible to warp. The oven is riveted to a malleable iron (non-breakable) angle frame; this frame is riveted to the main body, making an absolutely perfect non-breakable joint. The oven is aluminized, making it clean, and sweet.

Top—is of a high grade malleable (non-breakable) iron, beautifully POLISHED, fitted with 3 interchangeable plates, into which lids and short centers fit, making practically an indestructible top.

Pouch Feed—Extra large, on left end of range, enables feeding fuel evenly entire length of box, without disturbing utensils on top, and will also take a large broiler.

End Draft—Entire length left end of range, gives equal distribution of draft entire length of fire box, making an even fire.

Grate—Duplex, reversible for wood or coal, extra heavy and durable.

Fire Box—is perfectly proportioned to give the greatest maximum heat with smallest minimum of fuel consumption.

Low Closet—of large capacity, fitted with perfectly tight door, hung on malleable iron frame.

Reservoir—is of pure copper, tinned inside, of 11 gallon capacity and heated by contact.

Ash Pit—is near floor, such a long distance from grate that ashes cannot possibly bank up under and burn it out.

Thermometer—In oven door, indicates degrees of heat in oven, saves opening door to ascertain by various ancient methods, "whether oven is hot enough to bake." Saves steps, time, and prevents "guess work."

Nickel—"White, beautiful and bright." Lasts a long time. Being free from superfluous carving, prevents accumulation of grease and dirt and makes an easy range to keep clean. Nickel is as follows: Reservoir cheek edge and panel, oven door frame, panel and handle, feed door, clean-out door, ash pit door, low closet door frame and panel, rails and full nickel high closet.

FURNISHED ONLY AS SHOWN—ORDER BY NAME AND NUMBER.

SUPREME REV-O-NOC STEEL RANGES.

FOR ANY COAL OR WOOD.

Without Reservoir, with High Closet, Base and Oven Thermometer.

With Reservoir, High Closet, Base and Oven Thermometer.

Description—The Supreme REV-O-NOC, as the name signifies represents the very highest grade steel ranges made in this country. In attractiveness, durability and value it spells the last word in range construction. Nothing but high grade material and high grade workmanship used in building this beautiful range.

Walls—Made of cold rolled charcoal iron, which is the most durable material obtainable for this purpose. It will not become pitted, or corroded, neither will it rust nor burn off. The body is made of double steel walls. Cone head rivets used. They are driven by compressed hammers same as in boiler construction.

Oven—Bottom plate is made of 12 gauge wrought steel, securely braced with cast-iron plates. Top and sides are made of 14 gauge steel. Top is well braced and will not warp. Oven rack made of 8 gauge wire. Inside of oven is aluminized. The door has non-breakable, sliding brackets which move up and down in a grooved slide. It drops to a horizontal level and forms a convenient shelf that will support any weight up to 300 lbs.

Top—The finest fitting key plate top ever put on a range. Made of high grade smooth castings, beautifully polished.

Pouch Feed and Draft Door—Are combined. Opening plenty large to feed fire evenly, avoiding necessity of lifting covers to feed through top. Front key plate top section is fitted with nickel lifter to be used for broiling.

Hot Blast Draft—In front of range discharges heated air between the flue bottom and the main bottom of the stove under the fire box, spreading the draft evenly from front to back.

Grate—Duplex pattern, so made that one movement of crank cuts out the dead ashes and cinders and drops them into ash pan. It is easily removed through special grate door without disturbing water front or linings. No grate frames or tracks to warp and get out of order, and no grate holder to get loose.

Fire Box and Flues—Are carefully proportioned to produce quickest heat from the smallest quantity of fuel. The linings are heavy and durable. There is ample ventilation behind the linings to prevent their burning out. Extension fire box to use for wood.

Reservoir—Is white enameled on cast-iron, capacity eight gallons. Easily removed.

Ash Pit—Is large, and situated so far from grate that ashes will not bank up under it. Ash pan has large capacity and is fitted with handles that make it convenient to carry.

Thermometer—Is high grade, and so placed in door that it correctly indicates the temperature of oven.

Base—Is made of pressed steel, perfectly smooth. No chance for unsanitary accumulations. Nickel corners.

Nickel—Smooth, best grade trimmings used on this range, free from flaws, and bright and beautiful in appearance.

Without Reservoir, with High Closet, Base and Thermometer.

LEADER REV-O-NOC STEEL RANGES.

FOR ANY COAL OR WOOD.

Without Reservoir, with High Closet, Nickel Leg Base and Oven Thermometer.

With Reservoir, High Closet, Nickel Leg Base and Oven Thermometer.

Description—The Leader REV-O-NOC is a high grade range, made of first-class material by skilled workmen. The design is neat and compact. Its pleasing appearance and many good points will make it one of the best sellers on the market.

Walls—Are made of Wood's refined charcoal iron, patent leveled and re-squared. All parts of body are protected by asbestos board, held in place by extra sheet of steel, making body of range three wall construction.

Oven—Is made of patent level steel, assuring level bottom. The top is well braced so that is will not warp. Steel rack is furnished. Oven door is perfectly balanced and opens horizontally with oven bottom, making a convenient shelf.

Top—Is made of three interchangeable key plates or sections. It will last much longer than ordinary top and is well fitted so there is no danger of its cracking from expansion. Covers and cross sections are heavy and substantial. Is large enough to take six 9-inch covers.

Pouch Feed—Is good size, so that fire can be easily and evenly fed without disturbing cooking vessels over fire box.

End Draft—Provides for as much draft in back of fire box as in front, making an even heat throughout entire length of fire box.

Grate—Is Duplex pattern, turned down for coal, reversed for wood.

Fire Box—Is of good proportion and size to get the maximum of heat from the minimum quantity of fuel. Has extension for wood. Fire back is made of three horizontal corrugated sections which gather ashes and protect the linings from the direct flame.

Ash Pit—Is large and far enough removed from fire box so that ashes will not bank up under the grate.

Reservoir—Is cast-iron, porcelain enamel lined.

Base—Plain nickel leg base which is very much in demand at the present time. Very attractive and easy to clean under stove.

Dampers—This range is equipped with sliding damper to control heat in oven and also with combination check and damper in the High Closet pipe.

Nickel—High grade, plain nickel trimmings are used. Easy to keep clean. Following parts are nickel: Clean-out door, oven door frame, handle and panel, leg base, ash pit and feed doors, towel bar, full nickeled closet.

Without Reservoir, with High Closet, Nickel Leg Base and Thermometer.

"CRUSO" STEEL RANGES.

FOR ANY COAL OR WOOD.

Without Reservoir, with High Closet and Base, Open View.

With Cast Encased Enamel Reservoir, High Closet and Base.

Description—The "Cruso" Steel Range is an entirely new construction, taking the place of the "Gem." It is modern, up-to-date, with many talking points. (Refer to sectional cut above.) This range has all the features, style, appearance, etc., of the highest priced construction. A sample will prove that it is the biggest seller ever put on the Retail floor, and will stand up.

Walls—Of 24 gauge cold-rolled steel, protected by asbestos and steel wall, retaining heat inside of oven and under top, creating great economy in fuel.

Oven—Is square and measures full in door opening,—fitted with drop door and steel never-break oven rack.

Top—Is fitted with Boston rim covers long and short cut centers, and reducing cover.

Pouch Feed—Has a large feed door, permitting easy feeding of fuel, without disturbing vessels on top of the stove Door is also fitted with check slide.

Cast Left End—Adds strength. Note large slusher door, with draft slide, permits poking fire easily and gives draft entire length of fire box, creating even consumption of fuel.

Cast Main Front—Found only on high priced ranges, adds strength and durability. Large cast lined feed door and ash pit door and ash guard, highly nickeled Ash pit fitted with large deep pan.

Fire Box—The fire linings are similar to those used for years on the "Gem" range, the back and front lining being of the one piece style. With end linings out, box will take 20 in. wood.

Grate—Is of Duplex Pattern, reversed for wood and coal.

Reservoir—The casing is of cast iron, very superior to steel in this regard because it will not rust out. The tank is cast, enamel lined, of ample size.

Base—Is made of blue steel with nickeled corners, adding greatly to appearance of range and preventing water being splashed on body of range while scrubbing.

Nickel—"White, Beautiful and Bright," and lasts a long time, and is as follows: Clean-out door, oven door frame, handle and panel, corners on base, ash pit and feed doors, ash guard, rail and full nickel high closet.

For shipment from our warehouse at factory in Chicago. If shipped from stock, a delay of two or three days will result.
All ranges shipped in black japanned with high closet and base unless otherwise ordered.
Order by name and number.

STEEL COOK STOVES.

For Coal or Wood.

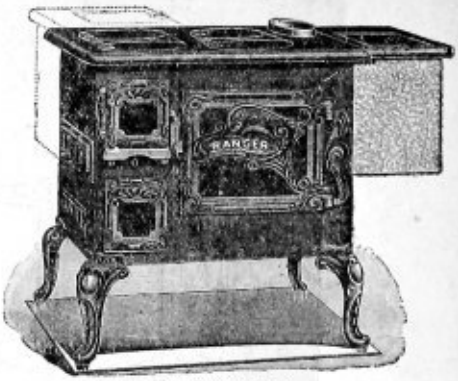
Material—Is made of smooth steel plate, well riveted and protected at the weakest points by asbestos.

Oven—Is made of extra heavy steel riveted firmly together and amply protected to prevent warping.

Flues—Are of ample capacity and provided with clean-out in rear of ash pit, reached from front of stove.

Linings—Are of cast iron, built on scientific principles, held firmly in place. The grate is shaking and dumping.

Reservoir—Made of galvanized iron, can be used on end, top or back, heats by direct contact.—Not for No. R27.



Steel Legs—No. R27 has steel legs turned so they may be bolted to the bottom of wagon.

RANCH HOTEL STEEL COOK.

For Any Coal or Wood.

Steel Plate Cook—Illustrated is built of extra heavy steel, all exposed walls lined with asbestos and protected by inner steel walls hand riveted together, all rivets driven cold, preventing unequal expansion and contraction.

Oven—Is made of heavy steel plates firmly braced, preventing warping.

Oven Doors—Swing open in the center with less exertion than if all in one door. Has a bar extending from top to bottom, when door is closed clasps doors tight in two places.

Flue—Of sheet flue construction, heat passing over entire oven top in a broad sheet, giving heat to all points, down left end, under oven and up into smoke pipe in right end of cook, making entire circuit of stove, distributing every unit of heat where it can be used to best advantage.

This flue system is more economical in use of fuel than any other.

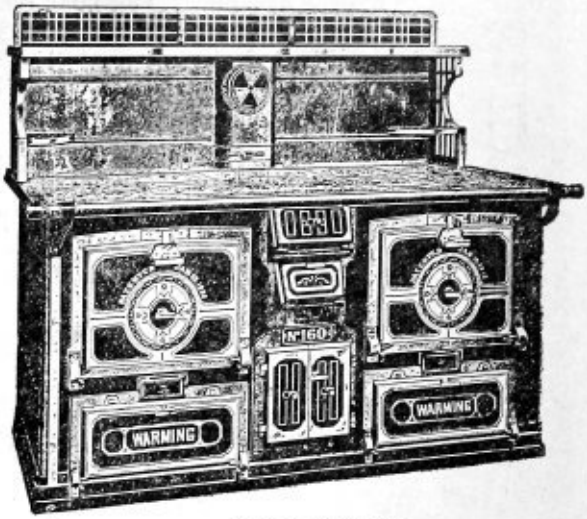
Fire Box—Extra heavy, fitted with duplex grate.

Top—Stove is shipped when not otherwise specified, with six 8 in. holes, heavy short centers and key plates.

Ash Pan—Large and roomy.

Finish—Body of polished steel, all trimmings such as feed door, oven door frames and handles are polished.

Recommendation—Especially suitable for camps, boarding houses, small hotels, etc.



No. R324—Six 8 in. cooking holes, oven 24x24x17 in., top 30½x43½ in., shipping w't 490 lbs.★ .....each **DBJJ** $70.00
Water front .....extra, each **EDJ** 9.00

If French Top (blank plates with one sectional cover reducing from 12½ in. to 5½) is desired, specify "French Top." (No additional charge for same.)

- Y 3 solid plates.

UNLESS OTHERWISE SPECIFIED, RANGES WILL BE SHIPPED AS PER ILLUSTRATIONS.

ALWAYS SPECIFY NUMBER OF RANGE, KIND OF FIRE BOX, KIND OF TOP (BY LETTER), WITH WATER BACK AND IF HIGH CLOSET IS WANTED IN PLACE OF SHELF.

THE HOTEL RANGES shown on this page are built of an extra heavy enameled steel, with extra heavy base and corner strips. The entire range is bolted together instead of riveted, so that any part can be replaced without difficulty.

THE OVENS are constructed of heavy gauge steel with a heavy iron frame around the back and front edges to prevent warping. The top of the oven is protected by a heavy iron cement filled plate.

THE OVEN DOOR is counter-balanced by a weight instead of a spring and closes against an iron frame instead of the raw edges of the steel. It is impossible for this oven door, at any time, to get out of order. It is also fitted with a ventilator, so that the temperature of the oven can be regulated to a nicety.

THE END FLUES where the intense heat strikes first on its downward course, are lined with brick filing. The back flues are of iron.

FIRE POT. Where coal is used for fuel, we furnish a round pot, or we can furnish a wood fire pot, built especially to burn wood, if so desired.

WEIGHTS. Carefully note the weights of all these ranges. Remember when buying a hotel range, it is not a question of how cheap a range can be bought, but it is a question of how heavy the range is made and its lasting qualities.

MAKERS. These ranges are made by one of the largest hotel range people in the United States, whose ranges are today used in many of our warships (also those of foreign countries), steamboats, lake steamers, large hotels, and public institutions all over the United States.

RECOMMENDATION. To those desiring **A FIRST CLASS HOTELRANGE**, buy either of these ranges. They may cost a little more to buy, but your future expense is reduced to a minimum.

★*FOR FACTORY SHIPMENT ONLY. CHICAGO. ILL.*

"REV-O-NOC" CAST RANGES.

FOR COAL OR WOOD.

Without Reservoir, with No. 12 High Closet

With Reservoir and No. 12 High Closet.

Description—The REV-O-NOC Beauty is positively THE FINEST cast range it is possible for anyone to build. It is made of the best of pig iron fitted and mounted by experts in a big factory devoted to the manufacture of highest grade stoves. This is not an old range, retrimmed on the outside but is new from the ground up.

Design—No stove manufacturer (no matter who it is) can produce a pattern and design as practical, graceful and pleasing. The rich harmony, throughout, with the extreme smoothness of the patterns, places this range far in advance of anything on the market.

Oven—Is perfectly square and is well ventilated.

Top—Is extra large, fitted with Boston rim covers, cut extra heavy and long, with short centers, has one reducing cover.

Pouch Feed—Has very large lift door to permit feeding of fuel without disturbing vessels on top of stove; has spun handle and check slide.

End Draft—Entire length of fire box, making even distribution of draft, insuring even fire, no dead fire.

Grate—Is duplex pattern, reversed for coal or wood. The back section is shaking bar, preventing formation of clinkers. Fire always bright next to oven. A big talking point. Both grate bars can be taken out through ash pit, without disturbing linings or water front, by removing small plate at front end of box.

Fire Box—Is constructed for best economy of fuel, no waste corners, extra heavy, porcupine fire back takes place of oven front and manufacturers guarantee it under ordinary usage to wear many times longer than the ordinary fire box.

Oven Door—Is full cast iron, steel lined, spring balanced, of steel range drop style, making convenient oven shelf. Door spring and cap are removable without loosening a bolt. See small lug at spring casing—this is a big feature.

Front Door—Is extra long, conceals inside drop self-mounting end fire door, which prevents ashes falling out when using wood.

Dampers—Detachable, easily put in without removing top of range or reservoir.

Thermometer—In oven door indicates heat in oven, saves steps and testing.

Nickel—"White, beautiful and bright," lasts a long time. Removable round nickel towel bar.

★FOR FACTORY SHIPMENT ONLY, WESTERN ILLINOIS.

CAST RANGES.

Without Reservoir, with Back Guard.

With Reservoir, with No. U16 High Shelf.

Material.—The best grade and mixture used, all made by expert workmen, insuring smooth castings of great strength.

Oven.—Perfectly square, ventilated, with bottom clean-out feature.

Top.—Of generous proportions (see below), fitted Boston Rim, heavy covers, reinforced short centers, thoroughly braced.

Pouch Feed.—Large swing feed, with check slide.

Grate.—Duplex, of the open pattern to burn coal. This grate will burn wood, but we suggest a loose wood grate be ordered when wood is to be used freely.

Fire Box.—Built with walls straight up and down, preventing live coal banking up against them. This box has been built with economy always in view. No. 820, 822 and 922, have wood pouch back end on fire box to take long stick of wood.

Dampers.—The direct draft handle is directly in front over the oven door, preventing bending over hot stove to regulate damper.

Nickel.—"White, beautiful and bright," lasts a long time. This is of the plain, smooth lift off type, no bolts used, and as follows, nickel top rail, nickel edge on hearth, on end shelf and on oven shelf, nickel oven door panel, tea pot stands and handles.

Selling Features.—This range is the same as the [illegible] Clifton, except it has a solid hearth, built heavier and has a long oven shelf. The [illegible] Oakwood is positively the greatest value ever offered the trade.

	No. of Holes.	Size of Oven.	Size of Top	Approximate Shipping Weight	Each
No. U816	6-8	15×16×10 in.	38½×26 in.	330 lbs.	AIHJ $33.00

No. P18. Steel High Closet, w't 40 lbs., extra ..... EDJ 9.00
Water Front ..... BDJ 4.00

RANGES WILL BE SHIPPED WITH LOW BACK GUARD, AND TEA POT STANDS UNLESS OTHERWISE ORDERED. ORDER BY NAME AND NUMBER AND ALWAYS SPECIFY "HIGH SHELF" OR HIGH CLOSET (IF WANTED) AND ADD TO PRICE.

CAST RANGES.

Without Reservoir, With Backguard.

With Reservoir and No. P16, High Shelf.

Material—Made of new high-grade gray iron, perfectly smooth castings, comparing favorably with any.

Oven—Is perfectly square, well ventilated.

Top—Is large (see dimensions below) fitted with heavy Boston rim covers, heavy centers, reinforced, and has one reducing cover.

Pouch Feed—Has large swing door, permitting of easy feeding of fuel, fitted with sliding check draft.

Grate—Is of duplex pattern, fitted for burning coal. While this grate will burn wood, still owing to its open construction it will not be economical

Fire Box—Is built to create economy in fuel consumption. Fire back is in three pieces, and heavy, perfectly ventilated.

Dampers—The direct draft damper handle is directly in front over the oven door, saving necessity of extending over the hot stove to the pipe collar to regulate damper. This is a good feature

Nickel—"White, beautiful and bright," lasts a long time. This plating is very heavy all nickel, is of the smooth lift-off type and as follows nickel band, nickel edge on hearth and end shelf, oven panel and shelf, handles, and tea pot stands.

Selling Features—In the [illegible] "Clifton" we offer a high grade cast range at ridiculously low prices. Never before has been offered such value The demand for cast ranges is increasing every day. It will pay the progressive merchant to handle the [illegible] "Clifton." It is a repeater. Our price is 20 to 35% lower than stoves of equal merit, offering the merchant an excellent opportunity to get all the cast range business in his town, and make some money.

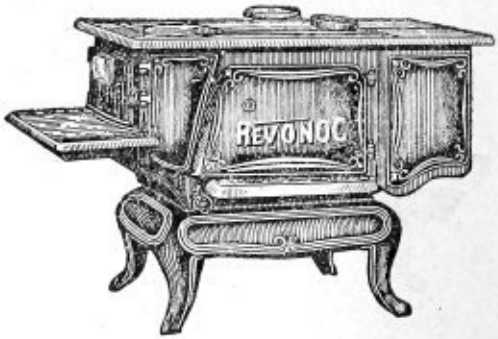
No. P18—Steel, high closet, w't 40 lbs.					EDJ	9.00
Water Front, extra					BDJ	4.00



Ranges will be shipped with low backguard and tea pot stands unless otherwise ordered. Order by name and number and specify "High Shelf" or "High Closet" (if wanted), and ADD to price. If this stove is wanted for wood, please specify "loose wood grate" and we shall be glad to include it at a very nominal charge. This wood grate can be thrown in on top of the present open duplex grate and makes a perfect wood stove.

No. D818-R—4 8 in. holes, oven 18x20 in., top 23x40¼ in., approximate shipping w't 280 lbs.....each BAJJ 35.00

Description—REVONOC cook stoves are built of the best grade of pig iron mounted by expert workmen, absolutely high grade.

Design—Of the plain Colonial design, smooth, free from carvings to catch dust and dirt. Something entirely new, and exclusively REVONOC.

Oven—Is practically square, of large capacity, notice sizes above.

Top—Is fitted with Boston rim covers, heavy, wide, long and short centers.

Pouch Feed—Large, of lift type, enables feeding of fuel without distrubing vessels on top.

Fire Box—Will take 20 in. stick of wood with end linings out.

Fire Back—Is of one piece pattern taking place of front oven plate. This style of back will last many times longer than the ordinary kind.

Interchangeable Parts—All parts on the Family and Domestic REVONOC are interchangeable. This is an excellent feature.

Nickel—"White, beautiful and bright," lasts a long time.

ORDER BY NAME AND NUMBER.

"REV-O-NOC" COOK STOVES.

WELCOME REVONOC, with Reservoir, with Oven Shelf.

No. W8R	4—8 in.	16x18 in.	39x21½ in.	220 lbs.....each	**A F B J**	27.00

Description—This stove is made from the same material, by the same workmen as the REVONOC Family and Domestic, and to those desiring a high grade stove at a low price we recommend the above.

Tops—These cooks have large tops which however are not put onto narrow bodies, note depth of ovens. Beware of cook stoves with large tops and narrow bodies, the oven capacity has been so reduced, it is of no practical use. The Boston rim covers and centers are extremely heavy.

Ovens—All are large and deep, note particularly the sizes given above, and compare with the lower priced lines on the market.

Fire Boxes—Are all of good proportion, built to create great economy of fuel.

ORDER BY NAME AND NUMBER.

SHIPPING FACILITIES

With our immense stock and very modern facilities for shipments, we are enabled to fill orders with unequaled promptness. On some of the roads we have special through cars which enable us to reach distant points 24 hours ahead of shipments made in the regular way.

REVO-NOC HARD COAL BASE BURNERS.

This illustration represents the outside construction of the REVO-NOC Base Burner—All nickel plated trimmings mounted with concealed hooks, upper and lower doors fastened with buttons in such a way that they cannot warp away from the frames. Fire pot is hung in a ring frame and can be turned to equalize wear, the grate revolves on hardened steel balls, the magazine cover is self-seating, mounted inside of swing top without hooks to break or wear out. Examine carefully points in illustration featured by arrows.

The REVO-NOC base burner is the most beautiful, most economical, and most serviceable base burner yet produced. It is a new and original design with many distinctive features.

ON DIRECT SHIPMENTS FROM FACTORY NEAR ST. PAUL, MINN., WE MAKE A FREIGHT ALLOWANCE OF 16c PER CWT.

Material—It is built of the best grade of iron used for this purpose.
Fittings—None but experienced, high class men are allowed to do this work. The castings are free from flaws and perfectly fitted. A rigid inspection makes it impossible to ship one of these stoves unless mounted and fitted properly.
Flue System—This is the three-flue construction which many authorities claim is the best system yet devised. Completely surrounded by these three flues is a fourth flue in the bottom of the stove, that carries the cold air from the floor through the hottest part of the stove. This cold air flue is more than twice as large as the hot air flue ordinarily used in base burners. The gases and products of combustion are carried completely around the sides and the gas flues in the back of stove are exposed on three sides, adding materially to the direct radiating surface.
The entire base side of the stove is in direct contact with the combustion gases, adding about 30 per cent to the radiating surface, over any other base burner. See above diagram of flue construction.
Firepot—Extra heavy and deep. Can be conveniently removed from front doors. Hung in a ring frame and can be turned to equalize wear.
Grate—Combination duplex and shaking type, heavy and indestructible. Revolves on hardened steel balls.
Magazine—Has self-seating cover mounted inside of wing top. No hooks to break or wear out. Large capacity.
Doors—Upper doors button in middle, cannot warp away from frames. Lower doors button both at top and bottom.
Mica Surface—Is extensive, radiating light and heat, frames removable, making it easy to put in mica.
Nickel—The very best grade only is used. All nickel parts are fastened on by means of hooks and are removable. The nickel dome is mounted with concealed joints and lifts off. No bolts used on nickel parts.

HARD COAL BASE BURNERS.

RADIANT REVONOC.

DESCRIPTION—This is a strictly up-to-date base burner, one of the most attractive on the market. In general appearance and design it is similar to our No. 317 REVONOC Base Burner. The Radiant REVONOC has a siphon flue base—See Figure 3. It is the best two-flue base burner ever manufactured.

The Magazine Cover rests inside the swing top and swings with the top, there are no hooks to break off and it is impossible for it to get out of order.

The Magazine of this heater is ventilated in such a way that the current of air rises on the outside of the magazine and carries the gas that forms inside the magazine down into the fire. This current of air being in the magazine, there is no possible chance for the coal to burn while in the magazine.

The Nickel Trimmings are of the highest grade and will compare with any on the market. They are of the lift-off type, and can be easily removed. No bolts are used. In setting the stove up on its base, the weight can be considerably reduced by taking off the trimmings. This is a big advantage and convenience when taking down a stove or removing it from one part of the house to another.

The Fire Pot is removable through the lower front doors without taking off the doors or any part of the stove.

The Grate rests on ball bearings, so that it is easily handled when full of coal. It is practically noiseless when shaking.

The Shaking and Dumping Grate are worked by means of a combination shaker and crank, which is unbreakable and fits into the socket in the shaking grate.

The Proportions of the Mica Front and side of this stove are the best and most practical of any on the market. Without question this is the neatest and most attractive medium-priced base burner to be had.

No.	Fire Pot, W't, in.	Height, lbs.	Floor Space, in.	in.	Each.
35	15	450	67	26x26	DBFJ★ $71.00
36	16	500	69	28x28	DFHJ★ 78.00

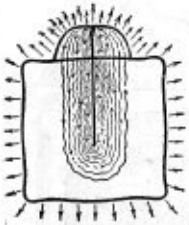

Figure 1.
The Old Way.

Figure 1 shows the usual method of making the bottom of a base burner. In this the heat stays in the center of the stove and the base has very little radiating power. There is no hot air circulating flue in this construction, and the stove is what is commonly known as a poor floor heater.

The comparative raidating powers are shown by the arrows around the edges.

By observing this diagram you can see why it is that your old stove does not throw the heat around the base the way it should. In Figure 2 is shown the principle of the new horseshoe flue of the "Radiant REVONOC."

Figure 3.

Figure 3 shows the raised bottom and hot air ventiduct in the "Radiant REVONOC." This ventiduct takes the air through the hottest part of the stove and is completely surrounded by the smoke flue and the fire wall, separating it from the fire box. The raised bottom throws the heat in the bottom flues to the outside of the base.

The Horseshoe Flue.

Figure 2 shows the base of the new "Radiant." It is the best two-flue base burner that has ever been put on the market. In this stove the center of the base is raised, thus forcing the heat to the outside of base, making the base of the stove a very powerful radiator. In the "Radiant" cold air is taken from the floor and passes through a ventiduct the entire length of the stove. This ventiduct, as shown in Figure 4, is completely surrounded by the hot gas flues and the fire chamber.

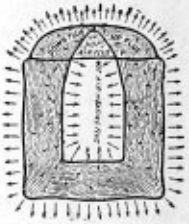

Figure 2.

Figure 4 is a section through the middle of the new "Radiant," and shows very clearly the large hot air ventiduct which takes cold air from the floor and passes through the hottest part of the stove, thus heating all parts of the room equally well, at the same time the heat acts as a germicide and continually purifies the air of the room, giving a continuous circulation and warming all parts of the room equally well.

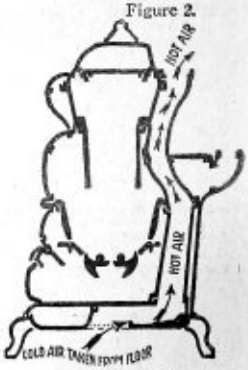

Figure 4.

SHIPPED FROM FACTORY NEAR ST. PAUL, MINN., WITH A 16c PER CWT. FREIGHT ALLOWANCE. ORDER BY NAME AND NUMBER.

HARD COAL BASE BURNER.

CHARM REVONOC.

Designed for a low price stove, containing many features found in higher priced heaters. The nickel trimmings are very smooth, many of them self-mounting. This heater is built with a large ash pit and large base flues, making it a splendid heater. It will nicely heat three or four rooms in zero weather.

It is fitted with duplex grate and shaking ring, also double heater attachment. The fire pot can be easily removed by taking off front strip. All parts are well fitted and made of first class material. A very attractive heater at a low price.

OAK STOVES.

PREMIER REVONOC.

Nos. P614 to P620.

For Hard or Soft Coal, Lignite or Wood.

Description—The Premier REVONOC is made of the finest mixture of pig iron that can be had, and analysis has proven that the mixture used will stand use longer than the ordinary kind. The polished drum is made of Wood's double refined charcoal sheet iron, cold rolled, will not flake off and will hold its color.

Fire Pot—In the walls are cast a number of self-cleaning slots extending from top to bottom through which air is heated and thrown onto the fire forming a perfect combustion by consuming all gases. The air after entering in ash pit passes into these slots and not up under the grate. In this patented fire pot the fire burns on outside edge, not in the center. Practically indestructible on account of air circulating through walls. Cannot clog with ashes because slots are larger at bottom than at top, a very desirable feature.

Ash Pit—And bottom are cast in one piece without joints, making it always air tight, enabling fire to be held indefinitely.

Doors—Are all tightly fitted, as are also the registers by ground joints, making it impossible for air to be drawn in. The locks are of malleable iron on a double iron incline. A great improvement on the screw regisfers.

Joints—The steel body is mounted in air tight pocket joints that cannot open. It is not bolted, so cannot buckle.

Finish—Castings are richly carved, the large square base and skirting, making stove large and massive. The elaborate nickel foot rail and brackets effectually conceal the fire pot. The urn base, name plate and registers are handsomely nickeled.

A Word—This stove has been before the American public many years and its greatly increasing popularity places it in a class by itself. It is a "Specialty." Dealers secure their own profits on it.

OAK STOVES.

Nos. 9 to 20½.

XMOR "REV-O-NOC" OAK.

Description—The pig iron used in the construction of this Oak is of the best grade, the steel drum of heavy gauge and will not peel off. The stove is mounted with great care and all fittings are perfect. Out of the thousands of this stove sold by us in past three years we have never had a complaint.

Fire Pot—Is extra heavy, corrugated, and the best fire pot ever put in a low priced oak.

The Grate—Is draw center pattern, heavy and durable.

Air Tight Features—The steel drum is swedged into a cup in top of fire pot, the outer cast ring on which foot rail hangs is brought over this connection and drawn tight by bolts on the outside. A cast protection rim circles entire pot, protecting steel where it joins fire pot, a feature not found on similar low priced Oaks. All doors have lever locks, enabling doors to be brought perfectly tight, a decided improvement on ordinary latches. Ash pit is made in two pieces, the bottom being of cast iron not steel, as is so often used. Grate is shaken through small door on side of ash pit, doing away with opening large ash pit door allowing dust to escape.

Finish—Nickel foot and top rail (steel never break), panels, registers, urn, etc.

A Fact—We have never lost a customer on the Xmor [illegible] Oak, it has given universal satisfaction and is positively THE BEST OAK at the price on the market. There may be cheaper Oaks, but price does not always indicate that it will give satisfaction.

"PET" OAK STOVES.

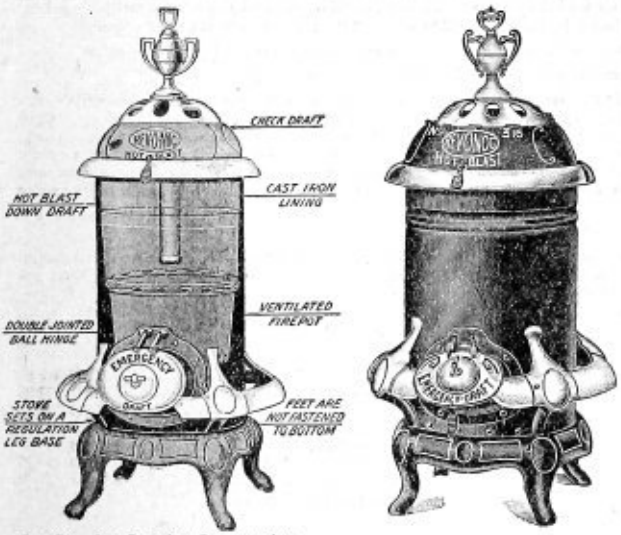
FOR COAL OR WOOD.

Description—To meet the demand for a low-price competitive Oak, we have decided to add the "Pet." We call your attention to the size and weight of this Oak, the full nickel rail, the cast bottom, not usually found in an Oak, at this price.

Material—Made of good gray iron, castings smooth, the body being made of polished blued steel securely bolted to the castings.

Ash Pit—Has large door with two hinges (one is usually found on this type of stove) fitted with screw register

Grate—Is flat, of dump variety.



Fire Pot—Heavy, smooth, of good material and better than ordinarily used on the stove of this character.

Nickel—As follows: Steel never-break top ring, foot rail, urn and screw registers.

NO.	SIZE BODY	HEIGHT INCLUDING URN	WEIGHT		EACH

REVONOC HOT BLAST STOVES.

FOR HARD COAL, SOFT COAL, LIGNITE OR WOOD.

Cut Showing Interior Construction.

No.		Diam. of Body, in.	Height to Bottom of Feed Door, in.	W't, lbs.	Each.
1312	REVONOC—....12	30½	115	JGHJ	$13.00
1315	REVONOC—....15	34	145	JIHE	16.50
1316	REVONOC—....16	35½	165	AAGJ	19.50
1318	REVONOC—....18	37	185	ABJJ	22.00
1320	REVONOC—....20	40	265	BJJJ	33.50

Description—The REVONOC Hot Blast is a very attractive, modern heater, made by skilled workmen from first class material.

The body is made of 20 gauge Wood's refined charcoal iron, patent leveled and resquared. This material is freer of deterioration than any other cold rolled sheet and will not become pitted nor turn white with long usage. The castings are smooth and well fitted.

The nickel trimmings are attractive and of the highest grade.

The **Big Feature** of the REVONOC is the base construction. The body sets on a substantial cast iron base, which is a decided improvement over the usual flimsy arrangement in which the feet slip into steel lugs bolted to the bottom of the stove.

Bottoms are made of 14 gauge open hearth steel, flanged and pressed into the drum of stove to which they are welded. This is the tightest, strongest and best construction yet devised.

These stoves have full cast iron linings, as shown in cut, which prevents the steel jacket from getting red hot and burning out.

The fire chamber is well proportioned and ventilated so it will not burn out. Fitted with cone center shaking grate.

The emergency door works on a double jointed ball hinge, making a perfectly tight fit.

A poker and shovel are furnished with every REVONOC Hot Blast.

HIBBARD AIR TIGHT STOVES.

Material—The Body is made of a high grade of polished steel, protected by heavy steel linings, giving an immense radiating surface.

Air Tight Features—The Steel Body is double seamed to the sides "like a wash boiler," (Fig. 4) making an air tight joint without the aid of putty or cement, which falls out when hard and dry and leaves openings.

Fig. 3

The Ash Pit Door—Is of the gravity style, (Fig. 3), the surfaces being ground a glass-like finish, making air tight joint. No turn buckles are used, as when a turn buckle is tightened, it springs the door away from the door frame at the hinge, allowing air to enter, preventing regulating of fire properly.

Dome—Is of cast iron, of pleasing design and has a large lift feed door, which will take a large stick of wood.

Finish—Nickel "White, Beautiful and Bright," and as follows—Rails, top ring (steel nevebreak), swing top, ash pit door, spun handle and urn.

Fig. 4

Remarks—We suggest when there is wood in a locality and dealer is pushing four "Hibbard" hot blast, he handle this desirable wood air tight in connection herewith, the air tight features of both being identical. This is the best air tight on the market, and will be a trade winner.

Smooth Steel Body, Lined, without Rails.

Nos.	201	241	301
Size body, in.	20x17x20	24x17x22	30x17x24
Ship. w't, lbs.	46	50	54
Each	$5.40	6.00	7.50
	CBE	CFJ	DEJ

Made of high grade material. Steel top, sides and bottom, double seamed together, making absolutely tight joints. Fitted with cast ash pit door. Cast legs are bolted to side of stove.

Note hot blast down draft. Tube heats air before throwing on to fire, creating perfect combustion and making a saving in fuel. An entirely satisfactory stove. RAILS EXTRA, SEE END OF THIRD COLUMN.

REVONOC PARLOR STEEL BOX

Cast Top and Bottom, Blued Steel Body, Steel Lined, Large Swing Top and Ash Pit Door, Nickel Name Plate and Screw Register.

EXTRA FOOT RAILS.

Nickel plated foot rails for Nos. 200, 201, 240, 241, 300, 301, per set ..... JIJ $1.50

CANNON HEATING STOVES.

DASH.

Description—Made of good grade of material. The castings are very smooth. The stove is well constructed, and of pleasing design.

The Fire Pot—Is heavy, firmly bolted to the base and top, of the globe type, radiating large quantity of heat.

The Feed Door—Is large, of the sliding type, operating smoothly all the time.

Drafts—Are of screw style, closing tight, enabling fire to be held a long time.

The Ash Pit—Is of ample size, built tight.

The Grate—Of draw center type, something not usually found in a stove of this type.

Nos.	D6	D7	D8	D9	
Fire Pot	8	9	10½	12	in.
Grate	6	7	8	9	in.
Pipe	5	5	5	5	in.
Height	23	24½	26	28	in.
Weight	37	50	61	75	lbs.
Each	$3.20 AIJ	4.50 BGJ	5.30 CBJ	6.50 CIJ	

HERMITAGE.

Description—Made of the same grade material by the same expert workmen who make our [illegible] cook stoves, making this a high grade medium weight cannon stove.

The Fire Pot—Is extra heavy, being bolted firmly to the ash pit and upper bowl.

The Feed Door—Is of the swing type, on a large stove a sliding door is liable to catch.

Drafts—Are located in the ash pit door, around base of fire pot and the check draft in feed door.

The Ash Pit—Is large and deep, fitted tight.

The Grate—Is draw center type, heavy and durable.

Nos.	H11	H12	H13

VOLCANO

Description—A big, heavy cannon, especially designed for heating school houses, public buildings, R. R. depots, etc.

It is built of a fine grade of pig iron, no scrap being used, in fact the same material and workmen are used that build fine cooks and heaters.

The Fire Pot—Is built to stand the greatest amount of heat without burning out, the upper fire bowl being contracted, taking the place of a baffle plate, creating a large heating surface.

The Feed Door—Will always remain shut, as it is of the gravity type.

The Ash Pit—Is large and deep and tight.

The Grate—Is extra heavy, of draw center pattern.

This Stove can be bolted to the floor, making an ideal stove for heating R. R. cars, depots and camps.

Without Drum.

Nos.	V018	V020	V022

LAUNDRY STOVES, RANGE BOILERS, ETC.

LAUNDRY STOVES.

For Coal or Wood.

No. 84—21×22 in. top, 22 in. high, four 8 in. lids, w't 90 lbs..... each **EDJ** $9.00

Made of good cast iron, free from flaws, swing ash pit door fitted with draft slide, flat dumping grate

For Coal or Wood.

No. 89—18×22 in. top, 22 in. high, two 8 in. lids, w't 90 lbs.... each **DHJ** $8.00

Made of good grey iron, filled with special care, made extra heavy and durable for extra hard use. Large top surface.

For Hard or Soft Coal.

No. 82—15½×19 in. top, 23 in. high, two 8 in. lids, w't 60 lbs. each **CDJ** $5.70

Fitted with device to hold 8 irons so they will stand close to the fire pot, securing the largest amount of heat.

LAUNDRY STOVES.

For Coal or Wood.

No. 81—16×19 in. top, 22 in. high, two 8 in. lids, w't 55 lbs. .... each **CJJ** $5.00

Well made, substantial fire pot, heavy lids well fitted and low in price.

For Coal or Wood.

No. 2—12½×19 in. top, 20 in. high, two 8 in. lids, w't 45 lbs..... each **BDJ** $4.00

Square top—swing pouch feed door, fitted with shaking and dumping grate. Popular low price laundry.

SALAMANDERS

No. 1—Made of gauge steel, diameter of body 15 in., height of body less handles 30 in., size of legs 1½×¼ in., w't 26 lbs..... each **AIJ** $3.20

Extra Grates, for same..... " **DJ** .70

No. 2—Salamander hoods, with pipe collar to fit above.....each **ABE** 2.00

TIGER LAUNDRY STOVES WITH WATER JACKET.

No. 80—20×13 in., top, 23 in. high, two 8 in. lids, w't 140 lbs...each **JIFJ** $16.00

This stove is built with a water jacket entirely around it, part of it with intake and outlet tops at back, ready to connect to pipe. It is built of high grade of iron, tested, and will heat the largest range boiler very satisfactorily. This is a far better arrangement than the coil, because no space is lost in the fire bowl. Note extra weight.

GALVANIZED RANGE BOILERS.

Made of the Best Material, Tested to 200 lbs. Pressure, Fitted Complete with Fancy Stand, Tube and Galvanized Couplings.

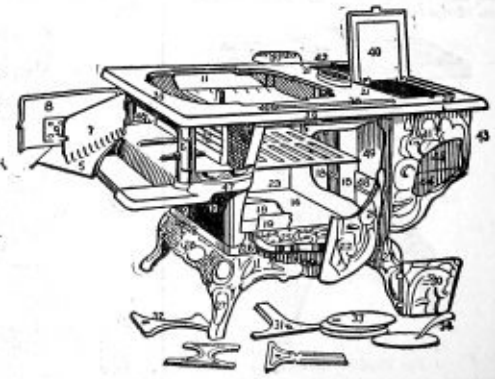
Nos.	30	35	40
Capacity	30	35	40 gal.
Dimensions	12×60	13×60	14×60 in.
Weight	78	85	96 lbs.
Each	$13.50	16.50	17.00
	JHAJ	JIIJ	AJBJ

If wanted without stand, deduct $1.80. If wanted without couplings, deduct $1.08. If wanted with brass couplings add **JGE** *$1.80.*

Shipped complete unless otherwise specified.

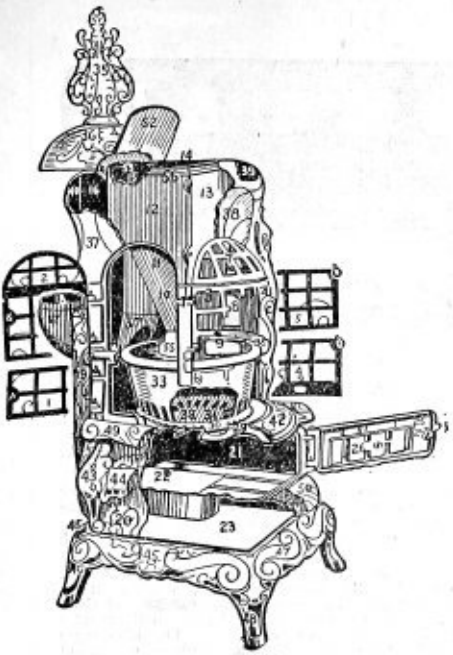
SECTIONAL VIEWS OF STOVES.

In ordering stove repairs, always stand facing the pipe collar. Give number and name on stove. (Do not use invoice.) Do not give numbers on castings; they indicate only moulder's private numbers. Order repairs by numbers on this cut, and also full name of casting, as per this list. If casting wanted cannot be found on cut, give full description of it, and if necessary, a drawing. Liberal descriptions will avoid errors.



STEEL RANGE.

1 —Pouch or left cast end.
2 —Pouch feed door.
3 —Left end draft door.
4 —Left end draft door damper.
5 —Front grate or lining.
6 —Back end lining.
7 —Front end lining.
8 —Fire back, if in two or three pieces specify section wanted.
9 —
10 —Short half duplex grate.
11 —Long half of duplex grate. (If flat grate, so specify.)
12 —Grate cogs (2).
13 —Grate frame.
14 —Grate cog covers.
15 —Grate rest. (Right side.)
16 —Grate rest. (Left side.)
17 —Grate shaker.
18 —Wood extension pocket.
19 — Cap for water front openings.*
20 —Fire back rest.
21 —Feed door and ash pit door frame. (Sometimes this frame is in 2 or 3 sections. Specify which, one is desired.)
22 —Upper cog guard.
23 —Feed door nickel panel.
24 —Feed door. (If feed door swings, so specify.)
25 —Grate door.
26 —Ash pit door. (Ash pan often is attached to this door; door only will be sent unless otherwise specified.
27 —Ash pit door damper.
28 —Ash pit door damper handle.
29 —Ash pan. (On some ranges ash pit door is front of ash pan. Door will not be sent unless specified.)
30 —Left end or pouch top.
31 —Back or collar top.
32 —Right end top. (When range has key plate top.)
33 —Front top.
34 —Left end or broiler key plate.
35 —Broiler key plate lift.
36 —Center key plate.
36A—Right key plate.
37 —Right end (with regular stove top.)
38 —Short center.
39 —Cover.
40 —Large ring of reducing cover.
40A—Medium ring of reducing cover.
41 —Small ring or disc of reducing cover.
42 —Center rest.
43 —Cover lifter.
44 —Direct draft damper.
45 —Direct draft damper handle.
45½—Direct draft damper rod.
46 —Back flue. (When in 2 sections specify upper or lower.)
47 —Front nickel band.
48 —Oven door frame. (Unless specified "with steel lining" frame only sent.)
49 —Oven door panel.
50 —Oven door handle complete.
51 —Oven door thermometer.
52 —Oven door catch.
53 —Oven slide.
54 —Flue strip (under oven).
55 —Short base strip.
56 —Long base strip.
57 —Flue door frame.
58 —Under half spring box. (When spiral spring is used.)
59 —Spring cover. (Specify right or left, flat or spiral spring.)
60 —Oven door spring. (Either flat or spiral.)
61 —Left high closet bracket.
62 —Right high closet bracket.
63 —Teapot stand.
64 —Teapot stand hinge.
65 —Lugs connecting steel body to cast top. (Specify location.)
66 —Pipe damper frame.
67 —Pipe damper slide or round register.
68 —High closet panel. (If handle is separate, specify if handle only wanted.)
69 —Left closet corner.
70 —Right closet corner.
71 —Lower closet strip.
72 —Upper closet strip. (Specify front, right or left strip wanted on both above.
73 —Right closet door hinge.
73½—Left closet door hinge.
74 —Closet top guard, only.
75 —Closet top guard strip.
76 —Closet top guard, left corner.
77 —Closet top guard, right corner.
78 —Reservoir top.
79 —Front reservoir casing.
80 —Bottom reservoir casing.
81 —Reservoir damper.
82 —Oven brace. (Right end.)
83 —Reservoir tank.
84 —Reservoir covers. (Specify front, back, or both.
85 —Towel rod.
86 —Flue door.
88 —Right end reservoir casing.
89 —Back end reservoir casing. (If range has steel reservoir casing, order "Steel Reservoir Casing only.")



COOK STOVE.

1 —Main bottom.
2 —Lower front.
3 —Flue stop.
4 —Main hearth.
5 —Hearth slide.
6 —Upper main front.
7 —Front grate.
8 —Front door.
8½—Front door name plate.*
9 —Front door damper.
10 —Main right side.
11 —Main left side.
12 —Fire back.
13 —Center rest.
14 —Oven top.
15 —Oven back.
16 —Oven bottom.
17 —Oven rack.
18 —Back flue-strip.
19 —Bottom flue strip.
20 —Direct draft damper (complete).
21 —Flue cover (2).
22 —Right oven door.
23 —Left oven door.
24 —Oven door nickel panel. (Specify right or left.)
25 —Oven door shelf. (Specify right or left.)
26—Oven door kicker.
27—Leg.
28—Short base strip.
29—Long base strip.
30—End feed door. (Specify right or left.)
31—Cut long center. (Specify top or bottom.)
32—Short center.
33—Cover.
34—Cover lifter.
35—Front top.
36—Back or collar top.
37—Teapot stand.
38—Towel rod.
39—Reservoir top.
40—Reservoir cover. (Specify front or back.)
41—Right reservoir casing.
42—Left reservoir casing.
43—Back reservoir casing.*
44—Bottom reservoir casing.
45—Reservoir tank.
46—Reservoir damper.
47—Right ash guard.
48—Left ash guard.
49—Main back, reservoir stove.
60—Main back, square stove.*

BRASS REVONOC WICK OIL COOK STOVES.

No. 2600 REVONOC, Two Burner, Blue Finish.

No. 5600 REVONOC, Four Burner, Blue Finish.

Material—Made of heavy gauge steel, with rolled edges to strengthen stove where necessary.

Body—Full cabinet, protects flame from drafts. A decided improvement over stoves made with open back. Base is made of re-inforced rolled edges.

Top—Is large and edges are strongly braced and re-inforced. Grates are square, giving much larger cooking space than stoves having round grates. The three burner stove will easily accommodate a double oven and still leave the third burner free to use any size kettle or pot. The space between the burners on the four burner stove has been increased so that a double oven will leave two burners entirely free for other work, even when stove is fitted with high shelf.

Burners—Are made of spun brass and have been improved every year so that they are by all odds the best oil cook stove burners in use. They are extra heavy, the wick raiser has been improved so that ratchet will always work. Brass burners will not rust as do burners on some other stoves that are made of steel. The success of the REVONOC Oil Cook Stove is due to the superiority of its patented burners. The top rim of burners is so constructed that small particles of char from the wicks do not collect around wick and cause smoke or odor when stove is lighted. The diaphragm across the top of brass burner creates an equal distribution of air on inside and outside of wick resulting in perfect combustion. The stove burns thirty parts of air to one part of fuel, making it the most economical stove to be had.

Indicators—The raising and lowering of wicks is regulated by an indicator that is fastened to the raising device. This indicator has been greatly improved and the wicks can now be easily set without the trouble of loosening a set screw. No guesswork in operating the REVONOC oil stove.

Cones or Chimneys are made of steel white enameled, the inside cylinders being perforated so that air enters on both sides of flame resulting in a beautiful blue flame.

Tanks are made of heavy flint glass supported by a bracket so that they cannot be knocked off. Capacity about one gallon. The automatic valve on mouth of tank can be easily removed when necessary to refill. Glass tank shows amount of oil and prevents smoking and rapid consumption of wicks which results when stove is operated after oil has been used up.

Chimney Raisers of the best type are a new feature of the 1915 REVONOC. When wicks are turned down and fire put out, the chimneys should be raised from top of burners. This breaks connection with burner and prevents oil seeping up onto the chimneys. This keeps them clean and avoids possibility of stove smoking when first lighted.

Wicks—Double thick, extra close weave and will burn approximately seven hundred hours if properly handled. See Direction Card furnished with every stove.

Legs are made of heavy pressed steel and are nearly perpendicular. A tray is fastened to the legs making a very rigid base and a convenient shelf for pots and kettles.

The REVONOC **Oil Cook Stove** is the best oil cook stove made. There are thousands of them in use. Set the REVONOC on your floor and demonstrate it along side of other stoves. It will do 46 per cent more work and use 22 per cent less oil. In fact the REVONOC oil stove combines all the advantages of a gas range and is operated with the cheapest and most convenient fuel obtainable.

Blue Enameled with Black Top, White Cones and Tray.

For prices and information on wicks, see page 1023. For further description, see page 1080.

TEST.

Between the REVONOC and its most popular competitor, gave the following results—

The test was made with one quart of water in a three quart covered pail at a temperature of 60 degrees Fahrenheit.

Test No. 1—It took the REVONOC 15 minutes, while it took the other 20 minutes to boil this water from time fire was first started, showing the REVONOC was 25% faster.

Test No. 2—It took the REVONOC 12¼ minutes, while it took the other 18½ minutes, to bring to boiling point, both fires burning normal, when water was put on, showing the REVONOC 46% faster.

Test No. 3—Was to burn one burner of each oil cooker 3 hours. This test was made during the same time and with the same burners. The REVONOC consumed 18½ oz. of oil in 3 hours, while the other consumed 22½ oz. of oil showing a saving in favor of the REVONOC of 22 per cent in oil and time.

This shows the REVONOC Oil Cooker will do 46 per cent more cooking and at the same time consume 22 per cent less oil, which amounts to doing the work in two-thirds the time at much less cost for oil.

The reason for this favorable test, is the fact that other oil cooks can only mix a limited amount of air, and that only from below the burner, while the REVONOC takes in air through a great many carefully adjusted perforations both from the interior and exterior throughout the entire length of the combustion chamber above the wick, in addition to the air taken in from below the burner. By mixing this great amount of air with the flame, the REVONOC Oil Cooker requires less oil to give perfect combustion.

The REVONOC Oil Cook is the result of long years of careful experimenting, and is an achievement in the art of burning kerosene oil.

OIL AND GASOLINE STOVES.

REVONOC OIL STOVES.

Wickless Blue Flame, Iron Burners.

Description—Body made of cold rolled steel, japanned and ornamented elaborately, in full cabinet style only, strong and rigid.

The Burner—Is durable, self-centered, requires no adjustment, drops easily into place. It evaporizes perfectly and burns at all times with a steady blue flame.

Tank—Is removable, cannot be filled while stove is in operation, equipped with automatic oil feed.

No. 501—1 burner, height 12 in., shipping w't 22 lbs. .....each **BEJ** $4.50

No. 502—2 burners, height 12 in., shipping w't 30 lbs. .....each **CGJ** $6.50

No. 503—3 burners, height 12 in., shipping w't 40 lbs. .....each **EBJ** $9.00

Wickless Blue Flame, Brass Burners, Massive Steel Base.

No. 801—1 burner, height 14 in., shipping w't 24 lbs. .....each **CIJ** $6.80

No. 802—2 ubrners, height 14 in., shipping w't 32 lbs. .....each **DHJ** $8.50

No. 803—3 burners, height 14 in., shipping w't 43 lbs. ....each **JFAJ** $10.50

REVONOC GASOLINE STOVES.

Base Burners.

No. 109—1 burner, height 14 in., shipping w't 18 lbs., each **BGJ** $4.50

No. 209—2 burners, height 14 in., shipping w't 25 lbs., each **CBJ** $5.30

No. 309—3 burners, height 14 in., shipping w't 31 lbs., each **EAJ** $8.50

Description—This stove is built with special care, material of selected cold rolled steel, beautifully japanned and decorated.

Large Massive Base—Adds to the appearance and strength, and prevents accumulation of dust under stove.

Burners and all Stand Pipes—Are of brass, insuring absolute fit, no leakage of gasoline.

Tank—Made of heavy steel, double seamed and soldered.

REVONOC GASOLINE STOVES.

Brass Burners.

No. 302—2 burners, height 14 in., shipping w't 31 lbs.★....each **DCJ** $7.80

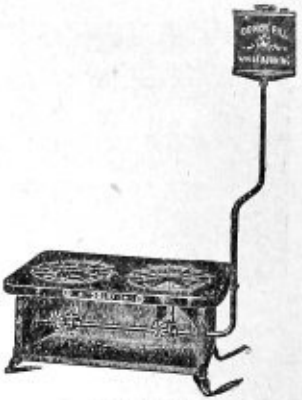
No. 303—3 burners, height 14 in., shipping w't 40 lbs.★..each **JEHJ** $10.50

No. 402—2 burners, height 24 in., shipping w't 38 lbs.★....each **ECJ** $9.60

No. 403—3 burners, height 24 in., shipping w't 47 lbs.★..each **JFFJ** $12.00

Description—Substantially made, in full cabinet style, baked with japan and handsomely decorated.

Single Generator Burner—Is so constructed that by generating gasoline at one burner, gas is formed and makes balance of burner self-generating. By means of the pilot-light all burners can be kept ready for immediate use. This is the most practical and convenient method and is becoming very popular.



Tank—Is of the lay down kind and cannot be filled until flames are extinguished. Safe and convenient.

Brass Burners.

No. 423—2 top burners, 1 step, height 24 and 16 in., shipping w't 60 lbs., each★ .....**JICJ** $17.00

Aside from having a step this stove is similar in detail and construction to those illustrated and described above.

SOLID GASOLINE STOVES.

Iron Burners.

No. 108—1 burner, height 8 in., shipping w't 16 lbs. .....each **BAE** $3.60

STOVE PIPE RADIATORS, DRUM OVENS AND FIRELESS COOKERS.

STOVE PIPE RADIATORS.

Nos.	246	286
Size over all, in.	10x24	14x28
Size of pipe collar, in.	6	6
Weight, lbs.	17	21
Each	$3.20	4.00
	AIJ	BDJ

These radiators are made of finest grade polished steel, and contain six large tubes, which run from bottom to top. These tubes cross each other in the center, giving the smoke and heat a spiral motion, causing it to come in direct contact with the full length of the tubes and outer surface of radiator.

These radiators take the place of a joint of pipe, and can be used at any convenient place, either above the stove or on the floor above.

ONE IN A CARTON.

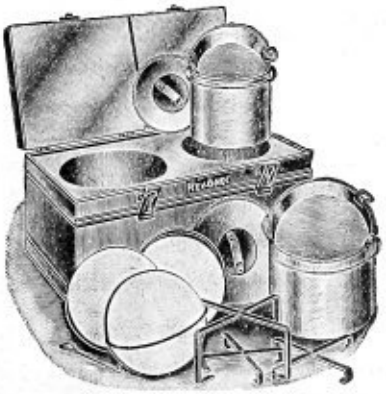
DRUM OVENS.

Cast Rollers, Frame and Door.

No. 18—18x14 in., 6 in. pipe, w't 35 lbs., each .....BBJ $3.70

Cast ends, into which steel body is carefully fitted, the bottom of oven being protected by cast plates.

DRUM OVENS.



All Steel.

No. 17—17x18½ in., 6 in. pipe, w't 12 lbs., each .....AEJ $2.50

Made of good sheet steel, double seamed joints perfectly tight.

ONE IN A CARTON.

REVONOC ALUMINUM FIRELESS COOKERS.

Boil, Bake and Roast. Beautifully Finished in Blue Enamel.

The REVONOC Fireless Cooker is all metal. All utensils and linings pure aluminum. Outside body is made of steel, making a framework that is strong and indestructible. All joints are double seamed, making the case watertight. Every cooker is packed with a selected grade of mineral wool, an excellent non-conductor. The mineral wool is packed under pressure and from twenty-five to thirty pounds of wool are used in each cooker.

All parts have absolutely smooth surfaces inside and out, so cooker is sanitary and easily cleaned.

The outside is finished with blue enamel, baked on. A regular bicycle finish. Trimmings are nickel plated, highly polished. Cooker is mounted on four ball bearing casters and can be easily and quickly moved around to any desired spot.

Vessels are made of pure aluminum. Best Virginia soapstone aluminum bound are used.

No. 80 REVONOC—Two compartment fireless cooker, 14 in. high, 14 in. wide and 27 in. long, equipped with one each aluminum vessel 8 qt. capacity, one 10 qt., one 3 qt., one 4 qt., three soapstones 8½ in. in diameter, two radiator racks for baking and roasting, one pie or cake rack, dimensions of crate 15x15x30 in., shipping w't 80 lbs. ....each ADDJ $24.00

ALCOHOL STOVES.

ALCOHOL STOVES.

No. 0—"Universal," diam. 6¼ in., height 5½ in., nickel plated brass frame, with detachable wind shield, capacity ½ pint, shipping w't per doz. 42 lbs., per doz-en **BHHJ** $48.00

These stoves burn a blue blow flame, resembling in appearance the flame of a plumber's fire pot and is in consequence intensely hot.

The corrugated tube contains the wick, absolutely protected. The outside is surrounded by the flame, turning the alcohol in the wick into gas, which is mixed with the air, causing perfect combustion, and making the blow flame. A big saving in alcohol, also absolutely smokeless and odorless.

We recommend denatured alcohol, as it cannot explode, and is also economical as well, and is far superior to kerosene and gasoline, at the same time odorless, clean and safe.

After turning down with the thumb screw the collar containing corrugated tube, take two or three strokes of the little pump and apply a lighted match to the alcohol which has been pumped into the disc at base of burner. This will generate gas in a few seconds. Regulate by turning thumb screw.

ONE-HALF DOZEN IN A WOOD BOX

ALCOHOL STOVES.

No. 1020—Mayflower, alcohol, brass, diam. 3 in., folding, w't per doz. 2 lbs. .....per dozen **AEJ** $2.50

This stove is brass and should not be confounded with the cheap lacquered tin imitations on the market.

GLOGAU'S ALCOHOL STOVES.

No. 75—Nickel plated brass body and bottom, nickel plated steel frame, w't per doz. 7 lbs., per dozen **JEAJ** $8.50

For travelers, sick room, camp, chafing dish; manufactures its own gas by first vaporizing the alcohol, produces more heat than any other style of alcohol stove, and consumes only one-eighth the usual amount of fuel; absolutely safe—explosions cannot occur; wick is invisible and never requires renewal. It is smokeless, odorless, and forms no soot; burns as steadily as a regular gas stove; can support a vessel weighing 100 lbs.; capacity of reservoir 7 oz., making it unnecessary to refill every time the stove is lighted; never out of order, easily operated. To obtain the best results, the best spirits procurable should be used.

GLOGAU'S ALCOHOL STOVES.

Showing handles open.

Showing handles closed against the boiler.

No. 175—Knock down style, the legs being removable as shown in cut, so as to pack inside of a tin boiler, w't complete with boiler 14 lbs. per doz., otherwise same as No. 75, per dozen .....**JHDJ** $14.00

GUARANTEED GAS STOVE, LAMP TUBING AND GAS HOSE COCKS.

RED C. I. GAS TUBING.

No. 40—⅜ in., red cloth insertion with black inner tube, w't per 100 ft. 16 lbs. .....per foot **J G** $0.11
Especially adapted for gas.

FIFTY FEET IN A BOX.

REX RUBBER TUBING.

Rex—Silkoline covered, ⅛ in. inside diameter, with 3-32 in. wall, put up in boxes of 150 ft. lengths, so dealer can cut any desired length, in continuous lengths....per foot **J F** $0.10

This is the only tubing that can be used for stoves, lamps or cigar lighters. It is of pure rubber center covered with a composition of glycerine gum, etc., to make it absolutely gas proof and then covered with silkoline, and is at all times durable, ornamental and flexible.

REX PATENT STOVE ENDS.

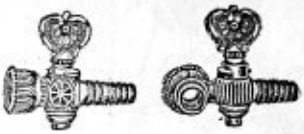
Rex—The best and only stove end that prevents the tube from kinking at the ends, or shutting off the gas in the most vital spot in the tube while in use .....per pair **J H** $0.11
Rex Ends for Lamps, per pair **J F** $0.10

FLEXIBLE STEEL TUBING FOR STOVES.

Steel Tubing—Indestructible, ⅛ in. diameter, gas tight and absolutely safe from crushing, leakage or breakage, furnished in 2 to 10 ft.—except 9 ft.—lengths .....per foot **J H** $0.13

This is the latest and best tubing for the purpose made and is fully guaranteed.

STOVE TUBING.



No. 39—2 dip, diameter about ½ in., furnished in 2, 3, 4, 5, 6, 7, 8, 9, 10 or 12 ft. lengths....per foot **J D** $0.07

This is a splendid guaranteed tubing ready for use. Is good for artificial as well as natural gas.

The interior is a galvanized iron wire coil, covered with cloth then dipped with heavy solution of composition, then again dipped in composition, and finally covered with a splendid quality of yarn, braided close.

GAS HOSE COCKS.

No. 1. No. 2.

No. 1—⅛ in., straight, cast brass, w't per doz. 3 lbs. ..per dozen **A H J** $3.00

No. 11—½ in., otherwise same as No. 1, per dozen .....**B A J** $3.50

No. 21—¾ in., otherwise same as No. 1, per dozen .....**C J J** $5.00

No. 2—¾ in., independent, cast brass, w't per doz. 4 lbs., per dozen .....**B D J** $4.00

No. 12—½ in., otherwise same as No. 2, per dozen .....**C J J** $5.00

The size given is the inside diameter of gas pipe for which these cocks are intended. The straight cock is for use where only a connection to the stove is desired. The independent cock permits the use of a gas lighting fixture to the same pipe. Ordinary gas hose will fasten securely.

STOVE TUBING.

No. 38—Diameter ⅜ in., galvanized wire center, with cotton cover, and a fine gelatine composition, covered with beautiful designs in yarn, furnished in any length from 2 to 12 ft., —except 9 and 11 feet, per foot .....**J C** $0.05½

This is a splendid single dip stove tubing—fully guaranteed for one year.

GAS HOT PLATES.

FOR ARTIFICIAL GAS.

Description—Utility hot plates have a plain wide top, with no carving. They are further strengthened by having a cast center bar between each grate. This connection makes the strongest hot plate possible. The grates are cast separately and bolted into the top so that they are not continually falling off when being handled, thus preventing loss and inconvenience from breakage.

Burners are one-pieced star burners, with adjustable mixers. One giant burner with each hot plate. Heavy barrel stop cocks provided. Supply pipe polished and nickel plated.

Black, With Star Drilled Burners.

No. 220—2 burners, size 13x23 in., w't 22 lbs. .....each **BDJ** $4.00

ONE IN A CRATE.

Description—Elevated Hot Plate, frames are 28 in. high, made of heavy angle irons, reinforced with eight cross braces of ⅛x⅞ in. iron. The legs are furnished at the bottom with a cast foot. The legs and braces are finely japanned.

Shelf—Galvanized iron, is strong and neat. The shelf extends underneath all the burners so as to catch anything dropping from above.

In many sections insurance underwriters object to low hot plates on account of the possibility of fire. As a laundry stove these plates have no equal.

JUNIOR GAS HOT PLATES.

No. J00—Made of good material, nickel dipped, presenting always a clean and attractive appearance, one cast burner, diameter of rest 5½ in., approximate w't 1½ lbs., each **AB** $0.20

Very useful in nursery, dressing room, sick room, in fact indispensable in any home. Gives a good heat and always operates satisfactorily.

Our reputation founded on over half a century's business stands back of the GVB brand.

OIL HEATING STOVES.

Blue Steel Drums, Full Nickel Trimmed.

No. 37A REVONOC—Height (floor to top of bail) 31 in., diam. of drum 8 in., main top, hinge ring, base and legs full nickeled, takes No. 3 Rochester lamp wick, capacity of fount 4 qts., w't each 19 lbs. .....each **CHE** $6.40

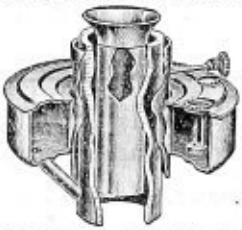
No. 37AB REVONOC—Full brass fount, otherwise same as No. 37A REVONOC, each . .....**DCJ** $7.20

No. 37B REVONOC—Japanned trimmed, height (floor to top of bail) 31 in., diam. of drum 8 in., takes No. 3 Rochester lamp wick, capacity of fount 4 qts., w't each 18 lbs., each . .....**CBE** $5.40

Safety Fount and Burner.

No. 1J—8 in. circular wick, height (bail down) 27 in., diam. of drum 7 in., capacity of fount 2 qts., w't each 17 lbs. .....each **CCE** $5.60

No. 2J—10 in. circular wick, height (bail down) 28 in., diam of drum 8 in., capacity of fount 3 qts., w't each 20 lbs. .....each **DEJ** $7.50



Blue Enameled Drum, Full Nickel Trimmed.

No. 61 REVONOC—Height (floor to top of bail) 30 in., diam. of drum 8 in., main top, hinge ring, base legs full nickeled, takes No. 3 Rochester lamp wick, capacity of fount 4 qts., w't each 21 lbs. .....each **DFJ** $7.70

No. 62 REVONOC—Full brass fount, otherwise same as No. 61 REVONOC, each . .....**EBJ** $8.70

DETAIL OF ALUMINO BURNER AND FOUNT.

A—Flame spreader. B and C—Air space outside and inside of wick-cool. D—Wick, circulation of air on both sides, cannot become hot. E—Outside casing of burner. F—Air space between fount and outer casing. H—Feed pipe conducting oil from fount to burner.

Description—The material is the finest quality cold rolled polished steel plate, and sheet brass.

Safety in Operation—The wick does not turn down directly into the fount (like all others), but is retained in a separate receptacle, supplied with just enough oil through small tube in bottom, making explosions impossible.

Smokeless—See simple attachment at end of wick raiser. All burners are tested and smokeless device set at right height before leaving factory.

Re-wicking—Loosen the knob at end of wick raiser, turn wick up as far as it will go, pull out wick tube, take off old wick, slip on new one and replace in burner. Clean and convenient.

Indicator—Cork float, simplest.

Finish—Highly nickeled to a mirror finish. **Top**—Removable.

No. 24—Blue polished steel body, fount of heavy steel, covered with composition to prevent rust, fitted with patented anti-smoke device, oil indicator, takes No. 3 Rochester wick, japanned top, center and bottom rings, steel legs, drum artistically decorated and fitted with mica window enclosed in an aluminum frame and name plate, height with bail 28 in., capacity of fount 3 qts., w't each 12 lbs., each . .....**BFE** $4.40

Safety Founts and Burners.

No. 3J—15 in., circular wick, height (bail down) 33 in., diam. of drum 10 in., capacity of fount 5 qts., w't each 30 lbs. .....each **JFIJ** $11.50

GAS HEATING STOVES, GAS HEATERS AND GAS JET HEATING DISCS.

REVONOC GAS HEATING STOVES FOR ARTIFICIAL GAS.

Best Polished Steel Body, German Lava Tips, Full Nickel Trim, Copper Reflector with Wire Guard, Burners With or Without Flue Connection.

	Height	Width	Depth	Weight		Each
No. 192	20½ in.	12 in.	9½ in.	10 lbs.	**CJE**	$5.10
No. 193	22½ in.	14 in.	11 in.	13 lbs.	**CHE**	$6.40
No. 194	23½ in.	16 in.	11 in.	14 lbs.	**DBE**	7.10
No. 195	26½ in.	20 in.	11 in.	17 lbs.	**DFJ**	7.80

The REVONOC Gas Heater is furnished with special burner construction which is mechanically perfect, and the only one of its kind on the market. All the holes for the lava tips are in a depression so that an even bearing is given the tips.

The valve is so fitted that it is possible to make a connection from any angle of the room.

The body is reinforced at the top and bottom and the back and sides are of one piece steel, making the heater very rigid. The steel used is non-corrosive material on which the action of gas has little effect.

The REVONOC has been approved by the United Gas Imp. Co. of Philadelphia, which is the best evidence of its high quality and adds to its salability.

Can be furnished from factory for burning natural gas at same prices.

No odor, no soot, German lava tips, considered the best for a heater of this kind.

ONE IN A FIBRE CARTON.

GAS JET HEATING DISCS.

No. K44—Blued steel disc, diam. 7 in., burner and pipe of spun brass, will fit any standard gas jet, shipping w't per doz. 10 lbs.....per dozen **CJJ** $4.50

Burns a solid blue flame and will not accumulate dirt or dust. Top is flat with a flange around edge, so it will hold a pan. The hole in side of disc will hold a curling iron.

ONE IN A CARTON.

BLUE FLAME GAS HEATERS.

No. 200—Blued steel with cast aluminumized top and base, can be attached to any gas jet having pressure, with ordinary gas hose, practically indestructible, w't 12 lbs., each .....**CCJ** $3.50

This remarkable heater is positively odorless. Can be used as long as desired without the slightest odor. It consumes about 12 cubic feet of gas per hour at a cost of one cent an hour. It gives three times the heat of any other gas heater at one-third the expense. Food can be cooked on top of heater without interfering with its heating capacity. Always burns with a blue flame which gives the most heat without smoke or odor.

ONE IN A FIBRE CARTON.

KOST GAS HEATERS.

No. 3.

No. 3—Jet heaters, nickel plated, single top, diam. 10 in., each .....**ABJ** $2.00

Nos. 1 and 2.

No. 1—Floor, full nickel plated, except drums, single top, diam. 10 in. .....each **BJJ** $3.34

No. 2—Floor, full nickel plated, except drums, double top, diam. 11 in. .....each **BDJ** $4.00

These heaters are used all over the country, wherever there is gas. Will burn natural or artificial gas, no dirt, smoke nor odor. Recommended by the medical profession and used in hospitals, sanitariums, churches, schools, halls, stores and offices as well as in thousands of private homes. Will fit any gas jet.

ONE IN A CARTON.

ADJUSTABLE STOVE REPAIRS AND CISTERN COVERS.

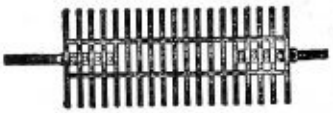
DIAMOND FIRE BACKS.

No. 6—Adjustable from 4½x15 in. to 7x20 in., w't per doz. 110 lbs., per dozen .....**JGHJ** $13.00

These backs are so constructed that no bolts are used and the dovetail is above the fire where it never becomes hot and will not warp. The flange that fits along oven plate is on a straight line and makes an air-tight joint. This prevents the ashes from accumulating between the oven plate and back wall, a feature no other extension back possesses.



CRESCENT FIRE BACKS.

For Wood or Coal Cook Stoves.

No. 9—6x20 in., w't per doz. 96 lbs., per dozen .....**JFIJ** $11.50
No. 10—7x20 in., w't per doz. 126 lbs., per dozen .....**JIJJ** $15.00
These backs can be fitted to most any stove, by breaking off the edges, reducing in length 2 inches on each end and in width 1½ inch on the bottom.

BOTTOM GRATES.

Wichita Bolted Shank, Adjustable.
No. 2—6x14 in., reduces to 4x9 in., w't per doz. 66 lbs., per doz. **DHJ** $8.00
No. 3—6½x16 in., reduces to 4x9 in., w't per doz. 78 lbs., per doz. **DHJ** $9.30
This bottom grate is an excellent substitute for the original bottom grate.

BASKET GRATES.

HIRD'S, Used to Burn Coal in a Wood Stove.

No. 8—Full size 7½x18 in., reduces to 6x15 in., w't per doz. 144 lbs., per dozen .....**AJCE** $17.25
No. 78—Right and left ends for above, w't per pair 5 lbs., extra per set .....**CF** $0.60
Always state if end linings are wanted as we do not send end linings unless so ordered. This grate can be used successfully to burn coal in a wood cook stove.

★*FOR FACTORY SHIPMENT ONLY.*

DIAMOND COOK STOVE DAMPERS.

No. 173—Adjustable blade, 9x3⅝ in., reduces to 5½x2 in., w't per doz. 22 lbs. .....per dozen **BGJ** $4.50
This damper will fit all stoves having a turnover damper, It can be put in without taking stove apart and by any one easily. The handle can be put in from either end, thus adapting it to any damper that may turn forward or backward. Damper can be set at any point on handle. One damper fits all lengths and sizes.
ONE DOZEN IN A BOX. WE DO NOT BREAK BOXES.

SECTIONAL STOVE COVERS.

No. 8—W't per doz. 42 lbs., per dozen .....**DHJ** $8.00
No. 9—W't per doz. 56 lbs., per dozen .....**EDJ** 9.00
The packages in which these stove covers are put up while having only one size of cover, contain six different styles, varying as to thickness, etc., enabling dealer to fit any stove on the market. We cannot select covers to fit any particular stove. We do not break these packages. Packed in wooden boxes.
ONE-HALF DOZEN IN A PACKAGE.

REDUCING RINGS.

No. 935—Reduces 9 in. hole to 8 in., w't per doz. 15 lbs. per dozen .....**AEJ** $2.50

TANK HEATERS AND DEFLECTORS.

No. 100.

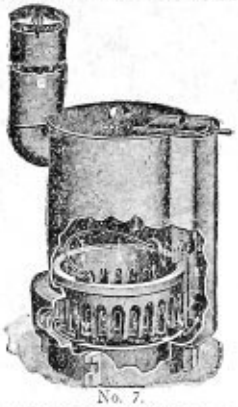
No. 100—Double seamed galvanized body, height 26 in., diameter 16 in., cast top, removable grate, complete with spark arrester, side rods and forks, w't 55 lbs.....each **BHJ** $4.70

No. 200—Diameter 19 in., height 26 in., w't 70 lbs., otherwise same as No. 100, each .....**DDJ** $7.30

No. 10.

No. 10—Double seamed galvanized sheet steel body, height 26 in., diameter 16 in., cast top with lift-off cover, basket grate which can be lifted out, complete with side rods, spark arrester and poker, w't 55 lbs., each .....**CDJ** $5.70

No. 20—Diameter 19 in., height 26 in., w't 65 lbs., otherwise same as No. 10, each .....**EAE** $8.60



No. 4.

No. 4—Cast iron body, cast in one piece, height 26 in., diameter 14 in., cast top with lift-off cover, basket grate which can be lifted out, complete with side rods, spark arrester and poker, without deflector, w't 105 lbs., each .....**ECJ** $8.80

No. 5—Diameter 18 in., height 26 in., w't 130 lbs., otherwise same as No. 4, each .....**JGEJ** $12.50

DEFLECTORS.

For No. 4 Tank Heater, each JGJ $1.20
For No. 5 Tank Heater, each JIJ 1.50

No. 7.

No. 7—Iron King, diameter 14 in., height 26 in., cast iron top, w't 140 lbs. .....each **JGHJ** $13.00

No. 8—Iron King, with weight casting which anchors the heater in the bottom of a galvanized or wood tank without the use of stay rods, otherwise similar to No. 7, w't 180 lbs., each .....**JIJJ** $15.00

The Iron King is the latest and best cast heater made. The body is in one piece, the draft chamber being separated from fire pot by a steel partition. The draft opens at the lower end into the drum-shaped portion of the body casting surrounding the basket grate, assuring an abundance of draft at all times. This heater has a cast-iron ash pan and a grate shaker.

★*FOR FACTORY SHIPMENT ONLY.*

No. 300—Hot Stuff, cast iron, no seams to leak, smoke pipe galvanized iron with hood and damper, height 24 in., diameter 12 in., w't each 120 lbs., each★ .....**DAJ** $6.80

The whole top lifts off and the smoke pipe is on inside of flange so that creosote from ashes and smoke is carried back into the heater instead of running down into the water, which might poison the stock. The cold air draft chamber can be entirely closed by turning lid, making a perfect draft regulation. The ashes can be removed without disturbing the fire or removing the heater from the tank.

This heater is guaranteed not to crack and not to float.

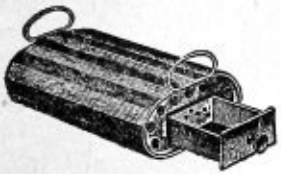
F. O. B. Northern, Ind.

No. 310—Cast iron, guaranteed not to crack or rust out, no seams to leak, entire top lifts off giving a 13 in. opening through which to feed fuel, height 24 in., diameter 14 in., w't each 175 lbs.★ .....each **JFJJ** $10.00

The cold air draught pipe is outside the heater and cannot become heated, insuring perfect combustion.

Smoke pipe is made of galvanized iron fitted with hood and damper. Weight of heater keeps it at bottom of tank without fastening it down.

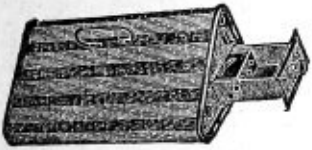
This heater will keep 100 barrels of water from freezing with temperature of 10 degrees below zero.



Condensation is kept up by a secret process whenever there is fire in this heater.

This moisture evaporates through smoke pipe and kills live sparks so that danger of fire is reduced to a minimum. This heater will last a lifetime.

★*F. O. B. Northern Ind.*



CLARK CARRIAGE HEATERS.

CARRIAGE AND AUTOMOBILE HEATERS.

No. 5B—Carriage, length 12 in., covered with fine Brussels carpet, w't 4 lbs. each ..... **ADJ** $2.30

This heater is light and handy, yet very sightly. Heats very quickly, though with a mild and comfortable temperature. Used extensively by mail carriers and milkmen.

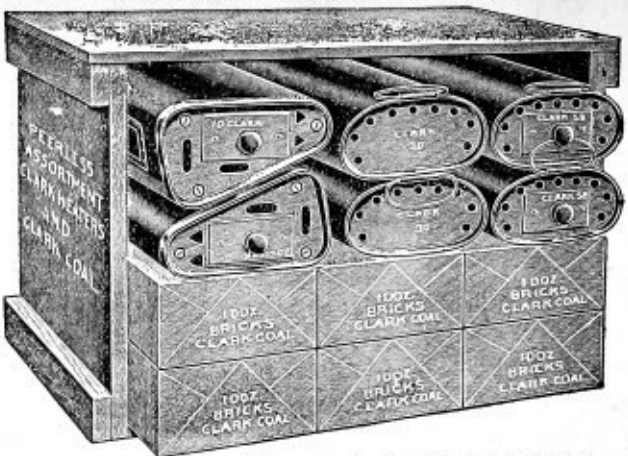
No. 12T—Carriage, length 14 in., covered with best grade green carpet, asbestos lined throughout, patent adjustable ventilators, w't 7 lbs....each **ADE** $2.40

No. 9A—Automobile, length 20 in., covered with best grade green carpet, asbestos lined throughout, patent adjustable ventilators, w't 10 lbs each..... **BAJ** 3.50

These heaters are popular sellers wherever shown, and are strong and durable. They have cast ends with steel rods extending all the way through, making them practically indestructible.

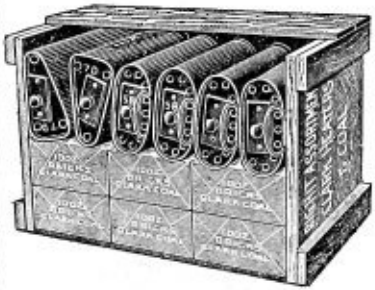
HALF DOZEN IN A CASE.

No. 3D—Carriage, length 14 in., covered with Brussels carpet, with braid binding, fine asbestos lining, w't 7 lbs., each..... **AHJ** $3.00



Our No. 3D is one of the most popular sellers, being very strong and durable. Ends are triple strength white metal, easily cleaned by brushing.

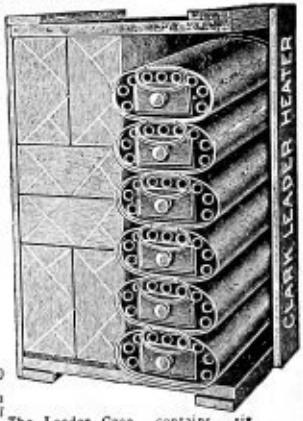
No. 7D—Carriage, length 14 in., covered with superior Brussels carpet, w't 9 lbs., each..... **BAJ** $3.50



A well known and popular style, having flat, slanting tops, and both sides and end ventilators with which it can be made to throw out as much or as little heat as may be desired. It has cold drawn steel ends, heavily nickel plated.

CARRIAGE HEATER ASSORTMENTS.

Peerless, contains two No. 5B, oval heaters; two No. 3, oval heaters; two No. 7D, triangular heaters, and six dozen bricks Clark's Coal..... per case **ADDJ** $24.00



This assortment is the result of several years' experience with heater assortments and we believe it represents—more than any other—the ideal assortment for the average dealer.

Big Hit, contains two leader heaters, two No. 5B and two No. 7D heaters, and six dozen bricks Clark's coal..... per case **ABDJ** $20.70

These assortments provide an ideal way of getting in a stock of carriage heaters and coal, as they are all well packed and boxed, preventing damages in shipping.

ONE ASSORTMENT IN A CASE.

The Leader Case, contains six leader heaters, and six dozen ABC coal..... per case **JHAJ** $13.50

CARRIAGE HEATER COAL.

No. 67—Coal bricks, 7½×2½×1¼ in., w't per doz. bricks 9 lbs., per dozen bricks..... **JFJ** $1.12

No. 67S—Coal, 100 bricks in case, for livery and garage purposes, w't per case 100 lbs.★..... per case **EDJ** 9.00

No. 69—Coal bricks 7½×2½×1¼ in., w't per doz. bricks 9 lbs., per dozen bricks..... **EJ** .90

No. 69S—Coal, 100 bricks in case, for delivery and garage purposes, w't per case 100 lbs.★..... per case **DCJ** 7.20

The No. 69 Coal is a high grade coal at a very low price. This coal is guaranteed to be the equal of any coal made. It is packed one dozen bricks in a carton.

HIBBARD, SPENCER, BARTLETT & CO.
STATE STREET BRIDGE
CHICAGO.

OVD BARTLETT ROTARY SEWING MACHINES.

The **OVD** "Bartlett" Rotary Sewing Machine is an innovation in the sewing machine world, as it is the only machine of the rotary type that is so simply constructed, so easily understood and operated and so self-guarded against troubles attending other machines of like type, that it may be safely marketed by dealers who have no intimate knowledge of sewing machines, and who heretofore have been unable to successfully sell a Rotary machine because of their trouble-making proclivities. It is universally acknowledged that the rotary type of machine is superior to all others in easy-running qualities and in speed. This is due to the fact that the under stitch forming mechanism rotates continuously, and has no lost motion on which account the rotary machines are geared higher than vibrating machines, consequently more work can be done with them in the same amount of time.

The **OVD** Bartlett Rotary is an ideal family sewing machine. Its price is moderate, and because of its very many good points we are confident it will soon be a leader in sales and popularity of the entire Bartlett-line.

SPECIFICATIONS.

Stitch—Is known as double lock stitch and is formed by two threads being drawn together and locked in the center of the goods and presents a finished and smooth appearance on both sides, in fact it is hard to distinguish the under side (which is commonly known as the wrong side) from the upper.

Sewing Head—Is most attractive in appearance and substantial in construction as is shown by the accompanying illustration. It is well finished in highest quality black enamel, and decorated with an imported decalcomania of Egyptian design, covered by a glass hard, smooth transparent varnish of very best quality.

The Arm—Is of generous size, the clear space underneath for sewing being 5¼×8 inches. This space allows ample room for the handling of the heaviest and bulkiest materials that may be used in all around family sewing machines.

There are two spool pins on the arm so that the operator can wind bobbin without disturbing material being sewed, or removing spool of thread used in connection with it.

The Needle Bar—Is round, accurately finished and thoroughly hardened. It is equally rigid in every direction, has no lost motion and consequently operates freely, easily and without noise. The upper end of the needle bar is covered and protected by a handsome nickel-plated steel cap which insures absolute cleanliness in the bearings, thereby preventing the accumulation of dust and grit and the ensuing hard and noisy running which is common to other machines less fortunately equipped. The needle is short, strong and self-setting. It is so made that it is impossible for one to place it in the needle bar incorrectly, thereby causing trouble.

The Under Stitch Forming-Mechanism—Consists of a hook which rotates around bobbin case the latter answering the same purpose as a shuttle. This rotating movement is responsible for the easy running qualities of the **OVD** Bartlett Rotary, in which respect, as in others, it is superior to vibrating machines. A splendid feature of this is that under no conditions can it clog or choke up—in this respect it is an innovation, as all other rotary machines are handicapped by the clogging complaint.

The Bobbin Case—May be removed handily from above by opening the hinged plate shown in illustration, which is provided for that purpose. The tension is in the bobbin case—accompanying bobbin holds 500 yards of ordinary sized thread, so the user is not annoyed by the necessity of changing or refilling the bobbins at frequent intervals.

The attachments furnished free of charge with each machine, are made of good quality spring steel, and are packed in a neat and substantial black enameled velvet lined metal box, having metal racks for holding each individual attachment. The full set consists of the following pieces: Ruffler, tucker, binder, braider-foot, under braider plate, shirring plate, feller, four hemmers of different widths, quilter, cloth guide, thread cutter, two screw drivers, twelve assorted needles, six bobbins, filled oil can, and well illustrated books of instruction.

BARTLETT ROTARY SEWING MACHINES.

SPECIFICATIONS—Continued.

The Stitch Regulator—Is located in a convenient position on the front part of the bed plate directly in front of the base of the arm. It is automatic—that is, by placing the indicator at certain points on the index, one can easily obtain the desired length of stitch, ranging from six to thirty-two stitches to the inch.

The Automatic Tension—Is an important feature exclusive to the Bartlett Rotary Machine. It is positively automatic in its action and adjusts itself without any assistance from the operator, to any class of work from the flimsiest laces down to the heaviest and coarsest woolens. This feature eliminates all of the trouble caused by constantly changing the tensions on the ordinary type of machine.

The Take-Up—Is positive and automatic in its action. It is operated directly by a cam on the main shaft and will control any size or kind of thread in a perfect manner in any class of sewing, thus producing an absolutely correct and perfect stitch.

The face plate—Is made of steel, beautifully nickel plated, and can be detached instantaneously by means of a thumb screw that holds it in position.

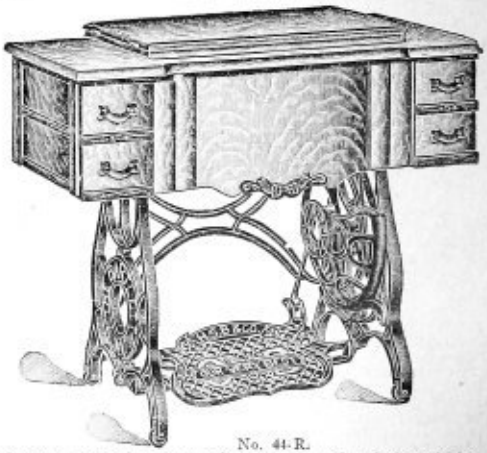
The Feed Point—Is double, extends both sides of the needle and has four distinct motions, thereby guaranteeing an even movement of the goods being used at all times and under all conditions. This feed is absolutely positive, being free from springs and other uncertain devices which invariably wear and weaken after a machine has been in use for some time and cause serious trouble. It is one of the strongest features of this machine.

The Hand Wheel—Is nickel plated over copper and in connection has a thumb nut by means of which the user of the machine can instantaneously throw it out of gear when it is desired to wind the bobbin. This hand wheel is so balanced that it does not stick or drag at a certain point in its revolutions, as is the case with others.

The Bobbin Winder—Is simple and at the same time a most ingenious contrivance. In connection there is a device which automatically drops the winder when the bobbin is full. This prevents over-winding and its ensuing trouble.

The Working Parts—Throughout are built of best quality steel, all those subject to constant wear being thoroughly hardened in oil and will last for a lifetime. The exposed parts are beautifully and permanently nickel plated over copper and then finely polished.

This is the same case as we use on No. 100 Bartlett Vibrating Machine, and is entirely different from anything ever shown in sewing machine woodwork exclusively our own pattern. Square and massive, with veneered roll edge. Paneled drawer cases completely enclosing long roomy drawers, brass drawer pulls, key hole escutcheon and hinges.

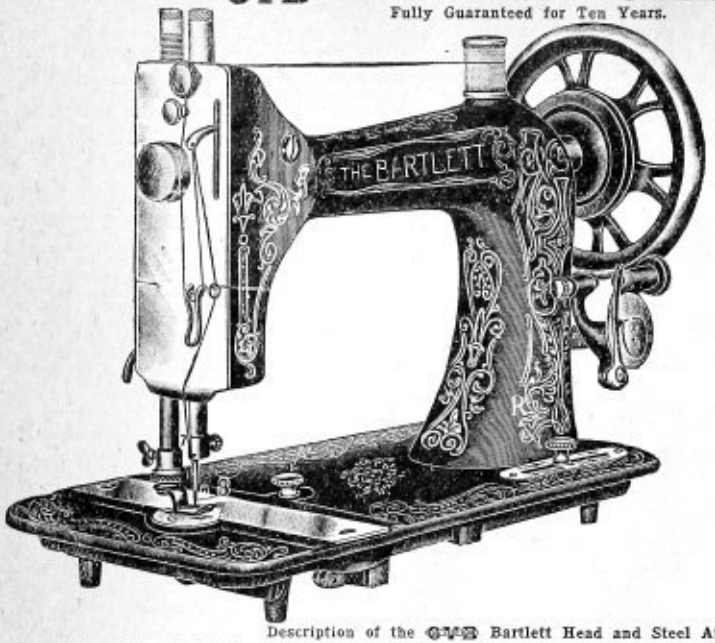


No. 101-R.

Art Nouveau Finish, revealing every detail of the quarter-sawed oak, carefully selected, showing the The finish consists of seven diso much admired and sought after. fine texture and large golden flakes tinct operations, and it requires four weeks of expert attention to finish.

No. 91-R.

This is exclusively our own pattern and is a most pleasing and practical design. Of quarter-sawed oak, polished to mirror-like finish. Has six full length drawers with embossed wood handles, all encased in solid dust-proof panels. For further description, see No. 90 Bartlett.



No. 44-R.

A very attractive case, of quarter-sawed oak in mission design, drawers with metal handles. The elegance and richness of this case are in keeping with the high quality of the Hibbard Rotary Head. For further description see No. 44 Bartlett.

BARTLETT SEWING MACHINES.

Fully Guaranteed for Ten Years.

Description of the Bartlett Head and Steel Attachments.

Description—The Bartlett is a family sewing machine of the very highest grade embracing the most complete combination of modern time and labor-saving improvements ever combined in one machine, and is presented to the trade and public as an ideal embodiment of the very best in modern sewing machine manufacture.

The basic construction is on the gear principle. These gears are so accurately fitted and adjusted that they operate most quietly and easily. They are riveted to the shafts by steel pins and cannot become loose. In this particular alone, the Bartlett, has a great advantage over other sewing machines which make use of eccentric shafts with many screws and parts, any one of which, if loosened, will destroy the perfect action and cause a poor stitch to be made. In a large measure, the gears are responsible for the wonderfully easy running qualities and the almost entire absence of the objectionable noise—accompanying other machines—. The clever adoption of the gear principle gives the Bartlett a simplicity of construction which makes it ideal for family use. Not only is the user assured that the Bartlett will always operate correctly, but the necessity of constant payment of money to sewing machine repair men is done away with. It is interesting to know that no other high grade up-to-date family sewing machine has this form of construction.

The Bartlett head has 15 per cent less parts than any other sewing machine on the market. The result is obvious, less wear, less friction and less power required to operate.

SPECIFICATIONS.

The Stitch—Formed, is what is known as the double lock stitch, made by two threads which are firmly locked in the center of the goods, presenting a smooth and finished appearance on either side. It is recognized to be the best all around, serviceable stitching for family sewing.

The Sewing Head—Is unusually handsome and well proportioned—it is elaborately finished in three durable coats of hand rubbed and polished baking black japan, with handsome imported decalcomania decorations in gold and bright colors, covered with an imported English varnish, hard baked.

The Arm—Is of the largest size furnished with an family sewing machine and is very strong and perfectly proportioned. The clear space underneath is 5½x8 inches, thus permitting the easy and convenient handling of the bulkiest material.

Automatic Self-Regulating Tension—Is absolutely automatic in its action, and is a special exclusive feature of the Bartlett machine.

Unlike the common form , it is ot necessary to adjust the Bartlett tension to the different classes of goods which are being used from time to time. This tension makes a perfect and even stitch on the lightest chiffons without puckering, and at the same time will produce equally good results on the heaviest woolens without and changing of the adjustment whatever. The convenience and importance of this great feature will be best appreciated by actual test by those who have had their troubles with the ordinary form of tension.

The release of the Bartlett tension is entirely automatic, and is put into operation when the pressure foot is raised to permit removal of work. When this is done, there is absolutely no tension on the upper thread and the goods may be removed without bending or breaking the needle.

The Stitch Regulator—Controlling the length of the stitch is operated by a thumb screw sliding in the slot on the bed plate in a convenient position for the operator. Attached to the thumb screw is a pointer so that one may instantly set the machine by moving the screw and pointer to the proper place on the scale or index, thus making any size stitch, from six to thirty-two to the inch.

The Take-Up—Is positive and automatic in its action. It is operated directly by a cam on the main shaft and will control any size or kind of thread in a perfect manner any class of sewing, thus producing an absolutely correct and perfect stitch.

The Working Parts—Throughout are built of best quality steel, all bearing surfaces being thoroughly hardened in oil and will last a lifetime. The exposed parts are beautifully and permanently nickel plated over copper and then finely polished.

The Attachments—Which are furnished free of charge, are made of nickel plated spring steel, and are packed in a durable and attractive black enameled velvet lined metal box. The complete set is as follows. Ruffler, tucker, binder, braider-foot, under braider slide, shirring slide, feller, four hemmers of different widths, quilter, cloth guide, thread cutter, two screw drivers, twelve assorted needles, six bobbins, filled oil can, and well illustrated book of instructions.

BARTLETT SEWING MACHINES.

Fully Guaranteed for Ten Years.

No. 44 —Bartlett, crated w't 120 lbs., each **BAFJ** $36.00

DESCRIPTION—Mission design, hand polished quarter-sawed oak case, with full drop front, tape measure on table, four roomy side drawers and tested steel cable automatic lifting device. FREIGHT CHARGES BOTH WAYS, ON MACHINES RETURNED FOR ADJUSTMENT, MUST BE PAID BY CUSTOMERS.

REVONOC SEWING MACHINES.

Fully Guaranteed for Ten Years.

Description—In the REVONOC we have a splendidly equipped, strictly modern, high class sewing machine which we furnish in several attractive models at prices that are lower than you would naturally expect to pay for a high class article, embodying the well known REVONOC quality. We predict for this machine the hearty welcome and the popularity to which its excellent qualities, combined with the very low prices entitle it.

SPECIFICATIONS.

Stitch—Is known as double-lock stitch and is formed by two threads being drawn together and locked in center of goods, and finishes alike on both sides.

Sewing Head—Is full sized, high arm, well finished in three coats of hand applied and hand rubbed best black baking enamel, relieved with attractively designed, imported decalcomania decorations, covered with an imported English varnish, hard baked. It runs easily and quietly and is so simple and solidly constructed that it will last a lifetime.

The Arm—Is full size, 5½x8 inches, allowing ample space to handle bulky articles.

Needle Bar—Is round, fits perfectly, no lost motion, covered with a cap to prevent dust entering into bearings. Needle is held in place by a patented needle clamp so arranged that it is not possible to put needle into machine wrong.

Automatic Tension—Is of the improved disc pattern, and automatically releases all pressure on the upper thread, when presser bar lifter is raised to allow easy removal of work without bending or breaking needle.

The Shuttle—Is large, of cylinder type, made of fine tool steel, and is self-threading.

The Feed Point—Is steel forged, double width and has positive four-motion movement. Springs are not used as they weaken and are liable to do imperfect work.

Stitch Regulator—Controlling length of stitch is done by means of thumb bolt on side of arm, permitting a change from 7 to 20 stitches to the inch. Can be quickly set to the desired stitch shown on nickel plated indicator.

The Automatic Bobbin Winder—Winds accurately and quickly without any attention on part of operator. This is an ingenious device and operates entirely without springs.

The Hand Wheel—Is equipped with a releasing device so that bobbin can be wound without operating machine.

The Working Parts—Are made of best quality steel, hardened in oil, are carefully adjusted and with proper care and use, will easily last a life time.

The Attachments—Which are furnished free of charge, are made of heavily nickel plated spring steel, and are packed in a durable and attractive black enameled velvet lined metal box. The complete set is as follows—Ruffler, tucker, binder, braider-foot, under braider slide, shirring slide, feller, four hemmers of different widths, quilter, cloth guide, thread cutter, two screw drivers, twelve assorted needles, six bobbins, filled oil can, and well illustrated books of instruction.

TEST.

All our high grade machines are doubly tested. First, when machine goes into testing room, ready for wood work, again when it has been mounted and is ready to crate, a sample of the sewing being left under the presser foot. This double test guarantees that machines are in perfect sewing condition and ready for immediate use when uncrated.

SEWING MACHINES.

Fully Guaranteed for Ten Years.

No. 320—Lake Shore Sewing Machines, crated, w't 120 lbs., each .....**AHJJ** $30.00

DESCRIPTION—The woodwork is of the popular drop front pattern, attractively finished, with the top and fronts of the four side drawers made of quarter-sawed oak. Equipped with steel cable automatic lifting device and 18 in. tape measure on table.

THE SEWING HEAD—Is high arm, space underneath measures 8¼x5½ inches. It makes the double lock stitch, and all working parts are made of oil hardened steel, and will last a life time. It has many improvements usually found only on high priced machines, including the following: Four motion positive feed, improved spring tension, automatic stitch regulator, automatic bobbin winder, gear releasing device, self-threading shuttle and self-setting needles. (See illustration, page 1105.)

THE BALL BEARING STAND—Is well finished in black enamel, has easy running ball bearings in the wheel, non-binding steel pitman and belt retaining guard.

THE ATTACHMENTS—Are made of good quality spring steel, and are packed in a substantial velvet lined metal box. The full set consists of the following: Ruffler, tucker, binder, braider-foot, under braider slide, shirring slide, feller, four hemmers of different widths, quilter cloth guide, thread cutter, two screw drivers, twelve assorted needles, six bobbins, filled oil can, and well illustrated books of instruction.

HIBBARD, SPENCER, BARTLETT & CO.

FREIGHT CHARGES, BOTH WAYS, ON MACHINES RETURNED FOR ADJUSTMENT MUST BE PAID BY CUSTOMERS.

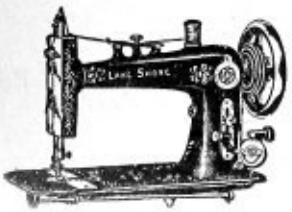
SEWING MACHINES.

Fully Guaranteed for Ten Years.

"LAKE SHORE."

No. 325.

No. 325—Lake Shore, crated, w't 120 lbs.....each **AFEJ** $27.50
No. 327—Lake Shore, with seven drawers, otherwise same as No. 325, crated, w't 125 lbs. .....each **AGGJ** $29.50



This machine is a radical and sharp departure from the usual medium priced sewing machine and is winning the approbation of every dealer who sees it. Medium priced machine have usually been mounted on rather cheap appearing wood work, not much different from that of the lowest priced machines. The Lake Shore was made up especially for us, and combines a good, serviceable sewing machine with wood work equal in appearance to that which some manufacturers use for their best machines.

THE SEWING HEAD—Is high arm, space underneath measures 8¼x5½ inches. It makes the double lock stitch, and all working parts are made of oil hardened steel, and will last a life time. It has many improvements usually found only on high priced machines, including the following: four-motive positive feed, improved spring tension, automatic stitch regulator, automatic bobbin winder, gear releasing device, self-threading shuttle and self-setting needles. (See illustration below.)

THE CASE—Is attractively designed, of well finished golden oak, the top and fronts of the four side drawers and center drawer being quarter-sawed. Equipped with steel cable automatic lifting device and 18 in. tape measure on table.

THE BALL BEARING STAND—Is well finished in black enamel, has easy running ball bearings in the wheel, non-binding steel pitman and belt-retaining guard.

THE ATTACHMENTS—Are made of good quality spring steel, and are packed in a substantial velvet lined metal box. The full set consists of the following: Ruffler, tucker, binder, braider-foot, under braider slide, shirring slide, feller, four hemmers of different widths, quilter cloth guide, thread cutter, two screw drivers, twelve assorted needles, six bobbins, filled oil can, and well illustrated books of instruction.

Showing Lake Shore Head.

"METEOR."

No. 300—Meteor, crated, w't 120 lbs.....each **AECJ** $25.50

We know of sewing machine manufacturers who, because of the fact that their product has been on the market many years, and is favorably known, sell, as "high grade" sewing machines which are neither as well constructed nor as well fitted with modern improvements as is the Meteor. Being free from the expensive agency forces maintained by sewing machine factories, we can sell better machines at as low or lower prices than they ask for their less desirable styles.

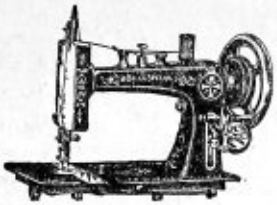
THE SEWING HEAD—Makes the double lock stitch, has full size arm, with clear space underneath of 8¼x5½ inches, and is equipped with the following improvements: Automatic bobbin winder, double width positive feed, self-threading shuttles, self-setting needle, automatic stitch regulator, gear releasing device, improved spring tension and hardened steel working parts.

THE CASE—Is an attractively designed drop cabinet, built throughout of good quality oak. It is equipped with four side drawers, with turned wood, brass faced handles, handy center drawer, 18 in. tape measure on table, and tested steel automatic lifting device.

THE STAND—Has easy running ball bearings in the wheel, is equipped with large treadle, wooden Pitman and belt retaining guard. Finished in black enamel.

THE ATTACHMENTS—Furnished free of charge, are packed in a neat metal box, and consists of the following pieces: Ruffler, tucker, binder, braider-foot, under braider slide, shirring slide, feller, four hemmers of different widths, quilter, cloth guide, thread cutter, two screw drivers, twelve assorted needles, six bobbins, filled oil can and well illustrated books of instruction.

Showing Meteor Head.



Furnished with dealer's special brand on head, in lots of ten or more, without extra charge.

FREIGHT CHARGES, BOTH WAYS, ON MACHINES RETURNED FOR ADJUSTMENT, MUST BE PAID BY CUSTOMERS.

SEWING MACHINES.

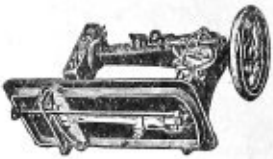
"LA BELLE SPECIAL."

Fully Guaranteed for Ten Years.

No. 250—La Belle Special, crated, w't 110 lbs., each .....**ADGJ** $24.50

The La Belle Special is another example of a combination of features heretofore found only on higher priced and expensive machines, with the sterling values of a medium priced pattern without any increase in price. This machine will be found especially valuable in combating certain kinds of competition, and we do not know of another machine of corresponding value to be had anywhere at the price.

THE SEWING HEAD—Makes the double lock stitch, and has good sized arm, not so high, however, as the arms of our other and better machines. The working parts are made of hardened steel, and the head is equipped with automatic bobbin winder, self-threading shuttle, self-setting needle, gear releasing device, spring tension, positive double width feed.



THE CASE—Is an attractively designed drop head, with embossed decorations, four side drawers, attractive center panel, 18 in. tape measure on table, and steel cable automatic lifting device.

THE STAND—Is finished in black enamel, and has hardened steel bearings, wooden pitman, good sized treadle and belt retaining guard.

THE ATTACHMENTS—Are packed in a neat box, and are very complete, as is shown on the following list: Ruffler, tucker, binder, braider-foot, under braider slide, feller, four hemmers of different widths, quilter, cloth guide, thread cutter, two screw drivers, twelve assorted needles, six bobbins, filled oil can, and well illustrated books of instruction.

"LA BELLE."

Fully Guaranteed for Five Years.

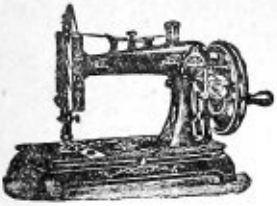
No. 225—La Belle, crated, w't 100 lbs.....each **ABIJ** $21.50

The La Belle is the best low-priced machine on the market, beyond question. It is an example of what our large buying capacity enables us to do. Compare it, part by part, with other low price machines, and the superior value becomes apparent. The La Belle is thoroughly dependable and will give excellent service.

THE SEWING HEAD—Has a good size arm, the same as the La Belle Special, makes the double lock stitch, and is nicely finished in black enamel, with transfer decorations. Equipped with positive feed, improved stitch regulator, automatic bobbin winder, gear releasing device, self-threading shuttle, self-setting needle and hardened steel working parts.

THE CASE—Is a plain but substantially well finished Oak Drop Head with four side drawers, convenient center drawer, and 18 in. tape measure on table. The machine is not equipped with automatic lifting device.

THE STAND—Is light but well braced, and is finished in black enamel throughout. Equipped with belt retaining guard, wooden pitman and good sized treadle.



THE ATTACHMENTS—Which are packed in a neat pasteboard box, are of good quality and consist of the following pieces: Ruffler, tucker, binder, braider-foot, under braider slide, feller, four hemmers of different widths, quilter, cloth guide, thread cutter, two screw drivers, twelve assorted needles, six bobbins, filled oil can, and well illustrated books of instruction.

Furnished with dealer's special brand on head, in lots of ten or more, without extra charge.

FREIGHT CHARGES, BOTH WAYS, ON MACHINES RETURNED FOR ADJUSTMENT, MUST BE PAID BY CUSTOMERS.

SEWING MACHINES.

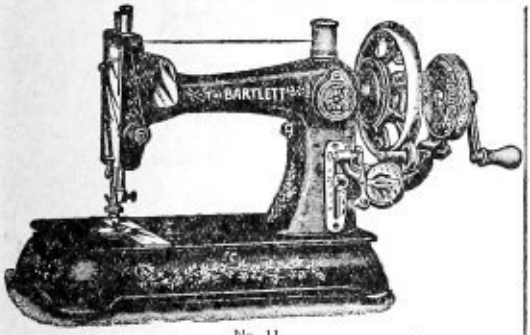
THE REV-O-NOC HAND.

No. 1000.

No. 1000—Boxed, w't 35 lbs..... each **JFFJ** $11.00

Description—This is a reliable Hand Machine that may be operated by hand at high speed, as it makes three complete stitches to each revolution of the handle. Well finished with black enamel and transfer decorations, and equipped with a complete set of hemmers and accessories, including hemmer and feller, 4 hemmers of different widths, cloth guide, quilter, 6 needles, 3 bobbins, filled oil can, thread cutter and illustrated instruction book.

The mechanism of the head is the same as the La Belle, see preceding page.



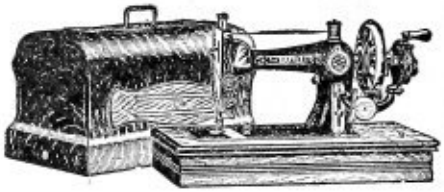
No. 1100.

No. 1100—Boxed, w't 49 lbs..... each **JHGJ** $14.50

Description—This REVONOC Hand Machine is the same as the No. 1000, illustrated in the adjoining column, except it is equipped with hand polished oak, base and cover. The cover is fitted with a substantial metal handle so the machine may be conveniently carried from place to place, if it is desired.

For details about the sewing mechanism, refer to description of the La Belle Sewing Head on previous page.

THE BARTLETT HAND.



No. 11.

No. 11—Boxed, w't 38 lbs..... each **JHDJ** $14.00

Description—The Bartlett is a high class, up-to-date Hand Machine, embodying all the many improvements and labor-saving devices incorporated in the REVONOC Treadle Machine.

Equipped with multiplying Gear Attachment, producing three stitches to each revolution of the hand wheel. The following is supplied with each machine. Complete set of hemmers and accessories, including hemmer and feller, 4 hemmers of different widths, cloth guide, quilter, six needles, 3 bobbins, filled oil can, thread cutter, and illustrated instruction book.

No. 12.

No. 12—Boxed, w't 52 lbs..... each **AJHJ** $18.00

Description—The mechanism of this model is same as Bartlett No. 11, described in the adjoining column. The additional equipment consists of hand polished, golden oak wood base and cover, with panel inlaid in fancy woods. Everything about this machine is strictly high class and in keeping with the excellent quality of goods bearing the **EVD** brand.

The well built cover is equipped with substantial metal handle, and lock and key, fastening it to the base so the entire machine can be conveniently carried from place to place.

SEWING MACHINE BELTS.

68 in., oak tanned leather, round, solid, with hooks..... per dozen **ADJ** $2.30

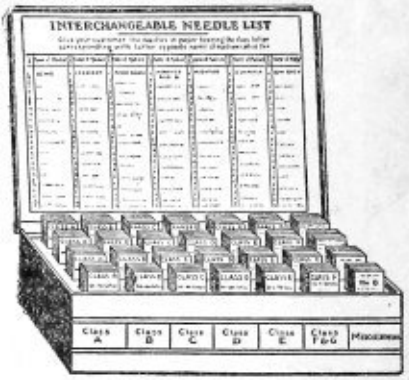
ON SPOOLS OF 100 AND 500 FEET.



THE ZENITH METAL NEEDLE CASE.

Contains Needles for All Makes of Machines.
Every Live Merchant Should Handle this Extremely Profitable Counter Seller.

The ZENITH needle case is well and solidly built of heavy gauge reinforced tin and is finished in four colors. Dimensions 6½x6¼x9½ in., packed in a pasteboard carton and accompanied by attractive display card.

There is an alphabetically arranged interchangeable needle list containing 212 names, lithographed on the inner side of cover. Opposite each name is a class letter, which designates the style of needle required for that particular machine. Corresponding class letters are lithographed opposite each section, so that one can instantly locate the desired needle. The needles contained in this case are the very best quality and are guaranteed to give satisfaction. They usually retail for 5c per package.

No. 270 ZENITH—Needle case, containing 264 needles—2 in a paper, w't 3 lbs. ..... each DEJ $7.50

Convenience in Re-Ordering—When you wish to reorder certain styles of needles, simply specify the class letter and the size of needles wanted. Such specifications insure prompt and correct handling of all re-fill orders.

INTERCHANGEABLE NEEDLE LIST.

Give your customer the needles in paper bearing the class letter corresponding with letter opposite name of machine called for.

REVONOC FIRE PROOF SAFES.

Construction—The outer and inner boxes of these safes are made of wrought steel, interposed by a secretly prepared concrete filling, which when subjected to great heat generates a vapor that fills all the pores in the cement, forming a cool, moist wall around the contents during its subjection to the heat.

Walls—These are built from the outside inward and are ground true to insure a perfect fit. The screws pass through one plate and half way through another, the next plate covering the heads of the preceeding set of screws. No screw points or head is visible from the outside. The outside steel box is formed of one continuous plate, bent around at the corners forming a top, sides and bottom, which is securely attached to heavy front and back wrought iron angle irons, forming in outline an all-round-cornered safe.

Doors—The outside door measures 4 inches thick. This, of course, includes the space occupied by the lock and bolt mechanism, solid thickness of doors being 2 inches of alternate layers of wrought iron and steel plates.

Locks and Spindles—Our patented combination lock has four tumblers, also a patented changing device so that combination can be changed at your will. All safes are numbered, and purchaser's name, town and number and original combination retained at factory to be used in case of accidents.

Weight—We give you an approximate weight only for guidance in ascertaining freight rates, as two safes of the same size may differ very widely. We therefore, cannot agree to supply any special weight. We sell by size NOT weight.

BRASS AND IRON BEDS.

On the following pages we show a line of Brass and Iron Beds, that is fully guaranteed by us to be free from defects in material and workmanship—in quality they have no superior.

FINISHES.

Iron Beds and Cribs are furnished in the solid colors—white, pea green, light blue, dead black and Vernis Martin—also in combination colors, pea green, white and gold, light blue, white and gold, and several shades of bronze. WHITE ENAMEL IS ALWAYS SHIPPED UNLESS OTHERWISE ORDERED. The enamel used is the highest grade, and is baked on. They are manufactured by a special process, which gives entire satisfaction.

Vernis Martin finish is similar in appearance to gold bronze, but unlike the latter, it is baked on and covered with varnish. On this account, it is more durable than any of the bronze finishes.

Pillars and Angle Irons in the combination finishes are always finished in darker colors than the inside parts of filling rods, which are white enameled with all chills decorated in gold.

Brass Beds are furnished in three finishes—the regular bright finish, which is standard, and ALWAYS FURNISHED UNLESS OTHERWISE SPECIFIED—satin finish, which is dull gold or Roman effect, and the pollet finish, which is a combination of the satin and the regular bright finish.

In the description of brass beds, satin finish is designated by an "S" after the number, and pollet finish by a "P" after the number.

The material used is the best that can be obtained. After the brass has been highly polished, it is protected by the very best amber hot process English lacquer. Each piece of brass is heated and kept at the required temperature by electricity during the successive coatings of lacquer, which are applied one on top of the other. This process is controlled exclusively by the manufacturer of these beds. Heavy ball-bearing casters are used on all brass beds.

The width of the bed is designated by the number—for example, No. 1800-46, calls for a bed 4 ft. 6 in. wide.

Side Rails. UNLESS OTHERWISE SPECIFIED, BEDS ARE ALWAYS FURNISHED WITH REGULAR RAILS, with which iron slats may be used, or the hangover wire mattresses and spiral springs, with steel side strips.

Reversed Rails—If the beds are to be used with wooden slats, orders must specify, REVERSED RAILS, with which spiral springs or ordinary woven wire mattresses may be used. In ordering beds, ALWAYS SPECIFY WHETHER REGULAR OR REVERSED RAILS ARE WANTED.

No. 296—Full Turkish upholstered, imperial edge, extra quality hair top★ .....each **BJDJ** $34.00
Best grade of ticking used on all numbers.

The most satisfactory spring for brass or iron beds—unexcelled for comfort and durability, each full sized spring, contains 72 best spiral steel springs, oil tempered and japanned, tied together eight times with strong manilla hemp, and built upon the same idea as are fine sofas. In ordering box springs always give us the outside measure; namely, 4 ft. 6 in. x 6 ft. 6 in., etc., also be sure and mention whether for wood or iron bed.

We specially recommend Nos. 291 and 294, as a felt top will stay in position better than any other material.

MATTRESSES.

MATTRESSES.

The material used in the construction of each of our mattresses is the very best that can be obtained for the money. The cotton used in combination mattresses is guaranteed to be absolutely clean, new cotton, thoroughly ginned, making a sanitary, comfortable bed. We use no so called wool, which is nothing else than ground up rags.

ELASTIC FELT MATTRESSES. BUILT-IN-LAYERS.

Elastic felt is made of pure, long staple cotton, thoroughly cleaned and purified, woven and interlaced or felted to form sheets or layers the size of the mattress, laid one upon another, compressed and ticking drawn over them, making mattresses that will not pack, spread or become lumpy. A felt mattress, if given a sun bath occasionally, will expand and retain its resiliency for a lifetime.

No. 272—Width,

ft.	3	3½	4	4½
Each	$12.75★	13.50★	14.25★	15.00★
	JGFE	JHAJ	JHEE	JIIJ

This mattress is made of unbleached felt, but absolutely clean, sanitary and satisfactory in every respect. Covered with a good grade of fancy striped ticking and tufted with cotton tufts.

Each	$14.50★	15.50★	16.50★	17.50★
	JHGJ	JICJ	JIIJ	AJEJ

This mattress is made of a good grade of felt, covered with a good grade of fancy striped ticking, satin finish, edges bound with bed lace, and best grade of cotton tufts used.

No. 273—Width,

ft.	3	3½	4	4½
Each	$17.00★	18.00★	19.00★	20.00★
	AJBJ	AJHJ	AADJ	ABJJ

The felt used in the manufacture of this mattress is of a white bleached fibre, thoroughly guaranteed and considered our leader at the price. Covered with a very fine grade of fancy striped ticking and tufted with cotton tufts.

No. 276—Width,

ft.	3	3½	4	4½
Each	$30.50★	21.50★	22.00★	23.00★
	ABCJ	ABIJ	ACBJ	ACHJ

The felt used in the manufacture of this mattress is of the very best grade. Guaranteed to be A1 in every respect, covered in either fancy striped or fancy Art-creton floral pattern ticking, satin finish, edges bound with best grade of bed lace, and tufted with the finest quality of cotton tufts. A first class high grade mattress.

No. 277—Width,

ft.	3	3½	4	4½
Each	$24.00★	25.00★	25.50★	26.50★
	ADDJ	AEJJ	AECJ	AEIJ

Supreme felt—extra quality. This is pure white in color and we guarantee it to be the best quality of felt on the market—barring none. Covered with the same quality ticking as above and finished in the best possible manner. If you desire the best thing to be had in felt mattresses, this is what you want.

All our mattresses are made by hand, built layer by layer, while a machine-made mattress is stuffed, consequently will not retain its shape and wear.

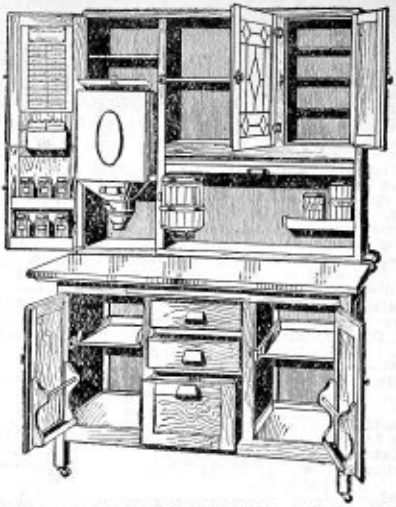
SANITARY SILK FLOSS—KAPOK—MATTRESS.

No. 274—Width,

ft.	3	3½	4	4½
Each	$19.00★	20.00★	21.00★	22.00★
	AADJ	ABJJ	ABFJ	ACBJ

The particular advantage of this mattress lies in its exceeding lightness and buoyancy. The full sized mattress weighs but 28 pounds, which is lighter than the larger section of a two-part mattress of any other filling. The consequent ease of handling will appeal strongly to the housekeeper. It has long life, and even after it may have become depressed by use, will resume its original buoyancy if placed where it can secure strong rays of the sun.

WHEN ORDERING BE SURE TO SPECIFY SIZE WANTED.



(Mattresses can be made in two parts if desired; extra, each $1.00.)

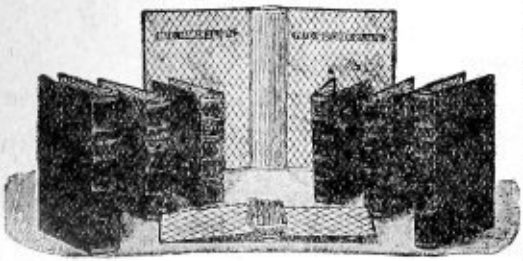
A pure gum product.

ONE DOZEN IN A BOX.

BLANK BOOKS, INVENTORY SHEETS AND HOLDERS.

LOOSE LEAF LEDGERS.

No. 40—ECONOMY, 12½×9¾ in. cover, bound in best grade of English corduroy with heavy red Russia leather back and covers, 4 telescopic posts, ⅝ in. in diam., alternately arranged to insure perfect alignment of leaves, complete with 200 9¾×11 in. best grade linen ledger leaves ..... each **JIFJ** $15.00



ONE IN A BOX.

No. 400—Extra pages, 9¾×11 in..... per 100 **ABJ** 1.50

No. 5—Transfer binders, strong pulp board covers, bound in high grade canvas ..... each **BDJ** 3.00

A permanent transfer binder having an exceedingly flexible capacity. The first sections of the posts are riveted to the bottom, additional sections may be used to extend the posts to any height. The 1 in. top sections are threaded ⅝ in. for brass countersunk thumb-nuts that are used in binding the leaves. These practically lock or bind the covers and serve as a finish to the top of the posts.

INVOICE BOOKS.

Leather Back, Cloth Sides, Gummed Stubs.

No. 15—10×12 in., 250 stubs, for letters, w't 1¾ lbs.... each **JIE** $1.60

No. 20— 9×15 in., 250 stubs, for invoice, w't 2 lbs.... " **AAJ** 1.80

INVENTORY SHEETS.

No. 1—Lots of	250	500	1,000
Per package..	$2.25	4.15	7.50
	AEJ	BGJ	DHJ

These inventory sheets with their holders and binders provide the simplest and most economical method of taking stock.

INVENTORY HOLDERS.

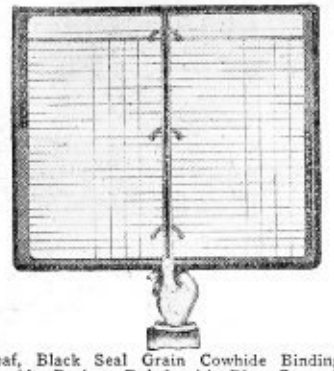
No. 222—Finely tempered steel spring, nickel plated, heavy side board, side opening for sheets 9½x12 in., duck covered, for sheets 9½x12 in., capacity 1 to 25 sheets, each ..... **ABJ** $1.50

SNAP-ON INVENTORY HOLDERS.

No. 1—Snap-on, flexible cloth covered binding, for sheets 9½x12 in., capacity 100 sheets, size 9½x12 in., w't ½ lb., each ..... **JIJ** $1.00

A practical and labor saving binder, can be easily carried from place to place and has a flat writing surface, no matter how you hold it. Prevents soiling or loss of records by being able to place them on the bottom of the binder. When inventory is complete it will serve as a permanent binder in which to file the records.

AUTOMATIC INVENTORY HOLDERS.



No. 2—9½x12 in., capacity 100 to 1700 sheets, one piece finely tempered steel binding, self-locking, double army duck covered over heavy tar-board sides, with leather corners, each ..... **BDJ** $3.00

Locks automatically at any point, to open binder insert key, and by one-half turn, spread the clamping device and the binder is open. By removing the key the binder is automatically locked. This binder combines simplicity and strength because the locking device consists of only one piece.

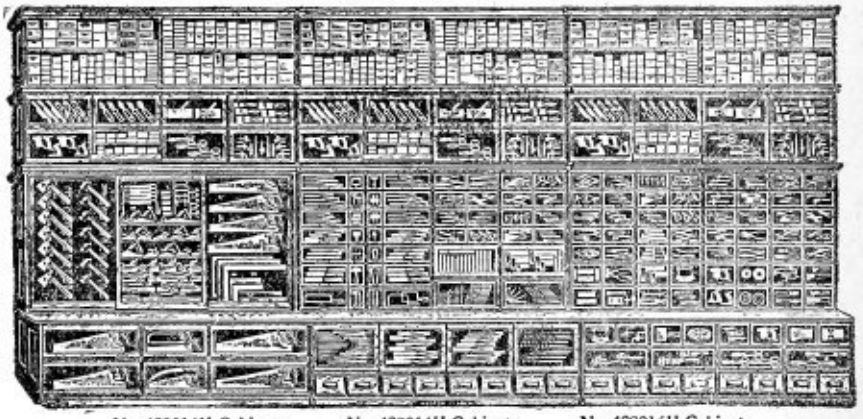
WARREN STANDARD HARDWARE STORE FIXTURES.

Warren Standard Hardware Store Fixtures are made on the sectional, interchangeable unit system.

All cabinet units are exactly the same outside dimensions, and the base units correspond to the cabinet units in length. When set up and fastened together they come into perfect alignment, and are as solid as if built in the store. Through this portable unit system of construction a merchant can fit up his entire store in one day, or at any time he wishes to rearrange the location of any line of goods or move into another building, these sections can be moved as easily as a filing cabinet or office desk.

Cabinets—All Warren Standard Cabinets are 100⅜ in. long (105⅜ in. with end cornice), 54 in. high, 15¾ in. deep (17¾ in. including cornice).



Bases—All Warren bases are 100⅜ in. long, 31½ in. high, 30 in. deep.

Material—The outside exposure of all Warren Standard Hardware Fixtures is made of select white oak. All interior construction of soft wood, usually poplar

Finish—The finish for all Warren Standard Fixtures is antique oak, hand rubbed and polished. This finish will always be sent unless otherwise specified. Samples sent on application.

Felt—Unless otherwise instructed when order is sent us, all sample boards will be covered with, and all sliding glass door cabinets lined with all wool rich red felt

How to Order—To make up an order for Warren's Sectional Hardware Fixtures it will only be necessary to use the catalogue numbers of the different units desired in the order they are to be placed in the store. Send us a pencil sketch, with the numbers of the different units (cabinets and bases inserted), showing relative location of each as they will be placed in the store. State whether the fixtures are to be placed on the Right or Left hand side of store as you enter the front door.

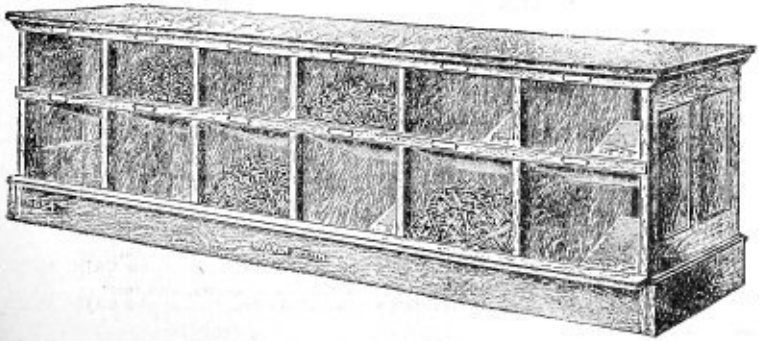
WARREN STANDARD OAK FRONT WRAPPING COUNTERS.

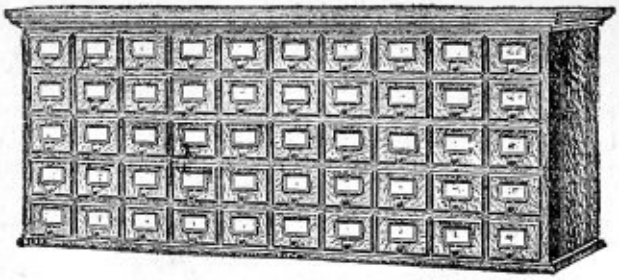


No. 5500—Counter. The illustration shows the top, front and ends of all Oak Front Wrapping Counters. These counters are 8 ft. 8 in. long, 2 ft. 7¾ in. wide, and 2 ft. 7½ in. high, with solid oak top, paneled oak front and ends, rear arranged with adjustable shelves.
Approximate w't packed, 500 lbs., each★.....CGIJ $42.13

WARREN PATENT 20TH CENTURY NAIL BIN WRAPPING COUNTERS.

No. 5658—Counter; an ingenious arrangement for nails, whereby all bins, both in upper and lower row, may be filled from the original keg at any time through the open or hinged top.
This counter has paneled oak front and ends and an oak top, one-half of which is hinged in two parts.
The bins have bottoms sloping toward the center from both front and rear, greatly facilitating the removal of the nails, and have an average capacity of 150 pounds each.
Bins in the lower row are filled by raising the hinged top, opening the passage to lower bins and inserting our especially designed heavy galvanized steel chute in top of upper bin. (See illustration, lower bin being filled while upper one is full).
Bins in upper row are filled simply by closing the passage to lower bins and emptying the keg of nails through the top of upper bin (no chute necessary). Any bin in lower row may be filled at any time while upper bins are full, by opening the passage to lower bins and inserting the chute.
Tops hinged with invisible hinges, giving this Counter when closed every appearance of a solid oak top wrapping counter.
Approximate w't packed, 535 lbs.....each ★ FBAJ $69.00

WARREN NAIL BIN WRAPPING COUNTERS.



No. 5654—Counter; this counter, with solid oak top, paneled oak front and ends is arranged in the rear with 12 nail bins correct in size, shape, proportion and operation, each with an average capacity of over 150 pounds. The bottom of each bin recedes toward the center from both front and rear. An extension ledge flush with bottom of lower bins allows the scale scoop to be placed well underneath the front of bins, which prevents scattering contents.
Approximate w't packed, 510 lbs., each ★..... EJIJ $56.63

Complete catalogue sent on application.

WARREN STANDARD SCREW CASES.

No. 6133.

No. 6111.

No. 6122.

No. 6100.

The exterior of all Warren screw cases is made of oak, hand rubbed and polished finish, and the interior of soft wood, usually poplar. The backs are well seasoned, varnished, matched and beaded lumber. The drawers have sliding covers so arranged that only one compartment is open at a time. By removing drawers from screw case, contents of any particular compartment can be emptied in the hand or on the counter and returned, or goods from original packages emptied into the different compartments without danger of mixing the different sizes. All screw case drawers have pulls, card frame and cards attached to fronts and our inlaid price card on the side of each, where a record of the size, number, cost and selling price of the different sizes can be kept, opposite each compartment.

No. 6100—Case; 19⅝ in. high, 16½ in. wide, 15⅛ in. deep, contains 15 oak front drawers with sliding covers, with three removable partitions, forming four compartments in each (60 in all), approximate w't packed 70 lbs.....each★ **ABBE** $13.63

WARREN ECONOMICAL HARDWARE STORE FIXTURES.

The Warren Economical Store Fixtures like all Warren's production are made on the Sectional Interchangeable Unit System.

The bases are 8 ft. 4⅝ in. long, 2 ft. 7⅛ in. high and 2 ft. 6 in. deep. All cabinets are 8 ft. 4⅝ in. long, 4 ft. 6 in. high and 1 ft. 3⅜ in. deep.

All outside exposures made of white oak. All interior construction of soft wood, usually poplar.

All Economical Fixtures have a matched and beaded back of soft wood, protecting stock from damp walls or possible loss of goods by being misplaced or falling down back of fixtures. All fixtures are built amply strong to sustain the weight of all Hardware Goods and every detail of trimming is complete, including all brackets, supports, shelves, racks, pulls, card frames, cards, etc.

The finish for Warren Economical Fixtures is "Mission Weathered Oak" and this finish will always be sent unless otherwise ordered.

How to Order—It will only be necessary to use the catalogue numbers of the different units desired, in the order they are to be placed in the store.

Send us a pencil sketch, with the numbers of the different units (cabinets and bases) inserted, showing relative location of each as they will be placed in the store.

State on which side, Right or Left of store as you enter the front, fixtures are to be placed.

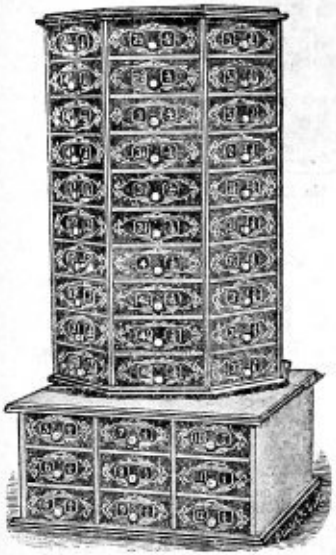
AMERICAN REVOLVING BOLT AND SCREW CASES.



These cares are made of the best Tennessee poplar, cherry finish, or oak in natural, orange or antique finish, double top and bottom, with the grain of the wood crossed, glued and screwed together strong enough to bear three times the weight that can be put into them, iron standards screwed firmly into the iron hub in the bottom, making them perfectly true and solid. Front drawers are of the best Norway pine, all provided with stops to prevent removal from case, each drawer labeled.

The perfect locking device for these cases is so arranged that all the drawers can be locked and unlocked at one time, a lever being attached to the case on the under side, and is only accessible to the person behind the counter. By pressing this lever down it unlocks the drawers and engages in a catch which holds it in this position until it is desired to again lock the drawer, when by a slight touch the lever is disengaged thus locking the drawers.

When the cases are to be used for fine tools or other valuable articles, we provide lock and key, so that only the person having the key has access to the drawers.

When ordering please state style of case wanted, poplar or oak, with or without label holders, also whether locking device is wanted with or without key.

BOLT CASES.

Mounted on Base 30 In. Wide, 15 In. High, Containing Eighteen Drawers.

ECLIPSE SECTIONAL REVOLVING NAIL BINS.

Will revolve in a circle four feet in diameter. Each section works independently, and is hung on the best steel balls. All parts where any friction might arise have been perfectly machined. The stem on which all the sections rest and revolve is molded solidly in the base, giving it the strength to withstand three times what is likely to be placed upon it. Scales, ten dollars extra.

	CCGE	CICE	DEJJ

We recommend this design especially for strap hinges, horse shoes and kindred hardware, as it has no projections at end of partitions between bins, and hence nails are more likely to fall out and get mixed. It has been also used by a wholesale fish merchant for display of fish for sale. Each bin holds one-keg of nails.

20 Gauge Sheet Steel.

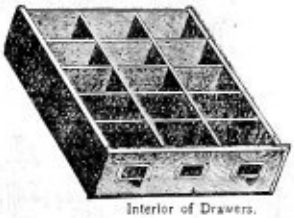
	CICE	DFGJ	ECDE

Ten divisions to a section; the object of this bin of smaller divisions (otherwise same as Nos. 13, 14 and 15) is to provide a suitable place for brads finishing nails, washers and small hardware, which dealers are learning to place in a handy device where easily handled.



SHIPPING FACILITIES

With our immense stock and very modern facilities for shipments, we are enabled to fill orders with unequaled promptness. On some of the roads we have special through cars which enable us to reach distant points 24 hours ahead of shipments made in the regular way.

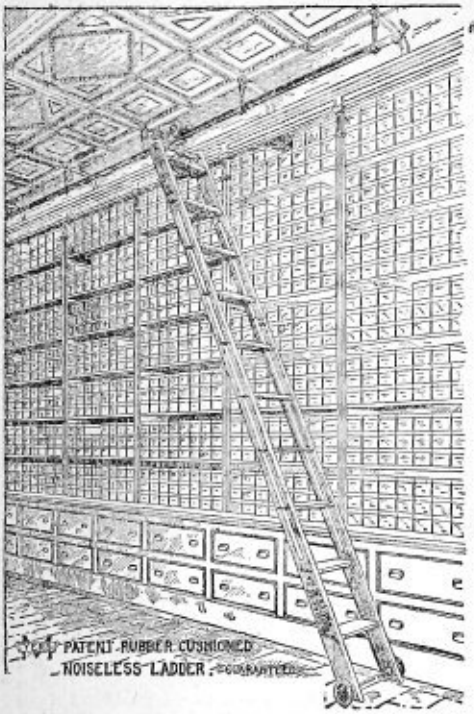
Card of Labels.

Interior of Drawers.

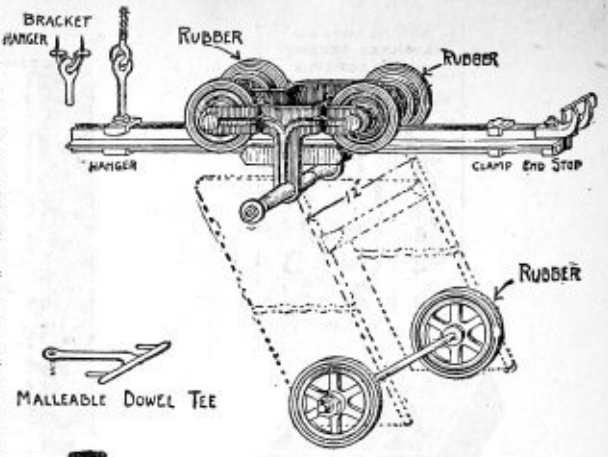
No. 210. 14 Drawers.

Oak Front Drawers, Cherry Stained Case, Brass Pulls and Label Holders.

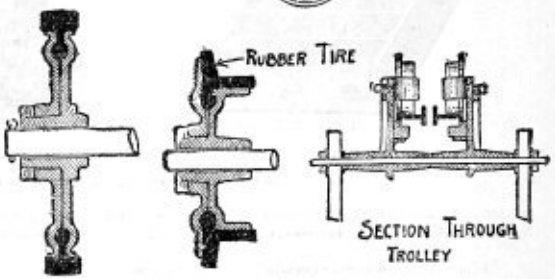
No. 180—10 drawers, 150 compartments, height 23 in., width 30 in., depth 16½ in., w't about 80 lbs. .....each AACJ $15.00
No. 210—14 drawers, 210 compartments, height 31½ in., width 30 in., depth 16½ in., w't about 100 lbs. ..... " ADCJ 18.00



These cases are designed especially for screws, small bolts and fittings. Each drawer is divided into fifteen compartments, size 2⅛×3⅛×3 in., with strong wood partitions. The spaces are large enough to hold a package of any size screws. The drawers are fitted with a safety appliance to prevent accidental dropping and spilling of contents.



With each case are furnished seven cardboard sheets of labels, marked so that they can be readily cut apart and exactly fit the holders supplied to each drawer. The long stripe designating the class of goods can be attached to or between the drawers as desired. By putting all screws of a length in separate rows, this will allow five numbers for each. Stove bolts can be arranged in the same manner, ¾ and 1¼ in. round and flat head being in one series of compartments By this arrangement one large case can be used for several kinds of screws, stove and tire bolts; the balance of these goods being in full packages on the shelves.



MAIL ORDER DEPARTMENT

Our constant attention in sixty years of business has been given to the perfection of the system of handling mail orders. Our object has always been to handle them with the greatest possible speed, with the result that we are enabled, in most cases, to ship mail orders the same day they are received.

MYERS' CUSHION TIRE STORE LADDERS.

For Shipment from Factory.

Ladder and Trolley, complete, average weight 60 lbs. ..... each **AAEJ** $20.00

Track, complete with hangers, weight per ft. 2 lbs. ..... per foot **AG** .30

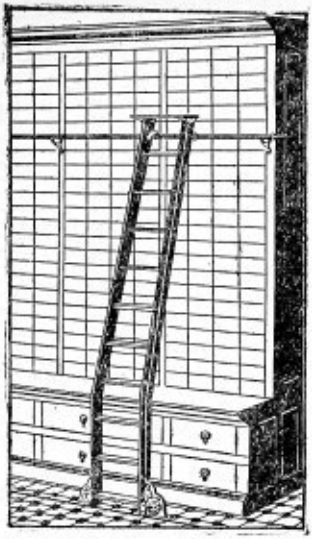
Give height of ceiling, and we will send the ladder of proper length.

DIRECTIONS FOR FITTING.

To find the required length of store ladder for any room, subtract from the height of the room 11 in. (this being the amount of space required by hangers, track and trolley); multiply the remainder by one and one-tenth; the result will be the length of the ladder from hole at top to long point of ladder at bottom.

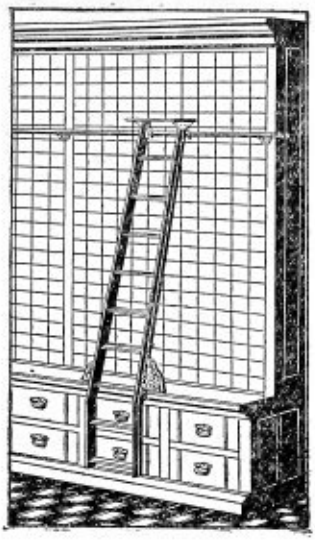
The track is the well known double angle steel rail, which is very neat and strong, and is suspended from ceiling by means of lag screws, either jointed or rigid or by flanged plates and wood screws. By this means the track is placed close to the ceiling and can be leveled on an uneven ceiling without the least trouble, and without any blocking or bridging, as is the case in many other tracks.

The ladder is constructed of the best clear Georgia pine, nicely finished, filled and varnished; has open panel sides 5 in. wide, with 5 in. steps Each step is supported at each end with a special malleable dowel tee, which makes the strongest construction possible. The width of the ladder is 12 in.



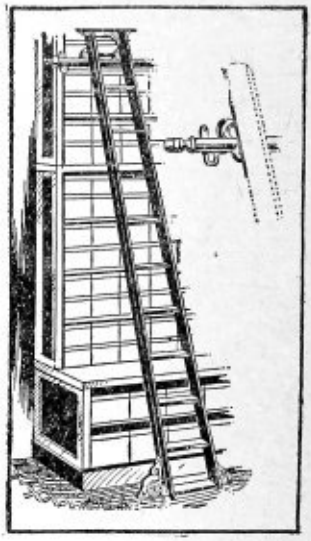
The trolley is self-adjusting and made of malleable iron fitted with turned steel bearings and 3 in. anti-rattler wheels turned and bored on lathe and fitted with special rubber tires.

The floor travelers are 5 in. in diameter, composed of metal sides with rubber cushion tires clamped in such a position as to be impossible to get off or come loose. These wheels are placed on a steel axle which revolves with one of the wheels, the other running loose. In this manner the ladder will adjust itself to the floor. With this style trolley, which is noiseless, a great objection in other ladders is overcome.



When the ladder is not the proper length for ceiling, cut off at the bottom and replace the lower traveler shaft by boring new holes at the proper point so as to have the steps of the ladder level.

BICYCLE AND AUTO STEP LADDERS.



NEW NOISELESS TRACK.

No. 100.
Bent Floor Track Bicycle Ladder.
Can use track Nos. 22, 24 or 26.

No. 110.
Bent Base Shelf Bicycle Ladder.
Can use track Nos. 22, 24 or 26.

No. 120.
Model Six Auto Ladder.
Use track No. 28.

Straight or Bent, Selected Hardwood, Finished in Natural Colors, Extra Wide Shelf at Top, Japanned Mountings, Track at Bottom, Either on Base Shelf or on Floor, Steel or Noiseless Rail.

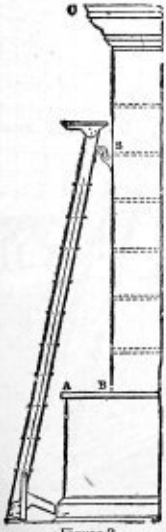


Figure 3.

		STRAIGHT		BENT	
No. 100—Bicycle, oak, japanned mountings, for floor track★	each	AABE	$15.00	ABDJ	$16.00
No. 110—Bicycle, oak, japanned mountings, for base track★	"	AABE	15.00	ABDJ	16.00
No. 120—Auto, oak, japanned mountings (no floor track)★	"	AABE	15.00	ABDJ	16.00
Nickel plated mountings★	extra each	AGE	2.00		

Approximate weight 40 lbs.

Any combination of track will fit any of the above ladders except 120 Auto. No. 22 track always sent for floor track ladders and No. 22 for base track ladders unless otherwise specified.

Ladders can be furnished in Georgia pine at $1.00 less than oak prices.

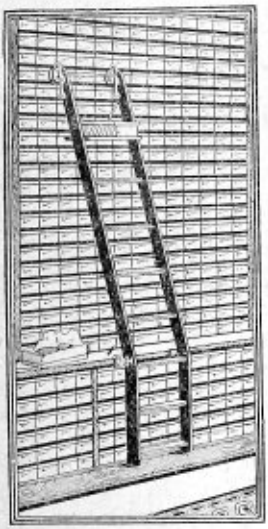
BICYCLE LADDERS have but two wheels, the track is at the bottom, either on the base shelf or on the floor, so that the entire weight of the ladder and operator is supported from below on a solid foundation and not suspended, holding operator and ladder in perfect balance and eliminating all liability of the ladder sagging the shelving.

A light turned pole guides the upper end of the ladder in moving it. Stout hooks fit over this pole to prevent the ladder from tipping backwards, but not a pound of weight rests on the pole.
Operator stands directly over the wheels, there is no side friction at all and ladder travels as easily as any other bicycle.
The noiseless rail is yielding and resilient, absorbing all vibration due to operation of ladder.

THE AUTO LADDER requires no track but runs on flat wheels.

It can be set at any angle or pushed close to the shelving when not in use. It is particularly adapted to short runs, cramped spaces or sloping, uneven floors. The adjusting feature allows guide rail to be placed opposite a shelf regardless of being parallel with the floor.

Track.



No. 22—Steel bronze rail, japanned brackets, special pole★	per foot	BC	$0.35	
No. 24—Noiseless rail, japanned brackets, special pole★	"	CJ	.45	
No. 26—Noiseless or nickeled rail, nickel brackets★	"	CC	.50	
No. 28—For Auto ladders, japanned brackets, special pole★	"	AG	.25	

Approximate weight ½ lb. per foot.
Any combination of track will fit any of the above ladders, except No. 120 Auto.
No. 22 Track is always sent for Floor Track ladders, and No. 24 for Base Track Ladders unless otherwise specified.

HOW TO ORDER BICYCLE LADDERS: Refer to Figure 3 on this page and give the following measurements: floor to C; Floor to A; A to B; and B to S. State whether ladders are to be straight or bent. State length of track wanted and the number of uprights of all kinds in the shelving, and say whether solid uprights, partition boards, turned spindles or iron brackets are used to support the shelving.

★ *FOR FACTORY SHIPMENT ONLY.*

MILBRADT ROLLING STORE LADDERS.

Showing No. 1 bent ladder, which runs on a track fastened to shelving near the top and runs close to wide base shelf.

The Milbradt rolling step ladders are all made to order, and to fit each particular place, of good oak lumber, in the most artistic and neatest style, handsomely finished, are durable and perfectly safe, as they cannot jump the track. They take up the least possible space, run noiselessly and so easily, either empty or with operator upon them, that a slight push will propel a ladder the length of an ordinary store. These ladders have an extra wide shelf at the top, which affords great convenience in handling stock. All iron work on ladders, as well as the brackets to hold up steel track, is malleable, artistic and strong and aluminum finished.

No. 1—Has suitable fixtures at the top to run on steel track and rubber covered rollers attached near the lower end that run against the edge of base shelf. This ladder is the best for all around purposes where shelving is reasonably strong.

No. 2—Intended for shelving that is not very strongly built, as most of the weight of ladder and operator rests on the floor. This ladder runs on a hardwood track at the top and has cushion tired wheels attached at the bottom that run on the floor, no track being required.

No. 10—Is a bent ladder that runs on a flat hard wood track that is screwed on top of original low shelving. When top of shelving is reasonably strong this is very often the most convenient way to apply a ladder to this style of shelving.

No. 15—Is a trolley or ceiling ladder that suspends from a track fastened to ceiling. Ladder has attached at the top, suitable iron in which paper filled wheels run noiselessly on the steel track. It also has attached at the bottom, cushion tired wheels that run on the floor. This ladder is very strongly built and specially adapted for hardware stores or any place of business where heavy goods are handled.

No. 1—Ladder complete with fixtures★...each **ABFE** $15.00
No. 2—Ladder complete, with fixtures★...each **ABFE** 15.00
No. 10—Ladder complete, with fixtures★...each **ABFE** 15.00
No. 15—Ladder complete, with fixtures★...each **AAEJ** 14.00

Approx. W't Ladder Crated 50 lbs.

Steel Track—For No. 1, regular strength, including brackets and screws★ .....per foot **BC** $0.35
Steel Track—For No. 1, extra strong, including brackets and screws★ .....per foot **BH** $0.45
Steel Track—For No. 15, including brackets and screws, per foot★ .....**BB** $0.35

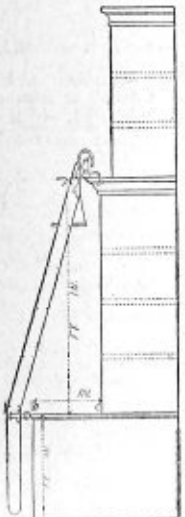
Approx. W't Steel Track 1 lb. Per Foot.

Hardwood Track—For No. 2, complete★....per foot **AG** $0.25
Hardwood Track—For No 10, complete★...per foot **AB** $0.20

Approx. W't Wood Track ½ lb. Per Foot.

HOW TO ORDER.

Ladders at Nos. 1 and 2 give the exact height from floor to top of base shelf; the exact width or projection of base shelf and then the exact height from top of base shelf to top of shelf to which track is to be fastened and the track should be fastened to a shelf that is about 3 feet down from the top.



Steel track for ladders No. 1, both regular and extra strong, is 1 inch in diameter and therefore does not block up any space when fastened up opposite the edge of shelf. When ordering steel track give the total length of each line of shelving; second, give distance from center to center of uprights and state how many brackets are required to hold up the steel track. For regular steel track the brackets cannot be more than 4 ft. apart. When the uprights to which brackets are to be fastened are more than 4 ft. apart, it is necessary to use extra strong steel track.

Ladder No. 10, give the exact height from floor to top of base; the width or projection of base and then the exact height from base to the top of shelving or cornice on top of which track is to be fastened. Also state how much the cornice or moulding on top of which track is to be fastened projects out over lower part of shelving.

Trolley ladder No. 15, it is only necessary to give the exact height from floor to ceiling and the exact length of each line of track wanted.

To order wood track for ladders Nos. 2 and 10, it is only necessary to state the number of feet required.

FOR FURTHER INFORMATION, WRITE FOR SPECIAL ROLLING LADDER CATALOGUE.

Showing No. 10 bent ladder, which runs on track screwed on top of original low shelving.

Showing No. 2 bent ladder, which runs on floor.

Showing No. 15 trolley or ceiling ladder, which suspends from a track fastened to ceiling.

★*FOR FACTORY SHIPMENT ONLY, F. O. B. ST. LOUIS, MO.*

FIRE EXTINGUISHERS AND FIRE PUMPS.

REVONOC FIRE EXTINGUISHERS.

REVONOC—Approved, 3 gal., made of special cold rolled Lake Superior copper, all seams hand riveted, solder sweated and lead filled, entire inside lead lined, top collar and cap of best steam brass carefully fitted by expert workmen, patent removable brass bottle holder, improved goose-neck hose connection, extra heavy, chemically treated hose with solid lead nozzle, tested 350 lbs., hydrostatic pressure, packed complete in box with acid and soda for one charge, w't per doz. 276 lbs. ....per dozen **AAHHJ** $198.00

REVONOC *Fire Extinguishers are examined, approved and labeled under direction of National Board of Fire Underwriters.*

The chemical charge consists of 1½ lbs. bicarbonate of soda and 4 oz. of sulphuric acid, which can be obtained at any drug store. The soda is to be dissolved in about three gallons of water. The acid is retained in the bottle and held in the bottle holder from the top of the extinguisher. In use the extinguisher is turned bottom side up. This allows the acid to mix with the soda solution, creating a very powerful gas with a pressure sufficient to throw the chemical stream 50 feet.

This stream as a fire fighter is fifty times as effective as plain water. There is nothing to get out of order, no cocks to open or close, simply leave it alone until wanted, then turn bottom side up and the extinguisher will do the rest.

FIRE EXTINGUISHERS.

H. S. B. & Co.'s Fire Extinguishers are made very similar to the REVONOC, *tested to 300 lbs. hydrostatic pressure, which is more than three times the pressure created when in use. H. S. B. & Co.'s Fire Extinguishers are carefully made, and are as serviceable as any on the market. As they do not have the underwriter's approved label, we recommend that our* REVONOC *Extinguisher be ordered when it is desired to obtain credit on insurance premium.*

No. 10—H. S. B. & Co., 3 gal., made of special Lake Superior copper, lead lined, packed complete in box with acid and soda, w't per doz. 294 lbs., per dozen .....**JHFDJ** $144.00

No. 15—H. S. B. & Co., 5 gal. capacity, w't per doz. 324 lbs., otherwise same as No. 10 ..per dozen **AAEBJ** $192.00

This extinguisher contains powdered bicarbonate of soda and other chemicals, which, when thrown into the base of the fire, create a large quantity of carbonic acid gas, in which fire cannot live.

Cover has spiral agitator, which shakes up powder when cover is drawn off, so that chemicals are easily thrown out. Will instantly extinguish an oil or gasoline fire.

These extinguishers are not approved by the Underwriters' Laboratories, Inc., and are not recommended for general fire protection except when used in addition to approved 3 gallon chemical extinguishers. They are, however, unusually effective in extinguishing oil fires and are recommended for use in paint departments, garages, motor boats, etc.

No. 12—Standard, 22 in. lithographed tin tube, containing about 3 lbs. of chemicals, with strong screw hook for hanging, w't per doz. 45 lbs., per dozen .....**ADDJ** $24.00

ONE DOZEN IN A BOX.

HARDEN HAND GRENADES.

To extinguish a blaze throw the grenades as near the base of the fire as possible, in quick succession. In using the tubular pattern, grasp the lower end of the grenade and with a quick blow break off the top just under the cork, throw the liquid at the base of the flame vigorously.

No. 7. No. 4.

No Corrosion, No Freezing, No Danger of Explosion.

No. 4—Star, capacity 1 qt., w't per doz. 60 lbs. .....per dozen **JFIJ** $11.50
No. 7—Tubular, floral design, capacity 1 qt., size 2½x18 in., w't per doz. 58 lbs. .....per dozen **JFIJ** $11.50

ONE-HALF OR ONE DOZEN IN A CASE. WE DO NOT BREAK CASES.

HAND FIRE PUMPS.

No. 25D—Geyser, capacity 5 gallons, made of No. 24 gauge galvanized iron, double action pump throws a stream 50 to 75 feet, w't per doz. 150 lbs., per dozen .....**EJDJ** $84.00

The Geyser uses plain water to which salt may be added in winter to keep from freezing.

MEASUREMENTS.

High Top.

As will be seen by the accompanying sketch, the size of our high top hames is found by measuring according to the dotted lines, viz. From the lowest point of the top loops to the tip of the bottom loop.

Low Top.

Measured according to dotted line.

There is a growing demand for steel hames, and the above line represents the very newest patterns, carefully selected to meet requirements of every section. Note they are made in a certain size so that the same hame will serve for all three Nos. 5, 6 and 8 old style wood Concord hames. This feature enables you to reduce your stock and investment while increasing your total volume of business.

No. 404—Barton, 17¼ in. long, 4 links, 5/16 in. wire, bright, straight, high grade, open hearth, steel link, with malleable iron snap, w't per doz. prs. 30 lbs. ....per dozen pairs **CAJ** $4.70

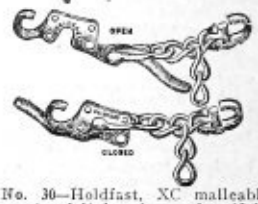
LUMBER HEEL CHAINS.

No. 99—36 in. long, 5/16 in. No. 0 wire twist link, 9 links per foot, with grab hook, w't per doz. prs. 65 lbs., per dozen pairs .....**EAJ** $8.50

CART BACK CHAINS.

No. 81—Bright, double link, with swivel, 4½ ft. long, ½ in. wire, w't per doz. 51 lbs., per single dozen .....**JGHJ** $13.00

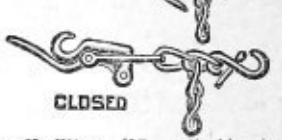
HAME FASTENERS.



No. 5 — Success, bronzed, Norway iron, steel twist link, w't per doz. 10 lbs., per dozen....**BGE** $4.60

Stronger and more easily adjusted than any leather hame straps. Easily put on, cannot become detached from hame, or get out of working order.

ONE DOZEN IN A BOX.



No. 15 — Dodson's, electro galvanized, steel, flat link, w't per doz. 7 lbs., per dozen..**BDJ** $4.00

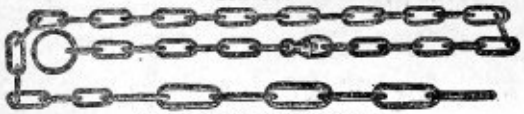
No. 30—Holdfast, XC malleable iron, twisted link, w't per doz. 15 lbs., per dozen .....**BDJ** $4.00

Note the snap, easy to operate, simple and secure. Pin cannot be lost. Nicely finished and most practical.

No. 25—Kling, XC malleable iron, twisted link, w't per doz. 30 lbs., per dozen .....**BDJ** $4.00

These fasteners are strong, durable and can be quickly adjusted. The purchase power is three to one, making it easy to pull hames very tight.

No. 35—GGG nickel plated, malleable iron steel stampings, 4 links, w't per doz. 16 lbs.....per dozen **CCE** $5.60



Represents highest type fastener, strong, durable, neat in appearance and can be quickly adjusted.

The purchase power is 3 to 1 which makes it possible to pull hames absolutely tight.

ONE DOZEN IN A BOX.

CHAINS.

TRACE.

Twist Link, with Ring and Swivel.

Nos.	15	16	
Size	7-10-2	7-10-1	
Diameter	¼	9/32	in.
W't per pair	7	9¾	lbs.
Per Pair	DF $0 84	JEF 1.02	

Mexican Twist Hook.

No. 25—Size 6½-6-3, diameter 7/32 in., w't per pr. 4½ lbs. ..... per pair CF $0.66

The figures used above designate in a condensed manner the size and length; thus 6½-10-2 is understood to mean 6½ ft. long, 10 links to the foot, No. 2 the wire gauge. Our chains are Western Standard and contain one less link per foot than indicated; thus an 8 link chain has but 7 links per foot. The links on the end are always a trifle longer than in the center.

EL WELTRA.

Electric Welded, Straight Link with Ring, ¼ Inch High Grade Drawn Wire.

No. 103—6½ ft., 8 short links per foot, 8 end links, 2½ in. long, w't per pr. 6 lbs. ..... per pair CE $0 64
No. 104—6½ ft., 10 short links per foot, 8 end-links 2½ in. long, w't per pr. 6½ lbs., per pair DJ .72
No. 105—7 ft., 10 short links per foot, 8 end-links 2½ in. long, w't per pr. 7 lbs. ..... per pair DD .80
No. 106—7½ ft., 10 short links per foot, 8 end links, 2½ in. long, w't per pr. 7 lbs. ..... per pair EA .92

Electric Welded, Straight Link with Ring, 7/32 in., High Grade Drawn Wire.

No. 107—7 ft., 10 short links per foot, 8 end-links, 2½ in. long, w't per pr. 10 lbs., per pair JEF 1 02
No. 108—7½ ft., 10 short links per foot, 8 end links, 2½ in. long, w't per pr. 10½ lbs., per pair JFF 1 20

These chains are made from ¼ in. exact size high grade drawn steel wire. The short links are 1¾ in. long inside. There are eight end links 2½ in. long. Every chain is tested to 1000 lbs. or 2000 lbs. to the pair.

The chains are guaranteed against defects in material or welds. Defective chains will be replaced or money refunded.

These traces are stronger than No. 1—5/16 or No. 0—¾ hand welded traces, so that a dealer can cut down his stock and carry but one size, as that will fill all requirements.

HALF TRACE OR BUTT.

Western Standard, Bright, Straight Link with Ring and Malleable Swivel.

No. 44—30 in., 10 links per foot, No. 2 wire gauge, diameter ¼ in., w't per doz. prs. 34 lbs., per dozen pairs. ..... BGE $5.00
No. 46—30 in., 10 links per foot, No. 1 wire gauge, diameter 9/32 in., w't per doz. prs. 40 lbs., per dozen pairs. ..... CAE 5.70

Western Standard, Bright, Straight Link with Hook and Malleable Swivel.

No. 144—30 in., 10 links per foot, No. 2 wire gauge, diameter ¼ in., w't per doz. prs. 34 lbs., per dozen pairs. ..... CJE 5.50
No. 146—30 in., 10 links per foot, No. 1 wire gauge, diameter 9/32 in., w't per doz. prs. 40 lbs., per dozen pairs. ..... CDJ 6.20

The number of links to the foot and size of wire gauge correspond with the same number of full length trace chains given above.

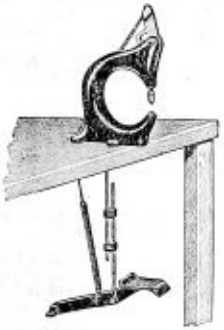
SPOT MACHINES.



Japanned, Sight Feed.

No. 200—Foot power, complete with dies to set round spots either flat or oval, from ⅜ to 1 in. inclusive by 8ths, each .....AJHJ $18.00

The spot holder is hinged, which permits the operator to feed the spots into the holder at the most convenient angle and is brought back into the central position by a positive stop. The spot holders are changed from one size to another by simply pressing a lever at the rear of the holder. The adjustable gauge is so constructed as to allow spots to be set close to the edge of the strap and has a range of adjustment of 5 in. and is easily and quickly adjusted to different widths.

ONE IN A BOX; SHIPPING W'T 35 LBS.

RIVETING MACHINES.

Japanned, Sight Feed.

No. 151—Foot power, for No. 1—factory number—tubular or bifurcated rivets, with one loop anvil and necessary parts for operating, each AJBJ $17.00

Chucks, for No. 3—factory number—rivets .....each AIJ $3.20

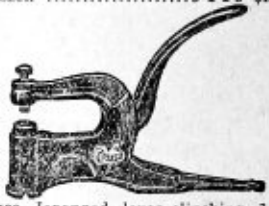
Anvils, for No. 3—factory number—rivets .....each EJ $0.80

To any one who has occasion to use tubular or bifurcated rivets, the advantage of seeing exactly where the rivets are to be set, is obvious. The chuck occupies very little room and is so constructed as to grasp the rivet very firmly by the head only, thus exposing the entire length of the rivet to the operator's sight until after the work is practically completed.

ONE IN A BOX; SHIPPING W'T 35 LBS.

RIVETING MACHINES.

No. 4 REVONOC—Malleable iron, japanned, polished steel working parts, height 6½ in., lever clinching, brass screw rivet box in stock, 1¾ in. throat, w't per doz. 36 lbs., per dozen .....$15.00 JIJJ



REVONOC

No. 1 REVONOC—Heavy iron frame, japanned, polished steel plunger and anvil, malleable iron lever, height 6¼ in., 1¾ in. throat, w't per doz. 45 lbs., per doz. $12.00 JGBJ

These machines will set both tubular and split (bifurcated) rivets perfectly, and automatically adjusts to the various lengths of rivets. Guaranteed against defects.

No. 20—Malleable iron, japanned, polished steel working parts, height 6½ in., lever clinching, with anvil top and horn, brass screw rivet box in stock and steel saddlers' punch, 2½ in. throat, w't per doz. 45 lbs., per dozen .....JIIJ $16.50

Cruso—Japanned, lever clinching, 3 in. throat, w't per doz. 42 lbs., per dozen .....CCE $5.60

Monarch.

HARNESS MAKERS' TOOLS.

AUTOMATIC STITCHING AWLS.

A Perfect Device for Sewing Any Heavy Material.

Automatic Stitcher—Highly polished rock maple handle, nickel plated cap and ferrule, complete with 3 needles and reel waxed thread, w't per doz. 3½ lbs., per doz. **EAH** $9.00
Extra Needles, per dozen **JEJ** 1.20
Extra Skeins, 25 yds., waxed thread, per dozen .....**JHF** $1.50

The Automatic is the latest invention and most effective of anything in the form of an automatic sewing awl ever offered for the money. Its simplicity makes it a thoroughly practical tool for any and all kinds of repair work, even in the hands of the most unskilled. With this awl you can mend harness, shoes, tents, awnings and pulley belts, carpets, saddles, suit cases, or any heavy material.

It is provided with a set of diamond pointed grooved needles including our special needle for tapping shoes, which is our own invention. It also contains a large bobbin from which the thread feeds, all of which are enclosed inside the handle out of the way. This awl has a tension which enables you to tighten your stitch, and it can be used with or without the bobbin which saves refilling the bobbin when you have a lot of work to do. No wrench or screw driver is required to remove the bobbin or tighten the needle in chuck, as it is necessary with other makes. The awl is convenient to carry—always ready to mend a rip or tear—it is a tool that no practical man can afford to be without.

ONE DOZEN IN COUNTER DISPLAY BOX.
Extra Bobbins five cord linen thread, per dozen .....**DJ** $0.72
THREE DOZEN IN A BOX.

This is a practical hand sewing machine and makes a perfect lock stitch. A groove runs the full length of the needle which has a twist point such as is used in all devices and machines for sewing leather. Thread is carried from the bobbin inside of the handle. A very handy tool and indispensable to the farmer and horse owner and will prove a money saver in every household. Full instructions with each awl.

LOCK STITCH SEWING AWLS.

Makes Lock Stitch Like Sewing Machine.

No. 10H—Myers, mahogany stained wood handle, nickel plated ferrule, reel and tool holder, complete with assorted needles, reel of waxed thread and combination wrench and screw driver, w't per doz. 3 lbs., per dozen .....**JEJE** $12.00
Extra Needles, per dozen **JGJ** 1.20
Extra Spools of Waxed Thread, per dozen .....**AAJ** $2.00

This awl is designed for speedy stitching to be used by all classes, the inexperienced as well as the mechanic.

Its simplicity makes it a practical tool for all kinds of repair work. The patent needle furnished with the awl is a diamond point and will go through the thickest leather; it has a groove to contain the thread running full length of the shank, overcoming any danger of cutting off the thread while sewing heavy material. The reel carrying the waxed thread is in a most convenient position under the finger ends so that the tension can be controlled at will by a simple movement of the fingers on the reel and thread can be taken up or let out as desired.

No. 20—Surrey size, japanned with nickel shaft tips, w't per doz. 22 lbs., per single dozen.....DEJ $7.50

For repairing broken shafts, used also on new work to prevent breaking.

How the Shaft Looks when Finished.

This device consists of two thick steel tubes, the inner tube having a hickory filler and being pressed into the outer tube in such a way that the shafts will break in any other place than where repaired. It strengthens and being neatly japanned, gives a leather finish to new and old work and is the quickest and best way of repairing a broken shaft.

TWO DOZEN IN A CASE.

STEEL POLE ENDS.

For Repairing Broken Poles.

No. 30—24 in. long, 1¾ in. diam. at opening, w't per doz. 28 lbs., per dozen .....JGBJ $12.00

No. 40—24 in. long, 1⅞ in. diam. at opening, w't per doz. 30 lbs., per dozen .....JHAJ $13.50

The socket is made of heavy sheet metal, with an extra tube lining inside, a hardwood filler and a heavy malleable pole tip japanned two coats; constructed so that if carefully fitted to the carriage or wagon pole, there will be no possibility of same coming loose or breaking, in fact this device will repair the broken pole or lengthen it out and make an equally strong job as our shaft end.

TWO DOZEN IN A CASE.

WHIFFLETREE HOOKS.

No. A70—⅛ in., malleable iron, screw shank, 3 in. long, w't per doz. prs. 1½ lbs.....per dozen pairs CD $0.56

ONE-HALF DOZEN IN A BOX.

AVERAGE WEIGHT TEN POUNDS.

No. 150H—"Star Security," heavy harness leather stitched on lock stitch machine, will fit any size yoke up to 2 in., complete with metal plates and rivets, w't per doz. 8 lbs., per dozen .....EGE $9.00

For buggies and other light vehicles.

ONE-HALF DOZEN IN A BOX.

No. 55H—"Sensible," heavy harness leather, will adjust to any size yoke up to 2 in. in diam., w't per doz. 12 lbs. .....per dozen JGHJ $13.00

Slip loop pattern made with wrought iron metal fastening. To adjust, slip center on the yoke at the proper place and the job is done. Desirable for carriage and spring wagon use.

ONE-HALF DOZEN IN A BOX.

No. 50H—Excelsior, extra heavy harness leather, stitched on lock stitch machine, will fit any size yoke up to 2 in., complete with metal plates and screws, w't per doz. 11 lbs., per dozen .....JGEJ $12.00

For carriages and spring wagon use.

No. 200H—"Iron Clad," good heavy harness leather, stitched on lock stitch machine, japanned malleable iron slip loop and pole hole plate, will fit any size yoke up to 2 in., w't per doz. 15 lbs. .....per dozen JHCJ $11.90

Note horse shoe shape wear plate. This increases the wearing period and also distributes the strain uniformly over the entire lower drop of center. Will not rattle as leather only comes in contact with sides of the bolt tip. For carriages and spring wagon use.

IMPROVED MONTANA, Heavy Harness Leather, Adjustable, Soft Steel Bolts, So Made that They May Be Removed without Disturbing Stitching.

No. 70H—Medium size for buggies and light rigs, will adjust up to 2 in. yoke, w't per doz. 14½ lbs., per dozen .....JHHJ $16.00
